

# Local Happenings

Work is progressing favorably on Mrs. Buckwalter's new cottage on First East street. Cement blocks are being used and the walls are now up.

Mr. and Mrs. R. R. Reid are here on a short visit to Mr. and Mrs. J. A. Kopp. Mr. Reid has a lot in Cedar City and intends building a home here next spring.

Mr. Lesly Hunter returned from Nevada, where he has been working, and spent the latter part of last week and a portion of this visiting relatives and friends.

Mrs. David Crosley, who was so seriously ill a short time since, and who underwent a very serious operation at the local hospital, is now able to be up and around again.

The upper floor of the Bladen building, over Don's Garage, has all been partitioned off for tenement purposes, and is to be equipped with water for culinary purposes, plumbing, etc.

Mr. Reese J. Williams, Sr., of Kanarra, was a Cedar visitor yesterday and again today. His son June Williams has just undergone an operation at the local hospital for appendicitis.

Don Coppin, proprietor of Don's Garage, which has the agency for Studebaker cars, is in Salt Lake City for the purpose of obtaining more Studebaker cars. He is expected back this week, but has not returned at this writing.

A number of the local business establishments, including the Urie Meat Market, Woods Toggery, et al, have had new awnings erected recently. Messrs. Colvin and Smith appear to be doing most of this class of work.

Jos. T. Wilkinson, whose health has been so poor all winter, and who was just about sufficiently recovered from his operations to enable him to get about again, has been suffering again lately, either from rheumatism or the effects of poisons absorbed, and is still unable to leave his room.

Pres. U. T. Jones is one of the most recent converts to the Buick car, having recently "blowed" himself to one of the Big Six touring cars. Cashier S. J. Foster of the Bank of Southern Utah has made a similar purchase. They are fine looking machines, and have the tried and proven merits of the Buick behind them. The cars were purchased through the local agency, Kopp's Garage.

Charley Bechtol spent the week end in Cedar City. Mr. Bechtol has a very promising copper property north of St. George not far from Gold Strike, Washington county, in which he is interesting a number of Washington and Iron county people, and which he expects to develop in a practical way in the very near future. Arrangements for this work was one of the objects of his recent visit here.

The use of cement blocks in buildings in lieu of brick seems to be gaining favor here. A number of buildings have been contracted for. In California this type of construction is very popular, and it seems rather curious that cement has not been used more here. When a cement plant is established in this county it will do much to popularize the use of cement in all lines of building activity.

## OLD LAND MARK IN DENTAL PROFESSION VISITS CEDAR

Dr. E. Smith, the exquisite, inflexible, incomparable, transcendent, translucent and transmigrant dentist, who has filled more "unseen cavities," supplied "boiler plates" bridged more chasms and extended the Midas touch to the "ossified" instruments of mastication for more people in southern Utah than any tooth mechanic extant, and who has extracted more molars, shrieks and groans from his large clientele of patients than would fill a bone-yard, is filling an indefinite appointment in Cedar City, with offices in the front of the Mercantile block. The doctor has patients in every town of this locality who reserve their tooth problems for him to solve. Yes, he still has a vest pocket full of million dollar mining properties, ranging in importance from "diamonds" from Diamond Valley and dusky diamonds from the Parowan gap, (very rare), down to ordinary oil gushers, gold, platinum and uranium ores and stocks in endless variety; and at last (?) is "just on the verge" of realizing an immense fortune, on which he has our hearty congratulations. Here's looking at you, Doc, through a spy glass filled with nektu. You're a real live sport, at that.

## ENOCH M. I. A. TO ENTERTAIN AT TABERNACLE SUNDAY

The following program will be given Sunday evening in the tabernacle under the auspices of the Enoch Ward M. I. A.  
1—Musical number, Double Mixed Quartette.  
2—Prayer.  
3—"June," Quintette.  
4—Reading, Marva Jones.  
5—Song, "Loves Old Sweet Song," Junior Chorus.  
6—Reading, Della Rogerson.  
7—Violin Solo, "Schubert's Serenade," Rulon Jones.  
8—Short Talk, Hyrum Jones.  
9—Chorus.

## CEDAR HOME ECONOMICS MEET

The Cedar City Home Economics association met in the Alumni room of the E. A. C. May 23, at 2:30 p. m., Pres. Homer presiding.  
Miss Golda Faux lectured on Boys' and Girls' Club Work.  
It being the date for the reorganization of the club, the following named officers were elected:  
President—Ella Leigh.  
Sec'y & Treas.—Mrs. Ryan.  
Corresponding Secretary—Sarah A. Wood.  
Executive Board.—Mrs. Anna Froyd, Mrs. Dewie Thorley, Mrs. Abbie Corry, Mrs. Lillian Macfarlane, Mrs. John U. Webster, Mrs. A. P. Spilsbury.  
Meeting adjourned.

