

**The Standard.**

ESTABLISHED 1870.

An Independent Newspaper, published every evening except Sunday, without a mousetrap or a club.

**THE PRESIDENTIAL ELECTION**

The returns from the nation are a reminder of the first Cleveland campaign, in which the results were in doubt for days after the election, and finally the carrying of New York by 1080 decided the contest in favor of Cleveland.

At noon today the decision depended on the returns from California and Minnesota. With either state carried by Wilson, the president would be re-elected.

The states in which Wilson leads give the president 261 electoral votes, and five more votes are necessary to elect.

If West Virginia goes Democratic, as claimed by Vance McCormick, Wilson can win without either California or Minnesota, admitting that Oregon is in the Wilson column.

At noon the results were far from being decisive, but with the prospects brighter for Wilson than for Hughes.

**THE VICTORY IN WEBER COUNTY**

For the first time in eighteen years Weber county Democrats have made a clean sweep of the courthouse. Not a man in all that little band of workers wearing a Hughes button will go back to his accustomed county seat after the first of the year.

With Wilson's great lead of nearly three thousand in Ogden City, every Democrat who ran was assisted into the job of his choice, and, the voters having performed their part, it is now up to the newly elected to make good.

If The Standard, after congratulating the successful men, were invited to offer a little advice, it would caution the winners to recognize they have an important duty to perform, that they can make an excellent record or prove a great disappointment. By enforcing economy in county affairs and demanding efficiency, they can please Democrats and Republicans, and two and four years from now go back to their positions.

**PREPAREDNESS OF THE GERMAN.**

Writing in World's Work, on Germany's preparedness in aviation, Frank C. Page, says:

When France started in the war there had been no governmental control of the airplane industry. Every manufacturer had been allowed to work out his own theory of aviation without collaborating with any of his competitors or seeking the best solution of aerial defense in war. The result was that, when hostilities began, a champion flyer who had always flown the machine of one manufacturer was unable to fly the machine of another manufacturer because of the many differences of control. As a result, France was forced to adopt a standard method of airplane control and to teach many of its best aviators all over again. This is one of the main reasons why up to the present year Germany has been almost universally superior to the allies in air service, for although Germany had no machine as good as the best French airplanes it had adopted a universal system of control throughout the Empire, and was therefore prepared to go ahead with the improvements for fighting and scout service. In other words, Germany developed aviation from a point of view of military preparedness, whereas France developed it from a standpoint of sport.

**HAD THE POWER OF LOOKING AHEAD.**

How James J. Hill gained his success is told by Joseph G. Pyle in his "Life of James J. Hill."

One characteristic which was to differentiate James J. Hill from others, and contribute to his remarkable achievements, the gift of the clear look forward, was in evidence even when he was a young man. Whenever Mr. Hill considered any enterprise in a practical way, or contemplated taking any share in it whatever, he immediately proceeded to throw a mental stereopticon view of it upon the screen and study its probable aspect after the lapse of half a century. Then he knew whether it contained for him any practical use or attractiveness. His mainsail was always trimmed to catch the breeze of tomorrow. First he planted himself firmly on facts; the exact facts, all the facts. Then he applied to them his powerful, constructive imagination. For example, he was one of the first to appreciate the extent and value of the coal deposits of Iowa; and some years later the gentlemen who needed them were amazed to find 2,300 acres of valuable coal lands in one county of the state held under lease by James J. Hill. He had read every book on the subject, visited every locality within reach where coal could be obtained, questioned travelers and prospectors, and commissioned others to get information for him.

**BIG PANTAGES SHOW THIS WEEK**

Everything new but the theater is the keynote of the Pantages bill opening tomorrow afternoon at the Orpheum. Headlining the all-feature programme are the Pirkinoff and Rose

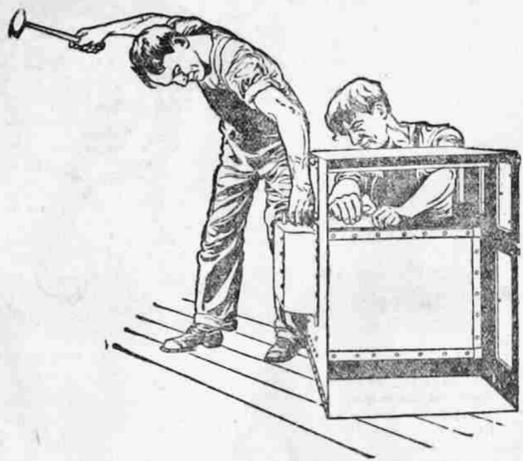

# See MONARCH Ranges Built In Our Window This Week

## Factory Demonstration of the Famous

Nothing we can say for "MONARCH" Ranges would be half as convincing to you as to actually see how they are put together. Come and see the expert work!

**Monarch**  
MALLEABLE  
The "Stay Satisfactory" Range

It is because "MONARCH" Ranges are riveted permanently air-tight that they use less fuel—and "stay satisfactory" year after year the same as new.

## These Are the Things You'll See in Our Window Every Day This Week

—No housekeeper or family man in Ogden can afford to miss this remarkable demonstration. It is the riveted construction that we will show you this week in our window that makes the "MONARCH Malleable Range" absolutely first, in the number used and the estimation of the people of Ogden and the whole country as well.

