UNCLAIMED SCHOOL MONEY

HAS BEEN IN A LOCAL BANK THIRTEEN YEARS.

Large Sum to Be Added to the Funds of City and County Schools—Letter to Standard.

For some time the school boards of Ogden and Weber county have been considering the question of the disposal of \$3,074.10 of money which has been in the Ogden State bank thirteen years. In order to explain the source of this money, the Standard sent a communication to the Ogden State bank, to which the following reply by the bank has been received:

"Editor Standard: In reply to your inquiry as to whether there is any school money on deposit with us, are pleased to say that there is a balance of Three Thousand Twenty-four and 10/100 Dollars (\$3,074.10) standing on our books to the credit of the Territorial School Fund. The transactions in this account covered a period of several years during which time various deposits were made to it and very many drafts drawn against it by the County Superintendent of Schools. Finally the checking ceased, leaving a balance as stated. We do not know why it has not been disbursed but probably was overlooked by the Superintendent.

"We wish to say, however, that the money has at all times been carried by us in an open account on our balance books and ledger, subject to the order of those authorized to draw against it."

The money is to be paid over to the school funds, with 2-1/2 per cent added, aggregating about \$4,000, of which the city will receive about \$2,800.

EXPLOSION OF A BARREL OF PAINT

WORKMEN SEVERELY BURNED IN THE CARLIN SHOPS.

One of the Victims, Swathed in Bandages, is Conveyed to the Ogden General Hospital After Arriving.

Dallis Meyers and H. I. Johnson, employees of the Southern Pacific shops at Carlin, were frightfully burned Monday afternoon by the explosion of a large barrel of smokstack paint. The barrel—the contents of which were thick and similar to asphaltum paint—had been rolled near a large heating stove in the shops to allow the inflammable material to soften and become thin, when the staves were ignited and before the fire could be extinguished the barrel exploded, hurling the burning paint in every direc-

PRESTON, ONE OF CLARK MURDERERS IN CUSTODY

Self-Confessed Confederate of Burns and Shine Will Arrive From Salt Lake on Afternoon Train—He Will Be Placed on Trial for Burglary in Robbing the Box Car at Uintah.

Deputy Sheriff P. J. Naylin will arrive from Salt Lake on the 5:20 train this afternoon with the self-confessed box car robber who acknowledges he was present when Deputy Sheriff Clark was killed at Uintah by one of three men engaged in robbing a Union Pacific car of six cases of shoes. This simply verifies the exclusive story published in the Examiner of Preston's confession of being implicated in the box car robbery and the subsequent murder of Deputy Sheriff Clark. Preston will be charged with bur-

lary, in robbing the cars of shoes, and his own confession, as published in the Examiner, will probably result in Preston being sentenced to the penitentiary for a term of at least three years, and he will be safely kept for that length of time in the event of his confederates in the crime being apprehended in the future.

Until the prisoner has been examined and his confession, made at Salt Lake, repeated to Weber county prosecuting officials, Preston will not be allowed to talk with newspaper reporters.

FINE HOME SAVED FROM DESTRUCTION BY FIRE

The fine new bungalow home of H. E. True, 2561 Fowler avenue, was the scene of a blaze this morning which, for a time, threatened its total destruction. Mrs. True noticed smoke in the kitchen shortly after eight o'clock and upon going to the basement entrance, discovered the woodwork of the basement on fire. She immediately turned in an alarm by telephone and then gave her attention to subduing the flames in person. R. M. Robinson, who lives across the street from the True home, noticed the escaping smoke and rushing into the house endeavored to extinguish the flames with several buckets of water. The fire had gained considerable headway, however, and his efforts were without avail, but with the arrival of the fire department, the flames were soon under control. About \$100 worth of damage was done to woodwork and house furnishings, fully covered by insurance. It is thought that a defective flue of the furnace was the cause of the fire.

WOODMEN OF THE WORLD.

The Degree team and members of Logan will visit this camp and initiate candidates Thursday evening, March 11th. Kaysville camp will also be present. Members and visiting members are invited.

HARRIHAN OF ILLINOIS CENTRAL

GREAT RAILROAD MAN PASSES THROUGH OGDEN.

Non-Committal When Interviewed and Declines to Affirm or Deny He is to be Promoted.

President J. T. Harrihan of the Illinois Central Railroad company arrived from the east on the west-bound fast mail train at 12:55 this afternoon and was met at the Union depot by W. H. Snedaker, general agent of the Illinois Central system at San Francisco, and J. A. Foley, general agent of the road in Utah.

Replying to inquiries from a Standard reporter who invaded the observation end of the private Illinois Central car "Marionette," President Harrihan said:

"No, my trip west has no especial significance at this time and I have nothing to say in reference to retiring from the Illinois Central company. While I may meet Mr. Harrihan on the coast, I have no engagement with him and no business of importance of a railroad nature to transact. I am just resting up a bit and thought a trip to California would do me good at this time. I know nothing in reference to any changes contemplated on any of President Harrihan's roads in the west and do not care to discuss them. I do not know how long I will remain in the west.

"Business conditions are improving generally all over the country and railroad matters are naturally affected in a similar way."

