MAY NOT BE SUDDEN THAW DURING THE SPRING

Due to the solid condition of the snow in the mountains, some of the older residents of Ogden are of the opinion that there will not be extreme high water this spring. There is more snow than usual in the higher altitudes, they say, but it is formed into a perfect glacier and will not readily move.

DISTRICT FORESTERS DISCUSS TIMBER

Salt Lake, Feb. 24.—District foresters and their assistants of the several forest districts in the west of the United States forest service opened their annual conference at the Hotel Utah yesterday afternoon.

Reports of the forest service show that there are now about 650,000,000 feet of timber cut annually from the national forests, bringing into the government about \$1,000,000.

With the exception of one impolite member of the fraternity, the crooks in the city must have got "wise" to the fact that the local police force had left some valiant substitutes at the station, while they hid forth to trip the "light fantastic" at the New Colonial.

Those present at the meeting are W. B. Greeley, assistant forester in charge of silviculture; S. H. Clapp, assistant to Mr. Greeley, and Austin Gray, forestry department, all of Washington, D. C., and the following officials of the six western forestry districts:

RAILROADS TO FILE A BRIEF

Interstate Commerce Commission to Be Asked to Reopen Matter of Allowances.

RATE CUSTOM OUTLINED

Commission's Report Would Make Unlawful Imposition Upon Steel Industries.

Washington, D. C., Feb. 24.—Assuming that trunk line railroads are arranging immediately to discontinue through rates with the Union Railroad company, the Newburgh and South Shore Railway company, and the Lake Terminal Railroad company, subsidiaries of the United States Steel corporation, attorneys for the corporation today asked the interstate commission to "reopen the matter of allowances to short lines of railroads serving industries."

The brief, filed with the commission contends that in the transportation of iron and steel products and of raw materials, including coke and coal, it has been the general custom from the beginning of the industry for the carriers to spot cars within the industry where they are to be loaded or unloaded and to take each car when loaded and unloaded to the main line, and that freight rates on these commodities have been continuously constructed upon the basis of the cost of such services.

Average Car Revenue. It is further contended that while for 441 miles, the distance from steel industries on the Union railroad, to New York, the average car revenue over eastern trunk lines on all commodities is \$65.63, it is \$12.54 for steel products. Figures are also given to show that the same condition prevails in transportation of all commodities and steel products from many other points in eastern trunk line territory.

The petitioners contend that the commission should not have found that the complainants' railroads are plant facilities and they argue that the commission is not justified in the contention that "services performed for industries adjacent to complainants' tracks give such industries an obvious advantage over a shipper who delivers and accepts his freight on a public team track."

It is argued that the commission should not have found that delivery of a car upon complainants' interchange track is a delivery for the purpose of assessing demurrage, and that the commission should not have found that the admission of the industrial railroads to the modified per diem agreement is an "undue, unreasonable and unlawful preference and advantage to the industry."

The general effect of the report of the commission, it is carried into effect, it is held, would be unlawfully impose upon steel industries the cost of operating terminal facilities and to cause line commissioners to discriminate against industries located along terminal railroads.

It would advance rates on particular commodities, which rates are a part of a long continued adjustment, and the proposed change would disturb the whole rate situation; would disturb the grouping of rates into territories by making different ratings to and from industries in the same groups, and would rearrange the whole fabric of rates in this country.

The commission is asked to make an order directing trunk lines who were parties to the original submission of this matter to the commission from carrying out the proposed discontinuance of true rates pending the re-hearing and to make an order directing the trunk lines to continue existing through rates and allowances.

REVOLUTION SEPARATES MISSIONARY'S FAMILY; REUNITED AFTER THREE YEARS

Dr. George Haddon, his wife and son Patrick, from whom he was separated for three years in China wilds.

A strange tale of the Orient is related by Dr. George Hadden, a medical missionary, who has just returned to this country with his wife and little son, Patrick. Dr. Hadden says that he and his wife were separated on the breaking out of revolutionary troubles while working in the interior of China. A child was born after the separation, but the father could not rejoin his wife and see his boy until the latter was three years old.

The latest fad of the gay Parisian girls is the wearing of their fiancé's name embroidered on their stockings, as shown herewith.
