

Consumption Can Be Cured.

Mrs. Nettie Carter of Elkton, Ky., after her physician had told her that she had consumption took Duffy's Pure Malt Whiskey, and has been completely restored to health. Appetite is good, she sleeps well, and enjoys life without pain or ache.

"I had acute indigestion for two years, which kept growing worse. I employed several physicians without any benefit. I came near starving, as I could eat very little. For several months I suffered frequent attacks of vomiting, which made me very weak. Finally my physician told me that I had consumption. This filled me with terror.

"In an advertisement in the Nashville 'Banner' I read that Duffy's Pure Malt Whiskey was recommended for Tuberculosis or Consumption. I began to take it in desertspoonful doses four or five times a day, and a table-spoonful at bedtime. I am now strong and well. Cough, distress in my chest, and the indigestion are gone. My appetite is good; I sleep well. This is all due to Duffy's Pure Malt Whiskey, which I regard as an unfailing cure of consumption if taken in time."—Mrs. Nettie Carter, Elkton, Ky.

Duffy's Pure Malt Whiskey

cures diseases of the throat and lungs and all run down and weakened conditions of the body, brain and nerves. It builds new tissue, invigorates body, brain and nerve, quickens the circulation and aids in driving out all disease germs. It is prescribed by doctors and is recognized as a family medicine everywhere.

CAUTION—When you ask your druggist, grocer or dealer for Duffy's Pure Malt Whiskey, be sure you get the genuine. It is the only absolutely pure medicinal malt whiskey, and is sold in sealed bottles only, never in bulk. Price \$1.00. Look for the trade-mark "Old Chemist," on the label, and make sure the seal over the cork is unbroken. Write the Medical Department, Duffy Malt Whiskey Co., Rochester, N. Y., for a free illustrated medical booklet and free advice.

BIG LAND DEAL IS CONSUMMATED

A deal involving a large sum of money was consummated yesterday afternoon by which D. A. Smyth, proprietor of the European hotel obtains possession of all the land and sheep interests of the late A. R. C. Smith of North Ogden. The vast tract of land is about twenty miles square and is considered one of the best ranges in this section of the country. A large number of valuable blooded sheep were included in the deal. The property extends from North Ogden canyon to the North Fork.

A number of bids from sheep men of Utah, Idaho, Wyoming, Nevada and other points were offered for the property, but Mr. Smyth succeeded in swinging the deal. Mr. Smyth expects to improve the property in many ways, and to enlarge the business of the ranch. The sale of the property was made through the executors of the estate, Mrs. A. R. C. Smith, M. S. Browning and John Watson. The acquisition of this property by Mr. Smith involves one of the largest deals of its kind ever transacted in Utah.

NEW HIGH SCHOOL TO BE COMPLETED

The Board of Education held a short session last night in the room, oil chamber. Nothing but regular and routine business was transacted. The finance committee reported a cash balance of \$7,546.94 and the sanitary committee, reported two cases of scarlet fever and one case of diphtheria.

The building committee recommended that sixty lockers be purchased from the Y. M. C. A. of Salt Lake at \$3.50 per locker, but after considering the matter it was decided that the price was not very alluring and the matter was laid over for one week's consideration.

Samples of bronze tablets will be received from eastern manufacturers within the next ten days and from these samples there will be selected the plate which will be placed over the door of the new High school building.

The drinking facilities at the Pine school were reported as not being in the best condition and it was recommended that a drinking fountain be placed on the campus at that school. This was referred to the building committee to report.

Principal Wittle, of the Lewis school proposed the erection of a statue of T. B. Lewis, the man whom the school was named after, should be placed in the halls of that school, and it was requested that he be given the authority to start a subscription in the school to raise enough money to purchase the statue. The permission was granted on the condition that the students were not to be urged to contribute and that they contribute voluntarily.

Architect Hodgson informed the board that the new High school building would soon be finished and everything would be in fine shape. He said that the heating plant will not be perfect for some time as a great many inspections will be necessary to make it perfect.

NOTICE TO WATER USERS.

