Its purity, wholesomeness and superior leavening qualities are never questioned.

Fifty Years the Standard

**NO UPRISING IS NOW LOOKED FOR**

Victoria, Oct. 20.—There is little danger of an outbreak in northern China, although reports from the south indicate unrest according to Japanese newspapers received today, which discuss the report from Minister Calhoun at Peking, that a second Boxer uprising is threatened. The Yamato says there may be some good ground for the report, the unbusiness being due to the re-organization of the army.

Prince Teal Toa and Yin Ching, minister of war, are remodeling the army and all incompetent officers who held their positions through political influence are being dismissed. The old army will be disbanded and a new one gathered together through conscription. This change may result in riots, it is feared. The Yamato says it is a mistake to regard the present Chinese government like that in existence when the Boxer trouble arose and the situation will likely be handled without serious disturbances.

The Nichi Nichi says that the revolutionaries in China are quiet now and not considered dangerous, their influence having been weakened by reason of the fact that the government has taken up the matter included in the revolutionary manifesto.

John S. Goodell, engineer of the Hankow-Canton railroad, who arrived last night, says the leaders of the anti-dynastic movement are busily engaged in the south trying to foment revolution. Large consignments of arms are being imported but the revolutionaries' strength is not such that an outbreak is considered imminent.

Yawning is caused by a deficiency in the air supply to the lungs.

**JAPAN'S AM DISCLOSED**

**Little Brown Men Plan to Gain Control of All Asia**

New York, Oct. 20.—Betram L. Simpson, who, under the pen name of Putnam, is well known as an international author of Chinese politics, discussed relations between China and Japan, in an interview given out yesterday. He says:

"The annexation of Korea by Japan is the most significant fact in international politics in the Far East in a century. The Japanese are reaching for all of China. If Southern Manchuria goes the way of Korea, the fate of Peking is sealed for then Japan will be only six hours by rail from the Chinese capital and will be able, if not to annex the country, at least to dominate completely its external and international policy.

"The Japanese believe that this is a period in their history exactly similar to the eighteenth century in England's history when Britain founded her empire. They believe that if all opportunities are taken advantage of, Japan will found a vaster empire than England.

"The United States has a vital interest in the matter. Current opinion in the Far East is pessimistic about the security of America in the Philippines. The work which has been done there since 1898 is excellent, but it is evident that the Pacific is too vast an ocean to be controlled from such distant points as San Francisco or Honolulu and that it would be child's play for a powerful enemy to occupy the islands, leaving an entrenched city such as Manila merely isolated.

"Japan will never attempt anything against the United States unless she is prepared in every particular. The Japanese resent any western powers assuming the role of protector in east-Asian Asia. That she actually covets the Philippines is doubtful. Her first aim is to establish her leadership in China. She knows if she can do this, the game is won and everything else is a matter of mere detail."

**DEATH OF D. B. HILL**

**Famous Democrat Suddenly Called—Aspired to the Presidency**

New York, Oct. 20.—David B. Hill, ex-United States senator and former governor of New York, died suddenly at Woolfert's Roost, his country home. About two weeks ago Mr. Hill was seized with a bilious attack, and, although his condition was not considered serious, his physician advised him to remain at home until he recovered. A cold developed and a later alarming report of his condition were circulated. These reports, however, were denied by friends. The senator appeared to be on the road to recovery until last night, when he had a sinking spell which resulted in his death.

David Bennett Hill was born Aug. 29, 1843. When 17 years old he entered the law office of Col. John I. Lawrence of Havana, N. Y., and when 21 was admitted to the bar. Later he was chosen city attorney of Elmira, then being elected alderman and still later mayor.

He was elected to the assembly in 1870 and again in 1871. In his first term in the assembly he made his memorable fight to abolish convict labor and in his second he was a member of the judiciary committee with Samuel J. Tilden, they being the only Democratic members which had the task of investigating the alleged scandals and corrupt conduct of certain New York city judges. For many years Mr. Hill was a member of the Democratic state committee and, in 1876, and 1884, he was a delegate to the national convention which nominated Tilden and Cleveland respectively.

In 1882 he was elected lieutenant-governor on the same ticket with Grover Cleveland and, following Mr. Cleveland's election to the presidency, Mr. Hill became governor, subsequently elected for two terms.

