

Bowling and Billiards

Lee Johnson and W. Ash are certainly the mainstays of the Donohue and Johnson team. But you have got to give Wild George Thompson credit for keeping up the courage of the team for he can sure produce some excitement in a contest.

Capt. Knapp's team is still in a slump as "Daddy" Drake and "Lefty" Crummitt are not hitting them in contest at their usual speed.

Owing to the absence of G. W. Friday night the Roi Tan team lost its first two games to the Donohue and Johnson team. They were tough ones to lose as the Roi Tan got 571 and 555, but they were mere practice games for the Donohue and Johnson team that night.

Capt. Caywood and his Stogie rollers are fast rounding into good form, judging from the way they knocked the little pins down this week.

The Butchers were off color in their match last week. But Lum says they are going to give the boys a race yet.

The big Dutchman, Jake Cook, left the head pin last week and is offering a reward to the man who can hit it.

Such is duck pins, Jake. Shinnston Henry is sure tumbling the little pins over.

G. W. and Johnnie still retain the two man championship at the Gore alleys.

That fellow Gay is mowing down the duck pins just as though he invented the game.

Who is it that does not like to hear the name of John Hayes. I wonder what happened, brother.

Louis Deem is now inspecting the foul line as he has decided that it is to his own advantage. Much oblige, Louis.

Did you see what the Gore team did to Salem the other night? It was a shame to treat a visiting team that way. But let bygones be bygones.

Clark Ingraham still rolls his same steady game.

Oh, you ten pin rollers. We are to have a league just as soon as possible. All wishing to roll will leave their names at the alleys and show some form and they will be placed on a team.

BULL SMITH

(Continued from page 1, third section)

a handicap of injuries all year. Kellison is the real star tackle of the year, but Colebank would make a fit mate for him.

Ends—Heavener and Morrison are the best, since I have brought Colebank in to tackle. The former is a wonder in all departments, and in the bets kicker in the state, but Morrison, in the Thanksgiving game, gave one of the most wonderful exhibitions of receiving forward passes I have ever seen, not excepting the splendid work of "Greasy" Neal in the past. Bernard is a good end and will show better next year.

Quarterback—Stansbury is by far the best, in fact, the only football general I saw in the state this year. Leatherwood is good, but is out of position at this place. Chenoweth and Spears will show next year and to excellent advantage.

Halfbacks—Leatherwood and Reeser would be my choice. There is a possibility of Hite making better than either and I will be criticised for not giving Shumaker a place. Reeser, in my opinion, is the best runner in the state with the hall, and I give Leatherwood the place over Shumaker because "Mike" is never hurt and is the best man I saw handling punts. Garry, Hutchinson and Chenoweth are backs of the class. But for the failure of Hutchinson in the Wesleyan game to block the first forward pass which went for a touchdown, I hardly could have kept him off the team. In mid-season Curry was playing the best game in the state. Shumaker, I am told, played wonderful games against V. P. L. and Georgetown, but he did not do himself justice against Dickinson, a weak team, or West Virginia, and these were the only times I saw him perform, except in the Carlisle game, which was too early to judge his real ability. If Hite learns defense and to interfere he will be by far the best of the bunch. This is the hardest position to select. How many will think Leatherwood and Reeser better than Shumaker or Hite or Curry and Hutchinson, etc. Well, I do, even if I am alone. Let Shumaker be free from injuries and make a good defense man out of Hite as well as an interferer and perhaps they will be better, but I am basing my opinion on what I saw.

Fullback—Rogers, Jacobs, and Stewart are the only men of class that showed. The former completely overshadowed the other two but Jacobs played a much better game all through than generally supposed and Stewart ought to show next year particularly in line plunging. He is a good punter and should have been used all through the game with Wesleyan. He is a boy that shows much better in a game than in practice. Last year he was a beat at line plunging. Brooks was injured and will show next year, doubtless better than all the rest.

I think the above team is a high class one. The only question about the line is, can Colebank play tackle, or Morrison play end in addition to receiving forward passes? I think they could and well. I would put Morrison on Kellison's side and Webster with Colebank, as he and Heavener could ably assist Colebank and Kellison could make up for any

weakness of Morrison. Heavener would punt, Stansbury would pass and captain the team. We have speed, experience and weight all through. They would win from my second team about 21 to 0.

First Team.
Right end, Morrison, Wesleyan.
Right tackle, Kellison, Wesleyan.
Right guard, Brannon, West Virginia University.

