Poultry Raising—J. O. Cross, principal of the public schools, is enthusiastic in regard to the idea of establishing a poultry raising contest in the schools of this city. The idea was advanced by W. W. Browning in an address before the real estate men at the Weber club Monday afternoon and Mr. Cross has taken it up. In his opinion the scheme would be equally as good as the potato and corn growing contests that are now being conducted for the benefit of the boys in this vicinity.

CHARRED BODIES ARE DISCOVERED

Oacoma, S. D., May 15.—The charred bodies of seven persons were found today in the ruins of the home of Chris Peterson, near the town of Lund in Lyman county. The bodies are supposed to be those of Peterson, his wife and five children.

Whether the seven persons were murdered and their bodies burned up, or lost their lives in a fire is not known. An investigation is being made.

ROOSEVELT IS SPEAKING

(Continued from Page One.)

the people and adopted by the people, so that the people themselves, without compulsion, could, as is set forth in the preamble of the constitution, better obtain justice for themselves and better promote the general welfare. Our opponents believe that the constitution is something that does not spring from the common people, the plain people, that, on the contrary, it has been imposed upon them, and that they are to be compelled to submit to it even against their will.

"We who endeavor to make the constitution an instrument through which the people may obtain justice and work out their own salvation, are its real defenders, its real upholders. Our opponents are the enemies of the constitution, in spite of all their lip loyalty to it, when they invert its true meaning by the refinements of attorney logic.

"Do you think that I am preaching revolutionary doctrine? Well, I am only preaching the doctrine that Abraham Lincoln preached, and which every one recognizes now as sane and conservative.

"I stand for referendum and Mr. Taft is against it. I ask for a referendum on a certain type of state judicial decisions; I ask that the court, as well as the executive and legislative, genuinely represent the will of the people. Mr. Taft says he will protect the courts from the majority of the people. Here again let me quote Lincoln when he said: 'The people of these United States are rightful masters of both constitution and courts, not to overthrow the constitution, but to overthrow the men who pervert the constitution.'

"Mr. Taft, in his speech at Detroit last summer, declared that he was opposed to any amendment of the anti-trust law, which, he said, had been brought into practical and beneficial use by twenty years of litigation. The last Republican convention declared that the anti-trust law had been a wholesome instrument for good, but that experience had shown that its effectiveness could be strengthened. Mr. Taft stood squarely against this declaration in his speech at Detroit.

"Our attitude toward Mr. Taft can be expressed in the words of Abraham Lincoln, when he said: 'I will stand with anybody who stands for the right; I will stand with him while he is right, and part with him when he goes wrong.'

WHAT'S THE MATTER WITH CALIFORNIA?

Fostoria, Ohio, May 15.—The day began early for Colonel Roosevelt. He was up at six and made his first speech at Fostoria at 6:30 a. m. At that hour there were several hundred persons at the station. Later the colonel spoke to several hundred students of Oberlin college. When the special pulled in to Norwalk the station platform, running an entire block, was densely packed. No sooner did the colonel puff his hat than a voice rang out:

"What's the matter with California?"

"California is all right," replied Roosevelt, with that characteristic toss of his head.

"What's the matter with Ohio?" shouted a native son.

"Ohio is going to be all right," replied the colonel.

"I intend to take nothing that is not mine," said Roosevelt in a speech at Bellevue today, "but if anybody tries to take what is mine there will be a lively time."

"The powers of privilege in the Democratic party are helping our opponents in every way," said the colonel at Norwalk in New York and Massachusetts, the great Democratic papers, which represent the Democratic standpoint element, the papers that helped Parker in 1904, are practically all the organs of Mr. Taft. They are Democratic only nominally, they are the hidding of Wall street with the Democratic leaders in congress. They are working to prevent my nomination partly because they are afraid I shall win if I am nominated and partly because they do not like my style anyhow."

