(BY GWEN SEARS.)

Great Care Should Be Taken of the Mouth and Teeth—Do Not Give Baby a Painted Toy—Everyday Etiquette—Panama Hats General Favorite at Palm Beach—Medallion Handkerchiefs Used—Cotton Dresses to Be Simply Trimmed—Household Hints.

Gwen Sears.

Keep the Teeth Clean.

Each morning the grooming and thorough brushing of the teeth and cleaning of the mouth should be accomplished with vigorous perseverance. The morning cleansing gives a purer and more healthful breath and takes away the accumulations that may have gathered on the teeth during the sleeping hours.

Before using a new tooth brush, it should be allowed to soak for two hours in cold water, as this prevents the usual shedding of the bristles, and the tooth brushes should be kept clean and antiseptic and frequently renewed, and the brushes should always be placed with bristles down after using until the water has been drained from them.

Teach children never to crack nuts or bite thread with their teeth, for he it understood that once the enamel which is a thin shell covering the tooth structure and not the tooth itself, is injured, cracked or worn, trouble is bound to ensue.

It is not enough to brush the teeth and gums each morning, though this is important, one should use an antiseptic mouthwash, and one of the most beneficial washes for daily use is a weakened boracic solution, and this is prepared by dissolving one-half ounce of boracic powder in one pint of warm water.

Great care should be given to the selection of powder or pastes used for cleansing the teeth, as some powders have sufficient roughness in the material to wear the enamel, and the best way is to make a good powder at home. An excellent and safe powder is made by mixing well together one-half ounce each of white castile soap powdered, boracic powder and pulverized sugar and six ounces of prepared chalk, one ounce powdered orris root and one-half drachm powdered wintergreen.

If this powder is used daily and the mouth rinsed out with the boracic solution after brushing the teeth at night, it will tend to prevent chemical changes, which during sleep takes place without hindrance, unless some preventatives are used.

YOUR BOYS AND GIRLS.

As soon as baby can grasp and hold a toy every mother knows that it goes into his mouth. My baby had several bright, fascinating things that she must not put in her mouth. So I tied them on a string that I could slip over the chair posts just far enough away so she could sit in her high-chair and reach them but not get them in her mouth.

An old watch, mirror or bottle, as well as a painted toy, can be enjoyed by a baby in this way. These toys can also be fastened on carriage or

cradle bed. This helps greatly to prevent the habit of sucking thumb or finger.

It is possible to make little washable toys of wool with yarn and the crochet needle. White woolly dogs are very lifelike, and there are funny little tassel dolls made of a single large tassel. The top of the tassel is tied together with a piece of yarn, so that there is a ball-like formation at the top. Two more sections are divided from the sides and tied for arms and the lower parts of these sections are tied with another piece of yarn, so that they resemble hands.

EVERYDAY ETIQUETTE.

"What shall a man do when he receives an announcement card from a girl who has just been married?" asked Jimmie.

"He should call upon the bride within two weeks after receiving notice of the wedding. If she resides in a distant city, he should send her either a brief note of congratulation or send his visiting card on which is written: 'Sincere Good Wishes,' said his father.

HOUSEHOLD HINTS.

New tinware may be kept from rusting by rubbing it all over with lard, then heating it thoroughly. Once the fat has penetrated the tinware it will not rust for an indefinite time.

When putting away summer stockings see that they are clean and whole, for it is a great comfort and they are ready to use when needed. Have a calico bag to hold the stockings of each member of the family.

FASHION HINTS.

Panama hats are said to be a general favorite at Palm Beach. The tailored styles of last year, with their mannish lines, still retain their popularity. The high, round or oval crown, indented on the edge, with the center dropping lower, is seen. Both the rolled and straight edge are worn.

The trimming of a Panama consists of a plain grosgrain or silk bow on the side and ribbon encircling the crown. Some more dressy effects are bows and fascias made of faille, grosgrain and chiffon ribbons with a picot edge. Several dyed Panamas have been seen, one in deep green and another in purple.