## NEXT WEEK'S PROGRAM AT THORLEY THEATRE

Monday—"Her Inspiration," featuring May Allison, also a one reel comedy.  
Tuesday—"Her Body In Bond," starring May Murray, a program that will appeal to you all.  
Wednesday—June Elvidge in "The Bluffer," and Episode No. 2 of the "Perils of Thunder Mountain."  
Thursday—Carlyle Blackwell and Evelyn Greely in "The Road to France."  
Friday—"The Heart of Gold," featuring Louise Huff and also a comedy.  
Saturday—A five reel feature and a comedy.  
Special, Violin and piano music by Mr. H. Peyton Johnson and Miss Bernella Gardner every Monday and Friday night.

## Card of Thanks.

I wish to thank the people for their help and kindness during my sorrow.  
Sincerely,  
EARL URIE.

## LA VERKIN SANITARIUM WILL BE COMPLETED

Kaibab Copper Company Installing Fine Plant and Preparing for Big Operations at Mine.

(Hurricane correspondence to the Washington County News.)

Hurricane, Utah, June 17.—A section of the Hurricane public square is piled full of freight and supplies for the Kaibab Copper Company for their mill at Ryan, Arizona. The new company have been at work a year building roads, piping water and remodeling the old mill and adjoining buildings, and expect to install their machinery and begin operations at once.  
The construction of a big sanitarium on the Virgin river will now be resumed. This is one of the projects interrupted by the war. A. B. Christensen, the biggest stockholder in the company, is now on the ground perfecting plans and necessary negotiations for an early resumption of the work. The hot springs owned by the company are unrivalled for tonic and remedial properties and the completed sanitarium will make of this locality a winter resort for health seekers from all the states in the union.  
Eighty-five crates of Greensboro peaches have been shipped to the Hancock Fruit company in Salt Lake City from the orchard of N. J. Workman. Next week shipment of the early peach crop will begin in earnest. A shortage of crates is worrying the shippers as it may seriously hamper shipping.

## ONE HALF OF THEM ARE FORDS

No stronger evidence of the important fact that the Ford Motor car has become a veritable part of the life of the people could be asked for than is given in the restriction records of the various states which comprise our country.  
For instance, in the month of January there were 11,450 cars of all makes registered in the State of Montana, of which 5,790 were Ford cars. This means one Ford car for every other car of every make and 130 over. This proportion is very evenly maintained in the other forty-seven states. There are now more than 6,000,000 motor cars in operation in the U. S., more than one-half of which are Fords.—Adv.

Mr. and Mrs. F. M. Hamblin of Kanab were in Hurricane this week visiting their daughter, Mrs. W. T. Dobson, with them were Mrs. George Hunter and Mrs. Miles Hunter of Cedar City.  
Two more June weddings were celebrated in Hurricane this week. Alonzo Dalton and Mrs. Rebecca McConnell and Orin Wood to Miss Anna Jennings of Rockville.  
W. D. Rishel, Tribune pathfinder, visited Zion canyon Tuesday and went on to St. George Wednesday.

# WATER WORKS MAN GIVES OUT FACTS

## After Searching for Years He At Last Finds Medicine That Ends Troubles

"I have been trying for years to get something that would relieve me of my troubles and have found it at last in Tanlac," said Alfred Jolly, of 3291 Quintam St., Denver, Colo, and an employee of the water works department of that city.  
"For a long time," he continued, "my stomach was in such an awful condition that I could hardly eat a thing without being in misery afterwards. Even the lightest foods would bloat me up with gas and I was constantly belching up sour, undigested food that at times would almost choke me, and often I would get so dizzy and light headed that I would almost fall down, and I would get so nervous that it was almost impossible for me to rest at night. I suffered agony from rheumatism and was in such a wretched condition that I was hardly fit for a thing.  
"After trying nearly everything I could hear of I took Tanlac, and it sure hit the spot and has made a different man out of me. My appetite is splendid, my nerves steady, I sleep like a log at night, have gained eight pounds and am in better shape than I have been in years."  
Tanlac is sold in Cedar City by the Cedar City Drug Store and in Parowan by the Parowan Drug Company.

