runs through the country firing mattresses, lounges and upholstered furniture.

He came to Ward's on Saturday, saying that his horse had died from lockjaw and he wanted to buy another one.

Ward agreed to this, and the man went off leading the horse, an animal weighing about 1100 pounds.

Horse and Buggy Missing. SANTA ROSA, CAL., July 14.—On Friday last a bay mare and a black side bar top buggy were taken from Laughlin & Ross' livery stable by a short, thick-set man.

The man told the men at the stables that he was going to Mark West, but he has not yet returned. The officers have a good description of him and are doing their best to find him and the property he took away with him.

Fatal Fall at Los Angeles.

LOS ANGELES, CAL., July 14.—John Borchers, a blacksmith 40 years of age, fell from a window in his room in the second story of his house and broke his neck this morning.

He died at 11 o'clock. He was intoxicated when he returned home last night, and, while standing in front of the open window, lost his balance and fell over. He leaves a widow in San Bernardino, from whom he had been separated for some time past.

FRUITS OF SANTA CLARA.

Scarcity of the Dried Apricot Product Predicted by Good Judges.

The Outlook for the Present Year Much Better Than for That Passed.

SAN JOSE, CAL., July 14.—Colonel Philo Hersey, president of the County Fruit Exchange, yesterday issued a statement regarding the outlook for the present year.

"No quotations have yet been made for peaches. A number of large sales have been made, but the figures have not been made public. One sale made during the past week involved not less than 1000 pounds."

The second bulletin of the Santa Clara County Fruit Exchange, issued July 11, has the following on crop prospects: "The outlook for 1895 is much better than it was for 1894. We believe the market will be more active and confident. Sales can be made more promptly, and prices, while not high, will be firmer and less fluctuating."

"Apricots will be very scarce as a dried product. Good quality apricots are light and frost has injured others. While apricots green have sold from \$30 to \$55, the price of peaches has not been established, but will vary from \$16 to \$25, according to quality and kind."

"Prunes are the same in quantity as last year, and if we can spare the hot wave of late August it is thought they will average one size larger. This, however, cannot be determined at this early date."

As the French are reported 20,000,000 pounds short of last year, it is expected that our product will all be required, and if the usual conditions of trade are recognized, we shall hope to obtain living prices for our product and to have a steady trade and a healthy consumptive demand.

Officers of \$25 have been made for green prunes, but we have heard of no sales. The associations are prepared to do good and prompt work, and it will be for the interest of the fruit industry generally to give them our complete and hearty support."

"The Exchange, with increased facilities for combining and grading, expects to overcome the delay caused by the numerous individual lots which it became necessary to consign and await the action of the fact of commission house. Prompt business methods will be used and ready returns made to the contributor."

BI-CYCLE HANDICAP. J. Wing Wins the Seventh of the Five-Mile Trophy Races.

SAN JOSE, CAL., July 14.—There was a large crowd at the five-mile course in East San Jose this morning to witness the seventh of the five-mile handicap road races of the San Jose Road Club.

The race was well managed, although the handicaps were a little too large. The scratch men gained but little on the handicap men and the latter finished well wunched. J. Wing, with 30 seconds handicap, won the race in 14:00. J. Harrington was second, with Smith third.

The others finished in the order named: V. A. Benson, Dahlstrom, G. Hardenbrook, G. Navlet, E. Bello, J. Smith. The handicaps were followed by F. Smith, 1 min. 15 sec.; J. Wing and Dahlstrom, 50 sec.; J. Harrington and V. A. Benson, 50 sec.; Hardenbrook, Navlet and T. E. Bello, scratch.

The trophy contested for is a silver cup, and must be won three times to become personal property. The following have won the cup: V. A. Benson and G. Navlet, twice each; W. Harris, F. McFarland and Wing, once each.

