

JAMES H. HUGHES' WINDY ESCAPE

Mrs. Mary Nelson Tells Harrowing Tale of Husband's Cruelty.

Seeks the Protection of the Police for Self and Children After Being Choked and Beaten.

Oakland Office San Francisco Call, 1115 Broadway, Oct. 28. To save herself from the brutality of her infuriated husband, Mrs. Mary Nelson jumped through a window at her home, 1256 Twelfth street, and with her three children, the youngest 3 years of age and the oldest 7, following, made her way to the police station last night for shelter.

Mrs. Nelson declared that she had been the victim of her husband's ill treatment for days, but that her husband's assault was the ugliest of all, and she did not dare to remain in the house with him while he was in this mood. The police were sent out to investigate, and the woman and her children were given quarters in the station. Mrs. Nelson said that her husband arrested, fearing his vengeance if he were put behind the bars.

EARLY MORNING ROBBERY ON THE WATER FRONT

Two Sailors Fall Into Hands of Thieves, One of Whom Is Captured by Officer Flinn.

Two sailors, named August Kauffer and T. Trabolt, fell into the hands of robbers on the water front early yesterday morning and as a result John J. Lloyd, who claims to be a helper in the change of robbery standing against his name on the Harbor station book. Trabolt accuses Lloyd and his pal, who escaped, of taking \$5 from him.

While the sailors were in the hands of the thieves they were held by Officer Flinn and Hightower, who were patrolling their beats, gave chase to the robbers, who beat a hasty retreat. Flinn captured Lloyd, but the latter's companion, Trabolt, in the darkness, though Hightower fired shots to bring him to a halt, Lloyd refused to appear to the officers. He has a skeleton key in his possession.

Kauffer says that he and Trabolt had been drinking in the hands of the thieves. He said that he was a little tipsy, and that he was a little nervous. He said that he was a little nervous, and that he was a little tipsy. He said that he was a little nervous, and that he was a little tipsy.

FATHER KIDNAPS HIS CHILD FROM NURSE

George Gray Makes a Bold Move to Get Possession of His Minor Daughter.

Mrs. Madge Gray, who resides at 1928 Pine street, called on Chief of Police Sullivan at his office last night, and in an excited manner asked him to send a detective with her to find her nine-year-old daughter Mildred, who had been kidnapped by George Gray, the child's father and divorced husband of Mrs. Gray. Mrs. Gray declared that Mildred was walking along Taylor street, near Bush, at about 11 o'clock yesterday morning in company with a man whom she searched about the vicinity for her charge, but could find no trace of her. She returned to her employer, Mrs. Gray, at once set out to find her child, and secured the neighborhood until dark without result. She reported the matter to the police.

George Gray is a member of the contracting firm of Gray Bros. Two years ago his wife obtained a divorce from him, and was awarded the custody of the two minor children, the oldest of which is Mrs. Gray will apply to the Superior Court to-day to have her child restored to her custody.

FIVE HUNDRED BURNING LETTERS ARE PRODUCED

Catherine Haight Says They Were Written to Her by Cyrus Elwood Brown.

Though the deposition of Mrs. Cyrus Elwood Brown has not as yet been completed and placed among the papers in the \$20,000 breach of promise suit instituted against her husband by Catherine Haight of Cincinnati, the attorneys who represent the claimant are preparing to augment the record by bringing the scene of Brown's alleged ardent wooing and search of other depositions and affidavits. A telegram from Cincinnati says: Deposition will be taken next week in regard to the discovery of 500 letters of San Francisco, reputed to be worth half a million of \$50.

GRAPE-NUTS.

MRS. RORER ON COMPLEXION.

Not a Matter of Outward Application.

Mrs. Rorer answers, in the Ladies' Home Journal, an inquirer about good complexion, reciting that it can only come from a healthy condition of the entire system and that it is not a matter of outward application, finishing with the statement that "your food cannot possibly agree with you if you have muscular rheumatism and a bad complexion."

It is a known fact that many people fail to properly digest the starch part of bread and other food. Grape-Nuts (a delightful breakfast food) are made of the grape sugar which results from preparing the starch parts of the cereals, in the same way artificially as the body should do by natural processes.

These Grape-Nuts give one food all ready for immediate assimilation into blood and tissue. They are ready prepared, require no cooking whatever and will be found most valuable by Athletes, Brain Worker or Invalid.