## EARLY IRRIGATION OF OATS MOST PROFITABLE

If oats can be watered but once a year it pays to do it early while water is plentiful, according to a publication just issued by the Utah Experiment Station.  
This conclusion is derived from 3 years' experimental work conducted on the Station farm at North Logan by F. S. Harris and D. W. Pittman. Many combinations of water were used including weekly irrigations of various amounts and at the various stages of growth.  
The most profitable system was to apply three irrigations of about five inches each, beginning when the grain was about five or six inches high and stopping about the time it was in bloom. Where only one irrigation was given the best time to apply it was at the five-leaf stage and where two were given the five leaf and the boot stages were best. Twenty acre-inches of water, in addition to the rainfall, spread over four acres of land produced over three times as much oats as where it was all used on one acre.  
These and other results obtained in this experiment are graphically illustrated and discussed in detail in Bulletin 167, "The Irrigation of Oats," recently issued by the Utah Experiment Station.

## TAKE NOTICE

Considerable complaint has come to the city officials about people in the down town districts using water in violation of the Mayor's proclamation, while people in the higher parts of town can't get water to their houses at all. While the city officials don't want to commence prosecutions, if they can be avoided, yet if that is the only thing that will have any effect, that is the method that will be used. Please take notice.  
J. M. FOSTER, City Attorney.

## CHEWED THE WRONG END.

A little boy walked into an East side grocery the other day and proudly gave the man behind the counter a piece of paper, very ragged on one end where he had been chewing it while waiting his turn.

The grocer looked at the paper, then turned it over and looked on the other side. "There is nothing on the paper, my little man," he said. "What did your mother want?"

The boy took the paper, looked at it in a dazed sort of way for a moment, grinned, and said: "I—I chewed the wrong end!"

**Mrs. Muggins Not Desirable.**  
The town councillors of Modville had organized a raffle for the benefit of poor Mrs. Muggins and finally the oldest inhabitant was asked to buy a ticket.

"What for?" asked the ancient one.

"For Mrs. Muggins," replied the agent. "Didn't you hear?"

"Oh, yes, boss, I heered all right," said the fossil; "but what I want to know is—what am I goin' to do wiv Mrs. Muggins if I win 'er?"—London Tit-Bits.

**APPLIED ART.**  
"Working in a delicatessen, are you? I thought you'd never give up art."  
"I haven't given it up. I'm engaged here to paint slices of ham and tongue on the sandwiches."

**More Than All.**  
"Give fools their gold, give knaves their power.  
Let fortune's bubbles rise and fall; Who sows a field or trains a flower Or plants a tree is more than all."

**Both Write.**  
"Who are the two celebrities holding such an animated conversation?"  
"A puglist and a literary person."  
"But what can they have in common?"  
"A great deal. They are discussing the merits of their respective typewriters."—Birmingham Age-Herald.

**Abrupt Effect.**  
"I don't quite get our eloquent friend's views on this subject."  
"Nor I," rejoined Senator Sorghum. "They don't appear to connect up. They remind me of a motion picture film which has had a thousand feet or so chopped out here and there by the censor."

**Knows Grammar.**  
"This stenographer has a supercilious air."  
"She comes by that naturally."  
"How so?"  
"She's a high school graduate and she's working for a self-made man."

**Hush, Hush.**  
"Money makes the world go 'round, you know," observed the chronic quoter.  
"That's probably because so much of it is used to keep the world from going on the square," replied the facetious feller.

**Highbrow Effect.**  
"She raises her eyebrows at so many things—"  
"Yes?"  
"That it might be as well to go to a facial expert and have them permanently elevated."

**A Dinner Party.**  
"Why don't you present Mr. Wombat to the lady at his right? He doesn't appear to know her and may be timid about addressing her."  
"Forget it. That's his wife."

**TRY SOCKS, THEN.**  
"Why don't you give him the mitten?"  
"It isn't cold hands he has, it's cold feet."

**Don't Monkey With Tiger.**  
The tiger is a fearsome beast. He makes the jungle quail! No monkey ever tames him Or tries to pull his tail.

**Misapprehension.**  
"Madam, I find nothing deleterious in your pies."  
"It's there all the same, sir. I'd have you know I don't serlip none on anything in my pies."

**Some Guess.**  
"Bill broke his word to his wife not to drink, and now he is going home a maudlin moving picture of woe."  
"I wonder how many reels it will take to get him there?"

**Case at Home.**  
"I see some scientists are going to India to study suspended animation."  
"These scientists are impractical. Why go to India before having a look at my hired man?"

