Your Home

In which two hundred and fifty members will share the great savings in the price of Pianos and Player-Pianos purchased during the passed business depression.

Right in the midst of the gloom and discouragement of Piano manufacturers everywhere--when mechanics were being laid off--some working half time--we continued to buy at remarkably low prices, realizing that all business depressions are only temporary, and that with the return of prosperity prices would naturally go higher. And now:--

Mills and factories all over this country are humming with new life and activity that will raise prices on all articles of manufacture to a normal basis, if not higher.

But This Economy Club of Two Hundred and Fifty Members Will Reap a Genuine Harvest From This Big Money - Saving Opportunity.

Which is another fitting demonstration of the **wide-awake, progressive** spirit that dominates the management of Davis, Burkham & Tyler Company's business, from the sale of a Victrola needle to the sale of a Grand Piano. The terms are only one of many economical features of this "CLUB."

First--You save a large portion of the purchase price of a Standard Piano or Player-Piano.

Second--You receive a bonafide insurance protection which plainly states that if the customer complies with the terms of our Club Contract and should lose their life while paying for the instrument, that the unpaid balance will be promptly cancelled.

Third--You get an absolute guarantee from both the factory and Davis, Burkham & Tyler Co. for your entire satisfaction in service and durability.

And last, but not least, you will take unusual pride in the possession of a Piano or Player Piano of such world-wide reputation as will be distributed through this "ECONOMY CLUB." These Pianos have been on the market in Wheeling and vicinity for many years. Thousands of them are in every-day use. We want every reader of this announcement to receive it as an **unusual** announcement. **FOR IT IS UNUSUAL.** We planned it as such. And we promise you an opportunity, the equal of which you have never seen here nor elsewhere.