Center, Mullenax, West Virginia University.
Left guard, Webster, West Virginia University.

Left tackle, Colebank, West Virginia University.
Left end, Heavener, Wesleyan.
Quarterback, Stansbury, Wesleyan.

Right halfback, Leatherwood, West Virginia University.
Left halfback, Reeser, Marshall College.

Fullback, Rogers, Bethany College.
Second Team.
Right end, Barnard, West Virginia University.

Right tackle, Davis, West Virginia University.
Right guard, Morgan, Wesleyan College.

Center, Callahan, Marshall College.
Left guard, Yance, Wesleyan College.

Left tackle, Wither, Wesleyan College.
Left end, Seckman, West Virginia University.

Quarterback, Chenoweth, West Virginia University.
Right halfback, Hite, West Virginia University.

Left halfback, Shoemaker, Wesleyan College.
Fullback, Jacobs, Wesleyan College.

TWO CHARTLRS

Issued by the Secretary of State Are Filed in the Office of County Clerk Here.

Two state charters have been recorded in the office of W. Guy Terlick, county clerk, issued to the Davison Oil Company and the Gifford Oil Company, each having an authorized capitalization of \$25,000, with the chief works of each, that of oil and gas operations, in Sardis district, this county, and with the following persons incorporators of each company: Charles N. Lindsey, Clarence Edsall and H. J. Von Hemert, all of New York N. Y.; and David J. Carter and Harry W. Sheets, both of Clarksburg.

POLITENESS—100.
A seventh grade boy encountered the following sentence in his grammar examination: "The horse and the cow is in the field." He was told to correct it and to give his reason for the correction. This is what he wrote: "The cow and horse is in the field. Ladies should always come first."—Woman's Home Companion.

KEEP PROPERTY OCCUPIED.
If you have any pride at all about your business capacity, do NOT permit property of yours to remain tenantless. If it is good enough for anyone to occupy or use, an advertising campaign in the Telegram will rent it for you—SURELY, quickly, to advantage.

Five Million More Motor Cars Needed For Farms

Glance at Agriculture Market Shows Possibilities Are Hardly Scratched.

FIVE—SUN—AUTO
Nearly one and a half million automobiles have been sold in the United States since 1902 when the business may be said really to have begun. The number of these machines that have gone to the scrap heap is as yet negligible for commercial reckoning. The oldest is only twelve or thirteen years old. You see the quaint old timers in service every day.

Next year, according to the forecast of the trade, nearly a half million more cars will be sold. These facts cause many to wonder where these hundreds of thousands of cars will go next year—and there is now that. They figure that there is now one automobile to each seventy or eighty people in the country. How many possible purchasers remain to be supplied?

Jasper, the well known financial authority and writer for Leslie's Weekly partly indicated the answer when he says, "Half of next year's output will be sold to farmers more largely for utility than for pleasure." The fact is, when the farm market is thoughtfully considered, it is found to be the dominant factor in the future of the automobile industry. And Jasper's words, "more largely for purposes of utility than for pleasure," furnish the reason.

Without taking into account the scrapping of old machines, which must be replaced by new ones, it may be said that stupendous as the business it, the possibilities have not been much more than "scratched."

More Than 6,000,000 Farms
Not quite 50 per cent of the automobiles in use now are owned by farmers. But there are in the United States, according to the census of 1910, six million three hundred and sixty-one thousand, five hundred and two farms, with a total value of forty billion nine hundred and ninety-one million, four hundred and forty-nine thousand, and ninety dollars—an average value per farm of six thousand, four hundred and forty-four dollars.

A supply averaging one automobile to a farm is a long way in the future—but the demand is not inconceivable. Some day, without doubt, it will be approximated—and when it comes it will represent a degree of progress and efficiency as far ahead of the present as the supply of that day will be ahead of the present supply.

Thus far the number of automobiles owned by farmers is only about 10 per cent of the total number of farms. The manufacturers would have to produce over five million more cars to fill the farm market alone.

The coming of the automobile has made remarkable changes in farm conditions. It is carrying the farmer far and wide over the countryside and bringing him into close touch with all the great improvements in agriculture.

Today it is no uncommon thing in any of the middle western states to see anywhere from 50 to 300 automobiles grouped about a field where a plowing contest is going on, or standing about the stable where there is a sale of fine cattle. These automobiles come from distances of 10, 20 and even 30 miles. They bring the farmer to these centers of interest quickly and without a great waste of time.

