**OF INTEREST TO WOMEN**

**Health Hints.**  
The teeth are an important factor in maintaining health. Poor, irregular decayed teeth cause foul breath, and do not permit the thorough mastication of food; this creates intestinal disorders, caused by lumps of partly masticated food lying and fermenting in the stomach.

All food must be in a liquid state before it can pass into the intestinal tract, so that if this task be continually imposed on the stomach, it will rebel and cause trouble.

The mouth is indicative of character and expressive as the eye. Refined and particular people do not neglect the appearance of the teeth. Taken for the amount invested, when necessary to have cavities filled and good dental work done, there is no part of the human body that will give such good results.

**TAILORED CORSETS.**  
You may have a corset made to measure to improve your figure, give comfort as well as style, at a reasonable price. Your choice of three kinds of boning, front or back lace, plain or fancy material. Baroley Tailor Made; guaranteed throughout. At the Priscilla Shop, Second street. Just try one.

One year's supply of coal for New York, loaded in fifty-ton cars, would make a train reaching from that city to Salt Lake City.
