

DOBBLES CHECK A ROBBERY

Battle to the Death on an Electric Car Near Tacoma.

LONE OUTLAW GIVEN HIS QUIETUS.

Slain by the Railway's Superintendent After Wounding Three Men.

SHOT AT WHILE SEARCHING THE PASSENGERS.

The Dead Man Believed by Some to Be Dunham, the Campbell Murderer.

TACOMA, WASH., May 22.—The most desperate attempt at robbery by a single bandit ever recorded in this section was made this afternoon. Nearly five miles southwest of this city, on the Steilacoom division of the Tacoma Railway Company's line, an unknown man, at 4:30 o'clock, entered a car on its way to Tacoma, ordered the passengers to throw up their hands and was searching their pockets when Superintendent T. L. Dame opened fire on him. The robber returned the fire, wounding Dame and two others.

PORTLAND GHOULS CAUGHT. Stolen Body of Millionaire Ladd Buried on a Farm Near the City.

PORTLAND, OR., May 21.—Detectives Welch and Simmons late this afternoon recovered the body of W. S. Ladd, the late millionaire banker, which was stolen from Riverside cemetery on Tuesday night.

DROWNED NEAR YUMA. YUMA, ARIZ., May 21.—Six weeks ago Calvin D. Turk and W. S. San Francisco, who arrived last Tuesday and who had been frightening a number of their country people, Chinese women especially, into giving them money. They were arrested on Monday.

KILLING AT NEW WHATCOM. Jasper Nesselroad Shot to Death by a Jealous Husband.

NEW WHATCOM, WASH., May 21.—Jasper Nesselroad, and old and respected resident of this county, was shot in the abdomen and fatally wounded about 10 o'clock this forenoon at the corner of Dock and Holly streets by Harry W. Stewart, who arrived at the morning from Carson City, Nev., where he was employed by the Virginia and Truckee Railway Company.

Oppose Canada's New Tariff. VANCOUVER, B. C., May 21.—Book-sellers of British Columbia are passing resolutions in opposition to the new Canadian tariff. They declare that the prohibition of the importation of American books increases the cost of books.

Oppose Canada's New Tariff. VANCOUVER, B. C., May 21.—The waters of Fraser River are again rising. The Matsqui dike has burst and the water is destroying the growing crops of a large stock-raising and dairying municipality.

San Bernardino Monopoly. SAN BERNARDINO, CAL., May 21.—A deal was consummated to-day and deeds placed on record by which the Redlands Electric Light and Power Company succeeds to the ownership of all the available water power in this valley and practically acquires a monopoly of lighting contracts.

Drowned on Snake River. LEWISTON, IDAHO, May 21.—The ferry running across Snake River sank to-day. Thomas Aram, a wealthy stock-owner of Grangeville, was drowned. The ferry was owned by Griffiths & White. The disaster was due to overloading with cattle. Eleven hundred head of cattle were to be ferried across the river for shipment to Dakota. Sixty were on the boat at the time. Mr. Aram, Newton Hibbs, G. Brown, the driver, and a boy of the name of Pound were aboard. The boat sank about 2:00

ROMANCE OF PORTLAND. Untimely Hunger of a Yachtsman Defeats the Plans of an Elopement Couple.

PORTLAND, OR., May 21.—Horace Thrall, the owner of a small yacht, last night lost a \$20 fee and spoiled what might have been a sensational elopement, just because he was hungry and could not wait an hour or two to gratify his "gray matter," he called it. At 8 o'clock a fine-looking young couple engaged his yacht at the foot of Taylor street to take them down the river a few miles to intercept an Astoria-bound steamer. The yacht-owner was to receive \$20 for his services, but he insisted upon eating before setting out. He deplored the anxiety of the young people to get away.

While Thrall was gorging himself another carriage drove down to the dock and in the twinkling of an eye a woman and two gentlemen alighted. The gentlemen quietly hustled the fair eloper into the carriage, which was rapidly driven up-town. By this time Thrall appeared on the wharf, ready to sail, but instead of his \$20 fee he got a severe tongue-lashing from the young man, and a few moments later the latter had succeeded in towing aloft, in a most unamiable mood.

The young man is Thomas W. Breeden, son of a wealthy Cripple Creek (Colo.) mining family, who a month or two ago successfully wooed the young woman, Miss Susie Galashman, in Denver. Her parents are classed among the well-to-do.

The objection to the young man on the part of Miss Galashman's people, who are strict Catholics, is that he has a divorced wife living. To her he was wedded eight months later. It now is but five months since young Mr. Breeden obtained a divorce.

The objection to the young man on the part of Miss Galashman's people, who are strict Catholics, is that he has a divorced wife living. To her he was wedded eight months later. It now is but five months since young Mr. Breeden obtained a divorce.

Mr. Willis spoke of the marked advance of the Y. M. C. A. work among the students of the great colleges and universities of America and the amount of good being accomplished by this work. He touched in a general way upon the aims of the Y. M. C. A. and the object of the convention, which was to aid in furthering these aims.

H. J. McCoy, secretary of the San Francisco Y. M. C. A., and Robert E. Lewis of Chicago delivered short talks. F. L. Willis was chosen presiding officer of the convention and upon taking the chair asked as a notable feature of this, the first session, that each delegate introduce himself to him personally.

PORTLAND, OR., May 21.—Detectives Welch and Simmons late this afternoon recovered the body of W. S. Ladd, the late millionaire banker, which was stolen from Riverside cemetery on Tuesday night.

