

LAMBERT'S FLIGHT FROM OAKLAND. CHECKERED CAREER OF THE BRUNETTE WHO WENT WITH THE CLERK.

BARSTOW'S STRANGE WILL.

THE CATHOLIC SOCIETIES WILL CELEBRATE THE HIBERNIAN HOLIDAY.

The anxious bondsmen of the missing clerk of the Police Court, Walter R. Lambert, had the pleasure of looking into the treasure-box in the clerk's office yesterday, after sixteen hours had been put in on the combination by Expert Ensign. Instead of stacks of yellow gold the box contained only a few worthless bail bonds and a lottery ticket for last month's drawing.

There are many reports in circulation regarding the amount of Lambert's shortage, some putting it as high as \$16,000. The truth cannot be ascertained until the experts, who are now working on the defaulting clerk's books, have finished their task.

Expert York, who has charge of the work, said yesterday that the shortage so far discovered was \$1000, and unless some of the bail bonds found are forgeries this amount, he thought, would cover Lambert's stealings.

Besides his pilfering from the city, creditors are springing up on every hand that Lambert succeeded in beating of small amounts, ranging from \$100. Attorney Tom Bracey knows Walter just \$100 better than he did last week, and Henry Evers, besides being on his bond, is out \$150 for the funeral of Mrs. Lambert about three months ago. Besides that there are grocerymen, cloth and shoe merchants and men engaged in all branches of trade who would like to look upon the smiling countenance of the Police Court clerk who has gone astray.

That Lambert left for Honolulu on the steamship Mariposa, last Friday, there can be no doubt, although his friends declared that he was too well acquainted with the law to think that the islands would be a safe hiding-place for him.

Miss Mahany, the young lady who is said to have left the city with the wily clerk, is well known in Oakland, and has had a somewhat checkered career.

Six years ago the young woman became a mother, and Pauline was forced to marry her. They lived together one short year, when the husband, becoming tired of wedded bliss, brought suit for divorce, and the decree was granted. It was then the charming brunette became intimate with the gay clerk of the Police Court, and much of his spare time was spent in her company while his wife was still living.

After the death of his wife Lambert gave more attention to Miss Mahany, with the result that now they are both sought after by the police and will probably be brought back to this city to answer to a charge of embezzlement and his companion as an accomplice.

The clerk in the office of the Oceanic Steamship Company who sold Lambert two tickets for Honolulu afterward said the defaulter on the Mariposa. He went to the steamer with the passenger list for Purser Smith and saw the couple on board. The girl, he says, was standing in the doorway of the main saloon and Lambert was sitting just inside the door.

"I knew of them very well by sight," said this gentleman. "I had seen the girl often in Oakland, and Lambert's figure was also a familiar one to me. There is no doubt in my mind as to the identity of the couple, and I know that they were both on board."

The Terminal Committee Talks. In an open communication yesterday the members of the terminal committee expressed their views quite freely in regard to the stand taken by some citizens who are anxious to have the Oakland subscriptions made to the new road without restrictions.

They say the word "Restriction" is not justly applicable to the plan of the terminal committee. Suppose we say "Anywhere in Oakland." These words mean nothing to an Oakland proposition.

"A pier could be located at Berkeley or opposite Temescal and, extending southwesterly, be within Oakland, out in the water five and a half miles off shore.

"No property-owner or business man in this city could be expected to subscribe to that as an Oakland proposition. Or a road might come to Oakland at the southwest corner, that would be over at Park avenue, between East Oakland and Alameda. It would cross the street westerly and then go down on the Alameda point, on either side of it, and thence into the bay, being in no sense an Oakland terminus.

If the words "above ordinary tide" be added, the danger to the southern subscribers, and the subscription could be claimed on the Alameda terminus, and toward the northwest a railroad and pier could terminate its landing, in reaching the navigable water at the point at least five miles from the business portion of Oakland, without coming nearer than three miles of the business center, contributing a minimum Oakland benefit, yet earning the subscription of the business and property interest of the city."

A Lawyer's Strange Will. The will of the late pioneer, Alfred Barstow was filed for probate yesterday by Mary R. Barstow, his widow.

