

# MARRIED WOMEN

is the expectant mother's greatest help. It is a remedy which prepares the muscles and tendons for the unusual strain, renders the ligaments supple and elastic, aids in expanding the skin and flesh fibres, and strengthens all the membranes and tissues. It is especially valuable where the breasts are troublesome from swelling and congestion, and its regular use will lessen the pain and danger when the little one comes. Women who use Mother's Friend are assured of passing the crisis with safety. It is for sale at drug stores. Write for free book for expectant mothers.

## OLD BASEBALL PLAYER IS DEAD

New York, Sept. 20.—News has been received here of the death in Ireland of Colonel M. Emmett Urell, a famous baseball player of the sixties. He was one of the leaders of the game in the old historic White Lot, Washington, D. C., when the Nationals of that city were regarded as one of the strongest teams in the country.

Urell played second base on the old Union team of 1867, acting as captain. Later he joined the Nationals. He was afterwards a member of the Olympics of Washington, of which Nick Young was the head.

In those days Mike Urell, with his flowing whiskers, facing Colonel Jones, the pitcher of the Nationals, who also wore a full beard, present

## THOMSON'S "CLOVE-FITTING" CORSETS

**THE HOME EYE TESTER.**  
YOU can test your own and your children's eyes. You can know positively if glasses are needed or not, and if glasses worn fit or need changing; if they be too strong or too weak; the kind of glasses needed; how to take care of, preserve and treat your own eyes, and a hundred other things. Indispensable in every family. Fills a crying demand. Sold by all news dealers, or postpaid to any address. Copyrighted and published by DR. FRANCIS KING, the Eyesight Specialist, Ogden, Utah. Price, 50c. Orders now taken.

ed a picture that attracted attention. Urell continued his entire life and always argued that the game was just as good and strong in the old days, when "first bounce was out," as it is at present.

## SOCIETY NIGHT AT THE ORPHEUM

Last night was society night at the Orpheum. Monday night is rapidly becoming the night for society folk at this theater.

Last evening a number of box and theater parties were given.

The following were entertained at a theater party by Miss Loretta Malone: Misses Whalen, Fitzgerald, O'Neill, Byrne, Kuhn, Krauss, Zeimer, Leonard, Grill, Douglas, Malone, Shuffelbarger, B. O'Neill, Hamill, Chaperson, Mrs. D. J. Malone, Mrs. Hurd, Mrs. M. Malone.

The following box parties were given: Mr. and Mrs. J. M. and M. S. Browning entertained Major Geo. E. Albrecht and wife of Gratitude, Maryland, formerly of the Winchester Arms company.

Mr. and Mrs. Boyd entertained Mr. and Mrs. R. E. Hoag and Mr. and Mrs. C. A. Boyd.

## NEW CEMENT PLANT IN THE NORTHWEST

Spokane, Wash., Sept. 20.—Papers were mailed to the secretary of state in Olympia, Wash., yesterday for the incorporation of the International Portland Cement company, limited, with a capital of \$1,500,000 preferred and \$1,500,000 common stock, which, it is announced, will build a plant in Spokane. B. S. Irvine of Ottawa, managing director of the International Portland Cement company of Canada, will probably be president of the new corporation.

The new concern has options on two mill sites west of the city and announces its intention of duplicating the great plant near Ottawa, the capital of Canada.

## PLENTY OF RACING IN CALIFORNIA

New York, Sept. 20.—"There will be plenty of racing in California this winter," said Thomas H. Williams, president of the California Jockey club, who arrived from the west yesterday.

"The California Jockey club will offer big purses and stakes to attract the best horses in the country. As the courts have decided that oral betting with a stakeholder is not against the law, our patrons, if they choose to make wagers, can do so without fear of molestation. The meeting at Oakland will begin on November 12, and will continue without interruption until well into next spring. The California Jockey club will offer in the neighborhood of \$250,000 to be raced for during the winter meeting."

## TWO ARE RELEASED

Chicago, Sept. 20.—President Comiskey of the Chicago Americans yesterday announced the release of "Chick" Gandil and Charlie French to the Montreal Eastern league club.

Gandil came from Sacramento last spring and French was purchased from Boston early in the season.

