Lack of Ambition Responsible for the Failure of Many Girls in Professional Life—Don't Contrive to be Ornamental at the Expense of Usefulness—Women Practitioners Very Popular in England—Influence of Light on Precious Gems—Pearls Deteriorate Very Easily—Poor Health Often Leads to Various Eye Troubles—Don't Read When Traveling—Sewing Room Hints—Systematic Brushing Excellent for Keeping Scalp and Hair Clean—Bristle Brush Best.

DO WOMEN LACK AMBITION?
Are women ambitious in their professional or business careers? At a recent conference it was contended that the lack of ambition was responsible for the failure of many girls in professional life. Doubtless the inherited tendencies of many successive generations has much to do with this problem for women have for years contrived to be ornamental at the expense of usefulness. It is only of recent years that women were expected to follow any occupation other than home duties, hence the professional woman finds herself handicapped by highly trained domestic instincts and less developed business capacity. It is only of recent years that women were expected to follow any occupation other than home duties, hence the professional woman finds herself handicapped by highly trained domestic instincts and less developed business capacity. Women as a sex find it more natural to be retiring than enterprising, yet worldly careers require enterprise as an essential to success, and therefore the crux responsible for unambitious business girls.

WOMEN PHYSICIANS IN ENGLAND
With the opinion of the Berliners on the subject of women doctors, we certainly cannot agree, declares an English writer. They, having publicly discussed the matter, have arrived at the conclusion that women do not care for their own sex as medical attendants. We have every reason to hold the contrary opinion. In England female practitioners are finding their progress unchecked. We have two hospitals staffed by women for women, and another one is projected in South

London. These hospitals never lack patients, and it is, after all, those who are riddled with ignorant prejudices of all kinds who mostly seek hospital aid. It is odd that this class of woman should invariably regard with distrust all attempts on the part of her sex to be equal, because they, of all people, ought most to realize what capabilities a woman has, and how successfully she uses them when she gets the chance. The patronage, therefore, that poor women extend to hospitals staffed by women is the greatest encouragement medical women can receive.

ARE YOUR GEMS SICK?
The discoloration of precious stones when they have been exposed to the air for a long time, is considered one of the most frequent maladies, says a well known jeweler. "Among the colored stones, emeralds, rubies and sapphires are those which remain intact best. Nevertheless, they are not exempt from changes, as has been proved by many experiments recently made in Paris. "Two rubies of the same size and shade were kept for two years, one in a showcase and the other away from all light. At the end of this term a comparison revealed that the first had become somewhat lighter in color. "The influence of light makes itself felt more plainly on topazes and garnets. The garnet turns much paler in a short time, while the topaz assumes a darker shade, and even loses the brilliancy possessed by it when freshly cut. "The most sensitive stone in this respect is the opal. This stone draws its marvelous rainbow reflections from numerous little clefts which allow the light to pass, and reflect it

in different directions. Often the opal stands the manipulations of cutting and polishing well, and all of a sudden it splits. It suffers always by excess of heat. Owing to its chemical composition, it is sensitive to all the changes of temperature. "Pearls deteriorate very easily. In the fire they are transformed into a piece of lime. Placed in contact with an acid, they behave as lime or marble would under the same conditions."

LOOK AFTER YOUR OPTICS.
It has been truly said that of our five senses that of sight merits the foremost place. To be deprived of it shuts us out from the world to a far greater extent than if we lost our hearing, or our sense of touch, taste or smell. Knowing this, it is astonishing how careless the majority of people are about their eyes and the eyes of their children. People who recognize the importance of taking care of their health of ten quite forget that if we want to preserve them it is just as necessary to take care of our eyes. First of all, take care of your general health. Poor health often leads indirectly to various eye troubles. Then, remember that straining of the eyes is caused by a dazzling glare or a bad light. Glare and gloom are equally bad to work in. You need not ask which is the worse for the eyes—one is as bad as the other. The light should fall on book or work from behind us. The attitude while at work is of great importance. The head should, as far as possible, be kept erect. Stooping causes an increased flow of blood to the head and eyes—this is injurious to them. Don't read when traveling. Deny yourself this pleasure for the sake of your eyes.