The estate is valued at \$20,000, and Mary R. Barstow is named as executrix.

The instrument, which is in the handwriting of the decedent, is one of the most unique wills that has ever been filed in the County Clerk's office. It reads as follows:

I, Alfred Barstow, of the city of Oakland, county of Alameda and State of California, do make and decree this to be my last will and testament, and I hereby revoke all wills by me heretofore made.

I desire my estate to be distributed in accordance with the laws of the State of California.

I desire my widow to be executrix of this will, and that no bond be required of her in any proceedings growing out of her trust. I authorize and empower her to sell any and all real and personal property belonging to my estate at private or public sale, without the order of any court or tribunal, and that she have as full and free right of disposition thereof as though the title of all said property rested in her, and my only object in making this will is to facilitate the settlement of my estate.

I think that no man should have the power to go further than this. I do not believe that a man should make a will, when a woman person is once comfortably laid away, let him cease from trouble, and let the living carry on the business of life. Very probably the dead one will have all he can get out of it. "The religious doctors" are half right as to "the truths" they hand out.

This will be entirely written, dated and signed by my own hand at the city and county of San Francisco, in the State of California, on this 13th day of June, 1890.

ALFRED BARSTOW.

Congress Women in Oakland. The Oakland branch of the Woman's Congress Association will meet on Wednesday, March 20, at 2 p. m. in the parlors of the Presbyterian church, corner of Fourteenth and Franklin streets.

The president of the General Congress, Mrs. Sarah B. Cooper, and other members of the executive board will be present and will present the plan of the coming Congress, to be held in San Francisco the third week in May.

To Celebrate St. Patrick's Day. Arrangements have been made by the various Catholic societies to celebrate St. Patrick's day with appropriate services in the Oakland churches morning and evening.

At Rev. Father McNally's church at West Oakland mass will be sung at 5:30.

7:30, 9 and 10:30 A. M. The 10:30 mass will be solemn high mass, with four priests officiating.

At 7:30 o'clock in the evening Rev. Father Hogan of San Rafael will deliver a lecture on "The Irish Race, Its Principles and Practices."

There will be an augmented choir at all the services. Five young Irish priests, on their return trip to Ireland from their Australian mission, will remain in Oakland as the guests of Father McNally and will assist in the day's celebration.

The lecture in the evening will be free, but the pastor will take up a collection.

An Attractive Play. To-morrow evening, the 18th inst., Hoyt's "A Temperance Town" will commence an engagement of three nights at the Macdonough. All indications point to a good house, for the advance sale is very large. But why not? Hoyt's attractions have always scored a success in Oakland, even in the old days when the town could not boast a first-class playhouse.

The new drama, "The Play Full of Paths," a homely scene intermingling with funny sayings and situations. Popular prices, 25 cents to \$1.

Attractions to follow this production are: The Whittier Opera Company in the romantic comic opera "The Fencing Master," which will run three nights, with a matinee. Then will come Marie Burroughs in her repertoire, to be followed by Tom Baker in her successful comedy "Our Flat."

Bondholders Will Buy. The property of the Piedmont Consolidated Cable Company that was placed in the hands of a receiver two years ago will be sold next Tuesday by the commissioner appointed by the court, and will in all probability be bid in by the bondholders of the road, who have organized for that purpose.

There are other street railway companies in Oakland who would like to get possession of this property, knowing full well the value of the same, but their estimate is so much lower than that held by the bondholders that it is likely they will have the bidding all to themselves.

It is the intention of the bondholders of the road if they are successful in purchasing the property to effect a thorough reorganization and then make an electric road of that portion going over the hills.

Will Take Her to Friends. In Henry Wilkinson, the Los Angeles restaurant-keeper, Mrs. W. J. Dean, the wife of the counterfeiter now awaiting trial, has a friend worthy of the name.

As soon as Mr. Wilkinson heard of the arrest of his former cashier he hastened to arrange his business so that he could come to Oakland to effect Mrs. Dean's release, and although willing friends had saved him this trouble the worthy gentleman will try to induce Mrs. Dean to return with him to the southern part of the State, where friends of the old days will make an effort to lighten the burden of the unfortunate woman whose life has been blighted by a scoundrel.