There is a waist line to suit every type and figure on this season's models. The empire is very becoming to the slight girl the natural line suits the conservative dresser and the straight style for the stout woman.

Medallion handkerchiefs are on sale in some of the exclusive shops. They come in plain, soft colorings, such as pale gray, blue and buff, and a little medallion is in one corner, with a pretty little decorative rim.

The smartest collars and cuffs for spring wear are made of satin. In some of the exclusive shops the collar portion is wired in the back, and points are seen on all models.

The Japanese influence in fashions is seen in many of the new gowns. Embroidery in blue, black and white is popular, and Oriental effects are used on the skirts and collars of navy blue suits.

The flaring skirts are extensively trimmed with outstanding plaited flounces. This gives fullness without being bulky.

A very notable reversion in street gowns is the use of dark blue serge or gabardine. Girdles of royal purple grosgrain ribbon embroidered in wooden beads are worn with this.

Perhaps the most interesting thing in the fashions this season is the old way in which the new stocks are worn. In the days gone by their use was limited to a severely tailored blouse or a close-neck shirt. Now they are seen with everything.

Cotton dresses will be trimmed with cluny, valenciennes and fillet lace.

Evening wraps in satin are not seen half so frequently as the metallic cloth, velvet and brocaded styles.

White petticoats are undergoing a

RUSSIAN SINGER AIDS WAR SUFFERERS

Mila Eugenia Beloglozova.

Mila Eugenia Beloglozova, the noted Russian singer, took an important part in the opening ceremonies of the bazaar in New York city for the relief of the Russian war sufferers. She was assisted in the entertainment by other noted Russian singers and dancers. The Russian Ambassador and Mme. Bakme-toff, besides numerous other officials, were in Russian circles in Washington and New York, attended the ceremonies. Bishop Alexander of the Russian Cathedral in New York city blessed the bazaar.

revolution from the narrow styles of last season. They are accordion-plaited, knife-plaited, and at least three yards around the bottom.

Girdles of outstanding taffeta are being used on spring evening gowns. These are embroidered with motifs of flowers, birds, butterflies, etc., with iridescent beads or sequins.

URIC ACID SOLVENT

For Rheumatism and Kidney Trouble.

50-Cent Bottle (32 Doses) FREE.

Just because you start the day worried and tired, stiff legs and arms and muscles, an aching head, burning and bearing down pains in the back, when you get up before the day begins, do not think you have to stay in that condition. Dr. A. Williams' Uric Acid Solvent will get you out of this state and send you to bed half a dozen times at night will appreciate the rest, comfort and strength his treatment gives. For any form of bladder trouble or weakness, its action is really wonderful.

Be strong, well and vigorous, with no more pains from stiff joints, sore muscles, rheumatic suffering, aching back, or kidney bladder troubles. Dr. A. Williams' Uric Acid Solvent conquers kidney and bladder diseases, rheumatism and all uric troubles, no matter how chronic or stubborn. If you have never used the Williams' Treatment, we will give you one 50-cent bottle free if you will cut out this notice and send it with your name and address, with five cent postage, to Dr. A. Williams, 100 New York Building, East Hampton, Conn. Send at once and you will receive your parcel post regularly. Some bottles do not, without charge, and without incurring any obligations. One bottle only to a family or address.—Advertisement.

ASQUITH URGES SELF-SACRIFICE

Newcastle, England, April 20.—The British prime minister, Herbert H. Asquith, who so often during his prime ministership has had to gloss over statements of his cabinet colleagues, in an appeal tonight to the workmen of the northeast coast to speed up the output of munitions of war, refrained from all reference to the drink question, and declared that there had been no slackness on the part of either the employees or the employers.

The necessity for greater effort, he said, arose from the fact that an enormous quantity of ammunition was being expended, to the success of recruiting among the workers and the consequent shortness of skilled labor. This was being remedied, and the premier foreshadowed the enlargement of the present plants and the utilization of factories otherwise engaged to do government work, with proper compensation.