SEWING ROOM HINTS.
To sew on patent fasteners or hooks and eyes, first sew the smallest part of the fastener (or eyes, if hooks and eyes are used), on the garment, all the way down, then pin the top and bottom of the garment together and press the back of the fasteners with an iron. This will leave dents on the other side thus showing the correct place for the other half of fasteners. Screw up hooks to the ceiling of your clothes closets. Then fasten strong cord to them, the length to be measured by the space allowed to hang the hats. Then to the end of the cord, fasten a safety pin, to use in pinning to whichever part of hat it is most convenient so it can hang loose and free, to save the hat and trimmings from getting mussed and broken.

KEEPING THE HAIR CLEAN.
A systematic brushing of the hair every night before retiring will do much toward keeping both scalp and hair clean. The brushing stimulates the roots to pour out their oil and make the hair lustrous. A brush should be chosen with bristles which easily penetrate to the scalp, but not too harsh. After removing the pins at night and shaking the hair over the shoulders to ventilate it, separate it at the side of the head, draw a strand toward the face, then apply the brush directly to the scalp in the seam, drawing it off on the hair.

QUIMET, SICK, QUILTS GOLF FOR THE SEASON
Boston, Oct. 2.—Francis Quimet, the youthful winner of the United States open golf championship, has, by the advice of his physician, abandoned golf for the remainder of the season and has canceled a number of engagements that had been tentatively made for him on the Pacific coast the coming winter. Dr. Blanchard of Brookline, who has been attending Quimet, declares the young man is on the verge of a breakdown and that a rest is absolutely necessary. It was noticed that Quimet's play in the Lesley cup matches was irregular and not up to the form he had shown in the championship games. It was after the match that the young man consulted the physician in regard to his nervousness and was advised to take a long rest. Older players who had watched the marvelous performance of Quimet in the championship matches, remarked that he seemed to have no nerves at all.

Lewis' Lye
The Standard for Half a Century for Softening Water

It makes no difference what your present method of softening water or general house cleaning may be—you can always depend upon Lewis' Lye to lessen your future labors and help you accomplish more.

The uniform purity and strength of genuine Lewis' Lye is guaranteed by ourselves and your grocer.

It is the only lye made and marketed by manufacturing chemists and is absolutely the best and most economical for—

Making Soap—Softening Water—Household Cleaning—Disinfecting Purposes—Preventing Hog Cholera and Worms—Destroying Vermine—Spraying Trees, etc.

Valuable book of suggestions on the many uses of Lewis' Lye mailed free on request. Simply address: PENNSYLVANIA SALT MANUFACTURING CO. Manufacturing Chemists PHILADELPHIA

Let Us Size Up Your Home

LET US look the house over and see where and how we can insure you the greatest possible heating comfort at least cost. If we are not certain that we can successfully install Campbell's furnace we will say so, and the advice and estimate will cost you nothing. And if the

Winter Chaser Campbell's Furnace

does not heat the house to 70 degrees we will take out the plant and refund your money. The makers of the Furnace stand back of this offer, with their 30 years of expert engineering experience in installation as well as construction. The Winter-Chaser is of the thickest steel used in any furnace in the country; it lasts a lifetime. Perfect combustion assures greatest heat-production for fuel consumed—supreme in economy. The 15-gallon water reservoir keeps the air moist—a protection to health and furniture. No dry, germ-laden air. No dust, gas or odors. Perfect ventilation.

Come in and get a copy of the free booklet—"Twice-A-Day," describing the Winter-Chaser made by The Campbell Heating Co. of Des Moines, Ia. Sold by—

NEWMAN & STUART

Accounts subject to check are invited.

Capital, \$10,000,000.00.
Surplus and Profits, \$140,000.00.

SAGE TEA DANDY TO DARKEN HAIR
Its Grandmother's Recipe to Bring Back Color and Lustre to Hair.

