

Ice-Mint Brings Joy To Tired, Aching Feet

If warm days and modern foot-wear have given you aching, burning, swollen feet, corns, or painful calluses, here is real foot-comfort for you at last.

From the cooling, dewy mint-beds of old Japan come the fresh, soothing ingredients that in just a few weeks have made Ice-Mint the most popular foot remedy in America.

Rub a little Ice-Mint on any tender corn or callus. Instantly the soreness disappears, and shortly the corn or callus will loosen so that it can be lifted out easily with the fingers.

ICE-MINT

is a clean, creamy, snow-white, non-poisonous substance and does not inflame or irritate the most tender skin. There is no pain and not one bit of soreness while applying Ice-Mint, or afterwards. It acts so gently, so magically, that you will never again run the risk of blood-poisoning by cutting a corn. Hard corns, soft corns, corns between toes, loosened and come off under the remarkable influence of Ice-Mint. No matter what you have tried or how many times you have been disappointed, you will revel in the cooling, soothing comfort that Ice-Mint brings. Try it! Ask your druggist today for a small jar of Ice-Mint and learn for yourself what solid foot-comfort really is. You'll like it immensely.

The Standard.

ESTABLISHED 1870.

An Independent Newspaper, published every evening except Sunday, without a muzzle or a club.

COAL SHORT AT THIS TIME.

Soon after the winter shortage in coal, the Standard predicted fuel would be scarce, not only next winter but this summer. Today the coal companies are urging the people of Ogden to resort to wood for fuel, if possible, because there is not enough coal to meet the demand.

With fuel consumption at a minimum, and coal scarce, what will be the situation when snow begins to fall?

Ogden homes should put in orders today for all the coal they can obtain, and begin storing.

Even the price of fuel will be higher, as miners' wages are being increased, freight rates advanced and delivery charges multiplied.

Once more the Standard suggests that wood be burned during the summer months, in the stoves of the homes of Ogden. Old trees could be cut into firewood and made to take the place of coal.

COLORED MAN GIVES HIS VIEWS.

A colored man, with gold teeth disclosed as he smiled, came into the Standard office to enquire whether the second officers' training camp at Des Moines had been ordered established. He had seen service in the regular army and wanted to do his duty in defense of the Stars and Stripes, now that serious work is ahead. His conversation proved him to be above the average in intelligence, and, seeking to obtain the negro point of view, we asked:

"What was at the bottom of the East St. Louis riots?"

"I am of the opinion," he said, "that the people of that district were not prepared for the influx from the south; they were not fully aware that, owing to war conditions, a real demand existed for colored workers and they resented what they thought would be a displacement of white laborers. Whiskey did its part. Among my people are the good and the bad. When the vicious elements of the two races met, out of a small blaze may have come the conflagration. The Standard editorial on the subject pleased me. I do not attempt to excuse the bad in my people. We have a big work to perform and are organizing for that purpose. I regret that we did not inform you last week of the presence in Ogden of a prominent colored woman speaker who was here, as the representative of 50,000 educated colored women who are banded together to raise the moral and social standing of the negroes of the United States."

SPIES WORK WITH GREAT CUNNING.

Apparently Washington continues to be considerably stirred up over Ger-

man spies. How cleverly the agents of Germany operate is illustrated by a communication to the Standard from the Navy League of the United States.

In a southern city with a population of about 30,000 people, there is a colony of German subjects who recently petitioned the government, through the department of justice, to waive certain of the restrictions placed upon them as to their residence in fixed zones. These restrictions prevent alien enemies from living or going within a certain distance of any naval station or ship. The petition from the Germans of the southern city, was so phrased on its face that it appeared to be an entirely harmless request.

Federal officials in the south were inclined to grant it. The petition, however, was referred to Washington. An investigation proved that there was on foot a scheme to place certain German agents close to the navy yard where considerable mischief might be done. It has now been decided that, not only will the areas from which these Germans are barred not be limited or reduced, but that increased surveillance over every movement will be maintained. The belief is expressed in Washington that, had this request been granted, it was the intention of alien enemies in other cities to make a similar request, and that in the end serious harm might have resulted.

NOW THE WORLD IS AT WAR.

Now China has a war, which is the spirit of the times. The power of suggestion is irresistible. Soon the whole world will be in the business of murdering or resisting the murderer.

What a shocking indictment of our civilization, which has become civil in name only.

Argentina is getting ready to declare war on Germany. Brazil has broken off cordial relations. Africa has had an echo of the European conflict. Australia, as a part of the British empire, is deep in the struggle. India, also a British colony, has men at the front.

Mexico is continuing an attempt at suicide.

If, on a map of the world, the warring nations were to be painted in proper hues, there would be a smear of blood from north, south, east and west.

WHERE ARE THE TRENCHES?