## SALT LAKE AND STATE NEWS NATIONAL IS A GREAT DISTRICT

C. P. Crawford Returns With the Confirmation of the Camp's Wonders.

Salt Lake, Sept. 20.—Confirmation to the effect that the National Camp of Nevada, located seventy-five miles north of Winnemucca, has succeeded in making a magnificent record of production during its brief career is brought to Salt Lake by C. P. Crawford, one of the best known operators who ever directed underground operations within the state of Utah. A great many local mining men knowing that Mr. Crawford was investigating the National camp have been awaiting his return to secure an expression from him, and when seen by a reported Monday morning, and asked for an interview, Mr. Crawford said:

"I have just returned after a three weeks' study of the new gold camp of National. It is interesting because it has the richest gold ore shoots ever discovered. There are four of these shoots within a distance of 300 feet along the vein, 700 feet deep. There is reason to believe that there are more of them, and a lot of money is being spent to find them.

"The way they speak of gold values up there was new to me, and it was hard to grasp at first. I was told by the National officials that they have not mined any ore valued at less than \$13 per pound, while ore valued at \$70 per pound, or \$140,000 per ton, has been mined. The company has produced 1,000,000 from thirteen tons of ore, which is an average of about \$80,000 per ton. The second class ore is to be milled later, the reason being that the leasers who found the ore could not stop to put up a mill. Time is very valuable when you are getting out picture rock. So they installed a small plant which had a capacity of 600 pounds in twenty-four hours.

"The ore was crushed, then rolled and then pulverized very fine. Two hundred pounds are then put into the amalgamating pan with quicksilver, and it takes seven hours of continuous grinding to amalgamate all the gold in this quantity of rock. The process is too slow for the low grade of ore. The National company now, however, has a 30-ton mill just completed, and when this plant is started to turn out bullion it will not be necessary for Wall street to import gold.

"The National mine is a wonder. I was told that it is a first-class gold mine without the high grade. There are four or five leasing companies nearby on the same ledge which have a good chance to get the ore. There also are many other leasers in the camp. To the north along the same mineral zone the Hatch lease looks promising, and the Edmonds lease has all the earmarks of bonanza ore. Just a day before I left Edmonds panned free gold from his quartz, and the iron sulphides assayed \$320 in gold per ton. He will get bonanza ore at any time."

Mr. Crawford and local associates have secured a block of good ground on the Mayflower group, which is on the same mineral zone north of the National property. He has a ledge plainly seen on the surface on which he will drive a shaft without delay. The main attraction of the camp is the mineralized porphyry zone along which the National ore is found, a zone which is fully 500 feet in width and which carries several parallel fissures of sugar quartz. There also are cross fissures, and the richest shoots make naturally at the junctions.

Mr. Crawford believes that his block of ground contains one or more of these intersections, and the experience of the camp has been so far that the ordinary mortal need hope for nothing more than just one of these bonanza nests in a lifetime.

While in the district, Mr. Crawford was given every opportunity to see all there was to be seen, and Ray Harris, editor of the National Miner and an old Salt Lake newspaper man, greatly assisted him in the inspection of the camp.

The distance of National from the railroad makes it an expensive camp in which to operate right now, but the rewards are so generous that this difficulty soon is forgotten.

## UNLUCKY CARD ENDED HIS LIFE

Joliet, Ill., Sept. 20.—John Raveglio, 19 years old, yesterday staked his wife on the turn of a card and lost. He then blew out his brains with a shotgun charge.

Despondent, it is believed, over a love affair, Raveglio went to his room, took up a pack of cards, drew one and looked at it. Then he dropped the pack, according to a younger brother, took the shotgun from beneath his bed, placed the muzzle in his mouth and pulled the trigger.

Raveglio, it developed, had been accustomed since childhood to make decisions on playing cards. His relatives believe, therefore, that meditating suicide, he determined to leave his fate to the cards and drew an unlucky one. He was employed by the Chicago & Alton railway.

## FOOTBALL STRTS IN BIG EIGHT REGION

Chicago, Sept. 20.—Football in a new makeup entered the "Big Eight" region in its oldtime form today. Official gridiron exercise and yelling practice will mark the day throughout the middle west. The opening of another season sees the conference colleges somewhat shuffled as to prospective strength, a condition that the rooters can diagnose through the gloom of the early reports.

