BIG INCREASE In Metal Output is Made during a Year in the State of Virginia.

WASHINGTON, May 16.—The value of the gold, silver, copper, lead, and zinc produced at mines in Virginia in 1915, according to figures compiled by James M. Hill, of the United States Geological Survey, was \$303,957, against \$47,377 in 1914. The ore sold or treated amounted to 22,843 short tons, against 15,444 tons in 1914. This ore yielded (inclusive of a small production in cement copper from mine waters) \$534 in gold; 27,744 pounds of copper, valued at \$4,855; 424,741 pounds of lead, valued at \$31,901; and 2,533,173 pounds of zinc (figured as spelter), valued at \$314,113. The production in 1914 was \$429 in gold, 1,458 ounces of silver, 139,008 pounds of copper, 254,000 pounds of lead, and 348,000 pounds of zinc. The gold and silver were recovered from gold and copper ores. No placer mines reported any production. The lead and zinc were derived from 18,759 tons of zinc and zinc-lead ores from Wye county, in Southwestern Virginia, and the copper was recovered from mine waters and from ores mined in Buckingham, Fairfax, and Hillfax counties.
