

"PLA-MATE"

There's no other shoe made to take the place of "Pla-Mate."

They're best because they follow the natural lines of the foot and allow just enough foot room.

They're genuine Goodyear welts, with flexible heavy welt soles.

They're strong enough for play and dressy enough for best.

They're made in three heights. Patent Leather, Tan Calf, White Nubuck and Gun Metal.

\$1.50, \$1.75, \$2.00 and \$2.50

EXCLUSIVE AGENTS FOR BOY SCOUT SHOES

Our Hosiery and Shoe Finding Department is a very important feature of our store.

Dressings and Polishes for all leathers—Suede, White Nubuck, Canvas, Patent Leather, Tan and Gun Metal.

The Osburn Shoe Co

309 West Pike Street, Next to Odcon Theater.

DOMESTIC SCIENCE VERY POPULAR

THIS DEPARTMENT OF WEST VIRGINIA UNIVERSITY IS RECEIVING CALLS FOR INSTRUCTORS.

Practice Class in Teaching.
One of the interesting phases of the work in the Domestic Science Department of the West Virginia University during the spring term has been that of a practice class conducted by the young ladies who are completing the work of their second year. The pupils of this class are eighteen girls from the freshmen and sophomore classes of the Morgantown High School, who meet in the University laboratory on Saturday mornings.

The purpose of this work is to give practice in teaching to graduates of the University who are going out in the state to teach Domestic Science. A series of six lessons is being given, each upon a type of food. Each of the girls of the department is required to teach one lesson, making out her own lesson, plan and market list. The girl teaching is responsible for all questions and criticisms. Conferences are then held by the head of the department both with the one who acted as teacher and with the class as a whole.

Engineering College Extending Its Work.

Plans are maturing for short courses and extension work in Mining under the direction of the dean of the Engineering College and the professor of the Department of Mining of West Virginia University.

A five-ton traveling crane has been installed in the power plant, which will be used in unloading and handling heavy machinery and for experimental purposes.

An Illustrated Lecture.

A set of lantern slides showing views of the West Virginia University buildings, the campus, the interior of the library, and a number of the scientific laboratories, have been prepared for illustrating the work done at the University. These will be used in illustrated lectures throughout the state.

The Summer School Faculty.

The detailed announcements of the University Summer School, Morgantown, W. Va., show that there is to be a faculty of thirty-seven members besides the faculty of School of Methods for Sunday-school Workers, making in all nearly fifty instructors. This is much the largest faculty that the Summer School has ever had, and the range of subjects taught will be much greater than ever before.

The Public School and Public Health.

The program is now being prepared for the ninth annual two-days Educational Conference at Morgantown, W. Va., to be held under the auspices of the University Summer School, Friday and Saturday, July 19th and 20th. The general topic for discussion will be "The Public School and Public Health." A more important or more timely topic could hardly be found. It is the intention to go into this subject with a good deal of vigor. Some investigations, now being made, will be reported at that conference and discussed.

Summer School Observation Classes.

For the first time since the organization of the University Summer School at Morgantown, fourteen years ago, there will be a "Model" or Observation School, composed of children of all of the eight grades. Hitherto only some of the grades have been represented. These eight grades will be in charge of three well-known expert teachers. One of them is Miss Eleanor Wright, of Columbia University, and the other two are Miss Sarah E. Griswold and Miss Lucy Marian Doyle, of the Chicago Normal School. This Observation School will be made up of children of the various grades of the Morgantown public schools, and the subjects taught will be such as are required in the West Virginia schools. This will give teachers an opportunity to see actual teaching in all of the grades done by the best trained experts. It will give teachers a standard by which to measure their own work.

Music in the Public Schools.

Instruction in music in the public schools is for the purpose of teaching the pupils how to sing, and the teacher who can read a simple tune and sing intelligently enough to interest pupils in music is the successful teacher. Nearly all public school teachers need to understand music to some degree, and the West Virginia University Summer School of Music is aiming to plan its work that it may give to teachers just the work they need in the way of fundamental knowledge of music and insight into methods of teaching it. Arrangements will be made for both class and private instruction.

Teach Children Games.

Games and dances, in which children play in groups, are coming more and more to be considered important elements in the development of child life. The play instinct is inherent in the child, and educators are now directing this spirit into channels that

make for greater happiness and usefulness in the community life of the child.

The Summer School of the University of West Virginia is making a special effort to bring before the teachers of the state the importance of the group work in their schools, and with this in view is offering a graded course in playground games and dances. Mrs. Chex, the director of the Woman's Gymnasium, will demonstrate these games to teachers in practice classes, which will meet two hours a week. The children from the model school and the teachers will also engage in these charming activities, twice a week under Mrs. Chex's direction.

Recent Changes at the University.

The Medical Department has been reorganized so that it will give the University membership in the Association of American Medical Colleges and full recognition for work done at Morgantown.

Farm Management Work in West Virginia.