State Engineer's Office, Salt Lake City, Utah, Sept. 20, 1909. Notice is hereby given that Eva P. Lewis, whose post office address is Ogden, Utah, has made application in accordance with the requirements of the Compiled Laws of Utah, 1907, as amended by the Session Laws of Utah, 1909, to appropriate six (6) cubic-feet per second of water from Cold Water Creek, Weber County, Utah. Said water will be diverted at a point 20 feet above the intake of the present Ogden City's water pipe, from which the water is drawn, to a point on the west quarter corner of Section 10, Township 6 north, Range 1 east, Salt Lake base and meridian, bears north 60 degrees east 2,100 feet distant, from which point it will be conveyed by means of a pipe line for a distance of 3,000 feet and there used from January 1 to December 31, inclusive, of each year, to develop power for the purpose of electric lighting and propelling machinery in Ogden City and resorts in Ogden Canyon, Utah. After having been so diverted and used, the water will be returned to the natural channel of the stream at a point from which the above described land corner lies east 2,550 feet distant. This application is designated in the State Engineer's office as No. 2390. All protests against the granting of said application, stating the reasons therefor, must be made by affidavit in duplicate and filed in this office within thirty (30) days after the completion of the publication of this notice.

CALEB TANNER, State Engineer. Date of first publication October 14, 1909, date of completion of publication November 13, 1909.

SALT LAKE AND STATE NEWS CONSTRUCTION WORK ON HARRIMAN LINES

Salt Lake City, October 15.—According to a recent statement of Julius Kruttschnitt of the Harriman lines, the more important extensions of the Union and Southern Pacific systems now under actual construction aggregate 2000 miles and will reach new territory in almost every state through which the lines are to run.

Of the extensions being constructed 600 miles are in the territory of the Union Pacific.

On the Oregon Short Line, which runs from Granger, Wyo., and Ogden, Utah, to West Huntington, Or., 293 miles of the extensions are nearing completion. A branch from Huntington northward up the Snake river to Homestead, a distance of fifty-eight miles, is about finished, also another branch sixteen miles long from Yale, Or., west along Willow creek which will serve a newly irrigated section. In southern Idaho a seven-and-a-half mile line is being built from Rupert west, running north of the Snake river to Bliss, beside other extensions in the same section, including extension from Buhl west, aggregating fifty additional miles. The Lemhi and Salmon valley was incorporated recently in Idaho to build from Lewiston, Ida., southeast to the Little Salmon river, thence east to Salmon, 230 miles, thence south to Cerro Grande, 148 miles, with the following branches: Salmon, southeasterly to Challis, fifty-one miles; from a point forty miles north of Cerro Grande east to Kamas, thirty-five miles. Surveys made by the northern and western for a line from Twin Falls, Ida., south to a connection with the Southern Pacific, about twenty miles east of Wells, Nev., or Coble, 120 miles.

In the territory of the Oregon Railroad & Navigation company 191 miles of new line are being graded. From Centralia, Wash., between Portland and Tacoma on the Northern Pacific, the section recently double-tracked for traffic of the Harriman lines, a branch is being run west to Gray's Harbor, fifty-eight miles. This will ultimately run northward 100 miles to Puget Sound through one of the finest forest sections in the world.

The Oregon & Washington, building from Portland, Ore., north to Tacoma and Seattle, Wash., 230 miles, has started tracklaying. Extensions under way on the Southern Pacific total over 400 miles. An important new low grade line will be completed so far as the Southern Pacific's share of construction is concerned, with the closing of the gap between Winkelman and San Carlos, Ariz., on the Gila Valley, Globe & Northern, about thirty miles. The Southern Pacific will then have a line between Bowie on the main line in the southeastern part of the state, west to Phoenix, from which place the Santa Fe has built to Parker on the Colorado river at the California boundary.

U. S. Inspected Meats

When making your purchases at the meat markets, for the protection of yourself and family, see that the meats are from carcasses carrying this stamp.

This stamp is an absolute guarantee by the U. S. Government that the meats are sound, wholesome, clean and free from disease when slaughtered.

You never did hear of a tuberculous beef or cholera hog or any other diseased animal being offered for sale by a U. S. Inspected Establishment **BECAUSE AT SUCH ESTABLISHMENTS THE GOVERNMENT DESTROYS SUCH MEATS**

BUT you do frequently hear of diseased animals being offered for sale from other sources **WHERE THERE IS NO INSPECTION**, and only a vanishing fraction of such cases are ever brought to the attention of the public.

Why Take any Chances of Getting Diseased Meats, endangering the health of yourself and family, when the U. S. Government is appropriating annually \$3,000,000 to protect the public against such meats by maintaining inspection at sanitary plants? Stop to consider why such sums are annually expended by the U. S. Government! Inspected meats are natural outgrowth of the more sanitary living.

