cause of the street renewing the purchasing movement, and the stock moved upward, closing at 9434, the highest price of the day and 33½ above yesterday's closing sale. The transactions in the stock aggregated 153,000 shares, which is the largest total for a day this year.

The general market was dull and without special feature. At the opening prices were a small fraction higher with but few exceptions, and in the early trading gains of 3½61 per cent were recorded, the latter in Great Northern preferred. Shortly before 11 o'clock a reaction set in followed by a rally and another recession before long, however, and the changes were very narrow. During the hour following midday speculation was intensely dull, but subsequently under the influence of the bull movement in Sugar the general market became strong. New Jersey Central selling up to 885½, an advance of 13½ from the low point of the day, the other gains being merely fractional. In the last hour speculation was irregular, but the market closed fairly steady, and at an advance of ½602 per cent on the day.

CHICAGO MARKETS. Heavy Bear Operators Give Wheat a

CHICAGO, March 7.—The course of the wheat market, except during the first twenty minutes, when it advanced a little, was largely a matter of cold-blooded slugging by some heavy bear operators. May started weak with sellers and trading 1531/6537/coard weak with sellers and trading tors. May started weak with seliers and trading at 531/2@537/sc and worked up to 541/s@541/4. Foilowing that it dropped to 53½@53½@535½C. The Cincinnati Price Current was very bullish in its remarks, and the French country markets, as reported officially were the equivalent of from 2½c to 5c higher. Wheat sold at 53½c about the middle of the session. New York wired that some buying in cash wheat on an order from Paris had caused a strong closing in that market. The market wound up at 53% for May.

March 7.—Exchanges, \$194,313; balances, \$40,934.

Wheat—Valley, 75½@77½c per cental; Walla 43½@44c per bushel.

In corn it was a repetition of yesterday's stagnation. The fluctuations were of the lightest and the trade the smallest proportions usually seen in the days of midsummer. May sold from 44%c to 44%c and closed at 44%c.

Oats were almost lifeless, with but ½c range for the day. The market was steady, influenced by corn. May opened at 28%c and closed at 29c.
The provision market was the liveliest on the floor. Manipulation frightened the dealers and caused vigorous trading. There was some selling, but after slight reactions the market wound up firm. May pork closed 22½c higher, May lard 7½c and May ribs 17½c higher.

STOCKS IN LONDON.

New York, March 7.—The Evening Post's London cablegram says: The increase in the Bank of England's coin this week was due to the imports during the week of £24,000. This week's bank returns completes the bank's half year and shows that the dividend will probably be 4½ per cent. against 4½ a year ago. The demand for gold for American has ceased for the moment.

The stock markets were irregular to-day. Consols were very strong on Government purchases. Americans were flat, closing hear the lowest, especially Canadian Pacific and Baitimore and Ohio. The siump of Grand Trunks was on fears of a had report. The Dutch are said to be buying Americans. This is given from a good quarter as a reason for their firmness. Dutch exchanges on the American loan had dropped to 3% per cent premium, but buying instigated by the Rothschilds and Morgans caused a sharp rally to 4%. The trade returns for February are disastrous. The imports decreased nearly £6,000,000 and there was also a heavy decrease in exports.