Kellogg Again on Deck. Detective George H. Kellogg had the charge of drunkenness and assault against him wiped out yesterday by Judge Wood, and is again on deck with the railroad company.

In his summing up of the charges brought by the Chief of Police against Kellogg Judge Wood had little to say. He simply dismissed the case for want of evidence.

There Will Be No Contest. Dr. H. B. Mehrman, the defeated candidate for Councilman from the Second Ward, has denied that he will contest the election of C. K. Marshall.

It was reported that there would be a contest of the ground of alleged irregularities in the count of the Second and Fourth precincts of the Second Ward.

Look Out For War. There will be a meeting of the Oakland insurance agents held Monday night to take steps toward forming a permanent association.

The result of the meeting will be more than likely that a rate war will be inaugurated Tuesday among the local agents.

ALAMEDA. Herman H. Schrader, the painter and decorator, who some months ago carried on a business at 124 Park street and went into insolvency, has been blocked from getting his final discharge. His former partner, W. W. Fowler, and one of his creditors, has filed an affidavit in the Superior Court setting forth charges on which he demands an investigation of the insolvent's affairs.

When Schrader filed his schedule last October he represented his assets to be \$1135 and his liabilities \$3018, including a \$400 debt to Fowler as part payment on the latter's interest in the firm, and an offset against him a note of \$250, which he had indorsed upon the security of another note, indorsed in turn by I. N. Chapman.

Fowler charges are to the effect that Schrader fraudulently disposed of a lot of property before filing his petition in insolvency, and further falsified the accounts of his business and neglected to keep proper records of the affairs of the firm. The matter of granting the final discharge will come up to-morrow.

Ten Petitions Filed. To-morrow will be the last day under the law for candidates to file their nominating petitions with the City Clerk to make certain for the election to be held on the 20th inst. Ten petitions had been filed yesterday, including that of the Good Government Club. The vacancy in the executive committee of the Good Government Club, caused by the resignation of J. H. Bruns, has been filled by the appointment of F. E. Jenkins of 2105 Santa Clara avenue.

Objects to the Principle. Trustee D. L. Randolph is not in favor of the proposition of the city paying \$50 per month for a police officer to have charge of the speed track. He has declared his intention of introducing a resolution to-morrow evening to revoke the appointment made in his absence Monday night. He insists that the owners of fast horses should pay for the maintenance of the track.

Erecting a Grand Stand. Improvements are being made daily to the boulevard speed track. Contractor Zingg received an invoice of lumber yesterday for the erection of a grand stand. The stand when completed will hold probably 1000 people. The location selected is on the south side of the track, about a quarter of a mile from the Grandstand entrance.

New System of Air Appliances. For the past few days trains have been running on the narrow-gauge locators on account of the new airbrake appliances that are being put on the division. Formerly the cars were operated by what is known as "straight air." The new system is a big improvement and is readily observed by passengers. It is the Westinghouse system.

Not a Candidate. John T. Fleming was presented with a petition a few days ago, asking him to be a candidate for the city attorney's office at the coming election. Attorney Fleming has fully considered the matter and has determined not to enter the field.

Only One Demand. The only demand against the fire relief fund for the past year was one for \$30 in favor of J. Schick, who was injured in a fire on St. Patrick's day, 1894. There is a balance in the fund of \$1966.49.

BERKELEY. The residents on San Pablo avenue, near University avenue, were thrown into a state of excitement last evening by the appearance of a nude woman on that thoroughfare, screaming and wildly gesticulating.

The woman was Mrs. Johanna McEbov, who lives at the corner of Allison way and Union street. She is in the habit of going on periodical sprees, and it is thought that liquor has unbalanced her mind. Her husband died several years ago and left three small children in her care. The neighbors say she often beats the little ones

and does not give them sufficient food, although she possesses considerable property in this city.

Indignant Ladies. There is a gnashing of teeth among certain ladies in this city over the announcement that women are not eligible to the position of School Directors, of which several of them have been aspiring.

Their whole and complete heaps of reform bills next May, provides that only "qualified electors" or "voters" are eligible to the elective or appointive offices of this town. Another section of the town law provides that every officer must be a resident of the town for three years before the election.

