THE REASON

That Weber's roses and carnations last longer than any others is because they are grown 2835 feet above sea level and each plant is backed by forty-two years of experience in "knowing how" to produce sturdier plants and richer colors. You will find them at Weber's down on Pike street.

Still Second Is This State

An Interesting Review of the Coal Industry by Geological Survey.

WASHINGTON, D. C., Dec. 29.—West Virginia, which in 1910, held second place among the states of the Union in the matter of coal production, evidently holds the same rank in 1911, although the accurate figures have not yet been made public by the Geological Survey.

Figures given out today, however, indicate that the coal production of West Virginia for 1911 in spite of unfavorable conditions and depression in the coal business was approximately equal to the production of the state in 1910. Illinois is West Virginia's closest rival for second place and while no figures have been given out showing the coal production of Illinois in 1911, it is believed from the general conditions prevailing in that state that the production there in 1911 did not materially, if any, exceed that of 1910, when it was far behind West Virginia.

The trade conditions in West Virginia have been far from satisfactory during the last year and prices have apparently been far from profitable. This, however, did not prevent the production of about the same quantity of coal as in the previous year.

The production of the Appalachian coal fields in 1911 is discussed in a statement given to the press by Edward W. Parker, of the United States Geological Survey. Mr. Parker states that in general the condition of the coal-mining industry in 1911 was far from prosperous owing to over-production and depressed prices.

The Appalachian region as the principal source of coking coals was more directly influenced by the depression in the iron trade in 1911 than some of the other coal-mining districts. In some of the coking districts many of the ovens were shut down throughout the year. The production of coke in the Connellsville district decreased about fifteen per cent, and the other coking districts will show a still larger falling off. There was also a lighter demand from the railroads, and as the supply of both cars and labor was adequate, there was naturally an ability to produce and transport the coal considerably in excess of the ability of the market to absorb it. It is estimated that the production of bituminous coal in Pennsylvania in 1911 decreased about three per cent, with a considerably larger decline in value. In West Virginia the production was approximately the same as in 1910. During the first six months of the year the production fell short probably 3,000,000 tons, as compared with the last six months of 1910, but after the first of July there was some improvement in the business, although prices were still depressed.

Slight Change in West Virginia.
In the opinion of Mr. John Laing, chief of the West Virginia Department of Mines, the state's output of the year was 64,950,000 long tons, or about 60,500,000 short tons, compared with 61,671,000 short tons in 1910. Some operators estimate that the production of the state will show an increase of about five per cent over that of the preceding year. Mr. Laing estimates that the production of coke in West Virginia in 1911 was not more than half as much as in 1910. This was partly made up, however, by the fact that a large amount of West Virginia coal is being shipped to by-product coke ovens in other states. For several years prior to 1911 the labor supply in West Virginia had not been sufficient for the requirements, but this was not the case in 1911. There were no serious interruptions to business owing to labor troubles, the few instances of dissatisfaction which developed having been settled satisfactorily within a few hours after the strikes began, and the usual complaints of car shortage and the failure on the part of the railroads to handle the traffic were not made. Several attempts have been made to secure agreement among the operators by which prices could be put upon a living basis and ruinous competition abated.

Decrease in Alabama.
In Alabama, according to conservative estimates, the output in 1911 decreased about 10 per cent from that of 1910. This has been due chiefly to curtailment of the production of pig iron, with a proportionate reduction in coke, and to curtailment of the output of coal from the mines of the iron-making companies. The commercial coal business of the state was anything but satisfactory. The demand was less than in 1910, and prices were greatly demoralized. Labor conditions were normal, the supply being sufficient and without interruption because of strikes. Although 1911 was so generally unsatisfactory, provision for better conditions in the future was made by the construction of two large by-product coke oven plants of Koppers' type, one operated by the Tennessee Coal, Iron and Railroad Company, the other by the Woodward Iron Company, Tennessee and Eastern Kentucky.

The trade conditions in Tennessee were similar to those in Alabama, and the decrease in output was about the same. The principal activity in the way of development in the entire Appalachian region was in eastern Kentucky, particularly in Pike and Harlan counties. That area will probably show an increased production over 1910.

The largest percentage of decrease in the Appalachian states was probably shown in the output in Ohio. This is due to the fact that in 1910 the production of that state had been stimulated by the strike in the Illinois and southwestern fields. The output in 1911 was between 10 and 15 per cent less than in 1910. From January 1 to June 1, 1911, the demand for coals in Ohio was very light, and in some sections the shipments were scarcely 50 per cent of the normal, while the Lake trade was 25 per cent or more below normal during the greater part of the year.

LOCAL

Concern Gets a State Charter to Develop Eagle District Property.