As his name indicates, President Harrihan is a typical Irish business man in appearance and is perhaps 55 years of age. While anything but robust, his appearance indicates general health and he smiled pleasantly when the reporter suggested that he was making no business of importance of a railroad nature to transact. He is a man who could stand off an army of newspapermen without yielding up an atom of news—unless he wanted something made public regarding his purposes or intentions.

LION AFRAID OF BOARHOUND.

Tamers Use Big Dogs to Keep Unruly Charges in Subjection.

The boarhound growled, and the great yellow lion leaped back in fear. "The lion could kill the hound," the trainer said, "but he doesn't think so. He thinks the hound could easily kill him."

"Why?" "When the lion was a cub, this boarhound, full-grown, lived in the cage with him. The big dog could, of course, lick the little cub, and the cub therefore feared and respected him. Now the cub is grown up, but he still thinks the hound is the better man."

M'GUIRE AND BRAMLETT FREE

MEN ACCUSED OF ROBBING OLD MAN NAMED GOFF.

Escape on a Technicality From the Meshes of the Law—Decision Given in District Court.

In district court this morning the defendant's motion to strike out the information against B. J. McGuire, John K. Garrett and R. E. Bramlett, charged with robbing Frank Goff of \$300 and a gold watch, was granted and the three men discharged from custody.

Goff was robbed several weeks ago and charged these men with the crime. They were arrested and, after an examination extending over several days in municipal court, were bound over to the district court and formal information filed against them. The information failed to state when or where the robbery occurred and on motion of defendant's counsel the trio were dismissed.

In the meantime a second information had been filed, but this proved equally fruitless and the men accused of the grave crime have succeeded in obtaining their liberty through a technical error of serious nature.

The judge, in his decision said: "While the court is convinced that the conclusions arrived at in the foregoing are correct, still even assuming that they are not, still the right of the state to further proceed in this action is of such a doubtful character that it seems to the court it ought not to proceed further without a determination thereof by our highest tribunal. There are three defendants charged in the information in question here, each of whom upon the previous information filed demanded a separate trial, and might do so again, so that it would be necessary to have three trials consuming a great deal of the court's time, and before undertaking such a procedure as is herein sought to be indulged in should have the sanction of our highest tribunal, such action on the part of the trial court being justified both for the sake of the defendants, who might be required unnecessarily to undergo a trial upon a charge, if the filing of this information were not proper, and also for the sake of economy to the state, that if such procedure is held to be not justified by our own supreme court and the state and the county should not be put to the expense of these trials.

There has been some question raised as to the form of the remedy which the defendants have in this case. Our supreme court has said that ordinarily a motion to quash the information is the most appropriate remedy where a failure to hold a preliminary examination is relied upon. (State vs. Spencer, 15 U. 156). But it seems to the court that after all the form of the objection is timely, and that in this case the consistent course for the defendants to take is to do as they have done to move to strike the new information from the files on the ground that the action is ended and such information has no place in the proceedings.

The motion of the defendants may therefore be granted and of course the motion of the district attorney for their arraignment, as well as for the fixing of their bail, must be denied, there being no information upon which to arraign them. In other words, it would seem that the proper attitude for the court is to refuse to proceed in this case further, owing to the fact that it has been dismissed and to allow the state to secure a review of this refusal by a writ of mandamus, or other appropriate remedy. It is so ordered.

MARRIAGES

Marriage licenses were issued this morning to David E. Davis and Juanita Carver, both of Ogden; to Benjamin F. Pierce of Salt Lake and Annie L. Middleton of Ogden, and to Joseph Wood and Clara Bingham, both of Ogden.

JOHNSON WANTS A FIGHT

Victoria, March 9.—Jack Johnson, the heavyweight champion pugilist, and his wife, a former Philadelphia woman, who threw in her lot with him after the fight at Sydney, and Sam Fitzpatrick, who is no longer manager of the big black champion, having severed his relations with him, arrived this morning by the Canadian-Australian liner Makura from Sydney. Johnson unreservedly declared his willingness to meet Jeffries or any other man.

In an interview just before leaving Vancouver, Johnson said to an Associated Press representative: "I am willing to meet Jeffries; I am willing to meet any man in the world, and don't think that anyone can get a decision over me, much less put me out. It amuses me to hear his talk about Jeffries claiming the championship. Why, when a mayor leaves office, he's an ex-mayor, isn't he? When a champion leaves the ring, he's an ex-champion. Well, that is Jeffries; he wants to get the championship back and I'm willing to take him on."

"No, I'm not making any restrictions. What's the matter though in the talk of arrangements of a fight with Jeffries? What will Johnson take? In all the notices I have seen, it's all what Jeff will take. What's the matter with what Johnson will take? I'm the champion ain't I? I want a winner and loser's end; I don't care what it is, 60 and 40, or 75 and 25, but there's got to be a winner and loser's end. That's how it was with Burns."

"I knew I could get him and I followed him around the world before I got on with him at Sydney to show the people that I could do it. If Jeffries wants a go, as the papers say, he's to see me."

MANY ACRES WILL BE OCCUPIED BY IRONWORKS.