These sections will keep carpet-baggers out of office, but the ladies say it will also render them ineligible. They do not place the blame on the shoulders of the Freeholders, as they think it was quite unintentional. Yesterday one of them was heard to remark, "This mistake will keep ladies out of office three years after they have been granted the elective franchise by the Legislature."

Trouble in the Football Team. For the past two months trouble has been brewing in the football team of the University. Shortly after the Thanksgiving game Captain Benson was re-elected, but, being compelled to leave college, resigned just before the Christmas vacation. Eddie Sherman was elected by a vote of 5 to 5 to fill the vacancy. His rival has kept the affair stirred up ever since, and this week made a strong attempt to depose him. Rumor has it that he has decided on a new plan of action and that he will not stop till he is captain.

Notes. The residents of South Berkeley are agitating the question of securing a supply of water for fire protection. The finest game of baseball ever played on the university campus was played yesterday afternoon between the University Club and Olympic teams. The latter won by a score of 2 to 3, after the college boys had the game shelved three different times. The university made seven base hits and four errors, while the opponent made eight base hits and three errors.

Barbers Want Half a Day. REASONS GIVEN FOR THE GOVERNOR SIGNING SENATE BILL 627. AN ALLEGED ERRONEOUS IMPRESSION REGARDING ITS PROVISIONS.

Apparently some doubt exists as to the exact terms of Senate bill 627 in favor of closing barber-shops at noon on Sundays and legal holidays.

W. G. Seppich & Kleinhaus, barbers, 217 Montgomery street, in speaking of the matter yesterday said:

A morning paper advises the Governor to veto this bill because it includes employes of bathhouses in its scope. This is not the case as we understand the bill. The law reads as follows:

Every person who as proprietor, manager, lessee, employe or agent keeps open or conducts, or causes to be kept open or conducted, any barber-shop, bath-house and barber-shop (barber-shop of a bathing establishment), or hair-dressing establishment (or any place for shaving or hair-dressing, or conducted, in connection with either of the above business or resorts), who engages in work or labor (as a barber) in any such shop or establishment on Sunday or legal holiday, after the hour of 12 o'clock m. of said day, is guilty of a misdemeanor.

"I, as the President of the Barbers' Protective Union, and also as proprietor of the Russ House Baths, claim that the law is meant and should be construed to read as relating to barbers only. I had the law drawn up by request of my fellow-barbers, who number about 5000 in this State. Our petition, as forwarded to the Legislature, has been signed by barbers from the entire State and not one protest has been heard."

"Any one accepting the assertion of the Sacramento correspondent might conclude that the provisions of the bill were intended to close bathhouses on Sunday afternoons. A hasty reading of the bill might give color to this idea, but careful study will show, as I have said, that the provisions relate to barbers only."

"I hope that through the medium of the CALL any erroneous impression may be corrected. That this bill may become a law is desired by all married barbers. By its means only can they hope to secure half a day of rest on Sunday to spend in their family circle."

A NEW IRISH SOCIETY. It Will Be Known as the True Sons of Ireland.

A call having been issued some months ago for the organization of a grand Irish-American society, to be known as the True Sons of Ireland, the following gentlemen assembled at the Palace Hotel last evening, one representing each county of Ireland, as follows:

Matthew J. O'Neill, County Antrim; Thomas L. Conall, Anagh; Peter Molloy, Carroll; Edward Riley, Cayuga; Thomas O'Brien, Clare; Jeremiah O'Sullivan, Cork; John Neill, Donegal; Bernard Curran, Dublin; P. A. Finnigan, Donegal; P. A. Dolan, Fermanagh; Patrick Joyce, Galway; William O'Leary, Kerry; Daniel Fitzgerald, Kerry; Robert Emmet, Kilkenny; Frank Carroll, Kings County; D. P. Dolan, County Leitrim; Frank Noonan, Limerick; John O'Keane, Londonderry; James O'Sullivan, Longford; Peter McDonald, Louth; Charles Dougherty, County Mayo; Daniel Griffin, Meath; Joseph J. O'Mahony; Michael Cassidy, Queens; P. J. Flynn, Roscommon; James Maguire, Sligo; Thomas Keough, Tipperary; James E. Burns, Tyrone; Peter Kelly, Waterford; Patrick Mullen, West Meath; Charles H. Murphy, Wexford; J. W. O'Toole, Wicklow.