He was governor for seven years. In 1891 Mr. Hill was elected United States senator and in 1894 he was once more the candidate for governor but was defeated by Levi P. Morton, his Republican opponent. Mr. Hill was the candidate for the nomination for president in 1892, but Grover Cleveland was elected to that office.

In 1904 Mr. Hill was credited with being the political sponsor of Alton B. Parker, who was nominated for the presidency by the Democratic national convention at St. Louis. Following that election, Mr. Hill announced his permanent retirement from politics and since that time had devoted himself to his law practice.

**FROM BOISE KING PLACER PROPERTY**

James Yoakum of this city has just returned from a visit to the above property, and he states that he had a delightful trip. The roads across the desert and over the mountains were in fine condition and the weather ideal.

Mr. Yoakum is enthusiastic as to the future of that entire district, including Rockybar, Atlanta and Black Warrior districts. He says he found every condition at the Boise King placers mine as represented, even better, for after making many pan tests of the gravel, he believes their values per cubic yard will exceed their estimates.

The natural conditions on the property are perfect and the location beautiful, making the Boise King Placers property, as he puts it, "a very attractive one."

He states further that he does not believe there is a better property in the entire state of Idaho. This is saying much, as Idaho is famous for her large producing placer mines. Three hundred million dollars in gold was taken out of the gravel in Boise Basin about thirty miles below the property of the Boise King Placers company, and over fifteen millions have been taken out just above this property.

Mr. Yoakum says the Boise King Placers company has spent about \$50,000 in up-to-date improvements, consisting of a camp of eight well constructed buildings, reservoirs, ditches, flumes, several miles of water pipe, good saw mill, implements of all kinds, horses, etc.

There is an abundance of water, and timber, also grade for power, and dumping facilities could not be better.

This property is under the supervision of Arthur W. Stevens, E. M., who is a conservative man, having had about fourteen years' experience in practical mining.

**CANADA IS INCREASING EXPORTS TO UNCLE SAM**

Washington, Oct. 20.—Canada is steadily increasing its sales of manufactured and industrial articles to the United States, according to statistics prepared by the department of commerce and labor.

During the four months ended July 31, 1910, the total exports of domestic products from Canada to the United States were worth \$20,049,324, as against \$26,437,472 in the 1908 period, and in the 1909 period the exports aggregated \$31,500,750. The greatest commodities of export to this country in the 1910 four months period were wood, lumber, pulpwood, aggregating in value \$9,328,727. Other leading articles of export during the period were woodpulp \$1,058,450; coal and coke, \$1,312,461; nickel, \$882,972; flaxseed, \$787,354; printing paper, \$653,845; furs and skins \$577,290; brass, \$478,472; asbestos, \$470,717; milk and cream, \$450,416 and aluminum, \$373,147.

Great increase in the shipment of cream from Canada to the United States began this year after the enactment of the new tariff lessening the duty on that commodity.

From the province of Quebec alone it is estimated that 800 gallons of cream are daily shipped to American creameries. Cream is also being shipped to this country for the first time this year from Prince Edward Island.

**BETTER COAL IN UNITED STATES**

New York, Oct. 20.—After using Welsh coal in the city's fire engines for nearly fifty years, the New York fire department has decided that the best product selected coal from Indiana fields, is not only cheaper, but also develops greater energy. A rigorous official test made by Commissioner Waldo shows that the Indiana coal is about twenty per cent more efficient, while the saving in cost is nearly two-thirds. The tests may also be of use to manufacturers.

Since the fire department was reorganized into a paid department in 1866, camel coal has been used for making steam in the fire engines. A quick burning gaseous coal is required to get up steam in short order.

In the tests just completed it was shown that the camel coal developed an average of 240 revolutions a minute with steam pressure 64 pounds and water pressure 85 pounds.

The Indiana coal gave revolutions of 272 a minute, steam pressure 85 pounds and water pressure 105 lbs. Camel coal costs \$12 a ton; the other kind about \$4.

**THOMAS ECKERT DEAD.**

New York, Oct. 20.—Thomas Thompson Eckert, former president of the Western Union Pacific Telegraph company, died today, at West End, Long Branch, Mr. Eckert was born at St. Clairsville, Ohio, April 22, 1825.