Watch for the inspection stamp on the carcasses of meats as you enter your meat market. **If You Do Not See the Stamp It Is Time to Change** To answer the numerous telephone inquiries we are publishing a list of the markets where our meats may be purchased. See if your market is listed. Ballard & Belnap, Chicago Market, California Market, Armour Meat Market, London Meat Market, Wright Meat & Gro. Co., Huseman Market, Ogden City Meat Market, Coop & Baker, Ogden Meat Co., Mound Fort Market, Seager Meat & Grocery Co., Sawyer Bros., Cardon Bros., Biel & Son, M. Grill, Pingree & Keller, C. E. Peterson & Co., Moulding Meat & Grocery Co.

Eat Inspected Meats and You Will cut off one of the Avenues Through Which Disease May Enter Your System

GREAT SHOW AT THE ORPHEUM

A TREAT FOR THE YOUNGSTER—"JACK, THE GIANT KILLER"—AT THE ORPHEUM.

The greatest bill in the history of the local Orpheum—and there have been some splendid ones—will be presented during the coming week, opening with tomorrow night's performance. It will appeal to all but especially to the children, as it includes the tallest and the smallest actors in the world in a bit from fairy land, "Jack the Giant Killer." The matinee Saturday will be a special one for school children, commencing at 2:45 o'clock. Tickets should be secured early for all performances as the bill has been a record-breaker wherever it has been presented. Geo. Auger & Co., in "Jack the Giant Killer," a playlet taken from the fable of that name, is considered one of the most artistic sketches on the vaudeville stage. Here truth is stranger than fiction inasmuch as the cast includes a real giant and a real Jack. Geo. Auger, the giant actor, and Ernest Rommel, the smallest actor and singing comedian in America. Thus "Jack, the Giant Killer," is presented in actual reality. Messrs. Auger and Rommel are ably assisted by Daisy Robinson. This sketch not only appeals to the grown-up, but is thoroughly enjoyed by the children. Special scenery, lighting effects and the work of an excellent company of play-ers makes this one of the most attractive numbers on any program. Carson and Willard, two Dutch comedians, have a most laughable and highly diverting act which they style "The Dutch in Egypt." They are both exaggerated tourist dress and in a scene representing the Sphinx and the Desert of Sahara they impersonate probably two of the funniest Dutchmen who ever crossed the sea. The Thalia Quartette is an organization that has met with huge success in the British Isles. It consists of Dan Thomas, tenor, who thrice carried off the blue ribbon at the national Elstisford of Wales; Ivor Davies, tenor and gold medalist; Idris Perkins, baritone and comedian, double gold medalist; holder of two silver cups and three winner of chief solo honors in the national Elstisford of Wales, and formerly comedian of the Gaiety theater, London; and Leonard Bean, bass, who has been rightly termed the "Ideal Basso Profundo."

Joe Jackson, the European Vagabond, has a bicycle performance which is unique, and after having scored heavily in Berlin he comes here almost direct from a successful engagement in the east. Laura Buckley, protean monologist, appears in three character sketches which is unique, and after having scored heavily in Berlin he comes here almost direct from a successful engagement in the east. Sam Albertus and James Altus have been popular on the continent and in England for a number of years. They are eccentric jugglers and come direct from a successful engagement at the London Coliseum. New pictures on the kinodrome and special selections by the Orpheum orchestra will complete the bill.

center the whole exhibit will be the six beautiful cups won by Utah in recent dry farming congresses. In this collection will be the famous Hearst trophy won at Albuquerque last year. A feature of Utah's exhibit is to be a series of lectures by the three Utah representatives. These will be given in the lecture hall at one end of the exhibit chamber. While not fully decided it is probable that the lectures will be illustrated with moving pictures. The Utah dry farm promoters believe that the Chicago exposition is going to do a great deal of good, not to Chicago alone, but to the west. The dry farming business is understood fairly well in the west, having been boosted at conventions in western cities, but never has it got such a boost in the east. Professor Merrill voices the sentiment in that line when he says: "We have said our say in the west and people are not looking for what we have to offer. We need to get into the east where there are more people. We have the lands out here and they have the people there. If the two can be brought together in some way, the west will be given a wonderful impetus. Utah's semi-arid land is being opened rapidly by the government and there is a great deal of it being taken up. This of course, means much to the wealth of the state. We are out in earnest after the honor of having the best exhibit in the exposition as that naturally will train all eyes toward Utah as a land of opportunity." In one corner of the exhibit will be a sample of the produce of the Utah basin. This basin was opened but a few years ago and already it is producing all kinds of crops. Orlando J. Bracken of Utah will have charge of an exhibit of pears, apples, potatoes, corn and other vegetables and fruits which will be placed in the general exhibit of Utah.