OHIOANS CHEER ROOSEVELT

Fostoria, Ohio, May 15.—When the Roosevelt train turned southward from Lake Erie at Sandusky today, the colonel met some of the most demonstrative crowds that have turned out for him in Ohio. The public square in Fremont was filled with a throng which cheered Roosevelt enthusiastically. Fostoria gave him a similar reception. Colonel Roosevelt held mainly to the themes upon which he spoke yesterday, assailing boss rule and proclaiming the right of the people to rule. The colonel smiled broadly when he was presented to the reception committee at Fostoria, consisting of a clergyman, a physician, a life insurance man and an undertaker. Colonel Roosevelt was much pleased at the reports from California that he was in the lead in the returns so far received from the primaries.

APPEALS TO FARMERS

An appeal for the farmer vote was made by Colonel Roosevelt at Fostoria.

"I want you farmers to remember that this is your fight," he said. "I know the season has been late and you are pretty busy, but you can't govern yourselves unless you take the trouble to do it. I want to see you take the trouble to go to the polls next week and find out who the delegates are you are going to vote for."

TRAIN IS HELD UP

(Continued from Page One.)

and they were safe as long as they remained inside the car.

The safe in the express car was secured by a time signal lock when the train left New Orleans last night and there was a guard in the car in addition to the regular messenger.

It is said that in the car there was one package of money representing the payroll of the Alabama & Vicksburg railroad at Meridian and about 25 packages of cash, representing the remittances of agents of the Southern Express company at points along the Vicksburg, Shreveport & Pacific railroad. There were also two or more sacks of silver, containing \$1,000 each, other packages of currency and several packages of jewelry, valuable stock certificates and bonds.

When the train was passing the flag station, Oklahoma, two masked bandits climbed over the tender and with drawn revolvers called out to Engineer Maher and his fireman to "Obey orders."

No resistance was offered and after the train had rounded the curve above Oklaola the engineer was commanded to stop. He complied promptly. With guns pointed at their heads the engineer and fireman were marched back to the baggage car, where Maher was ordered to call the express messenger, D. A. Gray of Chattanooga, who opened the door of his car only to look into the muzzle of a pistol. He obeyed the order to alight. Other trainmen were lined up alongside the train and leaving them in charge of his matter, the commanding bandit jumped into the express car and began work on the large express safe.

After walking backward for about 100 yards the men dashed off. It is believed they fled on horses which had been left in charge of a third robber. It is presumed the robbers are those who held up a Mobile & Ohio train near Corinth in February. None of the passengers were molested.

When the train reached bars express employees made an inspection of the rifled car. They poked up on the floor of the car about 300 silver dollars and found several silver dollars had adhered to the sides of the safe. They also found in the safe about \$700 in currency.

WILL VISIT HIS OLD HOME

Hagbert Anderson, city jailer, is to depart Saturday next for Christiania, Norway, after an absence from his old home of more than a quarter of a century.

The trip will be taken primarily for his health, but the pleasure of seeing the old folks is not the least of the impelling motives which prompted him to decide on the long journey across the seas.

Hagbert was injured in the Eccles fire, a piece of coping falling from the building, striking him on the head and splitting open his skull. For a time his recovery was thought to be impossible, but the wound healed and he gradually grew stronger, until now, that he is able to travel and has been advised to accept a leave of absence tendered by the city administration, he will go back to the scene of his childhood, among the floods of his native land, and he expects to return by August 1st, much improved in health.

A farewell surprise party was given Mr. Anderson last Friday at which there were many well-wishers.

TAFT RECEIVES POINTED QUESTION

Newark, O., May 15.—President Taft delivered his third speech of the day here to a good sized crowd. He spoke at length, reviewing the achievements of his administration. When he came to a discussion of the prosecution of the steel and harvest trusts, a man in the crowd yelled:

MINING NEWS

TIGHT REINS ON HIGHGRADE CAMP

Highgrade, the alleged new gold camp of California, has run foul of a state institution that promises to compel those operating within the district to confine their efforts purely to legitimate channels. State Mineralogist W. H. Storms has expressed a determination to prevent any wild catting in this embryonic district, but at the same time the promoters of the camp will be given every fair opportunity to make good. One of the first alarms to ring warning to the world was that the early stamperers were staking off claims in six to eight feet of snow. It will not be an easy matter to convince official Washington that locations thus made were by virtue of demonstrated ore showings of commercial value.