Bloomington, Ill., East St. Louis, Butte, Mont., Globe, Arizona, and other places have their labor troubles. Rioters are operating and strikers are closing the doors of industry.

What is the duty of the government?

Why, say to employes and employer:

"The United States is at war and needs the services of every man. You may have your differences and your grievances, but the government demands that the industrial plants of this country continue to operate at capacity. Go back to work and submit your contentions to a board of arbitration. The fighting front is supposed to be in France, where there is no striker, no slacker, no shirker."

Apparently Washington continues to be considerably stirred up over Ger-

This is notice that you have brought the trench lines to this factory, this city, this mine, and by so doing have come under the rule which applies to the soldiers who are offering their lives to preserve the liberties of this people, including the industrial welfare. Right about, face! Forward, march!"

WASTE OF WATER HAS CAUSED A CLOSER INSPECTION

That a serious shortage in the water supply of Ogden threatens, was the statement made by Commissioner Miles L. Jones today. He said that many people are using the water indiscriminately in all parts of the city and that, if the practice is not stopped at once, Ogden will face a serious menace in the lack of water for proper fire protection and for the watering of the many gardens started on the instigation of the government.

"The waterworks department has several inspectors in all parts of the city whose duty it is to watch that water is not wasted. They have orders to shut off the water from all residences where the water is found running wastefully. Wherever people are watering lawns without a nozzle on the hose, the water will be shut off," said Mr. Jones.

"The city does not want to impose sprinkling hours, as has formerly been done, if there is a way out of it. This works a hardship on many people, who are not able to be home during those hours. But many of the water users do not use any judgment. They will turn on the tap and then go away and leave it running, not realizing that it is pure waste. This condition must be stopped, for the protection of those people who are careful.

"One of the most serious things that this waste does is to reduce the water pressure in the mains, so that if a big fire should break out, the fire department would be helpless to cope with it. This is a thing that has to be constantly guarded against and the thing we are watching at the present time through the work of the inspectors.

"With the many gardens about the city, being worked with pride by children and grown-ups as well, it would be a serious thing if the water supply had to be taken away from them. The only way to prevent this is for the citizens to take warning at once and see that there is no waste of the water. Not only should they watch themselves, but their neighbors as well, for in this case, what is to the interests of all is to the interests of the individual. Not until it is absolutely necessary, will the sprinkling hours be put into effect, but it remains in the hands of Ogden's citizens whether it is found necessary or not."

L. G. GRIFFIN FINED \$10 AND BUSH IS ASSESSED \$5

As a result of a spree they were on last night, one man faces serious charges, another, under age, may be implicated, and 17 years of age, are in a grave predicament in that they were partners in the escapade.

L. G. Griffin is the man who was with the boys. He was in the police court this morning and, after testimony by Officer John S. Moore, Sheriff Wootton and another man who came up at the time of the disturbance, he was fined \$10 or ten days for disturbing the peace in being drunk, and a further investigation of the case will be made by the officers.

Griffin, a boy named Bush and the other two, 17 years old, were interfering with two 14-year-old girls on Washington avenue, between Twentieth and Twenty-first streets. They would not allow the girls to pass and were making insulting remarks. Officer Johns saw the disturbance and ordered the boys to leave. They did not do so, and, when the officer attempted to enforce his demands, they grabbed him and while two of them held his arms, the other one proceeded to beat him, when Deputy Sheriff Wootton appeared on the scene. With his assistance, the boys were placed under arrest and taken to jail. A citizen who appeared on the scene was deputized to help round up the boys.

The Bush boy, who is under 21, was accused at first of trying to break into the rear of the Lobello store on Washington avenue. It was later learned that this was not the case, but that he had made insulting remarks to the woman in charge and when she had threatened to call Mr. Lobello he left.

As Officer Moore stated, the whole affair has been sifted down to the question as to where the boys obtained the liquor. Young Bush testified that he had bought drinks in several saloons. Bush was fined \$5 for being drunk.

NEVADA WANTS OGDEN BOYS TO HELP IN HAY FIELDS

Farmers of Nevada, Wyoming, and Idaho, as well as those of Utah, are asking the Weber council of defense to aid them in securing men and boys to work in the fields and orchards during the next month or so.

A call came in from Winnemucca, Nevada, this morning, offering to pay boys 15 to 20 years old \$2.50 a day,

MAPLE SYRUP, PRODUCED FROM WILD MAPLE TREES OF UTAH, OFFERS NEW INDUSTRY TO STATE

Discovery that the native wild maple trees of Utah are most prolific producers of sap which can be easily boiled down to make excellent maple syrup has been made by Ben Smith of Thistle. This statement is vouched for by a prominent Ogdenite who visited the farm of Mr. Smith. With the Utah springtime longer and nights cooler than are experienced in the east and south, an extraordinary amount of sap is furnished by each tree.

A wild maple four inches in diameter will produce one gallon of sap per day for three months, or a total of 90 gallons of sap during the season. Mr. Smith has discovered.