Five From Spontaneous Combustion. SAN JOSE, CAL., July 14.—Shortly after 2 o'clock this morning fire was discovered in the rear of Schimmel & Pfister's music-store on East Santa Clara street, near Third.

The fire started in a room used as a repair and finishing shop. The room was filled with paints, oils and varnishes, and the fire is supposed to have resulted from spontaneous combustion. Seven pianos and several hundred dollars' worth of sheet music were destroyed. Iron doors kept the flames from spreading into the store, and but little damage was done to the stock there.

The building in the rear of the store was totally destroyed. The loss of the building is placed at \$800. Schimmel & Pfister's loss will amount to a couple of thousand dollars and is partially covered by insurance.

Nominations for Sanitary Officers. SAN JOSE, CAL., July 14.—The citizens of the proposed Alameda sanitary district yesterday filed the following list of nominees for the offices created by the organization of the district: Sanitary Board—S. F. Leib, George Cozzens, Frank Baumgartner, J. J. Devine and Theodore Lenzon. Assessor, F. W. Donohue. Fred Ottman and James Moynagh are named as inspectors of election. The election takes place August 3.

The Spectacles Party Returning. LOS ANGELES, CAL., July 14.—The Spectacles party passed through here today, en route to San Francisco. They left on the evening train.

FATHER YAGER DEAD.

He Was One of California's Most Noted Pioneers.

PASSED AWAY AT NIGHT.

The End Came at His Daughter's Home at Arlington Heights.

A POWER IN THE EARLY DAYS.

One of the Heirs to a Fifty Million Dollar Estate in Germany.

FRESNO, CAL., July 14.—Cornelius Yager, better known as Father Yager, one of the most noted of California's pioneers, died here late last night.

When he passed away he was lying at the home of his daughter, Mrs. Sarah E. Caldwell, at Arlington Heights, in the suburbs of the city. He was attended by his grandson, Dr. E. E. Brown of Selma, and by Dr. J. L. Maupin of this city.

The decline began last Friday. The cause was a complication of diseases, of which diabetes was one, but a failure of the vital organs from age had much to do with the pioneer's death. With wonderful tenacity the old man has clung to life. Since Friday night he has been at death's door, and his physicians expected that every minute would be his last.

Father Yager was born in Kentucky in 1811. His ancestors were German, but for many years had lived in this country. They took a prominent part in the struggle of the colonies for liberty.

Nicholas Yager, great-grandfather of Cornelius Yager, went into Kentucky when it was a part of Virginia and was the first white man in that section of the country. He patented a large tract of land there. On his return to Virginia he sent the papers showing his title to the land by another party and he himself undertook to find a shorter route across the country. He was taken prisoner by the Indians, his body was stuck full of pine splinters and he was burned to death. The papers were saved and the family of the murdered man obtained possession of the rich lands.

Father Yager was a true representative of the illustrious family. He married Miss Susan Frances Berry in 1838 and settled in Missouri, near the present city of Independence. Seven children were born and four are now living, Frank, John G., Sarah and Mary. Mrs. Yager died in 1849 and a year later Father Yager came across the plains to California, settling at Mountain View, Santa Clara County.

For some years he was County Clerk of Contra Costa County and later lived in San Joaquin, Santa Clara, Tulare and Fresno counties.

It was as a minister of the Cumberland Presbyterian Church that he was most widely known during the great gold excitement. His magnificent carriage and height made him a marked figure, while his wonderful constitution defied the exposure to which he was constantly subjected.

He spent a large part of his time riding over the hills on missionary trips. The rough miners everywhere revered the saintly old man, and his influence for law and right was almost unbounded. Unlike others who traveled from camp to camp, he needed no protection. He was welcomed at every dig, and his simple, honest way of preaching won the love of many of the lawless miners. The mountain preacher was associated with the noted Bishop Monogue, and for years they worked in the camps for the cause of the church.