You can turn gray, faded hair beautifully dark and lustrous almost overnight if you'll get a 5 cent bottle of "Wyeth's Sage and Sulphur Hair Remedy" at any drug store. Millions of bottles of this old famous Sage Tea Recipe are sold annually, says a well-known druggist here, because it darkens the hair so naturally and evenly that no one can tell it has been applied. Those whose hair is turning gray, becoming faded, dry, scraggly and thin have a surprise awaiting them, because after one or two applications the gray hair vanishes and your locks become luxuriantly dark and beautiful—all dandruff goes, scalp itching and falling hair stops. This is the age of youth. Gray-haired unattractive folks aren't wanted around, so get busy with Wyeth's Sage and Sulphur tonight and you'll be delighted with your dark, handsome hair and your youthful appearance within a few days. Agents, A. R. McIntyre.

GRUESOME TRICK ON FELLOW SAILOR
Buffalo, N. Y., Oct. 3.—A policeman on a Niagara street beat was startled early today when a rough box lying on the sidewalk in front of an undertaking establishment slowly turned over. When he drew near to solve the mystery it again turned over. Chief of Police Regan happened to be passing in his automobile and he joined the patrolman. He ordered a man from the undertaking rooms to unscrew the lid. Inside they found a sailor who gave his name as John Deleth of Milwaukee. Deleth said he had been on a lark with a fellow sailor named Kelly. "Says Kelly to me," Deleth told the chief, "the first guy to the dead box can sleep there. I slept all right, but when I woke up I could not get out. Kelly's been up to his tricks again."

RELIEF SOCIETIES HOLD CONFERENCE
Salt Lake, Oct. 3.—Representatives of the Women's Relief societies of the Mormon church had a successful opening of their semi-annual conference in Assembly hall yesterday, holding morning and afternoon sessions under conduct of Mrs. Emmetine B. Wells, general president of the association. Assisting Mrs. Wells in charge of the meetings were her counselors, Mrs. Clarissa S. Williams and Mrs. Juilina L. Smith, and Secretary Amy E. Lyman. Mrs. Wells delivered the address of welcome and the response thereto was made by Mrs. Effie Mer-

FATALITIES IN COAL MINES OF AMERICA
Washington, Oct. 3.—Fatalities in the coal mines of the United States during the first seven months of the year numbered 1,437, as compared with 1,419 in the same period last year, according to reports to the bureau of mines here. Pennsylvania leads the list with 763 deaths, an increase of 193 over last year. Of these 380 were in the anthracite and 383 in the bituminous fields. West Virginia with 181 deaths showed a decrease of 72 over the fatalities in the first seven months of 1912. Then in order follow Ohio 99, Illinois 97, Alabama 55, Colorado 47, Indiana 32, and Tennessee 25.

GENERAL DIAZ TO REMAIN IN FRANCE
New York, Oct. 3.—According to a special dispatch from Havre, General Felix Diaz embarked there on the German liner Corcovado yesterday for Vera Cruz. It is reported that former President Porfirio Diaz has rented a villa at Biarritz for the winter, indicating his intention to remain in France.

UNDERWRITERS CALL ON STOCKHOLDERS
New York, Oct. 2.—The call by the underwriters for 10 per cent of the Utah Securities corporation's \$27,500,000 note issue made September 27 is payable 5 per cent on or before October 17 and 5 per cent by November 17, bringing the total calls to date up to 70 per cent. The payment of this last call will make a total of between \$21,000,000 and \$22,000,000 of the notes outstanding, as a little more than \$2,000,000 have been paid in full. Any future calls this year on the remainder of the notes will depend entirely on the weather. Should the weather remain open there will undoubtedly be one and probably two more calls made this year.

NO IMMEDIATE DANGER.
New Haven, Conn., Oct. 2.—Officials of the Brotherhood of Locomotive Engineers said today that they had not yet received Governor Foss' letter and therefore declined to discuss it. Assistant Grand Chief L. Griffing arrived here late today tomorrow will count the strike ballots that have been taken on the New Haven system in the last few days. It was said, unofficially, that the men would vote to strike by an overwhelming majority. "This does not necessarily mean that the men will strike," said Chairman F. S. Evans. "It means that the men favor striking, if their contentions cannot be gained in any other way."