UTAH AT DRY FARMING CONGRESS IN CHICAGO

A strong effort is to be made to have Utah represented at the Chicago dry farming exposition next month, in better style than any other state in the union. Plans which are now under way guarantee that other states will have to make rapid strides to eclipse the Utah exhibit. Working on the arrangements are J. Edward Taylor, state horticultural inspector, Thomas Judd, president of the state horticultural board and Professor Merrill of the agricultural college of Logan. These three men represent three parts of the state—Mr. Merrill the northern part, Mr. Taylor the central part, and Mr. Judd the southern part. They are working to bring together an exhibit representative of the best irrigated and semi-arid land of the state. These will be on an even more bounteous scale than the exhibits which won the sweepstakes prize and others at the dry farming congresses in Sacramento and Albuquerque. Under the direction of R. R. Holbrook of Sacramento, the Utah exhibit will be shipped from Chicago, November 1, and will be hurried through to Chicago. Samples of grains from irrigated and dry land farms, fresh and dried fruits, nuts, raisins, semi-tropical fruits and vegetables will be arranged in attractive booths. While not necessary in line with farming a good showing of ores from Utah's mines will be on exhibit. In eight show cases will be samples of gold, silver, lead, iron and hydro carbons from Utah fields. In the

REMARKABLE COUNTRY NEEDS RAILROAD

Salt Lake, Oct. 15.—C. D. Lowe, postoffice inspector, with headquarters in the federal building here, returned from an extended trip through the southern counties of Utah and the southern part of Arizona this morning, after having been on the road since September 23. During this trip Inspector Lowe visited all the postoffices between Marysville, Utah, and Fredonia, Ariz., including Pipe Springs, Rockville, St. George and Modena. "The route from Kanab to Panguitch are in a frightful condition," said Inspector Lowe this morning, "as a result of the heavy rainstorm and the washouts of July. It was necessary to travel for from a half to three-quarters of a mile around these washouts in many places. It was a two days' ride to civilization from Kanab to Rockville. The roads are virtually impassable at many points, and something should be done by the authorities of the various counties looking to improvement. "The new routes that were established for the delivery of mail to the isolated communities during the last year have been a boon to the people."

Anty Drudge on Marriage.

Miss Dolly Dainty—"I certainly do love James—but he's far too poor for us to get married. I'm not strong enough to do the family washing myself, and we cannot afford a girl." Anty Drudge—"Get married right away if that's all that stops you. You're plenty strong enough to wash clothes the Fels-Naptha way. Fels-Naptha is easy on the woman; easy on the clothes."

Easy on the woman: easy on the clothes! That, in a nutshell, is the Fels-Naptha way of washing.

Fels-Naptha soap does away with all the hard and disagreeable part of washing clothes. Little rubbing, no steaming suds to bend over, no keeping up fire to boil the clothes, no nauseous odor from cooking soiled garments. Then, clothes last longer with no boiling to weaken their fiber and no hard rubbing to wear them thin.] Look for the red and green wrapper.

Driskell positively identified by Nebeker. Salt Lake, Oct. 15.—L. E. Driskell, who with R. E. Kennedy is now in the city jail, has been positively identified by Knowlton Nebeker as one of the two men who held up and robbed him on the night of October 5, a few minutes before Special Officer C. C. Riley was shot and killed by two highwaymen. The police feel certain that in Driskell and Kennedy they have the murderers, and are leaving nothing undone to fasten the crime on them. For several hours today the men have been undergoing the "sweating" process in the office of Chief of Detectives Sheets. This afternoon the process will be repeated. The men were interviewed separately and then the police compared their statements to see how nearly they agreed. This afternoon Sheets stated that he had nothing new to give out. "I am still satisfied that we have got the right men. That is all that I care to say at the present time," said he. Marriage Licenses—Marriage licenses were issued to James C. Palmer, Grand Valley, Garfield county, Utah and Miss Jennie Frick, Rifle, Garfield county, Utah.