The estimate of the first day's work is expected to come to a question of the physical condition of the squad in most schools. The players who report with a poor supply of "ganger" will find it hard to catch up. Those who report as "hard as nails" will be the heroes of the early training.

The University of Chicago authorities remain somewhat downcast over the football outlook.

## PURCHASE LAND ON RESERVATION

Information as to the conditions which are to govern the auction of land on the Uintah Indian reservation in Summit, Utah, Wasatch and Uinta counties November 1 at Provo, and also the conditions of the sale of Crow Indian reservation land in Montana, was received at the United States land office Monday. The information in the form of a circular is as follows:

"A part of the Crow Indian reservation will be sold to the highest bidder at Billings, Mont., October 15, at not less than \$2 per acre and the unentered land in the former Uintah Indian reservation will be sold at Provo on November 1, at not less than 50 cents an acre.

"Any one may purchase not more than 640 acres in each of these reservations, either in person or by agent, without showing his qualifications to make entry under any of the public land laws. The lands in Utah must be paid for in cash at the time of the sale, while but one-fifth of the purchase price of the Montana lands must be paid in cash, and the remainder may be paid for in four equal installments, without interest.

"These lands are suitable principally for grazing and dry farming purposes, and no residence or cultivation will be required by the government. Patents will be issued as soon as the whole of the purchase money is paid. By remitting a check after October 1 any person can obtain a map of the Crow lands from the United States land office at Billings, Mont., or a map of the Uintah lands from the United States land office at Vernal, Utah, or maps of either of the reserva-

## GLOBE EXPRESS DOING BUSINESS

New Gould Company Busily Engaged in Perfecting Its Through Service.

Salt Lake, Sept. 20.—The Globe Express company is now operating over the Western Pacific, as well as the Rio Grande in Colorado, and great activity is shown in the work of building up the service. Down at the union station a carload of trucks came in on Saturday, and these will be distributed all over the new system. They are all new and similar to the regular baggage truck in use at large stations. To arrive at once are several carloads of new wagons and harness which will be used in Sacramento, Oregon, San Francisco, Stockton and other large places where wagon express delivery is to be established. The company is now making connection with other express companies east of Colorado, and is therefore in a position to handle traffic between the Atlantic and the Pacific, and already there is quite a healthy growth shown in the volume of express matter passing through Salt Lake.

Naturally, this great move has taken considerable time, but within a very short while all will be completed, and the Globe will be doing business across the continent at a lively rate.

## CHANGING LEVEL OF THE LAKE

The Oregon Short Line has prepared a highly interesting blue print showing, in the shape of a profile, the rise and fall of the Great Salt Lake. The data is from January 1, 1850, to August 31, 1910. eZero is a point on the Lucin cut-off at Midlake, or an elevation of 4215.36 feet.

In the latter part of the year 1860 the lake was down to a point 2 feet and 2 inches above zero, and in 1865 it rose to the highest point recorded, 14 feet 6 inches above zero. It fell until 1877, when it again rose to 14 feet above, and then followed the long decline to 1902 when it reached the lowest point, 2 feet 4 inches below zero, or a difference of 16 feet 10 inches between 1865 and 1902. It was during the latter year that the Lucin cut-off was being built, and in May of the present year it reached 5 feet 4 inches.

11 1/2 inches above. Since last May it has been steadily going down, and the showing of the level on August 31 was 4 feet 4 inches above, and since then it has dropped quickly, so it is now time for the scientific writers, technical magazines and Collier's Weekly to show that the lake is drying up.

The level of 1868 would be up to the bottom of the stringers on the cut-off. Now that the high water cycle is past, the railroad men are looking for a steady fall, with no trouble until the next cycle comes around.

## BOYS AND GIRLS FOUGHT ON CAMPUS

Appleton, Wis., Sept. 20.—One hundred freshmen and sophomores of Lawrence college fought for three hours on the college campus yesterday, the efforts of President Plantz and members of the faculty to stop the fuss being ineffectual.

The sophomores had determined to dislodge the freshmen colors which had been suspended from wires extended from University hall to Science hall and to burn off the freshmen colors from the big stone in front of the college.

