Over-Worked Girls

Read What This Girl Says:

Appleton, Wis.—“I take pleasure in writing you an account of my sickness. I told a friend of mine how I felt and she said I had female trouble and advised me to use Lydia E. Pinkham's Vegetable Compound, as she had taken it herself for the same trouble with wonderful results. I had been sickly for two years and overworked myself, and had such bad feelings every month that I could hardly walk for pain. I was very nervous and easily tired out and could not sleep nights. I had dizzy spells, and pimples came on my face. But I have taken your Vegetable Compound and I am entirely cured. I think it is the best medicine in existence.”—Miss Cecilia M. Bauer, 1161 Lawrence St., Appleton, Wis.

THIS GIRL SAYS IT IS WOMAN'S BEST FRIEND:
Chicago, Ill.—“Your Compound cured all my troubles and I am feeling strong and happy and able to work now. Wherever I go I shall praise Lydia E. Pinkham's Vegetable Compound, as I think it is woman's best friend. I have told all my friends the good it has done me.”—Miss Maggie Isbauer, 2418 So. Whipple Street, Chicago, Illinois.
Lorimer, Iowa.—“I had a heavy cold in the spring and got all run down and was irregular. I had no strength and had bearing down pains in my sides and back, and was very nervous and excitable. I took Lydia E. Pinkham's Vegetable Compound, and I am all right again, and stronger than before.”—Miss I. E. Williams, Lorimer, Iowa.

Is it not reasonable to suppose that a medicine that did so much for these girls will benefit any other girl who is suffering with the same troubles?

Does it not seem the only sensible thing to give such a medicine at least a trial? You may be sure that it can do you no harm, and there is lots of proof that it will do you much good.

For 30 years Lydia E. Pinkham's Vegetable Compound has been the standard remedy for female ills. No sick woman does justice to herself who will not try this famous medicine. Made exclusively from roots and herbs, and has thousands of cures to its credit.

Mrs. Pinkham invites all sick women to write her for advice. She has guided thousands to health free of charge. Address Mrs. Pinkham, Lynn, Mass.

Dr. FARRNEY'S TEETHING SYRUP

EXPOSITION SITE FINALLY CHOSEN

San Diego World's Show is to Be Greater Than First Planned.

SAN DIEGO, Calif., Oct. 15—After several months in making preliminary surveys and much time and effort expended in planning accommodations for the various divisions of the Panama-California international exposition in Balboa Park, the buildings and grounds committee of the exposition and the city park commission have decided upon the actual ground in the park where the exposition will be built, and Director of Works Frank P. Allen, Jr., has presented the complete plans for adoption. Construction on the Administration and California buildings will begin November 1.

The site finally selected for the exposition embraces approximately 400 acres of high and comparatively level ground in Balboa Park and is so situated that it will permit of almost unlimited extension beyond its own confines should the growth of the exposition demand it.

The first intimation that more space than at first had been considered sufficient would be needed came when Director General D. C. Collier and other members of the legislative committee of the exposition wrote from Washington, after having been there several weeks, that indications for a much larger exposition than had previously been figured on were apparent. Then came a trip through the southern states by Director General Collier and G. Grosvenor (Dawe) of the Southern Commercial Congress, who aroused the enthusiasm of the southerners in the exposition to a high pitch, and secured promises of participation that made it certain the original site would not contain the exposition.

Meanwhile, a representative of the government of Brazil, who had met and talked with Director General Collier and other representatives of the exposition in New Orleans, came to San Diego. This representative was Eugenio Dahne, and he passed several days in the city, going over the exposition subject with acting Director General Joseph W. Setton, Jr., and members of the board of directors. At the end of his visit he announced authoritatively what Brazil would be willing to do at the Panama-California international exposition. The announcement opened the eyes of the exposition directors and the original plans were abandoned.

The enlarged plan for the exposition, presented by Director of Work Allen was approved as to general features by Director General Collier with the understanding that minor changes shall be made to meet exigencies as they shall arise. This plan shows the main entrance to the exposition grounds at the west side of Cabrillo canyon. A cause-way and bridge lead to the east side of the canyon, where rises the Administration, California and Art buildings on the rectangular court separated from the Prado ahead by a series of mission arches thrown across the axis between the California and Art buildings. The entrance to the central court of honor will be past this group of buildings.

Leading south from the court of honor is a street that rebouches into a rectangular plaza, rounded on the ends, the Plaza de las Republicas America. At the south side of the plaza will be the huge ethnological building, a structure that will be built in the old Spanish-American down the mesa from this building will be the state and foreign building with a patio. To the west and lugs.

The main buildings, being on the axis, or central line of the bridge, will be grouped around formal courts and will include the California, Art, Agriculture, Horticulture, both Liberal Arts and Machinery, United States government and Mining exhibit buildings.

North of this group will be the huge botanical gardens with the finest and most extensive lath house ever built. The lath house will be something like 600 feet square and 100 feet high, with a central court for band concerts, fountains and other features. Surrounding it will be the exhibits of the different great seed houses of the world. Here also will be the outdoor exhibits, such as those from the reclamation, conservation and forest services of the government and the great Indian congress, with the villages and fields of the aborigines, cliff dwelling and pueblos.

Across a deep canyon will be a dam that will impound a lagoon to be used as an auxiliary water supply for the city fire department, a reservoir of 50,000,000 gallons capacity. Around this lagoon will be grouped ornamental trees, vines and flowers, and it will be a system

of parked airplanes from Laurel to the center of the city, instead of removed from the business center by several miles in Spanish canyon. All the grading, street and road work will be so constructed that when the temporary buildings are removed there will be a system of roads and streets, with ornamental centers; the permanent buildings surrounded with groves of trees and

(Continued on page 4.)

Try On Some of Our New SUITS and OVERCOATS!

See how attractive they are in style, how perfectly they fit, and of what excellent fabrics they are made. You'll see an immense line of quiet, practical and refined styles which are so much in demand by correctly attired men.

The gaudy, loud and freakish garments are entirely omitted. The garments we show will appeal to discriminating men who appreciate distinction, yet desire refined styles.

The Sweetness of low prices will never atone for the Bitterness of poor quality. It is what you get for the price that counts. Any one of our fall garment offerings is an able demonstration of the fact that buying ready-to-wear garments here is a paying proposition for you.

Don't Pay too little for a "bargain," it may cost you too much

We always put the importance of QUALITY before PRICE. But our prices are low when you consider the quality. As people grow more careful in buying, the surer we are of their trade.
