RUMORS REGARDING PEKING OVERTHROW HELD GROUNDLESS

WASHINGTON, Oct. 14.—Rumors in Shanghai that the Peking government had been overthrown were held by officials here to be groundless. A message received today by the state department from the American legation at Peking dated October 12, referred only to routine matters and contained no suggestion of any abnormal situation in that region. This was accepted by officials as disposing of current rumors in Shanghai to the effect that the Peking government had been overthrown.

The action was based on a statement which the plaintiff asserted was made by Governor Campbell in a recent speech in his campaign for re-election to the effect that a flag-staff man had paid the son of the state land commissioner \$1000 before he could secure the state land lease he wanted. WOULD CANCEL EUROPE'S DEBTS

Brya Urges Nation to 'Buy' Peace of World by This Method

WASHINGTON, Oct. 14.—World peace, "universal and perpetual," can be purchased with the ten billions of dollars the allied governments owe the United States, W. J. Bryan declared in an address here last night before the World Brotherhood congress. He suggested that cancellation of the war debt would go far towards the building up of a spirit that would remove the chief causes of conflict between the nations.

PREPAREDNESS OPPOSED

For action can use this debt to buy world peace, universal and perpetual it can afford to cancel this debt on condition that the terms of the treaty are no modified as to bring the nations of Europe together in friendship and cooperation. Then universal disarmament will be possible; then the burden of militarism can be lifted from the backs of the toilers of the world; then we may expect the ushering in of that "glorious day" when swords shall be beaten into plow shares and nations learn war no more.

The Three Arts club is used as a home by women students of music, art and the drama.

Mr. Brane said all incoming ships would be boarded and searched either at Cape Henry or the Old Point quarantine station. "There is no reason why bootleggers should be permitted to break the law and make thousands of dollars by selling it seemingly to 'bottleggers,'" said Mr. Brane. "Unless they stop it, the government will have very little to show for the money it has paid for the merchant ships that he now owns."

CUBA'S FINANCIAL FLURRY NOT HELD AS SERIOUS

WASHINGTON, Oct. 14.—Financial conditions in Cuba are not considered serious by officials of the department of commerce who declared today that the government's action is a declaration of a moratorium was necessary to protect responsible traders during the present slump in business. Over speculation, the drop in sugar prices and the general excitement incident to the coming election are ascribed by officials here as the causes of the financial flurry. "Terms of the moratorium as reported to the department provide that drafts, notes and bills of exchange and other documents of credit which become due before December 1 will not be collected before that date. Payment of transferable mortgage credits or deeds of trust also is postponed to December 1." During the 12 years ending 1905, Japan had 29,580 earthquakes.

The Common Fault With Most Cooks is to Use Too Much Shortening

ONE of the most embarrassing things for a housewife is to have her cake turn out "heavy"—or her pie crust "soggy." Not only unsatisfactory to the palate but the cause of many people saying: "Pies give me indigestion"—or "I can't eat pastry."

Yet this is a condition easily avoided.

Don't use too much shortening.

You use 1/3 to 1/4 less Mazola than you need of either butter or lard—with better results.

If it's pie, Mazola will make the finest, most delicate and easily digested crust you ever tasted.

Or if it's cake—both lightness and richness will result from using Mazola.

And being an oil it is always ready for instant use—no tiresome "creaming-in."

This is because Mazola is an absolutely pure vegetable fat from an edible source. It is 100% fat—contains no moisture as is contained in butter and lard.

Once you try Mazola you will prefer it to lard and other shortenings.

COMMUNICATION

Editor Standard-Examiner:
An article in a recent issue of your paper, stated that Mr. John Felt, city milk inspector, was the first man in this county to raise the sunflower for feed, etc. Your informant is rather ignorant of conditions in our valley. During 1919 Mr. David R. Stromberg grew an acre and a half of the Russian sunflowers for seed and built a wooden silo, the first in the valley, and during the winter of 1919 and 1920, fed the ensilage to his cows, so that if no one fed sunflower ensilage prior to 1919, Mr. Stromberg is the first man, or among the first, in Utah to grow Russian sunflowers and feed ensilage made therefrom. Mr. Stromberg grew a field of sunflowers the past season and is making a number of experiments with them, which will be of value to the farmers. He says he is selecting the very best growing plants for seed, and expects in a few years to develop a strain especially adapted for the valley. He also advises farmers not to endeavor to grow more than 20 or 25 tons per acre, for the expense of harvesting is too great. He is very enthusiastic over the sunflowers and thinks they will push the valley to the front as a dairy region. Give credit to whom credit is due.