Buy Your "MONARCH" This Week and Get Absolutely

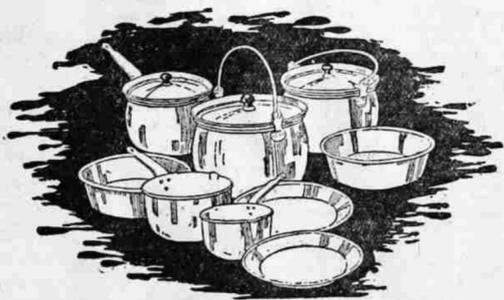

**FREE!**

An \$8.00 Pure Aluminum 12-Piece Cooking Set

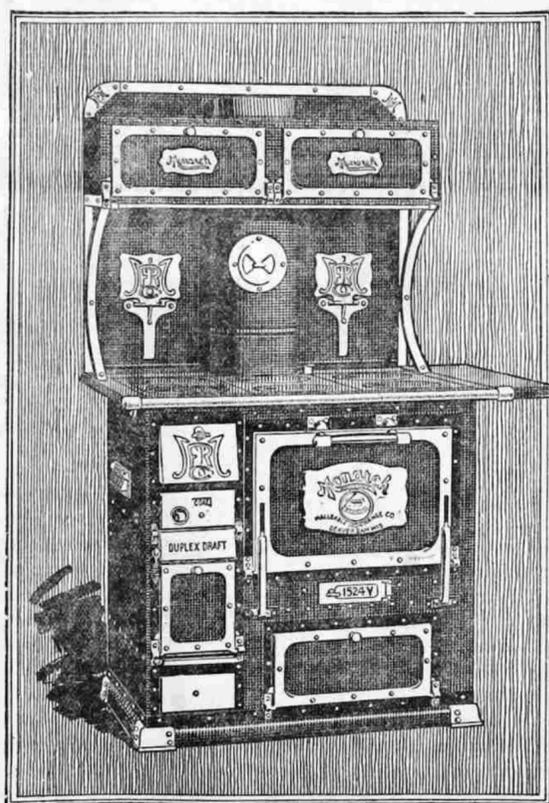

The Monarch Factory makes this offer to you:

—Practical, useful utensils that you will need every day for cooking—made of the highest grade aluminum. A 12-piece set worth \$8 as a premium if you buy your "Monarch" this week.

—See Window

This Demonstration Is Interesting—Instructive—You Cannot Afford to Miss It.

Anyone who can find any Stove Putty in the seams of Monarch Ranges will

**Get \$100 in Gold FREE!**

—But not alone seams—the joints or any other part of the "Monarch" Malleable Range may be examined. —All joints are hand-riveted, making it permanently air-tight. —This is one reason the "Monarch" saves fuel and gives perfect satisfaction.

**"MONARCH" Ranges Are Built to Last a Lifetime**

—The kinds and grades of material in your range and the manner in which it is joined together will determine absolutely the size of your fuel bills and the character and kind of service you receive.

—The Malleable Iron frame with triple wall construction—"steel, asbestos, steel"—hand riveted to the strong malleable iron frame makes every part of the "Monarch" air-tight and will remain air-tight during the life of the range.

**UTAH STOCKS**

**Summary of the Local Market.**

November 8, 1916.—The trading this morning on the local mining exchange was rather lively, with prices in some issues a little stronger, particularly noticeable in Tintic Standard. This stock closed Monday at 90 cents, this morning it opened at 91 and advanced rapidly to 95 cents, it closing with 94 cents bid and 95 cents asked. Silver King Con. also showed some strength it changing hands as high as \$3.77 1/2, while Colorado Mining was strong as high as 23 cents. Among the stocks that sold off were Big Four Exploration which dropped to \$2.10, and Walker Copper was weak at \$1.95. Quotations furnished over the private wire of J. A. Hogle & Co., Brokers, 2409 Hudson: Sales—Morning session. Alta Con., 100@30c. Albion, 1500@11c; 3500@10 1/2c. Alta Tunnel, 1000@13c. Bullion, 3000@30c. **Hog Market.**  
Chicago, Nov. 8.—Hogs were kept down in price today by the presence of a liberal supply in which light grades predominated. Cattle offerings proved adequate to meet requirements. Sheep and lambs were scarce.

**OGDEN CONSERVATORY OF MUSIC**  
Announces the opening of the 2nd term, beginning Nov. 13th. Students enrolling daily from 2 until 6.—Advertisement.

ballet, Beaumonte and Arnold and Willard's Temple of Music. Four attractions, including the Pirkinoff and Rose ballet offering will no doubt prove to be one of the most artistic bits of dancing featured in many a week. It a graceful feature, charmingly presented, with original dances by Mr. Pirkinoff and Miss Rose and a corps de ballet.

Bertie Beaumonte and Jack Arnold are favorites in their witty comedy play, with musical and dancin' trimmings, and it expected they will score one of the big hits of the bill.

Willard's Temple of Music is an elaborate musical act, comprising musical instruments of all varieties scattered here and there over the stage. Swiss chimes, musical buzz-saws and a complete pipe organ are some of the features in the attraction.

Arthur Don and Patricia Patty, the sailor and the maid, will present a clever comedy act, interspersed with sparkling vaudeville patter and dainty dancing steps.

The Lucy Lucier Trio is expected to prove one of the popular acts on the bill this week. It is a vocal feature presented by Miss Lucier and two men. All of them are said to have

pleasing voices which harmonize beautifully.

Mlle. De Verna will appear in a nifty comedy offering, introducing the famous postine horse. Judging from the success she has scored elsewhere on the ocean-to-ocean vaudeville circuit, Orpheum patrons are in for a rare novelty treat this week.

The bill runs Thursday, Friday and Saturday with a matinee daily. —Advertisement.