YUMA, ARIZ., May 21.—Six weeks ago Calvin D. Turk and W. S. San Francisco, who arrived last Tuesday and who had been frightening a number of their country people, Chinese women especially, into giving them money. They were arrested on Monday.

GAUER TO PLAN CHRISTIAN DEEDS

Annual Session of the Coast Students' Conference.

Pacific Grove Welcomes Representatives from Many Colleges.

Leaders in Gospel Work Present to Give Counsel to the Delegates.

PACIFIC GROVE, CAL., May 21.—The little city among the pines is full of life and interest now, for the delegates to the second annual Pacific Coast Students' Conference have arrived. The young men came on the evening train, full of the breezy enthusiasm and heartiness of the typical student.

The first session of the convention was called to order by Chairman C. C. Michener of New York City, who is also college secretary of the international committee of the Young Men's Christian Association.

Mr. Willis spoke of the marked advance of the Y. M. C. A. work among the students of the great colleges and universities of America and the amount of good being accomplished by this work. He touched in a general way upon the aims of the Y. M. C. A. and the object of the convention, which was to aid in furthering these aims.

LOS ANGELES WOMAN'S COUP. Prevents for a Time the Erection of a Trolley Pole Before Her Residence.

LOS ANGELES, CAL., May 21.—Mrs. Mary Walsh of 812 Hill street objected to-day to an electric railway company planting a trolley pole in front of her house. Her expostulations having no effect on the workmen Mrs. Walsh outwitted them in a way peculiar to herself.

The men tried every method except force to move her, but she would not budge. Then the officials of the railway went out and pleaded with her to get off her chair and let the work go on. But all had no effect.

She would not have the pole in front of her house, even if she had to sit over that hole forever.

Professor Holden and His Subordinate Disgrace as to Method. SAN JOSE, CAL., May 21.—Burnham, Barnard and now Hussey.

Some day it will be a tradition that Edward S. Holden, the terrible man on the mountain, has caused nearly as many stars to fall from the intellectual zenith of the Los Angeles Observatory as could be counted in their downward flight by the great telescope.

Barnard and Burnham, whose names were an ornament to the educational roster of California, have long since given up the fight against the methods of Professor Holden, and now it is mainly to Professor Hussey that the blame is laid.

It is at least a peculiar coincidence that the complaints of all the eminent scientists of America and the amount of good being accomplished by this work. He touched in a general way upon the aims of the Y. M. C. A. and the object of the convention, which was to aid in furthering these aims.

H. J. McCoy, secretary of the San Francisco Y. M. C. A., and Robert E. Lewis of Chicago delivered short talks. F. L. Willis was chosen presiding officer of the convention and upon taking the chair asked as a notable feature of this, the first session, that each delegate introduce himself to him personally.

GOLD PROSPECTORS ON MOUNTAIN'S COAST

San Franciscans Seeking for Riches in the Sands.

Party Headed by the Inventor of a Novel Amalgamating Machine.

Yellow Flakes and Traces of Quicksilver Found on the Ocean Beach.

MILL VALLEY, CAL., May 21.—Far away from the prying eyes of the public, at the mouth of the great redwood canyon, a party of three is searching for gold washed down the rocky coast of Marin.

The route to the prospectors' abode leads one over a wild section of country, where the great fogs from the ocean sweep in and envelop the hills in a cold embrace and the winds howl continually.

The inventor of the novel amalgamating machine is Mr. Verne, who has been pitched so as to be away from the world at large while they watched the workings of the mechanism set up by Verne.

My machine," said Verne, "is different in some respects from those now in use. I have never exhibited it in public, and the only tests I have made with it in San Francisco have been in my back yard, where no one has seen it. I am not prepared to explain the principle beyond that I do not use the gravity system used in other amalgamating machines. I have had it in successful operation for about a month, and before I put it before the public I wish to test it practically. I intend to visit other beaches on the Marin coast and will also go to Bolinas Bay."

CORNER STONE OF HEALTH Effect of Paine's Celery Compound Upon the Blood and Nerves.

Now is the season to lay the foundation for future health and strength. The corner stones of good health are complete digestion, sound sleep, pure blood and a perfectly nourished nervous system.

The wonderful success of Paine's celery compound in making people well and keeping them so has always been accounted for by physicians by its extraordinary power of nourishing and regulating all of these functions.

It is not strange that so many unscientific remedies do no permanent good when they disregard this close interdependence of the nerves and the organs of digestion and circulation, and attend to but one degrading part at the expense of all the rest.

The only possible way that a real lasting gain in strength and vitality can come is through purer blood, better nourished nerves and tissues, more refreshing sleep and an economy in the expenditure of nerve force.

These are the objective points aimed at and attained by Paine's celery compound! This remarkable remedy permanently cures every form of nervous debility, neuralgia, sleeplessness, indigestion, hysteria, headache, vertigo, dyspepsia and heart palpitation. Primarily the nerves, and then every organ governed by them is induced to work in a normal and orderly manner.

Mothers should give their children Paine's celery compound now it is spring, instead of some heavy blood-purifier that can have no power of creating an impure state of the blood or regulating so complicated parts of the body as the brain and nerves. Debility and disease are cured by Paine's celery compound. It is not in the power of any other remedy to make people so permanently and so completely well as this astonishing nerve and brain strengthener and restorer and blood purifier, Paine's celery compound. One needs simply to give it a trial to be satisfied.

For This Week Only. A few items picked at random from our immense stock.