Auto Paying Investment
The automobile on the farm is a paying investment in many ways. On many farms the car does service both as a pleasure car and a truck. By removing the body the car is converted into a truck on which farm products are quickly taken to market at little expense.

In the old days if a member of the family, or a valuable horse, fell ill or was hurt, or a machine broke down in the midst of harvesting, the farmer had no choice but to take the consequences. He would drive off to town for help, but it was a long, slow drive over bad roads and help almost always arrived late. The car gives him the quick service he needs.

When it comes to the boys of the farm, no one can doubt the influence of the automobile in making the farm attractive. Both the boys and girls of the farm drive the car and take care of it, and you may be sure that the young men or women on the farm who there is an automobile see to it that the car kept in good shape. There is a marked decrease in the desire on the part of the young to get away from the farm, and the automobile is one of the most important influences to bring about this change.

Promoted Good Roads
The automobile has promoted the good roads movement all through America. This is decreasing the cost of transporting agricultural products to market. And so important an item is this that it could almost be said that the improvements in roads alone would more than pay a big interest on the amount the farmer has invested in automobiles.

Even now, road improvements have made it possible in many places to use the car every month of the year. These are factors of the growing business of the local automobile dealer—for on the local dealer the farmer depends for his cars. It accounts for the fact that from now right on through the winter months the factories will be busy turning out cars to meet the spring demand. The high point of production is reached about the middle of February. The local dealer buys cars in advance and stores them until the opening of the spring season so he can make prompt deliveries when the rush comes.

Recognition by the banks of the importance of this phase of the business is evidenced in the growing practice of local bankers to make loans to the dealer on manufactured cars which he orders and receives during the winter months. The local dealers place the cars in warehouses giving warehouse receipts and certificates of insurance as security for the loans. Bankers who make this class of loans say they are among the most profitable in the market.

Liberal Support of Banks
President William Livingston of the Dime Savings Bank, Detroit, bespeaks for automobile dealers the liberal support of the banks—especially in the small towns where the dealers do a large part of their business with farmers. He said in his address before the American Bankers Association:

"As the greatest numbers of cars are sold during seven months of the year, makers and dealers have been borrowers, and it is a matter of record and congratulation that in fostering this growing industry bankers of this country have played a most important part with practically no loss. Discerning bankers in the past few years especially have appreciated the stability of the industry and the standing of the men in charge, and have co-operated to a marked degree, in establishing the business on its present high plane."

Holiday Gifts for Men

Holiday Gifts at special prices. We have made our holiday selection with greatest care. We have bought furnishings of a tasteful, yet stylish fixings.

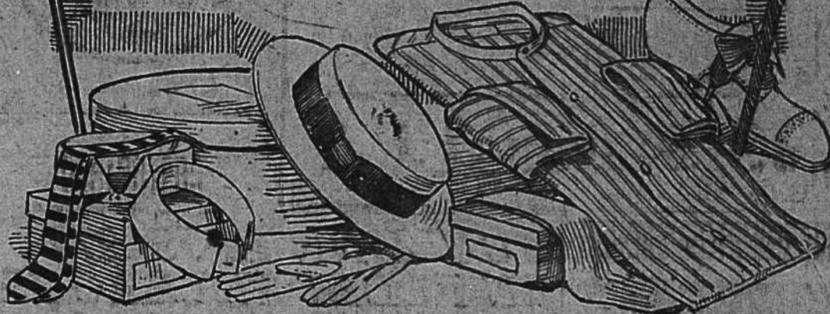

Our special offerings will be indeed attractive to gift buyers. Following are a few of the many attractive articles to select from:

- | | | |
|---------------|-----------------|------------|
| Bath Robes | Hats | Underwear |
| Pajamas | Caps | (Cotton) |
| Neckwear | Shirts | Underwear |
| Leather Belts | Handkerchiefs | (Woolen) |
| Collars | Hose Supporters | Underwear |
| Suspenders | Fancy Vests | (Mixed) |
| Hosiery | Sweater Coats | Rain Coats |
| Gloves | Balmacaan Coats | Jewelry |

There is not an article mentioned above that a man would not be glad to have, because it is useful and practical.

Switzer Bros.

PROPS. GLEN ELK TOGGERY
421 NORTH FIFTH STREET

WESLEYAN

(Continued from page 1, third section)

Notre Dame university in Indiana being the most difficult.

