UTAH'S HEALTH.

Utah has occasion to be proud of her industrial achievements in many lines. Her educational leadership is an achievement of incomparable value. But greater than all of these is her latest achievement in the preservation of the health of her people. Eastern journals have in some instances been free to admit that Utah has done that which seemed to be impossible, namely run a high birth rate and large families and a low death rate in both infant and adult life. It has been almost the universal verdict that these two are impossible of achievement together.

While the state has many resources, man is the greatest of all. Man's conservation from birth to demise is the highest duty of society.

In this and in previous issues of the Republican there has appeared a notice addressed to the Stake and Ward authorities by the First Presidency of the Church advising them to observe Sunday next, the 20th inst., as a day upon which special attention shall be paid to the Christmas Seal Sale which is now being conducted by the Utah Public Health Association. The campaign for selling Christmas Seals will run through a period of one month, commencing Thanksgiving Day. It is urged by the First Presidency that the officers and members of the Church be liberal in their patronage of this most worthy cause.

It is customary to use Christmas Seals in wrapping packages and presents during the holiday season. The Seals furnished by the Public Health Association are very prettily printed in Christmas colors and are quite as attractive as those which sell at a higher price in the stores. The proceeds derived from the sale of these Seals will be spent in fighting the dread disease, tuberculosis. Very little of the proceeds from the campaign go outside of the state, as over 95 per cent of the money so obtained is spent in a strenuous battle to banish that disease from among us. The Utah Public Health Association, through the aid of the government and other affiliated institutions, is spending large sums of money within the state in fighting disease of every form. A traveling clinic, well equipped with skilled surgeons and competent nurses, is now traveling to the remotest parts of the state where medical and surgical aid is not easily obtainable. Two dental clinics are included in this organization. For a nominal fee the children's teeth are looked after in many villages and settlements where no regular dentists are located. Children are also examined by these physicians who discover defects. Under nourishment is more or less prevalent, but can be successfully combated by proper treatment.

The Republican appeals to its readers to aid this great movement which means so much to the health and happiness and prosperity of the commonwealth. A little thoughtfulness upon the part of the average citizen will direct the expenditure of small sums of money which will be big in results. The preservation of life and the promotion of health are all

important. The Christmas Seal Sale and the cause of the Utah Public Health Association are most earnestly commended to the good people of the State.

Following close on the heels of "Get-Rich-Quick Wallingford," another Cosmopolitan Production, "Just Around the Corner," is scheduled for release by Paramount Dec. 11, sharing the date with the special production, "Don't Tell Everything." Wallace Reid, Gloria Swanson and Elliott Dexter have the leading roles in "Don't Tell Everything!" which is a Paramount multiple-star special. "Just Around the Corner" is an adaptation of "The Superman," a story by Fannie Hurst, author of "Homoresque." The leading feminine role is played by Sigrid Holmquist.

A Timely Suggestion
 This is the season of the year when her prudent and careful housewife replenishes her supply of Chamberlain's Cough Remedy. It is almost certain to be needed before the winter is over and results are much more prompt and satisfactory when it is at hand and given as soon as the first indication of a cold appears and before it has become settled in giving it to children at it contains no opium or other harmful drug.

Chamberlain's Tablets Have Done Her a World of Good.
 "Chamberlain's Tablets have done me a world of good," writes Mrs. Ella L. Button, Kirksville, N. Y. "I have recommended them to a number of my friends and all who have used them praise them highly." When troubled with indigestion or constipation, give them a trial and realize for yourself what an excellent medicine it is.

She Meant Well.
 To say the fitting thing in acknowledgment of a favor is something of a tax on the conversational powers of most people; when the recipient is unfamiliar with the conventional phrases used or gets confused in using them, comical situations occur, as in this instance reported in Harper's Magazine. Two sisters of a deceased cox called to acknowledge the flowers sent by the family. "We came to thank you for those beautiful flowers that you sent for sister," said the elder woman; and then, with a little stutter, she added, "and we hope soon to be able to return the favor."—From the Outlook.

Catarrh
 Catarrh is a local disease, greatly influenced by constitutional conditions. HALL'S CATARRH MEDICINE is a Tonic and Blood Purifier. By cleansing the blood and building up the System, HALL'S CATARRH MEDICINE restores normal conditions and allows Nature to do its work.

Roman Use of Concrete.
 The Romans' discoveries in concrete mixing made it possible for them to make prodigious strides in engineering and architecture. At the foot of Vesuvius were immense deposits of reddish sand or volcanic ash called pozzuolana, which, when added to lime mortar, made hydraulic cement. This gave to the Romans a concrete of extraordinary strength and permanence, which hardened under water as well as in the air, and became the basis of their entire system of building.

Healthy Calling
 Of eight English clergymen whose deaths were recorded in one week a short time ago, the ages aggregated 590 years, the oldest being ninety-two and the youngest fifty-seven, writes a correspondent. This high average of just under seventy-four years is either an uncommon record or attests the longevity of the "cloth."

Hunter's Unpleasant Companion.
 Alligator hunting in the tropics is always exciting, but when you're marooned on a muddy flat, with a wounded alligator for company, and your gun is jammed with mud—that is a real thrill. This is what happened to me, while the rest of my party were a quarter of a mile away. Nothing was left to go except throw mud in the alligator's eyes until I attracted the attention of my friends. After they had sunk about twenty bullets into that alligator we measured him and found him to be 22 feet long—Chicago Journal.

This "Earth" Largely Water.
 A trifle more than seven-tenths of the surface of the globe is covered by the waters of the oceans. The total area covered by the latter exceeds the total area of the lands of the world by 88,000,000 square miles. Reckoned in terms of quantity, the oceans contain 324 cubic miles of fluid, or 14 times the bulk of all the lands in the world above sea level.
