OF INTEREST TO WOMEN

If You Like Cabbage. Cabbage has not a very good reputation among some people, and it is a standby winter vegetable of thousands of others. Even for the fastidious taste there are delicious ways of cooking cabbage, and in salad it can also be used with appetizing results. Chop a small head of cabbage, removing the heart. Put three tablespoonsful of butter in a frying pan, add two tablespoonsful of flour and turn in the cabbage after the butter and flour are well blended, then pour on gradually a cupful of milk. Bring to the boiling point and add two teaspoonsful of salt, a few dashes of pepper, mix thoroughly and cover lightly and cook forty minutes on the back of the range. About five cupsful of cabbage is used with the other ingredients. All vegetarians relish this dish.

Notes on Fruit Cakes. Heavy cakes are often the result of using damp fruit. After washing, currants and raisins should be left in colander in slightly warm place for some time. Should also be dredged with flour before mixing with other ingredients.

Fruit cakes generally should bake in the dough, while with fresh fruits it is well to remember that dried fruits added to dough makes them stiffer, as they absorb the moisture in the dough, while with fresh fruits the contrary is the case. Pan should not be more than two-thirds full. To enrich the color housewives sometimes brown the flour before making a spice or fruit cake.

PROSPERITY IS FOUND ON SOUTHERN FARMS

Harry R. Warfield, Receiver for Georgia and Florida, Returns from Inspection.

BALTIMORE, Feb. 26.—Vice President Harry R. Warfield, of the Baltimore Trust Company, one of the receivers of the Georgia and Florida railroad, which was financed largely by Baltimore capitalists, has just returned to Baltimore from an extended trip over the property. Nearly a week was spent in going over the lines, and Mr. Warfield stated yesterday that he found them in splendid physical condition.

The territory through which the Georgia and Florida operates, Mr. Warfield explained, is gradually developing, and that as this development continues, the traffic of the Georgia and Florida will naturally increase.

"The outlook for a larger acreage planted in diversified crops along our line this year is excellent," commented Mr. Warfield. "As I went over the property on my latest trip I noticed that more ground was being broken preparatory to planting trucking products, etc., and this indicates that we will have larger yields. The diversified farming idea is receiving an effective application in the section of the South served by the Georgia and Florida. Farmers no longer plant all of their land in one product. This was the old idea. At the present time we find that small acreages are being tilled and that many crops are grown. The agriculturist has found that in the long run this method is perhaps more profitable. He doesn't depend upon a single crop for his profit. He has numerous farm products to sell.

"Every time I go south I am impressed with underlying conditions of business and the pronounced activity of trade. There is no doubt about the South prospering. The farmers have made money, so have the merchants and manufacturers. And you will find that the financial institutions are well supplied with funds. Naturally, this prosperity is reflected in the business of the railroads. The southern carriers, after going through a period of lean months from the standpoint of revenues are now reporting increasing earnings."

HAS PRIZE TURKEY OF THE COUNTRY.

W. E. Williams, state commissioner of agriculture, is the proud owner of the prize turkey of the United States, so Mr. Williams says he is perfectly confident. This turkey has a pedigree and a history and a most aristocratic appearance. A young gobbler, or turkey cockerel, he seems to possess a feeling of his own importance as he struts in the commissioner's back yard. Well he may, Commissioner Williams says, for his young gobbler, which was bought in Nebraska, won first prize this season at shows in Nebraska and Denver, Col., and was awarded the first prize over the gobbler that took first prize at the Panama-Pacific exposition. Mr. Williams expects to send the turkey to his farm at Henick.

HAPGOOD TELLS WHY BRANDEIS WAS HIRED

By Colliers Weekly in Ballinger-Pinchot Investigation a Few Years Ago.

WASHINGTON, Feb. 26.—Norman Hapgood, former editor of Colliers Weekly, today told the Senate Judiciary sub-committee investigating the nomination of Louis D. Brandeis to the supreme court that the reason Colliers had employed Mr. Brandeis in the Ballinger-Pinchot investigation was because Colliers wanted to support L. R. Glavin whose charges against Mr. Ballinger it had published and for whom Brandeis ostensibly appeared.

"We felt that if the newspaper appeared in the litigation it would detract from the main issue. We wanted to avoid the appearance of desiring to get into the limelight," said Mr. Hapgood. William S. Youngman testified at length about the Warren trial in which Mr. Brandeis was an attorney. Mr. Youngman, who was Edward Warren's attorney, said his client's complaint was that Mr. Brandeis had kept him in ignorance of the value of his father's estate and that he was not informed of the large sums going into the hands of trustees as lessees. Under cross examination, by United States Attorney Anderson, Mr. Youngman said Edward Warren was in England during the years it was complained Mr. Brandeis had not kept him informed. Youngman admitted he had been employed in 1913 by Clarence Barron, of the Wall Street Journal, to trace out Brandeis' court record and said his report had not been printed. He denied that his appearance before the committee was in the negative to a question as to whether he knew Barron had for years conducted a campaign against Brandeis. Over his objection the witness was required to tell the terms of the Warren settlement by which he had testified Edward Warren got restitution for wrongs imposed upon him. He said Edward was paid \$250,000 in cash and \$1,500,000 in four per cent notes due in twenty years. "Now since the gentlemen have used the power of the United States to make me divulge these figures, I want to put into the record that the book value of Edward's share was placed at \$1,410,000," said Mr. Youngman, "and I want to ask if there is not some difference between \$1,410,000 and \$1,750,000.55."