The appeal was addressed almost as much to the employers as to the men, although the meeting was entirely for the workers, and the manufacturers were told in plain terms that they must not expect to make undue profits from government contracts.

Given Great Ovation.

The prime minister was accorded a great ovation and his speech was repeatedly cheered. He will visit some of the armament works on the Tyne side tomorrow.

Premier Asquith said he was here to speak, not only to the men of Newcastle and of the Tyne-side, but through them to the men of the northeast coast, for in no other area of the empire, and not even in Flanders or France, were the natural fortunes of great Britain or her success more intimately bound up than with the efforts and energy of the patriotism and self-devotion of those like his hearers.

The men who were producing material were, in as true a sense as the sailors and soldiers, fighters and combatants in this national war. No man

UNIVERSITY TO HAVE FREEDOM

Salt Lake, April 21.—Henceforth there will be academic freedom at the University of Utah. The faculty was given assurance of this yesterday by the faculty relations committee of the board of regents when the faculty and the committee met in joint session at the university.

Without making any reference to the past, the regents, announced, through Waldemar Van Cott, chairman of the committee on faculty relations, that "perfect academic freedom" would be accorded the educators who comprise the faculty of the university.

As this term is construed in educational institutions, the professors are free to teach in connection with their work whatever their good sense tells them. No restrictions were laid down by the board of regents committee yesterday. The professors may treat of all subjects in an academic way—the theory of evolution, ancient philosophy, politics and religion, except that, of course, religion must not be treated in a sectarian way. Rather, fundamentals in religion, as they occur in philosophy, may be treated in an academic way.

Without making any reference to the past, the regents, announced, through Waldemar Van Cott, chairman of the committee on faculty relations, that "perfect academic freedom" would be accorded the educators who comprise the faculty of the university.

Another development of yesterday was the announcement that A. A. Knowlton, whose non-reappointment had been one of the sensations of the University of Utah affair, had been proffered the professorship of physics at Reed college, Portland, Ore., and had accepted. Reed is an endowed college of culture. The president of it, Dr. William T. Foster, was in Salt Lake City Monday and admitted that he was seeking to fill some vacancies in his faculty.

No new appointments to vacancies at the University of Utah were made yesterday. Appointments were not discussed at the faculty meeting, it being the understanding that no further action respecting them be taken until President J. T. Kingsbury and Dr. James L. Gibson, the newly appointed dean of arts and sciences, have returned from the trip east. They will go for the specific purpose of interviewing professors who have applied for positions here.

LIGHTNING STRIKES HOME.

Pocatello, Idaho, April 20.—Mrs. M. F. Reed, wife of President Reed of the State Technical college, narrowly escaped serious injury, if not death, this afternoon when lightning struck the residence on South Seventh street, piercing the roof and setting fire to the furniture in an upstairs room.

Mrs. Reed, who was alone with her baby boy, at the time, heard and felt lightning, but was not harmed. She put out the fire without calling the fire station. President Reed was absent in North Idaho, where he was called by the state board of education.

BAD BREATH

Dr. Edwards' Olive Tablets Get at the Cause and Remove It

Dr. Edwards' Olive Tablets, the substitute for calomel, act gently on the bowels and positively do the work.

People afflicted with bad breath find quick relief through Dr. Edwards' Olive Tablets. The pleasant, sugar-coated tablets are taken for bad breath by all who know them.

Dr. Edwards' Olive Tablets act gently but firmly on the bowels and liver, stimulating them to natural action, clearing the blood and gently purifying the entire system.

They do that which dangerous calomel does without any of the bad after effects. All the benefits of nasty sickening, gripping cathartics are derived from Dr. Edwards' Olive Tablets without gripping, pain or disagreeable effects of any kind.

Dr. F. M. Edwards discovered the formula after seventeen years of practice among patients afflicted with bowels and liver complaint with the attendant bad breath.