When an old man Father Yager learned that he was one of the heirs of an estate in Germany, valued at \$50,000,000. The money was left by some of his relatives, and now lies in the Bank of Hamburg awaiting settlement. Father Yager's claim has been proved up. At no time in his life was he a wealthy man.

Father Yager was a member of Fresno Lodge, Free and Accepted Masons, and of Trigo Chapter, Royal Arch Masons. The whole community mourns the death of this noble man.

WORK AT MARE ISLAND.

The Monadnock Waiting for the Arrival of Her Steel Rifles.

New Plans Being Drafted for the Widening of the Big Stone Dock.

VALLEJO, CAL., July 14.—The new monitor Monadnock has been hauled up under the big shears. This is partly to make room in the vicinity of the iron-plating shop and stone dock for the Adams and partly as a preparation for the arrival of the four 10-inch steel rifles, two of which go into each turret. These guns are of particularly fine workmanship and are as fine as the Washington navy yard has yet turned out. There is still much to be done on the monitor, but it would not take long to finish it up if the yard people could get the guns.

The top armor of the turrets has been lying here a long time, as has also the hydraulic and electrical apparatus which will operate the guns; but things are at a standstill awaiting their arrival. The rifles will have to be lifted by the shears into position in the turrets, and suspended there until the hydraulic pumps, cushions, etc., are adjusted and tested. A complicated system of electric lights, signals, telephones and firing batteries then remain to be run connecting the conning tower and turrets.

Should the Swatara be selected by Governor Budd as the Naval Reserve vessel it will be necessary to build her a complete set of boats. This is another reason why some think the Governor will find her selection too expensive. The boatshop has the lines of her old boats and could get them out quickly if necessary.

An inquiry from the Mare Island authorities has developed the fact that the plans for the widening of the stone dock entrance have not been completed yet.

From an officer it is learned that the department had plans for this work some time ago. They contemplated the broadening of the entrance to a width to accommodate the Iowa or our navy, but lately England and other countries have been building vessels of still greater beam and thinking it possible that we may build some of like dimensions, the Washington authorities have concluded to have new plans prepared. Naval draughtsmen are at work on them.

Quite a number of the Philadelphia's crew have been discharged, having served out their three years. Most of them are Eastern men, and consequently will be taken home at Government expense via Pagama.

VALLEJOITES ROBBED. Their Misfortune Due to Lack of Proper Caution. VALLEJO, CAL., July 14.—Two Vallejoites had rather an unpleasant experience an evening of two sines, but they have only their own lack of caution to blame for it.

They started about 9 o'clock to walk over to Vallejo from Benicia, seven miles east of here. The road is a lonesome one in some places, and when a mile or so outside of Benicia the two were joined by a third man, who asked permission to walk over with them.

This being granted, the stranger produced a bottle of whisky and invited the two to have a drink, which they did. One of the original two soon complained of drowsiness coming over him, and the two companions were given another drink. This fixed them, and when they awoke they were lying by the roadside. The stranger had disappeared, likewise all the valuables from their pockets.

SANTA BARBARA MINERAL LAND. Suit Brought to Settle Contenting Claims to a Valuable Tract.

SANTA BARBARA, CAL., July 14.—J. R. Hill yesterday brought suit against Thomas K. Moore to obtain recognition of certain rights he claims to a mineral discovery made by him on land belonging to Hiram C. Pierce, lying near the San Marcos tollroad, known as Rancho de la Purificacion, and an option acquired upon this ranch by Moore acting upon his advice.

Hill claims that last winter he discovered a valuable gold-bearing ledge on Pierce's ranch and communicated this discovery to Moore, who at his instigation paid \$500 for the option on the said ranch, and thereafter the purchase of a portion of it at \$55,000. In fulfillment of the agreement Moore made over to him a half-interest in this option, but two months later, when the option expired another was taken. Moore kept the whole to himself, and Hill asserts he has now transferred his interest in the option, together with the information concerning the gold ledge, to J. D. Richards and W. H. Eddy, thus doubly violating his compact.