President Plantz succeeded in stopping one contest, between freshmen and sophomore girls on the third story porch of Ormsby hall, where the first year colors had been unfurled.

The contest was in violation of the agreement made last week to wait until Tuesday and fight at their differences on the river bank.

## TRYING TO HIDE WIFE'S DISGRACE

Chicago, Sept. 20.—To save his wife from prison, Isaac Warren plans to plead guilty to a charge of using the mails to defraud through a "fake" matrimonial bureau and accept sentence without making a defense.

Warren and his wife, Kate Warren, were indicted more than a year ago by the federal grand jury. Shortly after his indictment, Warren fled from the city, going to Buffalo, N. Y., where he operated a similar scheme. He was arrested by the New York state authorities and was given a year's sentence.

Upon his release from prison a week ago a deputy United States marshal placed him under arrest on a fugitive warrant and brought him to Chicago.

"For the sake of our four-year-old boy, I don't want my wife to face the disgrace of a criminal trial," Warren declared yesterday in the United States marshal's office. "I am willing to plead guilty if it will save her from punishment."

Warren and his wife will be arraigned in Judge Landis' court today.

## DEMOCRATS ORGANIZE TO FIGHT

James H. Moyle was chosen chairman of the state Democratic committee at a meeting Monday night. The meeting was attended by almost every member of the state committee.

With the appointment of Mr. Moyle as chairman, the Democrats will at once begin an active campaign. It was announced Monday night by the Democrats that they would wage the most vigorous campaign in the history of Utah, and that the arrangements whereby such a campaign may be waged have already been made.

Resolutions were adopted empowering the state chairman to appoint a secretary, a treasurer, an executive committee, a finance committee, and such other committees as may be needed in the course of the campaign.

Judge Ferdinand Erickson of Mount Pleasant, Democratic candidate for congress; C. C. Richards of Ogden, candidate for the supreme bench, were at the meeting and made optimistic talks. Speeches were also made by Jesse Knight of Provo and Judge William H. King of Salt Lake.

A Democratic Daily. Arrangements were made at the meeting looking toward the publishing of a Democratic daily newspaper in Salt Lake during the campaign. It was announced that within ten days there would be a Democratic afternoon newspaper published. A committee consisting of James H. Moyle, W. R. Wallace, W. H. King, J. R. Letcher, R. P. Morris, Samuel Newhouse and Simon Bamberger, was appointed to complete the arrangements for the publication of the paper. Steps were taken looking toward the completion of the Democratic organization in every county in the state.

Among those at the meeting were: John Seaman, S. S. Smith and C. C. Richards of Ogden, Jesse Knight, W. F. Giles and J. David Larson of Provo, F. K. Nebecker of Logan, E. R. Owen of Wellsville, Judge Ferdinand Erickson of Mount Pleasant, J. D. Call of Brigham City, James H. Clark of American Fork, J. R. Letcher of San Juan and S. R. Thurman, W. R. Wallace, T. H. Fitzgerald, Judge W. H. King, John F. Tobin, Ben T. Lloyd, F. S. Fernstrom, Maj. S. A. King, W. A. Dusenberry, M. F. Cunningham and Willard Hamer of Salt Lake.

## BRIGHT'S DISEASE

Late estimates of the percentage of recoveries under the new emollient treatment for Bright's Disease are as follows:

Where patient is much weakened and crises may be expected in from five to ten days, probably not more than 10 per cent to 20 per cent recovery. Where physicians aid with efforts to restrain fatal symptoms this percentage is increased. In cases where patients have from thirty to sixty days of life the efficiency is very much higher.

Where patients do not wait until bed-ridden probably three-fourths yield.

And in cases that take the new emollient treatment on the appearance of the disease nearly nine out of ten respond.

Albumen Casts and dropsy do not prevent recovery. The point is that the renal inflammation should be attacked before the heart and physical system are broken down.

The new emollient treatment is known as Fulton's Renal Compound. It can be had in Ogden at Wm. Driver & Son Drug Co.

We desire every patient to write us who is not noting the usual improvement by the third week. Literature mailed free. Jno. J. Fulton Co., 645 Battery St., San Francisco, Cal. We invite correspondence with physicians who have obstinate cases.