Mr. Storms has been assailed by a coast paper for his attitude, to which he replied in part as follows:
Gold is in Camp.
"I find certain mining publications

MINERS ARE IN CONVENTION

Wilkesbarre, Pa., May 15.—The tri-district convention of the United Mine Workers, called to consider the provisional agreement drawn up by the sub-committee of four miners and four operators, and which was rejected by the executive boards of the three anthracite districts, began here today with a full representation of delegates from every local union in the hard coal fields. A majority of the delegates were sent to the convention unattached.

The members of the executive board of the three districts were in session at the miners' headquarters until early this morning. They took up the agreement and while no official announcement was made, it is known they declined to report the agreement to the convention without recommendation.

President White attended the meeting and gave his views. He was ill in the west when the executive board voted down the agreement at their meeting in New York May 2. The convention will last several days and as the agreement is not satisfactory to many of the miners, it is expected there will be a warm debate.

advertising Highgrade as a camp

where success is certain. I do not blame the publishers of these papers for accepting this 'business,' as that is what the papers are printed for, to make money for their owners; but I do blame irresponsible promoters for the untruthful statements made by them and warn all intending investors to investigate carefully first. There is no doubt that there is gold in Highgrade, the principal property there at present being that of the Fort Bidwell Consolidated Mining company, which has a ten-stamp mill.

"The camp will probably develop other good mines; I hope it will; but I repeat what I have already said, that the present knowledge of the camp does not justify the strenuous attempts being made to create a stampede to that district where the snow is still deep, for if a rush does occur it is bound to result in great hardship to many, besides the loss of money, which most of those joining in the rush can ill afford. They who profit by the stampede are the promoters, the transportation companies and the saloon men; that others will, is doubtful. I have been in many mining camps and an experience of many years in this sort of thing makes it unnecessary for me to visit it to know and say that every foot of ground that shows a sign of mineral, and much that does not, has long been located on general principles.

To Protect Investors.
"I note you conclude your editorial by advising me to remain in California, as 'knockers' are not wanted in Nevada. I will respectfully call your attention to the fact that Highgrade camp is in California and is within the jurisdiction of my official inquiry. I wish Highgrade well, but I also wish the investors well, and it is my intention to protect them in this, as well as in every other attempt of irresponsible boosters, to sell stock in companies organized not to mine, but to exploit the public."

WORK RESUMED AT OLD PIOCHE GROUND.

The first real evidence that Pioche has had that there is to be a revival of activities at the Amalgamated Pioche properties was evidenced by the arrival here of H. Van Wagonen and Allan H. Rogers, consulting engineers for the Nevada-Utah and allied interests. Mr. Van Wagonen reached Pioche Thursday morning and at once took steps toward the resumption of work at Amalgamated Pioche No. 1 shaft.

Yesterday the Pioche Pacific railroad company began hauling coal to the mine over the "high line" and it is expected that everything will be in readiness to start the engines tomorrow or Monday. The first move will be to unwater the mine and before this task shall have been accomplished the pump will have to be in operation several days.—Pioche Record.

TODAY IN CONGRESS

BROOKLYN BRIDGE UNDERGOES REPAIR

New York, May 14.—That some fears are felt for the safety of the old Brooklyn bridge, which still carries a considerable share of the traf-

fic between Manhattan and Brooklyn

is indicated by orders issued by the city bridge department prohibiting heavy teams from using the roadway and directing the elevated railway to curtail their traffic in the rush hours. Extensive repairs are being made to the structure.

A statement given out by the secretary of the public service board says:

"The bridge is rather old, and its construction is not the most modern, but with the repairs that are continually being made it is safe to believe that it will be many years before it will be necessary to condemn it.

"The strain on the bridge when heavily laden with cars, trains and trucks is naturally very great, and for this reason it has been deemed wise to restrict traffic thereon."

SOUNDED LIKE IT.

"Doctor, I see by the clock that I was under the influence of chloroform more than an hour. Did you have anything to do besides resetting that broken bone?"

"Nothing but a little supplementary operation or two."

"Supplementary? Great Scott! Did you cut out my appendix?"—Chicago Tribune.