Hunting a Mountain Lion. SANTA BARBARA, CAL., July 14.—A mountain lion has been seen several times lately in the back of the Terraces, a beautiful place belonging to Eaton on the Montecito. A party of hunters is scouring the hills and canyons for the animal.

The place where it was seen is close by the homes of Hugh D. Vail Jr., Henry C. Stoddard, Frank Gallagher, Kinton Stevens and I. C. Waterman. The latter is the young millionaire from Philadelphia.

Work on the Coast Railroad. SANTA BARBARA, CAL.—Grades stakes have been set on the coast extension of the railroad several miles below El Capitan. This brings the work within a few miles of Elwood, the present terminus, north from Santa Barbara. Surveyors are camped at El Capitan.

The depth at which the caissons must be sunk for the pier foundation at the mouth of the Santa Ynez River would require 1,000,000 bricks for the portion of the work under way. On this account stone or concrete may be substituted. The great local question of the day is still whether the road will pass through Lompoc.

ORDERS FOR THE OLYMPIA.

To Relieve the Flagship Baltimore on the Asiatic Station.

It Will Be by Far the Finest Cruiser in the Chinese Waters.

WASHINGTON, D. C., July 14.—The Navy Department has issued orders for departure of the Olympia from San Francisco to relieve the flagship Baltimore on the Asiatic station by the middle of August, the latter returning home after an absence of over two years for necessary repairs to hull and machinery.

Admiral Carpenter has protested against the withdrawal of the Baltimore, and believes that the station should be increased by the addition of some other vessels. The Baltimore, however, has been abroad since the naval review, and the terms of many of her men have expired and they wish to return home.

The Olympia will undoubtedly be the finest flagship ever seen in Chinese waters. No warship of Great Britain or Russia, it is claimed, ever attached to the station equals the Olympia, either in speed or general efficiency. Of the cruiser type, she is admitted by all naval experts to be ahead of anything of her class, and will prove to be most powerful flagship the United States has been represented by in Chinese waters.

Before the close of the summer is expected than one, and possibly two, of the vessels on the station will be ordered home for overhauling.

The Petrel has been on the station for a number of years, and will come to San Francisco for a few months, while the Concord is also slated, it is said, for home waters again. It is not the purpose, however, of the Navy Department to decrease the strength of the fleet in China, as it is believed that affairs in that part of the world will continue to remain in an unsettled state for a number of years yet.

It is expected that the fleet will soon begin a reorganization of her navy is accepted here as an indication that affairs in both China and Japan will bear close watching.

Close observers of the situation contend that the present fleet will be replaced by one that will attempt to regain her lost laurels and that her first step to this end will be in the rehabilitation of her navy.

Three gunboats intended for this station are now building at Newport News and when completed will be immediately assigned to duty. The Baltimore's return will be followed by her assignment to the Pacific station for the relief of the Philadelphia as flagship. The latter vessel is now undergoing repairs at Mare Island.

STRUCK BY A TRAIN. Three Persons Badly Injured in a Railroad Accident. OGDEN, UTAH, July 14.—A Union Pacific passenger train struck a team and covered wagon last night, breaking the wagon, killing the horses and badly injuring the three occupants of the wagon. The accident happened at the railway crossing near Ogden, where Second and Fourth West streets. The injured men were immediately brought to Ogden and placed in the Union Pacific hospital. The men were Dr. E. A. Wright, aged 50 years, G. M. Tye, aged 38, and his son, aged 11, all of Bunker Vista, Colo., who had started out from home some days ago to seek a new location in the further West.

Dr. Wright's injuries are quite severe, but not necessarily fatal, while his son should tell against him. His head and face are a mass of cuts and bruises. Tye is proprietor of a large livery-stable at his home, and besides being cut and bruised is injured in the position of a protractor in the small of the back. The boy escaped with only a few bruises on the face.
