Navy Will Tighten Orders Regarding Flights in Future

WASHINGTON, March 31.—Acting Secretary Roosevelt has begun a personal inquiry into the flight of the naval free balloon, missing since March 23, the day it left Pensacola, Fla., with five men aboard. The inquiry is preparatory to ordering the usual board of investigation which probably will not be designated until Secretary Denby returns from Guam on April 5.

Mr. Roosevelt said today that the Pensacola affair, coming on the heels of the balloon flight from Rockaway, N. J., to Moose Factory, Ontario, would undoubtedly result in tightening up orders regarding such flights in the future.

PERU DISTURBED BY POLITICAL CLASHES

BUENOS AIRES, March 31.—Disturbances of a political character have apparently occurred in Peru recently, according to meagre reports from Lima. A dispatch from the Peruvian capital to La Nación reports sanguinary events at various points in the interior, notably in the department of Apurimac, in the southwestern part of the country, where several persons have been killed and wounded, and in the village of Gray, where a colonel was assassinated and three gendarmes were killed. The dispatch says an attack was made on the municipal building in Paucartambo where seven persons were killed and many wounded, and that fatal disorders have occurred at two other points. The meagre reports say that details relative to the cause of the trouble are lacking.

A Lima message to La Prensa of this city says the Peruvian government authorities expropriated on March 28 the newspaper La Prensa of Lima, one of the most important newspapers on the west coast of South America, on the ground that it had taken part in a "dangerous campaign of rebellion against the government."

TELLS DYSPEPTICS WHAT TO EAT

Avoid indigestion, Sour Acid Stomach, Heartburn, Gas on Stomach, etc.

Indigestion and practically all forms of stomach trouble, say medical authorities, are due to an excess of hydrochloric acid in the stomach. This excess of acid is exceedingly dangerous and sufferers should do either one of two things. Either they can go on a limited and often disagreeable diet, avoiding foods that disagree with them, that irritate the stomach and lead to excess acid secretion, or they can eat as they please in moderation and make it a practice to counteract the loss of the harmful acid and prevent the formation of gas, sourness, and flatulence by the use of a little liquid antacid.
