The following are the seasonal rainfalls to date as compared with those of the same date last year: Eureka .11, last year .02; Red Bluff .16, last year .02; Sacramento .04. last year trace; San Francisco .01. last year trace; San Lius Obispo .00, last year necord; San Diego .00, last year necord; San Bluff .16, last been reported from California stations to-day; Bluff, 96; Los Angeles .78; San Lius Obispo .72; San Brancisco data: Maximum temperatures have been reported from California stations to-day; Wind, which was purely local; cloudy weather generally prevalls to-night with light northerly winds. General rain fell yesterday over the wheat and corn belt of the Mississippl Valley and to the north thereof. The area of high pressure continues central off the Washington Coast and appearances have a tendency to move; an eastern movemath will give warmer weather to the Pacific Slope.

The remperature has remained nearly stationary over the Pacific Slope during the past twenty-four hours; more or less clouds will prevail during the next thirty-six hours, yet there are no indications for any rain. To-day was more than usual free from fog at San Francisco, but more will prevail Sunday.

BRADSTREET'S REVIEW.

NEW YORK, N. Y., July 19.-Bradstreet's to-NEW YORK, N. Y., July 19.—The stock market to-day, as on previous days of the week, was entirely in the hands of the professional traders. A well-known broker said, after the board adjourned, that, in his opinion, fully 90 per cent of the day's business should be credited to room operators.

NEW YORK, N. Y., July 19.—Handsteet 8 to morrow will say; Alt the previously reported favy or sible industrial and commercial features are continued this week, the endurance of the revival in demand for iron and steel, the further advances in prices of the same and additional increases in wages of industrial employes being the most significant.

CHICAGO MARKETS.

CHICAGO, ILL., Juiy 19.—Yesterday after the regular session of the Board of Trade had closed there was an advance in wheat on the curb, on the rumor of troubles in Bulgaria. As is usually the case, the war rumor proved an excellent selling argument, for at the opening to-day and during the morning hours there was nothing for a bull to congratulate himself typon. The principal trading was the selling of a moderate line of shorts by a professional who has been achieving success in all the grain markets and in provisions within the past month. Receipts at Chicago to-day were 68 cars, and 159 arrived in the Northwest. Withdrawals and 159 ceptember wheat opened trom 684/8c to cover, but in so doing caused a raily of prices. prophesy larger yields, and of conf probably the largest on record.

Western receipts of wheat are not half what the were last year, while exports for the week, about a quarter of last year, show that foreign dealers are not regarding the situation with anxiety. Nor do British accounts indicate any anxiety about cotton, while efforts are reported by some American mills to sell part of the large stocks taken some months ago, apparently exceeding the needs for the year. If unfavorable to some speculators these are cheering conditions, for it is better to have tair crops than to get higher prices for what remains.

speculators these are cheering conditions, for it is better to have tair crops than to get higher prices for what remains.

Orders have so accumulated in iron products that some works forego the usual summer rest, and Eastern furnaces soon to begin blast will add about 5000 tons weekly to the production. Yet the week has been in new business the dullest. Since the rise in prices began, as many hesitate to buy after so great an advance. A few quotations have advanced—gray forge and Eastern bar—while Bessemer pig is a shade weaker at Pitts-burg, but the average of all prices is per cent higher for the week and 28.3 per cent higher for the week and 28.3 per cent higher than February 1. Minor metals are stronger, with sales of 4,000,000 pounds of copper up to 11c for lake, and tin very firm in spite of a large visible supply. Wool advanced in the first half of July, and is now 7 per cent higher than a year ago. Manufacturers do not support the advance and are buying only for immediate needs, but holders who have taken for weeks past several times the quantity consumed, are stiff. The opening of lightweight woolens has not been encouraging, as less demand and slightly lower prices appear, but was highly encouraging as to worsteds, in which there are numerous advances.

Cotton mills continue to enjoy a large business and several have advanced wages this week, but some strikes of considerable importance are threatened or are in progress. The weaker tone for the material does not as yet affect prices of goods. New business in boots and shoes is limited. Foreign trade continues unfavorable with a decrease of 10 per cent in exports this month, and an increase of 23 per cent inimports. Failures in eleven days of July show liabilities of \$3,503,982 this year against \$2,630,306 last year. Failures for the week have been 256 in the United States, against 24 last year.

COAL—Harrison's circular says: "During the week there have been ten arrivals from the Coast mines, aggregating 26,909 tons, and one arrival from Australia with 5024 tons. It is most singular with only 12.720 tons of foreign Coal arriving here in the past thirty days, that the yards along the water front should show such full stocks. With such a showing now what will we do for storage room three months hence, when Australian and English will be pouring in. It will have to be handled very expeditiously to avoid a jam, but the principal friction will be a scarcity of wharf room, hence it behooves our Harbor Commissioners to make the necessary repairs, dredging, etc., now, and be prepared for this influx of foreign tonnage. Such of our wholesale Coal-dealers who have not bunkers are only fitted and will only contract to take delivery of 100 tons per working day, hence a ship of 3000 tons will remain at the wharf 34 days. Hence it becomes simply a matter of computation of the number of vessels to arrive at specific times, the amount of wharf room these vessels will occupy and the time they will remain in berth, and

the writer's views will be too fully verified. The profit on Coal is so small it will not permit buyers to pay any demurrage. Large consumers of fuel this year will have no cause for complaint, as low prices will prevail." FAMILY RETAIL MARKET.

Changes this week are neither numerous nor wide. Poultry is somewhat cheaper. Fruits and Vegetables are plentiful and the seasonal kinds have a downward tendency. Butter is a little cheaper. Eggs are unchanged. Fish is cheaper. Following is THE CALL'S regular weekly retail price list:

COAL-PER TON.

ground is now in about three feet and its face shows a streak of ore from which some naying assays have been made. The inclines on both the Con. Virginia and Belcher ground and on the Hale & Norcross ground are now down about ten feet. The surveys for taking the water out to the lode, on which Engineer Haist has been at work for several days, is finished and his report will be completed and sent to San Francisco within a few days. This getting water out to the lode will facilitate operations greatly and means an immediate increase of the force at work.

Bullion valued at \$10,837 20 has been received from the Con. Cal. & Va.

R. P. Keating, E. B. Holmes and August Waterman, the mining operators, have gone to the Comstock. man, the mining operators, have gone to the Comstock.

In the Bulwer they finished crushing ore for this run on the 10th inst. and cleaned up on the 15th. Crushed during the week 54 tons of ore, average battery sample \$26 65, tailings \$9 8. Total amount of ore crushed this run, 344 tons. They have in main ore chute now 8 tons-of ore, estimated at about \$25 per ton. North drift from No. 6 200 level was extended 8 feet; face in porphyry. They are still extracting some good grade ore from the new No. 1 upraise above 200 level.