Railroad Officials Who Say Ogden Should Awaken to the Importance of These Big Improvements.

In connection with the exclusive story recently published in the Standard regarding the early erection of a mammoth foundry plant at Ogden by the Harriman management, it is now positively known that plans, specifications and estimates are being prepared for the different buildings which are to form the largest plant of this character between Omaha and Sacramento.

The new foundry will occupy a large area of ground than both the Sacramento and Omaha plants combined, and will require about thirty acres of land. A greater part of this ground is already in possession of different corporations comprising the Harriman system, and the remaining two parcels of land are believed to be held in the shape of indirect options that may be diverted to the Harriman management at the pleasure of the latter.

There is a well defined suspicion that all of this large tract of ground will not be required exclusively for the foundry plant, side tracks and accessories, and that ten or fifteen acres of the land may be utilized in the near future in the construction of a second large plant for manufacturing purposes.

Harriman officials are reticent and non-committal on the subject, but it is known that title records of vacant ground on the west side of the Ogden yards have been examined closely during the last few months, and a suspicion is abroad that the Harriman management is not especially solicitous of acquiring more valuable Ogden realty than is required to carry out plans for improvements and enlargements necessary to handle successfully the enormously increasing business to and through Ogden.

"I have nothing to say on prominent Harriman official to a Standard reporter this morning, as the railroad man casually and quietly covered up a batch of official correspondence on his desk, "but if the people of Ogden don't appreciate the fact that the management generally is favorable to this city in every way compatible with good business judgment, they are simply asleep—that is all."

DENNY WAS DECLARED INNOCENT

COURT EXONERATES HIM OF ANY WRONG DOING.

Automobile Was Well Behaved and Denny A. Smyth Was Not Exceeding the Speed Limit at Any Time.

The morning grind of police court was taken up largely with the trial of Denny A. Smyth, charged with violating the automobile ordinance. One of the witnesses for the prosecution was not present, he having disregarded the summons to court on account of the order having been read to him over the telephone. Attorney Horn, for the defense, opposed a postponement of the trial and City Attorney DeVine finally announced that the prosecution would proceed with what witnesses were available.

Officer Reast, who made the arrest, stated that he had observed Mr. Smyth driving his machine at a speed of 25 miles an hour down Washington avenue and demanded the number of his machine. Later in the day, the officer notified Mr. Smyth that he must appear in court. The witness testified that he was an old railroad man and was, therefore, able to judge the speed at which the machine was being driven.

Peter Madison testified that he was in the machine when it was stopped by Officer Reast and that he heard nothing which would lead him to think that Mr. Smyth was being placed under arrest. Nor did he think that an illegal rate of speed had been indulged in.

Mr. Smyth was then called to the stand and proceeded to tell his story which at times was somewhat amusing and brought forth considerable laughter on the part of those present. He denied that he had exceeded the speed limit and claimed that he had, at all times, been as careful about his speed as any man who had ever possessed an automobile and had driven it. He admitted that he had a speedometer on his machine, and that, in view of the fact that it cost \$75, he held that it must be a good one beyond question.

The examination of the various witnesses brought on a number of brief exchanges of sarcasm between the attorneys, the question being raised as to which one was best fitted for the tutelage of the other. The court calmed them, however, and after due deliberation, ordered the defendant dismissed.

MINING CONGRESS STRENGTHENS ORGANIZATION

Denver, Colo., March 8.—The effectiveness of the American Mining Congress is to be greatly increased by a plan, as announced by the board of directors, of having local officers and subsidiary organizations in each of the mining centers, where no active associations are now in existence. Hereafter the congress has been exclusively national in its scope, giving little attention to the local problems that vex the camps individually, but its growing strength in all the mining states. With now a large membership in each, has suggested a new arrangement under which each state will have its own branch organization, with local officers and committees in charge. The national organization will thus be brought into close contact with the small operator as well as the large one, and the entire strength of the national body will, if necessary, be thrown behind any local movement for relief from conditions generally oppressive to the industry.

Besides having a vice president for each state, who will preside over all local meetings, and look after the local affairs of the Mining Congress, standing committees will be appointed by the congress for each state for the purpose of ascertaining how the industry is locally affected by such questions as the forest reserves, smelter rates, transportation rates, labor conditions, etc.

A Housewifely Request. She—Dearest, are you going fishing? He—Yes, darling. She—Well, I want to put up some preserves this year. Won't you catch me some jelly fish?—Baltimore American.

DISCOVERED HIS WOODEN LEGS BLAZING

FIRE DEPARTMENT AROUSES HIM FROM SLEEP.

Fire in Hotel Was Confined to His Room, His Wooden Extremities Furnishing the Fuel.

San Francisco, March 9.—A special from San Jose states that when George Campbell of Sunnyvale was rudely awakened by the members of the fire department of that place, he discovered that both of his wooden legs were merrily blazing. Campbell was sleeping in the American hotel when a fire broke out. His life was probably saved by the daughter of a proprietor, who discovered the blaze and ran in her nightclothes to warn the fire department.

The blaze was practically confined to Campbell's room and he slept blissfully while his wooden extremities provided fuel for a lively bonfire. The chief damage was done to the legs.
