VICTORY IS AT HAND

Bitter Battle Still Raging But German Fall Near.

BELGIANS GAINING

Whole Situation Indicates General Retreat of Kaiser's Army.

BRITISH HEADQUARTERS IN FRANCE, Oct. 2.—The long, bitter battle is still raging but it has turned so definitely in favor of the British that it is scarcely even now premature to hail it as a great victory.

To the north of the sector where the chief tactical gain of yesterday was scored (in the region of St. Quentin) there was continuous and desperate fighting. Again and again the reserves of enemy storming troops were flung into the counter-attack and the battle swayed with incredible fury. Amid this surging, however, our troops were gradually shouldering forward.

FLANDERS CAMPAIGN BRITISH HEADQUARTERS IN FLANDERS, Oct. 2.—The British second army co-operating with the Belgians in the Flanders campaign, continued today to press forward. In the process of encircling Armentieres it took the hamlet of Le Biset, close to Armentieres on the north.

Heavy rains and mud have been interfering with the progress of the operations by the Belgian army and the Second British army in Flanders. Today, although the ground continued muddy, the weather was clear and cold, a change favorable to the prospects of the allies.

The Belgian and British forces now are astride the Roulers-Menin road along a considerable stretch. The capture of Beauraive cleared up the situation in the Gouy salient to the north.

The British Fourth army took these places while the Third army captured Cambes and Rumilly, south of Cambrai and north of the high ground east and north of those villages.

The Canadians had a hard day yesterday north of Cambrai, the Germans making a determined stand around the burning city.

The British Third and Fourth armies took 1700 additional prisoners yesterday.

ROME, Oct. 2.—The official statement from the Italian war office today reads: "There were artillery duels in the region of Concalis and Ponia, on the Asiago plateau and around Montello. Hostile patrols which attempted to approach our outposts in the Mori region and on Col del Rosso were driven back."

TIRE TROOPS HAPPY. BRITISH HEADQUARTERS IN FRANCE, Oct. 2.—This morning the sun was shining and everybody, even the tired troops who went through the heavy grueling of yesterday, was cheerful.

The fighting was resumed this morning with the enemy opposition increasing as reinforcements appeared in the line.

WORLD'S MARKETS

NEW YORK, Oct. 2.—Irregular changes in the first half hour of today's stock market testified to the further conflict of opinion in speculative quarters due to last war developments. The more substantial gains were again confined to oils, shippings and utilities, the latter including a six point advance for Twin City Rapid Transit and 3 points for American Telephone. United States Steel opened at a slight reaction but soon rallied to a large fraction over yesterday's close. Union Pacific and Reading were the only high grade rails to manifest strength.

Further adjustment of prices occurred during the first hour, United States Steel and war issues yielding to renewed pressure. Coppers, motors and utilities continued to improve. Western Union responding to American Telephone's rise with a gain of 2 1/2 points. Industrial Alcohol also hardened and activity in shippings was resumed. Marine preferred advanced two points. Union Pacific extended its lead to two points and Canadian Pacific rallied, but the general railway list was uneven. Trading dwindled toward noon. Industrials and specialties again developing heavy tendencies.

ANOTHER PRISON BREAK ATTEMPTED

SALT LAKE, Oct. 2.—An ingeniously concealed tunnel, designed to bring about the wholesale liberation of inmates from beneath the barracks building, has been unearthed by the officers and the wholesale prison delivery plot has been thwarted before it could be carried into execution.

The newest tunnel is the largest that has yet been dug and its location was so adroitly concealed that it defied discovery until the underground passage had been carried to a distance of more than forty feet from the point of entrance. It probably would have had to be carried another hundred feet before a safe exit could have been opened, however, and its discovery brought chagrin and consternation to a dozen or more prisoners who have been stealthily working on the passage in the wee hours of the nights.

The plotting prisoners, who have heretofore endeavored to dig their tunnels from beneath the barracks building floors, this time chose a concrete lined bathhouse near the prison hospital building as the point of beginning.