RED MEN REVERE MEMOIRS OF BROTHERS

"Council of Sorrow" Exercises Held in the Presence of a throng of Warriors and Palefaces.

In pursuance of a custom recently inaugurated by the great chiefs of the Red Men, the local lodge held a "Council of Sorrow" yesterday in the lodge room on Post street. It is the order of the great chiefs that once a year in any place where there are two lodges of Red Men, a memorial service for those of the order who have died during the year shall be held. It was a service of this kind that was held yesterday.

The large lodge room was crowded long before the services were opened, and every word of the speakers was followed with the greatest interest. The services opened with an address by Durin Lunderback, past grand sachem. He referred to the day and the occasion explaining the object of the services and recalling those in whose memory it was being held. Following this address the Lord's prayer was chanted by a quartet and the invocation, Dr. M. B. Ryer then recited "There is no Death" and the quartet sang "One by One."

The oration was delivered by E. D. Brandon, grand sachem. In his remarks he spoke of the purpose of the order, the fellowship which it fostered and the memories which it aroused. He reviewed its history and its origin, and he referred to the men who had brought the order to what it is to-day. Though the services were principally for those who had gone to the great beyond, they were also for those who had died during the year. He spoke of the purpose of the order, the fellowship which it fostered and the memories which it aroused.

Red Men might be with their living brothers, comforting them in adversity and guiding their pathway through life. "Lead Kindly Light" was then sung by the quartet and Emmelo Lastreto followed with a prayer for the souls of the departed. The services were closed with a prayer for the souls of the departed.

Red Men might be with their living brothers, comforting them in adversity and guiding their pathway through life. "Lead Kindly Light" was then sung by the quartet and Emmelo Lastreto followed with a prayer for the souls of the departed. The services were closed with a prayer for the souls of the departed.

YOUNG GIRL DIES FROM EFFECTS OF CHLOROPORM

Jennie McKown Succumbs to a Weak Heart While Being Operated Upon.

Coroner Cole issued a certificate yesterday morning signed by Dr. Ralph Addison Huntington, 574 Polson street, that Miss Jennie McKown, 2711 Sutter street, had died at his office Saturday night from chloroform. The coroner refused to sign the certificate and notified Captain Seymour.

The captain detailed Detectives Wren and Dinan to make an investigation and they reported that Miss McKown, who was stenographer, 21 years of age, had died at his office Saturday night from chloroform. The coroner refused to sign the certificate and notified Captain Seymour.

COMMITTS SUICIDE BY INHALING GAS

Mrs. Elizabeth Anna Flinn Ends Her Life Because of Sickness and Despondency.

Mrs. Elizabeth Anna Flinn committed suicide early yesterday morning at her residence, 423 Hayes street. She inserted a rubber tube on top of the gas jet, turned on the gas and placed the other end of the tube in her mouth.

Dr. Harrison, a roomer in the house, got home at 1 o'clock yesterday morning and his attention was attracted by the smell of gas coming from Mrs. Flinn's bedroom. He opened the door and found her dead in bed with the tube beside her head and gas pouring out of the end of it.

Harrison at once notified William P. Flinn, 84 Bryant street, and he communicated with the Morgue officials and the coroner. Mrs. Flinn's son, who had been ill for some months, which made her despondent, and she had frequently threatened to take her life. She was 51 years of age and a native of Oregon. Her husband is at present in the country looking after his ranch.

FRIEND OF ABRAHAM LINCOLN PASSES AWAY

Colonel Charles B. Wagner Dies at His Home in Alameda After Long Illness.

ALAMEDA, Oct. 28.—Colonel Charles B. Wagner died to-day at his home in this city, aged 78 years. He had been ill for about eleven months. Death was due to a stomach trouble. Colonel Wagner served through the Civil War as a captain and later was connected with the regular army, retiring with the rank of colonel in 1867. He was a personal friend of President Lincoln and commanded the guard that was stationed about the house in which President Lincoln was carried after being shot by John Wilkes Booth.

LAST SERVICES IN CALVARY CHURCH

Congregation Passes Forever From the Historic Old Building on Powell Street.

For the last time the members of the old Calvary congregation gathered last night in the church, on the corner of Powell and Geary streets, to hold services. There had been services in the morning-impressive services, laden with the sentiment of the last day. Dr. Hempel preached from the text "My presence shall go with thee and I will give thee rest." The congregation was a large one and seemed to be of all ages and members who perhaps had allowed the old church to take second place in their hearts had come to attend the services on the evening of the last day.