The following temporary officers were elected: P. A. Dolan, chairman; J. O'Sullivan, secretary.

In calling the meeting to order, P. A. Dolan made a few remarks, in which he outlined some of the objects, saying:

Far from the green hills of Erin. We meet in love to-day. Some of us scattered "True sons of Ireland," With spirits warm and gay. Why do we meet? 'Tis to repeat Our oaths, both night and day, To dear old Ireland! Brave old Ireland, Ireland far away!

He said, further, that it was the intention to organize by the election of a board of directors, one to represent each county in Ireland, there being thirty-two. In present there are three or four counties represented with local Irish organizations in this city, which will not be affected by this organization. It will be permanently organized on a grand scale as several other national societies are at present.

It was decided to keep the society open for at least sixty days. The following committee was appointed on headquarters: Thomas Keough, Edward Riley and P. J. Flynn. The meeting then adjourned, to meet on Saturday evening next at 632 Market street.

DAVID LORING'S LAST CONCERT. Eduard Remenyi Will Also Bid Farewell to This City.

Eduard Remenyi, the great Hungarian violin virtuoso, will give a farewell concert in this city on Wednesday, April 3, upon which occasion he will be assisted by a number of distinguished musical artists, among them being Miss Pauline Stein, a charming soprano singer, and the eminent young pianist, Henry Eames. Miss Stein is said to take a high rank among concert singers, and Henry Eames comes heralded from the East as a skillful player. The sale of seats will be announced later.

An especial interest attaches to the Loring Concert, which takes place at Odd Fellows' Hall on Thursday, March 28, as it is probably the last concert which will be given under David Loring's conductorship. It has been given in earlier date than was at first intended, in order that Mr. Loring might lead, previous to his departure for Japan.

AN ANCIENT TREASURE HOUSE.

AVALON, Santa Catalina, March 14.—For many years the island of Santa Catalina has been known to be the burying-ground of a lost or forgotten race of natives, and the old Spanish records have been examined and studied in the hope that something might be found that would throw light upon the question. Recently a report has gained favor that some of the old idols and other objects possessed by

which has an opening, there is a blind lead.

Some time ago some goat-hunters from the East were enjoying their sport on the island and had penetrated the country to the north of Little Harbor when they discovered an interesting cave on the borders of a little stream. This showed undoubted evidence of having been used by the ancients. The floor was covered with a deep black soil in which abalone shells had been ground up, and near by great masses of these shells were found where they had been left by the native occupants. The top of this cave was originally open and had been covered by a number of flat rocks, which had been overthrown in some

THE ABANDONED CAVERN.

the natives were buried or concealed in a cave somewhere on the coast. That this theory may have some foundation in fact is proven by the discovery recently of some singular caves. While the workmen on a pier were cutting into the bank of the cliff that fronts the beach at Avalon they came upon a cave over 100 feet in length. It was carefully cut into the disintegrating rock and braced with timbers that showed every evidence of age. But there was nothing in the cave except some rude im-

plements of the nature of scrapers or knives. Not a mile away another cave was found, entering a high cliff just above the level of the sea, and twelve miles from Avalon is still another, and the largest, that is accessible only by boats. This appears from the sea to be a simple depression in the face of the cliff, but once in it a passage is seen leading away for 100 feet, through which a boat can be pushed if the sea is calm. Half way through this branch,

They were paint-pots, sinkers, flat-shaped slabs, some ornamented with carvings of fish and various objects, oval stones, with a perforation or hole bored in the center, probably used in some game. Similar objects have been found on the mainland, but where the quarry was that the natives drew upon was a mystery until it was finally located at Santa Catalina, about midway up the island, on the shore side. Here, half way up the mountain, stands the old quarry that was worked by the

SECTION OF AN OLD OLLA MANUFACTORY.

Cost of Solomon's Temple. The cost of Solomon's temple and its interior decorations and other paraphernalia was one of the wonders of the world. According to Villiamus, the "talents" of gold, silver and brass used in its construction were valued at the enormous sum of 26,879,822,000. The work of the jewels is generally placed at a figure equally as high.