CHARLESTON, W. Va., Dec. 29.—With an authorized capital of \$1,000,000 and for the purpose of developing real estate, drilling for oil and gas, and constructing manufacturing industries in Eagle district, Harrison county, a charter has been issued to the Lynch Development Company, of Clarksburg. The incorporators are E. V. Lynch, G. E. Martin, E. B. Hardesty, J. L. Morris and G. C. Irvine, all of Clarksburg.

Other charters were issued as follows: Chase Oil and Gas Company, of Sistersville, to drill for oil and gas in Lincoln district of Tyler county. Authorized capital \$10,000. Incorporators: Joseph McKay, Mary C. McKay, C. A. McKay, J. J. McKay and Mabel G. McKay, all of Sistersville.

Kimball Light, Power and Water Company, of Dayton, O., to construct electric light and power plant and water works in the town of Imball, McDowell county, this state. The company is capitalized at \$50,000, and has the following incorporators: Charles H. Warford, B. Burns, Charles H. White, Homer F. Miller and George Wright, all of Dayton, O.

The Barrackville Cemetery Association, of Barrackville, to acquire real estate for cemetery purposes; real estate valued at \$2,000 and personal property \$1,000. Incorporators: G. W. Neptune and James Neptune, of Barrackville; W. F. Clelland, of Farmington; D. Fred Taibott and A. T. Heck, of Fairmont.

Jackson Store Company, of Jane Lew, W. Va., to conduct a general mercantile store. Authorized capital, \$25,000, of which \$24,000 has been subscribed and \$2,400 paid. Incorporators: R. E. Jackson, W. A. Jackson and M. E. Jackson, of Jane Lew; W. H. McWhorter and Laura McWhorter, of McWhorter, W. Va.

Chenoweth Valley Telephone Company, of Elkins, W. Va., to construct and operate a telephone line in Randolph county, this state. Authorized capital, \$5,000. Incorporators: C. W. Ward, Fred Chenoweth, H. A. Chenoweth, Stark Chenoweth and Wade Hart, all of Elkins, W. Va.

DEEDS FILED

In the Office of the Clerk of the County to Be Recorded.

Nathan Goff to Myrtle F. West, 2 lots, Glen Elk No. 2.
C. H. Warner to F. M. and Mary A. Gardner, 1 lot, Bridgeport.
Harvey W. Harmer to J. H. and Charlotte Sauborne, 1 lot, Bridgeport.
Cora Nicholson to James O. Filtror, 1 lot, Salem.
M. L. Riblett to E. Arlie and Ada Murray, 1 lot, Lumberport.
Mary J. Shreve et als. to Adolphus J. Shreve, 39 acres, Clay district.
Mary J. Shreve et als. to Jacob E. Shreve, 49 acres, Clay district.
Mary J. Shreve et als. to Alva S. Shreve, 28 acres, Clay district.
Howard L. Cunningham to S. W. Ford, 1 lot, Stealey Heights.
Howard Cunningham to Anna Bond, 1 lot, Stealey Heights.
David H. Taylor to Festus I. Day, 2 lots, Stealey Heights.
Mary C. Lucas to Walter L. Lowe, 1 lot, Glen Moore addition, 1 lot, M. W. Smith addition, city.

Usually there are a few "extra" houses and apartments in town—more than are actually needed by the actual number of possible tenants in town. Are you determined that YOURS shall not be of that "extra" and NOT-NEEDED number? Advertising in the Telegram will relieve you

IF YOU HAD A NECK AS LONG AS THIS FELLOW'S AND A SORE THROAT ALL THE WAY DOWN TONSILINE WOULD QUICKLY CURE IT. 222 and 332, West Street, ALL DRUGGISTS.

EVERY LITTLE OLIVE TABLET

HAS A MOVEMENT OF ITS OWN.
Your doctor will tell you ninety per cent of all sickness comes from inactive bowels and liver. Dr. Edwards, well-known physician in Portsmouth, Ohio, perfected a vegetable compound mixed with olive oil, to act on the liver and bowels, which he gave to his patients for years. Olive Tablets, the substitute for castor oil, are gentle in their action, yet always effective. They bring about that exuberance of spirit, that natural buoyancy which should be enjoyed by everyone, by toning up the liver and clearing the system of harmful impurities. 10c and 25c per box. The Olive Tablet Co., Columbus, O. Dr. F. M. Edwards, Pres. (68)

KEELEY CURE

The cure that has been continuously successful for more than 22 years is worth its weight in gold. For the cure of ink habit. Write for particulars. Keeley Institute in Western Pennsylvania, 424 7th Ave., Pittsburgh, Pa.