Four short excursions are made to other towns in West Virginia where the big rivals of Wesleyan are played in the games that will have a large bearing on the state championship. The first of these games is to Elkins on January 30, where Davis and Elkins college is met. For two years Wesleyan has barely squeaked through the annual game on the Elkins floor by the margin of one point and this year's game is not expected to be any easier than these, so that a hard game is certain. On February 8, the team goes to Morgantown where West Virginia is met in the second of a series of games that promises to be the most interesting ever contested in West Virginia. The university team, judging by the material at hand, should offer Wesleyan stronger opposition than any other team has offered in two years and Wesleyan is duly cognizant of the fact.

Will Play Scholastics
January 25, the team will meet the Clarksburg Scholastics, last year one of the best teams in West Virginia on the Clarksburg floor and this will no doubt prove to be one of the most interesting games played in the state. March 12 will be the climax of the season at Wesleyan when at Fairmont on that date West Virginia university will be met in the third game of the series. This will be the final game for Wesleyan and, regardless of the outcome of the previous contests will attract statewide attention.

The schedule at home this year is the most attractive ever arranged. Wheeling opens the season here and judging from last year's record Wesleyan will have to go the limit to win. Following the eastern trip the Clarksburg Scholastics play here and the last of that week West Virginia university team comes to Buckhannon, it being the first representative West Virginia university team that has visited Buckhannon since 1905. In 1912 the West Virginia university track team competed in the state meet here but the visit of the basketball squad from Morgantown is viewed with a great deal of interest and the game that will result will not only have an important bearing on the state championship, but will be a close and exciting struggle. Following the West Virginia university game comes Bethany, Pittsburg Collegians, Marietta college, Davis and Elkins and Muskingum at home and the home season is ended when the State High School Basketball Tournament is held here March 20. This will be a big event with about twenty teams competing and may take up all of Friday and Saturday as well.

To Play 25 Games
The complete schedule for 1914 follows:

- Jan. 8, Wheeling at home.
- Jan. 12, U. S. Naval Academy at Annapolis, Md.
- Jan. 14, Catholic University at Washington, D. C.
- Jan. 15, Georgetown University at Washington, D. C.
- Jan. 16, University of Virginia at Charlottesville, Va.
- Jan. 19, Washington and Lee at Lexington, Va.
- Jan. 19, Charleston at Charleston, W. Va.
- Jan. 22, Clarksburg Scholastics at home.
- Jan. 25, Clarksburg Scholastics at Clarksburg.
- Jan. 30, Davis and Elkins college at Elkins.
- Feb. 6, West Virginia university at home.
- Feb. 8, West Virginia university at Morgantown, W. Va.
- Feb. 12, Marietta college at Sta.

WIRELESS TAUGHT AT MORRIS HARVEY

As Well as Other Things of Modern Science and Practical Ideas Says Willis.

President Willis, of Morris Harvey College, Barboursville, who attended the meeting of the West Virginia Athletic Association here Saturday, told a reporter of the Telegram something of the work that his school is doing. He says that the old classical idea of an education is giving away to the modern scientific and practical idea; that the school that expects to command the respect and merit the patronage of the public must prepare its students for a successful career upon an independent and self-reliant economic basis.

Morris Harvey, he says, is taking an advanced position in these lines. The physical and chemical laboratories have been recently enlarged and improved and new apparatus install-

ed. A course in concrete construction dealing with the subject from the manufacture of the cement to the completion of the structure is given. The school is very strong in its electrical instruction, having its own electric power plant which is open for instruction purposes. What is perhaps the most powerful wireless telegraph receiving station in the state is now being installed. It will have a radius of 2,500 miles, and will get the radiograms from the gulf, lakes, and Atlantic seaboard stations.

Morris Harvey in the past has maintained a strong position in the athletic field and expects with its stronger faculty, better equipment and improved boarding facilities to draw more largely than ever that class of students that have contributed to its success in the past. The attendance this term is very large and the term has been one of marked success. Already reservations are being made for the second term which does not begin until January 26.

President Willis will speak at St. Paul's Methodist Episcopal church, South, at 1 o'clock this morning. The public is invited to hear him. Seats will be free.

BUSY SHOPPING.
Packed street cars brought crowds to the city early Saturday evening and the streets and stores were well thronged. Much Christmas shopping was done and the merchants had a busy night. The afternoon shopping was also good. The extra car on the Grassell line proved of much convenience.

We are Now Showing a Complete Line of Xmas Candies, Nuts and Fruits

And would be pleased to show them to you whether you purchase or not.

Exclusive agents for Whitman's and Park & Tilford's candy. Leave your orders here for Ice Cream. Individual moulds and bulk. Cream our specialty.