At a recent meeting of the State Board of Regents Mr. O. M. Johnson was appointed associate professor of farm management for the Agricultural College at Morgantown. Mr. Johnson graduated from the agricultural course at Ohio State University in 1908, and since then has been employed in commercial work, in managing his own farm, and as assistant in extension work of Ohio State University. He will teach farm management and rural economics in the College of Agriculture during the spring semester of each year, and during the summer and fall will investigate methods of farm management in various parts of the state, co-operating with the Office of Farm Management of the United States Department of Agriculture, for whom he will have charge of farm management work in West Virginia. It is becoming more and more evident that the business management of farm operations needs fully as much study and development as better methods of production. Professor Johnson is well equipped for this sort of work, having given considerable attention to it and having spent the last summer in travel in Europe studying methods of European agriculture. It is believed that he will be able to be of great service to the farmers of West Virginia.

University Boys in Camp.

The Y. M. C. A., of the West Virginia University, is turning its attention now to the Summer Student Conference, which will be held at Eagles Mere, Pennsylvania, from June 14th to the 23d. West Virginia University expects to have a large delegation in attendance. The Student Conference idea has grown since its beginning at Northfield until each summer now sees over five thousand college men gathered from schools in all parts of the country.

The conference will be held on the shores of a little lake, Eagles Mere, high in the mountains of Central Pennsylvania, near Williamsport. The mornings are devoted to work, Bible Study classes, Mission Study classes, conference and addresses. The afternoons are open for athletics and recreation. The various colleges in attendance meet each other in baseball, tennis, track, and water sports. The evenings are given over to life-work discussions, group conferences, and study. Altogether the conference forms an ideal vacation for a college man. Some of the biggest men speakers in the country will be there—such men as John R. Mott, Robert E. Speer, Harry E. Fosdick, Jeremiah Jenks and many more.

The cadets of West Virginia University go into camp for four days, on May 28th, at Camp Cadell. The Y. M. C. A. will have a tent there, and provide a place for the boys to meet, read, write or play games. The Y. M. C. A. has come to form an important part of army life all over the world.

A Great Story-Teller.

The pedagogical value of story-telling is now fully recognized by all progressive teachers, and a special effort is being made to train primary and graded teachers to use story-telling effectively. The greatest moral and ethical lessons are taught to children in this way. In connection with University Summer School at Morgantown and School of Methods for Sunday-school Workers, Mr. Richard Thomas Wyche, president of the American Story-Tellers' League, will give a series of lectures and illustrations. Mr. Wyche is much the most famous exponent of the art of story-telling in this country. His work is purely pedagogical, and it appeals to the judgment as well as to the interest of all who hear him. Mr. Wyche's stories and pictures promise to be an interesting feature of the Summer School.

CUPID

(Continued from page one.)

honeymoon brought her face to face with death.

The most dramatic feature of the story was an account of how the skipper's wife spent a night and day alone in the small ship's boat, expecting every moment to see the waterlogged bulk of the schooner with her husband on board take a last plunge to the bottom of the sea.

On April 4 the vessel struck the reef and two days after broke up completely, leaving the little shipwrecked company on the island of Riatea, a day's sail from Papeete, where they were cared for by an

island chief and his subjects.

The Watson sailed from Havelock, N.Z., January 18, bound for Papeete, with almost 400,000 feet of lumber. A few days after sailing the seas began to admit water into the hold and from that time until the vessel arrived at the South Sea port, fifty-nine days later, the crew was compelled to labor constantly at the pumps.

At Papeete a native diver made repairs, a portion of the cargo was discharged and the skipper prepared to wed Miss Ann De Lateur, a charming girl from Pendleton, Ore., who had arrived at the Tahiti port over a month previously, and therefore was permitted under the law to wed. Captain Andresson was informed that he would first have to remain at the port for a month, and then another month was required in which the buns of the marriage could be properly displayed upon the various billboards and fences of Papeete.

Despite the protest of the French authorities of the city, who declared that nothing of the kind had ever been done before, the skipper and his sweetheart chartered a seagoing launch and with one of the priests chugged out beyond the three-mile limit and were wed. Returning to port, the newlyweds began to keep house in the pretty quarters which had been arranged on the Watson, and sail was set for Riatea, where the remainder of the lumber was discharged.

Leaving the entrance of the harbor, which is a little more than a break in the coral reef, the schooner struck lightly, and the leak, which had been repaired at Papeete broke open and the wind began to blow a gale and it was impossible to return to the harbor. An attempt was then made to take shelter on the lee side of the island, while the water in the hole arose to over eight feet and the vessel began to list badly.

Fearing the vessel was about to capsize, the skipper compelled this bride to seek safety in the small boat which was attached to the schooner by a light hawser. A hatchet was thrust into the young woman's hand with instructions to cut the line if the ship went down. However, all escaped.

Despite the experiences, the entire party was in good health and spirits. They said that the governor of the South Sea island had treated them with every consideration. In one particular it is said that the devotion of the governor or island chief and his pretty, dusky daughter will be repaid. One of the sailors named Roberts fell in love with this young woman.

After the party had been shipwrecked for two weeks they were taken to Papeete on one of the trading schooners. Before they sailed for San Francisco, Roberts received two letters from the chief's daughter, and the same day the Aorangi sailed for this city, the young sailor took passage for Riatea with the intention of wedding the dusky maid of the South Seas.

FOR SALE

Lots in Summit Court, paved street, sidewalks, sewerage, gas, city and well water, located in best residence section of Clarksburg. Price

\$1300 and up
Easy terms. If you are looking for an investment or a home site, see us before buying elsewhere.