# GOthic BARN ADDS TO FARM GROUP

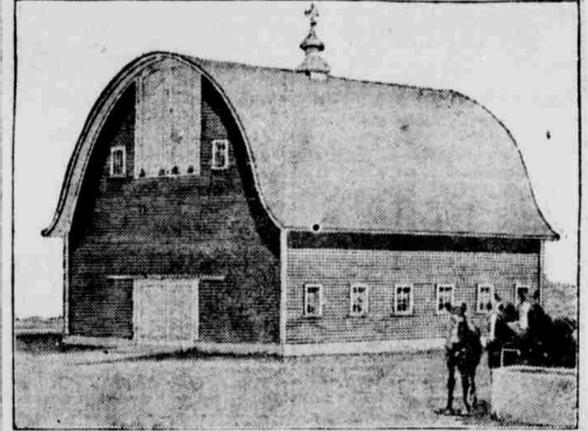

## Provides Attractive as Well as Useful Building.

## SUITED TO AVERAGE FARM

## Interior Arrangement Combines All Features and Allows for Proper Care of Stock.

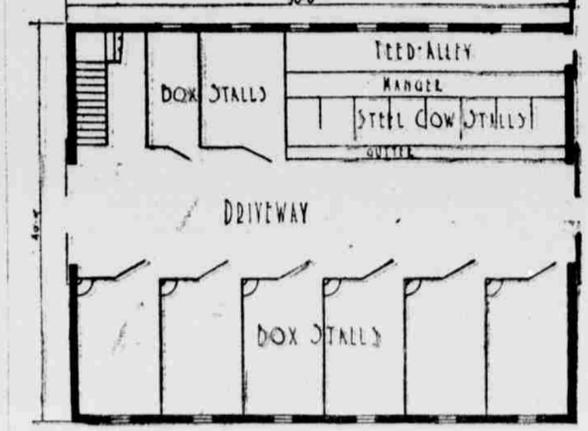

Mr. William A. Radford will answer questions and give advice FREE OF COST on all subjects pertaining to the subject of building work on the farm, for the readers of this paper. On account of his wide experience as Editor, Author and Manufacturer, he is, without doubt, the highest authority on all these subjects. Address all inquiries to William A. Radford, No. 1827 Prairie avenue, Chicago, Ill., and only inclose three-cent stamp for reply.

The barn on a modern farm is something more than a house for the live stock and their feed. By choosing a style of architecture for the barn design that conforms to that of the other buildings or that adds to the general appearance of the farm group, the owner derives a great deal of satisfaction from such a new structure. Beautiful, graceful lines of the building, combined with its utilitarian value, have brought the gothic barn in great favor during the last 20 years. Herewith is illustrated a gothic barn that will be a notable addition to any farm building group. And besides its attractive appearance, this barn is designed so that its interior arrangement

will combine all the features and allow for all the equipment that have been found to be necessary in the proper care of live stock and to do the work required to care for the animals.  
The building is 30 by 40 feet, of wood construction, set on a concrete foundation. The stable floors are also of concrete, which permits of a driveway and gutter, the latter being one of the prime necessities in keeping the live stock housed in a clean building.  
The floor plan given shows one use of the space in the barn. This arrangement, however, may be changed to suit the needs of the owner, whatever they may be. It is equally possible, of course, to increase the length of the barn, the width being ample for all practical purposes, and to make over the interior arrangement to provide for either horses or cattle.  
It also should be understood that in getting the artistic roof lines there is

few years ago; live stock prices have increased in proportion.  
While it is true that the cost of producing grain and of feeding and fattening live stock for the market have also risen, they have not gone up in proportion to the price obtained for the farm products. The fact that labor costs are high makes it all the more essential that the farm crops and farm stock should be housed in buildings where the work can be performed with the least amount of effort. Saving a couple of hours a day in caring for the live stock is a worth-while saving.  
Building a modern barn at this time is not only a patriotic thing to do, but it is good business. Grain and cows are too valuable to be housed in any building that does not keep the fumes from the weather and the raids of rats and other animals, and the latter in a healthy and productive condition.

Arrangement of Gothic Barn.

no waste of materials, the architect having worked out this plan with the idea of economy in materials foremost in mind. The heavy arches necessary to support the roof have been provided with little more material than is used in the ordinary barn.

The floor plan given is for eight cows and a like number of horses, however, it is an easy matter to make this a model dairy barn by facing the stalls in and putting litter alleys and gutters on either side. The driveway through the center of the building is of exceptional value, as it allows the owner to drive into the barn with feed, eliminating the necessity of carrying it in by hand.

By the ventilator shown on the roof of this structure it will be seen that the architect has provided a system of ventilation, without which no modern barn is complete. Fresh air and fresh water—plenty of both—are as

There are more arguments for building now than against it, and a careful consideration of both will convince the progressive business farmer that better farm buildings mean better crops, and better live stock.

There is an added advantage in building such a barn as the one shown here. There is the satisfaction that comes to every farm owner in having his buildings of such a type that they will command the admiration of his neighbors.

## Charity Begins at Home.

Katherine had gone with her mother to take some rolls and soup to one of mother's friends who was moving into the neighborhood. The friend was voicing her gratitude for the gifts when Katherine said: "Mother," she asked anxiously, "are you sure you left some of these rolls and soup at home for ourselves?"