Dr. Edwards' Olive Tablets are purely a vegetable compound mixed with olive oil, you will know them by their olive color.

Take one or two every night for a week and note the effect. 10c and 25c per box. All druggists.

The Olive Tablet Company, Columbus, O.—Advertisement.

PEARY SCORED BY WM. J. BRYAN

Washington, April 20.—Secretary Bryan said today that before criticising Rear Admiral Peary's recent speech on possible territorial expansion of the United States, he had written the admiral for verification of his remarks and received an authenticated copy. Mr. Bryan's comment on the speech as given out today at the state department was in part as follows:

"Rear Admiral Peary, speaking at a Republican banquet in New York recently said: 'We cannot stand still. A hundred years hence we shall either be obliterated as a nation or we shall occupy the entire North American world segments. The advantages of free speech are so great that we are compelled to accept with these advantages the evils that follow from occasional abuse of the privilege by persons publicly prominent to secure publicity for their views. It is to be regretted, however, that a man known to the public should so much enjoy enraging his imagination as to be indifferent to the effect which his utterances may have upon this coun-

A Tribute to Crisco

A remarkable tribute to the quality of Crisco was received from the chef of one of the foremost hotels in the United States.

For some time he had been buying Crisco in moderate quantities. When without warning his orders were more than doubled a Crisco representative called to see what had happened. It was found that while formerly the chef had been using Crisco only for pastry and other bakery foods and had done his frying with the fat obtained from his meats, he had decided after experimenting with Crisco to sell the meat fats and use Crisco exclusively. He is now using

for frying as well as for shortening because he knows that Crisco fried foods are better and that the guests of his hotel cannot complain of these foods being indigestible. He does this in spite of the fact that he pays for Crisco three times as much as he gets for his meat scraps. Scientific cooks the country over are using Crisco because they understand it. They judge a food product by what it will accomplish. And they have found that Crisco accomplishes wonderful results in cooking.

Housewives can profit by their experience. If Crisco is the choice of chefs, Domestic Scientists and hospital dieticians, it is very likely to please everyone.

try's relations with other nations. "Admiral Peary does not, of course, claim to be inspired—he is simply expressing his private opinion, but his name, unfortunately, gives wings to his words. He fixes one hundred years as the period during which it will be necessary for this government to secure control of the continent or disappear. Such a prediction from an obscure man would be foolish; from one in his position, it is little less than a crime. His prediction is based upon an assumption that has been demonstrated to be false, namely, that a nation must constantly expand or go into decay.

It has been a century since the boundary line between the United States and Canada was established and yet both countries are more prosperous today than they were a hundred years ago. This country shares the larger part of North America with several Spanish-speaking republics and there is no reason why there should be any dispute between them in a century or in many centuries. The idea that a nation grows only geographically is as un-American as it is untrue."

Admiral Peary on reading the above comment declined to comment upon or discuss it, but pointed out that he first presented the idea that the entire North American world segment is the eventual destiny of the United States in a public address in London in November, 1902, when he said: "The attainment of the north pole is particularly an object for American pride and patriotism. The North American world segment is our home, our natural ultimate destiny. Its bounds are the isthmus and the pole. We are negotiating for the isthmus. (The Hay-Bunau-Varis treaty was signed November 18, 1903.) We must find and mark the pole."

Rheumatism Sprains Lumbago Sciatica

Why grin and bear all these ills when Sloan's Liniment kills pain?

"I have used your Liniment and can say it is fine. I have used it for sore throat, strained shoulder, and it acted like a charm."—Allen Dunn, Route 1, Box 88, Pine Valley, Miss.

"I am a painter and paperhanger by trade, consequently up and down ladder. About two years ago my left knee became lame and sore. It pained me at nights at times till I could not rest, and I was contemplating giving up my trade on account of it when I chanced to think of Sloan's Liniment. I had never tried it before, and I am glad to state that less than one 25c. bottle fixed me up apparently as good as ever."—Charles C. Campbell, Florence, Texas.
