It was a situation worthy of Gilbert and Sullivan, but the attorneys found a way out of it by moving in Judge Slack's court for permission to proceed in the suit. This permission being granted, Judge Seawell was asked for judgment. The suit was upon promissory notes and money alleged to be due for the cost of a Mexican mine sold by the plaintiff to Mr. Haley. Judge Seawell rendered a judgment for \$40,927 against Mr. Haley. Now the insolvency proceedings may go on.

The following peremptory order has been issued by the Wells-Fargo Express Company:

The Contestants of the Fair Will Have Another Day in Court.

MOVING A MONSTER GUN, CONTEST FOR OELRICHS JR.

Arguments as to Procedure in the Case Are Set for Next Friday.

Yesterday had its due proportion of developments in the matter of the Fair will. Judge Slack's court was uncomfortably c.owded, and, no doubt, if the morbid portion of the community had not been otherwise engaged, there would have been less

than the standing room there was. The contest of the last, or "Craven will," made by Margaret J. STATE HEALTH BOARD.

It Makes an Appropriation for the Purchase of Anti-

The State Board of Health held a meeting in the rooms of Dr. C. W. Nutting of Ætna at the Baldwin Hotel yesterday, when quarantine matters in general were discussed. It was the general opinion that a more stringent quarantine law should be adopted, especially regarding smallpox: that every possible effort should be made to prevent this dreaded disease from reaching this State, both by land and sea.

The State anti-toxine factory came up for onsideration. It was thought it would be a long time before the factory would be turning out the anti-toxine, and Dr. Anderson suggested that steps be taken to secure some at once. It was stated that its effects, so far as tried in this State, had unquestionably been beneficial, and it had passed the experimental stage. It was finally decided to send East and buy a quantity of anti-toxine for immediate use and \$250 was appropriated for that purpose. It will be received in a few weeks, it was reported, and then each member of the board will be given his share for distribution in his particular district.

The anti-toxine factory will be under the direction of the State University, but it was proposed that the State Board appoint a committee to co-perate with the Uni-

HER FAREWELL APPEARANCE. Miss Edna Groves Gives a Well-At-

A number of local amateur singers assisted Miss Edna Groves, the soprano of the First Presbyterian Church, in her farewell concert, which was given in the Y. M. C. A. auditorium last night. The hall was filled with enthusiastic friends of the per-

formers, and every number was encored.

Miss Groves sang an air from De Koven's "Rob Roy," a lied by Schumann and a florid song by Mazzoni. In the last selection particularly her light, pretty voice was heard to good advantage. Her warm reception showed the popularity of the fair singer, who is giving up her choir position to pursue her studies in Europe.

Another of the vocalists, Miss Ruth White, had considerable personal beauty in her favor, as well as an easy platform presence. J. C. Hughes as usual pleased his audience and T. H. Desmond, the tenor, sang Stephen Adams' "Mona" with an energy that made his complexion rival the hue of the terra-cotta wall paper that formed his background.

Mr. Desmond showed himself to be possessed of considerable raw material in the way of voice, but it needs manufacturing. When he moderated his ardor and sang Tosti's little "Non mi la dite" without such a mighty effort the effect was much more pleasing. Adolph Lada played two 'cello solos agreeably, and Mrs. Allardyce and Miss White sang a duet by Lassen.

Californian Mechanics and Laborers Will Be Given the Work.

Chief Engineer Storey of the San Joaquin Valley railway received a letter from his chief assistant in the field at Stockton yesterday, informing him that the engineering corps had finished their work in and around Stockton and would move out yesterday to Collegeville.

"I am informed," said the engineer yesterday, "that the surveying party will strike camp some time to-day near Collegeville, a distance of nine or ten miles from Stockton on the Mariposa road, in the direction of the Stanislaus River. Now that they are fairly started in the field they will make from three to five miles a day, and at that rate should reach the Stanislaus River in a week easily. Once they get to the river they will return to Stockton and make a second survey, using the first for a base line, while they decide upon a more feasible way, avoiding houses or obstructions of any kind that can be got around."

He was asked about the kind of bridges that will be built over the rivers.

The self-ter announcing that ne could not act longer with the Republican party in 1894, calls the new issue 'financial reform.'

Just what the platform will be no one can now state. It will not, I believe, be a single-plank platform.

"So complex is our system of credit that the gold power, the moment it sees the tide for silver or paper, or both, rise to a certain height, will use its last weapon, namely, the withdrawal of money from enterprise and the demanding of the payment in gold and the demanding of the payment in gold of all matured obligations. This will produce almost universal bankruptcyfailures and industrial depression. In that hour the nation will issue money directly, and it will practically demonetize both gold and silver as money in the same way that they were practically demonetized from 1862 to 1879.