LACK OF REALISM.
Ere—What ridiculous, impossible things these fashion plates are. Mds. Ere—I know they used to be, but today many of them are ingraved from photographs. Ere—Well, this one can't be. Here are (w.) women going in opposite direction, both have brand new gowns and neither looking back at each other.—Boston Transcript.

"MAD MONARCH" DYING.
Munich, Oct. 2.—King Otto of Bavaria, the "mad monarch," is reported to be dying as a result of having eaten a quantity of leaves and earth. This unique diet brought about a severe attack of the abdominal trouble from which the king has suffered for years, owing to his constant overeating. His craving for food grows greater each day and he frequently chews at his clothing.

FLOOD CONDITION IS IMPROVING
Rivers Falling—Heaviest Loss in Rice Fields of Texas and Louisiana.

Dallas, Tex., Oct. 3.—Flood conditions in Southeast and Southwest Texas and Western Louisiana showed improvement with the cessation of rain in some sections today. Most of the streams which have been out of bounds have ceased rising and in San Antonio the river began to fall as unexpectedly as it rose. From the interior today came reports that streams were falling. It is in the rice fields of Eastern Texas and Western Louisiana, that the heaviest loss will be felt. Near Lake Charles, La., it is estimated that 75,000 acres have been flooded, entailing serious damage. Railroads have been hard hit, many steel bridges having been washed away and thousands of yards of track destroyed. Connection with the East is still interrupted. Improvement was made today in telegraph and telephone communication but normal conditions have not been restored. The lumber industry has sustained heavy damage. Eight persons are known to have been drowned.

SIX GAMES LOST
San Antonio, Tex., Oct. 2.—The San Antonio river, which overflowed its banks today, flooding a portion of San Antonio and Southwest Texas is falling rapidly tonight. Train service is still crippled and wire communication interrupted in several towns. In San Antonio it is estimated the damage to property and merchandise will reach \$200,000. Until communication is restored, an accurate estimate of the damage in the smaller towns and plantations along the stream is not possible. It is believed however, that the damage will reach a million dollars. A woman and three children were drowned near Hot Wells, and two women and two children lost their lives near Georgetown. The latter town is on the San Gabriel river, which reached flood stage this morning.

SCHOOL GARDEN PRIZES AWARDED
After a careful inspection of products raised by students, the committee having the work in charge awarded to the Lorin Farr school the first place in the agricultural product contest. Five Points took second prize and Mound Fort, third. The Weber club is to present the prizes but at the present time it is not known of what the awards will consist. Silver cups to be engraved will probably be awarded. In addition some individual prizes will be awarded.

ROSWELL, N. M., Oct. 2.—A rainfall equalling a cloudburst near Redlands, about 40 miles south of Carlsbad wash out the Delaware Bridge over the Pecos river of the Atchison, Topeka and Santa Fe tracks, which will delay traffic for three days. Passengers are being held at Carlsbad.

ROSWELL, N. M., Oct. 2.—A rainfall equalling a cloudburst near Redlands, about 40 miles south of Carlsbad wash out the Delaware Bridge over the Pecos river of the Atchison, Topeka and Santa Fe tracks, which will delay traffic for three days. Passengers are being held at Carlsbad.

THE GENUINE ROUND OAK HEATING STOVE—the most famous stove in the world. This is the one you have always heard about—the original—the genuine. It is known as the stove that holds the fire, that saves the fuel, that lasts and gives out heat just as desired because it is made and fitted so good and carefully that it is as easily regulated as a lamp. It burns successfully hard and soft coal, coke or wood. With soft coal it makes the finest fire possible, because of its double fire pot, cone center grate and hot blast draft. It burns the gasses and soot and makes the smoke clear. It makes no clinkers! It heats the floor under and around the stove.

There is no other Round Oak—there is not one stove like it; others made to look like it, there are hundreds of imitations. Be sure and look for the name Round Oak; it is on the leg and door. History of this famous stove sent on request.