RED MEN REVERE MEMOIRS OF BROTHERS

"Council of Sorrow" Exercises Held in the Presence of a throng of Warriors and Palefaces.

In pursuance of a custom recently inaugurated by the great chiefs of the Red Men, the local lodge held a "Council of Sorrow" yesterday in the lodge room on Post street. It is the order of the great chiefs that once a year in any place where there are two lodges of Red Men, a memorial service for those of the order who have died during the year shall be held. It was a service of this kind that was held yesterday.

The large lodge room was crowded long before the services were opened, and every word of the speakers was followed with the greatest interest. The services opened with an address by Durin Lunderback, past grand sachem. He referred to the day and the occasion explaining the object of the services and recalling those in whose memory it was being held. Following this address the Lord's prayer was chanted by a quartet and the invocation, Dr. M. B. Ryer then recited "There is no Death" and the quartet sang "One by One."

The oration was delivered by E. D. Brandon, grand sachem. In his remarks he spoke of the purpose of the order, the fellowship which it fostered and the memories which it aroused. He reviewed its history and its origin, and he referred to the men who had brought the order to what it is to-day. Though the services were principally for those who had gone to the great beyond, they were also for those who had died during the year. He spoke of the purpose of the order, the fellowship which it fostered and the memories which it aroused.

Red Men might be with their living brothers, comforting them in adversity and guiding their pathway through life. "Lead Kindly Light" was then sung by the quartet and Emmelo Lastreto followed with a prayer for the souls of the departed. The services were closed with a prayer for the souls of the departed.

MINERS ARE NOW ORGANIZING FOR WORK AT THE CONVENTION

A letter from Leadville discusses the silver market, and incidentally comments on the fortunate position of Leadville, where there was lead to sell at \$4 per 100 pounds when silver was as low as 60 cents. When lead and copper dropped in price silver advanced. Attention is called by the writer to the fact that the silver market has not been very erratic. Its rise and fall have both been gradual. In January of 1896 silver was 67 1/2, and was about stationary at 69 1/2 all through March, April and May. In August, 1896, it began to decline and reached 64 in January, 1897, but dropped to 60 in April, 1899. The present upward movement is the first that has been sustained since the first part of 1896.

It is important to note in connection with this advance that the price of two metals, lead and copper, is very much higher than in former years. The average price of silver in 1896 was 66 cents, while this year it will be about 72 cents, yet at this time copper is only 10 cents and silver is 70 cents. Copper began to advance and was at 10 cents in August, 1896, and is now at 12 cents. The average price of lead is better, consequently the intrinsic value of a ton of ore in which silver lead or copper is present is much higher than at any time since 1896, when silver shot up to over a dollar, and copper was at 12 cents.

Lower grades of refractory ore can be handled. Ores that went over to dump eight or nine years ago are now being shipped, and miners are making elaborate tests of the older dumps to endeavor to secure some satisfactory method of treating their former waste product.

A meeting will be held at Redding, Shasta County, to form an association of the miners of Shasta, Northern California, to send delegates to the State convention to be held next month in this city and to take such other steps as may seem best to the miners of the north. E. H. Benjamin, secretary of the California Miners' Association, has written to the Supervisors of Shasta, Trinity and Siskiyou counties asking them to assist in making the movement.

The Mineral Wealth, published at Redding, Mr. Benjamin calls attention to some benefits that have been derived by the effort of the California Miners' Association. He writes that three investments of capital in the mining industry of California have been the fruit of the visit of the mining engineers. "One of the investments is in Siskiyou County," he says, "and as consulting engineer for this company I am at the present time erecting a large cyanide plant, and have given continuous employment to some forty men since the 1st of July. I shipped in fifty odd tons of mining machinery and have distributed many thousands of dollars in labor and machinery in Siskiyou County. I do not think that any statement that the California Miners' Association has brought no benefit to Northern California can be substantiated. I hope that Northern California will have a large, energetic and ambitious delegation in the next convention. It is established an independent smelter for Utah has some interesting features. The local papers are not true on the proposition. One argument that has been urged

church to take second place in their hearts had come to attend the services on the evening of the last day.

In the evening the sermon was from the text, "I will not let thee go except thou bless me and be blessed then thyself." Again it was a large congregation and a sorrowful one. The hymns were more than the Sabbath fervor; the prayers seemed more heartfelt, the congregation more devout. The impending separation cast its shadow over all, and its effect could not be hidden.