**AERONAUT'S ARM BROKEN**

**Four Balloons Have Not Been Heard From Since Monday**

St. Louis, Oct. 20.—Six of the international balloons are known to have landed, two in Wisconsin, one in Michigan and three in Canada. It is believed here that the other four are down, but no reports have been received from them.

Messages from North Bay, Ont., report a balloon believed to be the Germania, landed in the forest near Pongasung, Ont. The aeronauts who made the trip, sent a messenger asking aid to bring the gas-bag to civilization.

So far the most exciting aerial voyages reported came from Lieut. Vogt and William Asman, also in Lieut. Vogt's balloon, landed in the forest near Pongasung, Ont. The aeronauts who made the trip, sent a messenger asking aid to bring the gas-bag to civilization.

Because of the lack of ballast, the aeronauts descended 18,000 feet with terrific force. Asman's left arm was broken and an artery cut. Vogt, medical aid was sent to Pongasung, Ont., and Lieut. Vogt obtained help from Indians in saving his balloon.

Except for the sighting of the Halveta by the Million Club in Wisconsin, early Tuesday morning, no word has come from the Swiss either since it left here Monday. Other balloons not heard from are the Azara, Dusseldorf II and America II. The four balloons have been away from St. Louis more than sixty hours.

**Aeronaut's Narrow Escape.**

Chicago, Oct. 20.—Jacob Faure, pilot of the Condor, one of the balloons that started in the race at St. Louis Monday, and his aide, Ernest Schmoelk, arrived in Chicago last night from Twin Cities, Wis., where they landed Tuesday afternoon, after being twenty-one hours in the air.

Schmoelk was injured in landing, his right arm being severed when caught between the rigging of the balloon and the basket.

While over Lake Michigan, Tuesday morning, the men had a narrow escape from being precipitated into the water. They were 9,000 feet high when they struck the cool air over the lake. This cooled the oxygen, causing it to condense rapidly.

In ten minutes they dropped more than 6,000 feet. From that time until they landed about five hours later, their lives were in jeopardy.

They tossed out bag after bag of ballast until they established their equilibrium about 45 feet above the water by trailing their guide rope.

**CHINESE ARE TO LECTURE HERE**

New York, Oct. 20.—Chinese students in Columbia university and other institutions of higher education in this city have undertaken to establish an academy in Chinatown in which the Chinese collegians will lecture and conduct classes on subjects calculated to improve the social conditions of the Chinese living here. They will, for instance, give courses in American government and principles of good citizenship. All the expenses of the academy are to be paid by the college men and instruction will be free.

Great River, L. I., a suburb of New York. The United States government, through the department of agriculture will go to unusual lengths to assist in making the enterprise a success. A tract of several hundred acres near the Vanderbilt Idle Hour estate is to be the scene of the experiments. The planting of the mulberry trees will begin early next spring.

**RADICAL CHANGE IN SCORING GAMES**

Chicago, Oct. 20.—Radical changes in several matters pertaining to baseball were suggested last night by President Lynch of the National League, a member of the National commission, who is here for the world's series. Mr. Lynch proposes to dispose of some of the criticism to which the official scoring in both leagues has been subjected by leaving the appointment of official scorers in each city to the Baseball Writers' association instead of having them appointed as now by the two leagues nominally but in reality by the clubowners.

The official scoring of the world's series, Mr. Lynch suggested, should be done by three scorers, one to be appointed by the National League, one by the American League, and the other by the Baseball Writers' themselves, majority opinion to rule.

**HOW TO KEEP YOUR CLOTHES LIKE NEW**

ADIES' or gentlemen's garments can be kept in beautiful condition until worn out—by taking frequent advantage of our dry cleaning and pressing service.

Our dry cleaning process removes the soil and stains from your clothing, freshens up the fabric, brightens the colors and raises the nap like new. It does not affect the life or color of even the most dainty or delicate garments.

Every garment or article is handled in each part of the process by skillful, careful workers. We use the genuine French Dry Cleaning process of cleaning by spirits and solvents, and etc.

You should send your garments to us, and take advantage of this service. No article of men or women's wear is too dainty for us to dry clean and finish satisfactorily—and our charges are not high.

Our pressing service takes out the wrinkles, creases and other marks of wear. It gives the garments a new like shape and fit. It removes all the bagginess in the knees and elbows, have 4 thoroughly up-to-date equipment.