One friend of Mr. Smith has been able to obtain fifteen gallons of excellent syrup from the sap of Utah's common native maple, and another friend got five gallons.

When asked why the pioneers did not make syrup from the native maple, Mr. Smith's answer was that they never tried. It was taken for granted that the sugar maple was the only tree that would produce first-class syrup.

Apparently the people of the state have not realized the number of maple trees at hand just waiting to be tapped, with the sap only needing a little boiling down to produce the finest quality maple syrup. Now that the discovery has been made, Utah may some day become as famous as the state of Vermont as a maple syrup producing state.

POLICE HOLD ART MODEL FOLLOWING MYSTERIOUS MURDER OF YOUNG BRIDE

Miss Harriet A. Varney in one of her Greek poses.

Miss Harriet A. Varney, an art model, is being held by the police in connection with the death of Mrs. George H. Keyes, the Brookline bride. The case is one of the most sensational in Massachusetts crime. One of the most important links in the chain of evidence being forged by the police was furnished by a Boston lawyer, who declared that Miss Varney had asked him to help her become the legal wife of George H. Keyes, with whom it is alleged she had been living for some time.

their board, and railroad fare between Ogden and Winnemucca, if they would come out to work in the hay-fields.

"We are receiving calls for boys from the farmers of four states," said Supervisor Robert E. Wilson, in charge of the boys' agricultural work. "There is not a reason in the world for any young man to say he cannot secure work these days. We have jobs for all the boys we can get. The wages are good and the boys will be able to have every penny they earn as they are boarded by the farmers."

In an effort to secure more boys to work in the beet and hay fields and in the cherry orchards, the Weber council of defense is today advertising in the newspapers for boys.

EXCURSIONS NORTH

July 7, 14, 21, 28 and later dates, via Ogden Short Line. Very low round trip fares to northern Utah and to Idaho points. For rates and full particulars, call at City Ticket Office, Orpheum block, or phone 2500.—Advertisement.

FRANK AND LENA ARE BOUND OVER TO THE DISTRICT COURT

Sam Bailey and J. C. Feury, two colored men, were in the police court on the charge of drunkenness last night. As Sam seemed to be earnest in his desire to go to work and his statement showed that he was not so very drunk, he was given a suspended sentence.

Feury looked like fury and Attorney Littlefield asked him if he didn't feel like fury. Feury was a little doubtful as to when or where he was arrested. From the way he kept smacking his lips, he was still dry. Judge Barker gave him \$5 or the alternative.

Frank Delaney and Lena Falkner, accused of grand larceny in the theft of a suit case and \$105, waived preliminary hearing and were bound over to the district court and bail set at \$300 for each.

WATER FLOWING IN THE BENCH CANAL

Commissioner Jones made the announcement today that the Ogden bench canal, which was blocked by a landslide on Tuesday, was opened last night and that the water is again being distributed through it.

The slide occurred where the canal follows the high bluff south of the canyon road and west of the old sanitarium at the mouth of the canyon.

Vancouver, B. C. City Council has passed a three-dollar-a-day minimum-wage ordinance for city laborers.

Are you having trouble with your skin?

Does your skin itch and burn? Or is your appearance marred by patches of eruption? There is no need of enduring such discomfort when Resinol Ointment usually stops itching at once and quickly makes the skin clear and healthy again. Doctors have prescribed Resinol Ointment for over twenty years in the treatment of skin affections. So you need not hesitate to use it, nor to recommend it to skin-tormented friends.

Resinol Ointment is so nearly heat-resistant that it can be used on exposed surfaces without attracting undue attention. Sold by all druggists.

PREMIER HAS NARROW ESCAPE

LONDON, July 6.—W. A. Holman, premier of New South Wales, narrowly escaped death during a visit to the western battle front Monday. A German shell which burst a few yards distant bruised him, tore his clothes and inflicted a severe shock. His complete recovery is expected.

MORE GOLD ARRIVES

NEW YORK, July 6.—Gold amounting to \$6,500,000 and carrying the total of the present movement up to \$126,031,000, was received here today by J. P. Morgan & Co. from Canada and sold to the federal reserve bank. The total for 1917 is now \$521,031,000.

SIX BATTERIES CALLED

CHICAGO, July 6.—Six batteries

NEXT QUERY

The editor of the correspondence columns had a very busy day—a very busy day indeed. So busy, in fact, that he had to enlist the services of the "sub" to read out the correspondence.

"What is the next query?" he asked, when he had gone half way through the pile of letters.

"Oh," replied the "sub," "a reader in South Africa wants to know how to prevent the hairs in his mustache from falling out. What shall I put down, sir?"

"Well," answered the editor, with a sigh, "just put down: 'The best way to prevent hairs from falling out is to brush them lightly apart, and keep them from quarreling.'—Brooklyn Times."
