A Brass Plate From the Medicine Chest of the Lost Montserrat Found.

Notwithstanding the calm and general barometrical quiet of yesterday, a light breeze blew over the bay, and a number of the Pacific yacht fleet, with all canvas spread, swept around the harbor. Only a few of the graceful nautical flyers were out the effects of the club festivities of the day before doubtless keeping the bold rovers of the sea—at church. The Truant, Lily L, and the sea picnic luncheon had been enjoyed by the thousands present, the literary exercises began. They were opened by the singing of a German song by the members of several societies united specially for the occasion. H. Friedrichs acted as leader of the singing societies. A poem was recited by Mrs. Neta Mueller, whose delivery of the new piece of verse was so excellent that she received the heartiest applause. The poem was written by Max Bergheim, the poet of the day.

An address by Grand President F. Ott was the feature of the programme. He reviewed the history of the organization and gave statistics to prove that a great deal of good work has been accomplished by it. The Order of Hermann Sons has about 100,000 members. In California there are 3000 members. San Francisco Lodge No. 1 was founded in 1870, since which time the order has paid out in Cali-

The Finding of Articles That Were Buried in the Long Ago.

A BADGE THIRTY YEARS OLD.

It Was Given by the Caledonian Club--Its Owner is Unknown.

Bakers Beach has developed another mystery, as appears from a story told a few days since by a young man named John Burke to D. R. McNeill, chief of the Caledonian Club. According to this young man, who says 1421 Taylor street is his residence, some children called his attention to a discovery they had made while playing on the sand, and this led to the finding of several articles that evidently had been buried in the beach for many years.

On Sunday, the 5th inst., several children were on the beach when one of the number proposed that they dig a tunnel. The others agreed, and providing them selves with scoops, they commenced to dig with that ardor that characterizes the energy of youth, but which as a rule is not productive of any practical results. They dug and dug in the wet sand until they had made a hole about four feet long, when suddenly the foremost cried out, "See what I have found," and held up a rusty

pistol.

Further work in the hole was stopped, when the finder suggested that the weapon might have been used by some one who had taken his life and then the youngsters and the some adult to whom had taken his life and then the youngsters went off in search of some adult to whom they could tell of their discovery. They met Burke and told him that they were afraid to dig further lest they might come across the remains of a man. He examined the weapon and saw that it was a self-cocker, not one of recent make, but one of either French or English manufacture that was in use more than a third of a century ago. It was so rusted that neither the maker's name nor the number could be distinguished.

Burke announced a determination to go to the place and make a further search, but to the place and make a further search, but the youngsters held back as if in fear that the ghost of some one covered by the sand near where they found the firearm would rise and strike terror into them. They pointed to the place whence they came and told Burke to go to the hole. He moved in that direction, and the young-sters growing bolder, followed at a dis-tance, and finally took up a position where they could see, him extending the exca-vation. The young man worked for some time and as a result of his labor obtained a silver badge of the Caledonian Club, a silver badge of the Caledonian Club, a bridle, two old-fashioned spring back clasp knives and two leaden bullets. The knives, knives and two leaden builets. The knives, like the revolver, were very rusty and the bridle showed the effects of having been a long time in moist sand. The badge, which is the size of a standard dollar, was black and so encrusted with sand that it was not until it had been scoured that its identity could be established. The following is the inscription on the badge: Memo me Impune Lagessit.

the back that gives a clew to its once owner.

Mr. McNeill, who has possession of the relic from the ocean beach, said: "I do not know of any way to trace the ownership of this badge of the society, as there are no marks on it other than those you see, placed there by order of the society nearly thirty years sgo. All that I can say about it is that it was one of a number of prizes distributed to winners in the game at the picnic in 1866. What do I think of the find? Well, I hardly know what to think. It may be that a burglary was committed long ago and that the articles

found buried were a part of the plunder; that the perpetrators of the crime, fearing the possession of the articles would compromise them, concealed them. It may be that many years ago, when that portion of the City was not as accessible as it is now, some horseman was attacked, killed and robbed; that the robbers took from the victim such property as could not be robbed; that the robbers took from the victim such property as could not be traced to the ownership of the dead man in case it was found in their possession, then buried the body and the saddle, as well as the other articles that were found, and led the horse away. It is just possible that the pistol was used to commit murder. I would not be a bit surprised if a skeleton would be found some day near where the badge and other things were found."

An excited crowd gathered around two young ladies and their escorts at the corner of O'Farrell and Powell streets yesterday afternoon. The young people had been riding in a two-seated carryall, and one of the girls drove.

The streets are wide, and there was no trouble till they reached Powell street. There the conductor of an O'Farrell-street car ran out and lifted the iron lever with which the cable is depressed at the crossing. The man was under the horses' hoofs, and the girl driver, becoming confused, pulled the wrong line and got the team tangled with the lever.

Wild confusion ensued. Both horses began to kick. The doubletrees at last gave way and the traces were broken. This loosened the horses, and they started to run away. They were soon caught and returned to their places. In the meanwhile the vehicle had caused a blockade of the cars, which lasted till the harness and the carriage were repaired.

HOW THEY DO THEIR WORK.

Among the Features Will Be a Race in Canoes of the Alaska Indians.

The bay in the vicinity of Long Bridge was dotted over yesterday morning and evening with the four and single oared shells and barges of the several boat clubs which are to participate in the regatta of the South End Rowing Club at El Campo May 30.

They were engaged in practice spurts and hundred-yard dashes for the spirited contest which is to come off between the following-named clubs on Decoration day: Stockton Athletic Association, Farragut Club of Vallejo, Acme Athletic Club, the Alameda Rowing Club, Olympics, Ariels, Pioneers, Tritons, South Ends and St. Mary's College Club.

The crews of the several clubs will not

be definitely announced until after the general meeting on the 15th, as there have been many changes made in their person-nel on account of accident and other auses.

The crews of the Pioneer Club will in all
