2468 Hudson Ave.
Bicycles, Supplies, Repairing

Ride a Bicycle

When Hayes Was President
of the United States --- more than forty years ago---the COLUMBIA, the first American-built bicycle, was introduced. Its success was instantaneous. During the years that intervened the COLUMBIA unfalteringly has taken the initiative in developing the art of bicycle building to its present recognized supremacy. The COLUMBIA has won for itself and retains the eviable reputation of the "Standard of the World."

We Stand Back of Every Bicycle We Sell

Geo. A. Lowe Co.
The BIG Hardware Store

Give Your Youngster His "Realest" Fun
A bicycle encourages him to join the boy scouts and bicycle clubs. It will help him grow stronger and manly, efficient and independent. It is one way to give him every opportunity for a successful business career.

We carry all the standard makes and also conduct a completely equipped bicycle shop

Prominent Men Turn To Wheel For Recreation

Bicycling at 80!
Hale and hearty, clear-eyed, clear-minded, the men of note are all active exponents of the statement that years make no difference to the cyclist.
All of them are busy men with big achievements associated with mere mention of their names. Each day for them means new achievement for despite their years, they have not wholly laid down the yoke of labor and service to mankind.
But all of them take time for exercise.
The bicycle, they find, serves their purposes better than any other recreation. It takes them outdoors where a world of fresh air braces them. It carries them along pleasant by-ways. It provides means for easily modulated exercise, adapted to whatever degree of strength they feel like putting into their riding.

RAMBLER BICYCLES

YOU CAN'T BEAT THEM

Consolidated Wagon & Machine Company

The figure of Dr. Charles W. Eliot, 85 years of age, president-emeritus of Harvard University, bicycling through the streets of Cambridge, has been familiar for years. A ride from his home on Brattle street to Fresh Pond ushers in every day. He generally makes the trip between 6 and 7 o'clock in the morning when the air is clearest and still a-tingle with the crisp coolness of night.
John D. Rockefeller, multi-millionaire oil king, makes novel use of the bicycle. He is a great lover of golf. He makes the round of the links on a bicycle, finishing his game in trim shape without the fatigue that might come from walking. Mr. Rockefeller also rides about the grounds on his estate.
Alvey A. Adee, aged 77, second assistant secretary of state at Washington for the last 33 years, is one of the most ardent devotees of the bicycle in public life. He has not missed a daily ride during suitable weather for years. He has also enjoyed several bicycle tours through France. He declares it the only way to see the intimate side of a foreign land.
Thomas Edison, electrical wizard, frequently employs the bicycle in getting about his various plants. It saves time, which is one of his most valuable possessions, and it provides exercise while he is busy at his momentous work.
Luther Burbank, the naturalist whose name is known the world over, can be seen most any day riding a bicycle in the magic orchards of his California estates.
Richard C. Morse, secretary of the Inter-National Y. M. C. A. committee, is another of the men of large responsibilities who finds recreation through regular bicycle riding.

The Best Bicycle in the World

THE INVINCIBLE IVER JOHNSON
"Has no equal--not even a rival."

Besides the celebrated Iver Johnson, we have a nifty line of World and Princeton Bicycles. Call and see our bicycle display.

Right now we have a handsome line to select from and can satisfy any bicycle fancy you may have.

Proudfit Sporting Goods Company
Corner Twenty-fourth Street and Hudson Avenue

REMEMBER, there are 12 points of every bicycle that must be considered when making a selection. They are: 1---Front and rear mudguards, splash protector and stand. 2---Rear fork construction. 3---Seat post construction. 4---Saddle construction and saddle springs. 5---Tools, equipment and finish. 6---Kind and construction of cones and bearings. 7---Frame construction, style and reinforcements. 8---Style and construction of front forks. 9---Front and rear hub construction. 10---Tires. 11---Style and construction of cranks and sprockets. 12---Style and construction of crank hanger brackets.

—The foregoing points should be considered by you when selecting your bicycle, because the life of a bicycle is dependent upon just these points. The DAYTON is recognized as being superior to any other bicycle in each and every one of these points. When you have become acquainted with the DAYTON you will realize its superiority of construction and design. DAYTON bicycles are designed and built with painstaking care. They embody every known and tested feature of design and construction that can make for beauty, simplicity, durability and comfort. All DAYTONS are guaranteed five (5) years. No other bicycle carries such a liberal guarantee. Come in and let us explain all about the DAYTON. Our terms are very liberal. We will accept \$50 liberty bonds as part payment on a DAYTON.