The vessels of gold, according to Josephus, were valued at 140,000 talents, which, reduced to federal money, was equal to \$2,876,450,000. The vessels of silver, according to the same authorities, were still more valuable, being set down as worth \$3,246,720,000. Priests' vestments and robes of singers, \$10,050,000; trumpets, \$1,000,000. To the above add the expense of building materials, labor, etc., and we get some wonderful figures.

Ten thousand men hewing cedars, 60,000 bearers of burdens, 80,000 hewers of stone, 3300 overseers, all of which were employed for seven years, and upon whom, besides their wages, Solomon bestowed \$35,944,985.

The material in the rough is estimated as having been worth \$12,726,685,000. These several estimates show the total cost to have been \$71,221,985,936.—St. Louis Republic.

natives from time immemorial. It was undoubtedly suddenly deserted, as when found it had the appearance of having been left by the workers, who dropped their tools never to return.

On the ledge to-day are innumerable marks showing how they cut out the great bowls with their flint chip tools. There were piles of broken bowls or ollas; others were found in the shape of flat, oval objects taken from the pits, quantities of quartz and slate knives which the workers used, broken and thrown aside.

Here were made carvings—bits of stone carved with rude representations of fish, seals and fish, rude bowls, oval objects used in games, and slabs that when heated were placed upon the body as a cure for various troubles. But the finest objects were large mortars of steatite, often three feet high, of elegant shape, showing that the natives had more than ordinary artistic taste. These great stone vessels have been found all over Southern California, from San Luis to San Diego, and far up in the mountains; but the largest and most numerous were carried to the mainland in canoes several hundred years ago where they were traded for skins and various articles not to be obtained on the islands.

It is estimated that fifty tons of antiquities have been taken so far from the island of Santa Catalina from the twenty or more townships that have been located by collectors. Excavating is still carried on and doubtless more interesting material will be found.

PASCATON.

ON THE COMSTOCK LODE. Reports of the Superintendents of the Various Mines.

VIRGINIA CITY, Nev., March 16.—Following are the reports of the superintendents of the various mines on the Comstock lode for the week ending to-day.

CON. CAL. AND VIRGINIA MINE—1050 level.—On the sixth floor in the new ore body, the second floor above the sill floor of this level, the east crosscut started at a point 125 feet south of the vertical winze which connects with the 1600 level and has been extended 26 feet, to a total length of 65 feet, passing through the formation assaying \$10 per ton, and reaching the old stope timbers. At a point in the south drift on this floor 5 feet south of the vertical cal winze a west crosscut was started and has been run 20 feet through low-grade quartz to the west, or footwall. On the ninth floor the drift running south from the south end of the fourth level has been advanced 34 feet to a total length of 99 feet, its face being in porphyry. On the twelfth floor the east crosscut has been extended 5 feet to a total length of 70 feet, with its face in porphyry and low-grade quartz. From this east crosscut, to a point 18 feet from its mouth, two drifts have been run, one to the north in low-grade quartz 12 feet, and the other to the south 12 feet in a formation carrying narrow streaks of ore which give an average assay value of \$22.70 per ton. An opening has been made from the thirteenth floor up to the fourteenth floor 10 feet long, and 6 feet wide, through low-grade quartz, porphyry and some clay.

The stope started from the south drift, from the east crosscut from the main north lateral drift, on the sill floor, at a point 29 feet from its mouth, has been carried up 7 feet to a total height of 22 feet. This opening is 10 feet long and 6 feet wide, through ore 2 feet thick, lying against the west wall, and carrying an average assay value of \$60 per ton. 1750 level.—From the end of the drift running south from the south end of the fourth floor two crosscuts have been run, one to the east 15 feet through porphyry and quartz of low assay value, and the other to the west 15 feet through low-grade quartz to the west wall. A small portion of the ore extracted during the week was from the floor, already mentioned, and the remainder from the opening made from the south drift from the east crosscut on the sill floor of the 1650 level, amounting to 52 tons, which assayed, per car samples \$42.92 per ton.

1600 level.—The drift running north from the top of the upraise, which was carried up 80 feet above the sill floor of this level from a point in the east crosscut from the main north lateral drift, has been advanced 24 feet, to a total length of 184 feet, with its face in porphyry, clay and quartz, which carries a low assay value. The drift on the fourth floor two crosscuts have been run, one to the east 15 feet through porphyry and quartz of low assay value, and the other to the west 15 feet through low-grade quartz to the west wall. A small portion of the ore extracted during the week was from the floor, already mentioned, and the remainder from the opening made from the south drift from the east crosscut on the sill floor of the 1650 level, amounting to 52 tons, which assayed, per car samples \$42.92 per ton.

1450 level.—The drift running north from the top of the upraise, which was carried up 80 feet above the sill floor of this level from a point in the east crosscut from the main north lateral drift, has been advanced 24 feet, to a total length of 184 feet, with its face in porphyry, clay and quartz, which carries a low assay value. The drift on the fourth floor two crosscuts have been run, one to the east 15 feet through porphyry and quartz of low assay value, and the other to the west 15 feet through low-grade quartz to the west wall. A small portion of the ore extracted during the week was from the floor, already mentioned, and the remainder from the opening made from the south drift from the east crosscut on the sill floor of the 1650 level, amounting to 52 tons, which assayed, per car samples \$42.92 per ton.

1300 level.—The drift running north from the top of the upraise, which was carried up 80 feet above the sill floor of this level from a point in the east crosscut from the main north lateral drift, has been advanced 24 feet, to a total length of 184 feet, with its face in porphyry, clay and quartz, which carries a low assay value. The drift on the fourth floor two crosscuts have been run, one to the east 15 feet through porphyry and quartz of low assay value, and the other to the west 15 feet through low-grade quartz to the west wall. A small portion of the ore extracted during the week was from the floor, already mentioned, and the remainder from the opening made from the south drift from the east crosscut on the sill floor of the 1650 level, amounting to 52 tons, which assayed, per car samples \$42.92 per ton.

1150 level.—The drift running north from the top of the upraise, which was carried up 80 feet above the sill floor of this level from a point in the east crosscut from the main north lateral drift, has been advanced 24 feet, to a total length of 184 feet, with its face in porphyry, clay and quartz, which carries a low assay value. The drift on the fourth floor two crosscuts have been run, one to the east 15 feet through porphyry and quartz of low assay value, and the other to the west 15 feet through low-grade quartz to the west wall. A small portion of the ore extracted during the week was from the floor, already mentioned, and the remainder from the opening made from the south drift from the east crosscut on the sill floor of the 1650 level, amounting to 52 tons, which assayed, per car samples \$42.92 per ton.

900 level.—The west crosscut from the Union Con. south lateral drift from the west drift, 1520 feet west of the shaft, has been extended 17 feet during the week, to a total length of 583 feet, its face in a formation of quartz and porphyry which carries an average assay value of \$25 to \$30 per ton. On the tunnel level the north drift from the end of the west crosscut from the north drift from the Mexican shaft has been advanced 10 feet, to a total length of 92 feet, continuing in low-grade quartz.

1450 level.—The north drift started from the top of the upraise, which was carried up 80 feet above the sill floor of this level, at a point 40 feet west of the main north lateral drift and 100 feet north from the south boundary of the mine, has been advanced 22 feet, to a total length of 177 feet; its face in porphyry and quartz.

As joint work with the Ophir Company has been making repairs in the Ophir shaft on the 1100 level, the west crosscut from the Union Con.—900 level.—The west crosscut from the Union Con. south lateral drift from the west drift, 1520 feet west of the shaft, has been extended 17 feet during the week, to a total length of 583 feet, its face in a formation of quartz and porphyry which carries an average assay value of \$25 to \$30 per ton. On the tunnel level the north drift from the end of the west crosscut from the north drift from the Mexican shaft has been advanced 10 feet, to a total length of 92 feet, continuing in low-grade quartz.

1450 level.—The north drift started from the top of the upraise, which was carried up 80 feet above the sill floor of this level, at a point 40 feet west of the main north lateral drift and 100 feet north from the south boundary of the mine, has been advanced 22 feet, to a total length of 177 feet; its face in porphyry and quartz.