After the sermon had been preached the pastor called upon any who felt impelled to speak a word of prayer and in response the members reported to the pastor and prayed that in leaving the old church building the congregation would meet nearer the throne; that in leaving the

church it had occupied for thirty-two years the congregation would lose none of its faith, nor its grace, and that a new era would commence with the passing of the old.

The benediction closed the services and the people left their old house of worship for the last time. It will be torn down at once, and the completion of the new edifice the congregation will worship in the Y. M. C. A. building.

DRILL CORPS GOING TO SAN JOSE

OAKLAND, Oct. 28.—The Young Men's Republican League drill corps will go to San Jose to-morrow night with the Republican Alliance to take part in the demonstration at the Garden City. A special train will leave First street and Broadway at 6:30 p. m.

THIRTY SHAKESPEARE EVENINGS.

The development of a given play and the lines of its action may be represented by a considerable degree of accuracy by a system of graphical illustration, in those cases at least where the interest of the play is derived from a general course of events and from the career of the individual actors in various stages of complication. Character, being qualitative, is not expressed with the same fairness as plot by any scheme of line relation, but in a map of a play the lines of action usually the outcome of character it will be found that character and plot commonly coincide and the line that develops action is also the expression of character.

The advantage of a graphical illustration lies in its directness and vividness. It conveys a good idea of the architecture, so to speak, of the play, and is a decided aid to the imagination. The entire action of a play may be held before the mind and the lines along which the character is supposed to be moving have the same meaning to the student of the play as has a map of a railroad to a train operator. A manager knows by a glance at a chart the location and movement of each one of his trains at a given moment. In like manner it is possible to construct a chart of a play so that the student can know the location and movement of each one of his trains at a given moment. In like manner it is possible to construct a chart of a play so that the student can know the location and movement of each one of his trains at a given moment.

Of course that a map of any kind is a mere approximation of only one aspect of truth, the external, but as a map of a country is useful to an economist or sociologist so its counterpart in spiritual geography may be serviceable for interpreting psychological facts.

A Shakespearean play is divided more or less mechanically into five main divisions or acts, and these are further divided into a plot of a play the smaller divisions may be ignored and the acts only defined. Five uniform spaces may be used to represent the acts or field of action. These acts correspond more or less closely with the logical progress of the play. Take for illustration the course of tragedy. Tragedy is the history of unsuccessful struggle. It involves at least two permanent conflict and concludes with the downfall of the hero. With the disappearance of the hero, the equilibrium is again established. This process requires beginning and conclusion. The first act will be devoted, therefore, to the introduction of the characters in action and to receive the next little sum of \$5,000 for his trouble and the cost of the vessel which he realizes comes up to what he thought otherwise he will not get anything. He has talked about money, but he has not made it. The Los Angeles Herald is authority for the statement that the Macra Brothers quartz mine will soon sail for the island.

The following facts came from the Callifornia Chronicle by the condensing process: The Greek mine will soon be in operation. It has a five-stamp mill, concentrators, hoisting works, etc. The Sheridan mine is idle, but will soon start again. It has a ten-stamp mill and a water wheel. The ore is of the ribbon character. The Macra Brothers quartz mine has been bonded to W. H. House of Oakland for four months on a working bond. The Sparhawk mine has been incorporated. These mines are in the Jesus Maria district.

THE TRINITY JOURNAL REPORTS THAT THE DITCH CONSTRUCTED FOR THE LEAST CHANCE MINING COMPANY HAS BEEN ACCEPTED

The Trinity Journal reports that the ditch constructed for the Least Chance Mining Company has been accepted. It is twelve miles long, has an average width of eight feet and five feet on the bottom, with a depth of four feet. The mine is on the Trinity River, in the San Joaquin valley, near the mouth of the river. Several reservoirs will be built in the spring and the mine will have a capacity of 100,000 tons of ore per year. An acetylene plant will be established.

The Amador County Democrat says: Sargent's mine, on the middle bar of the Mokelumne River, lying immediately south of the Hardenshire, has increased its capacity for the purpose of running a 700-foot tunnel to connect with a ledge of ribbon rock. From every direction on the mountain side outlook for the future is bright with hope. Among the latest propositions where every thing indicates a winner is the Free American mine, seven miles up the creek east from Summit, managed by W. S. Newcomb. The company has a good hoist and a new Submarine pump that will handle forty inches of water. The shaft is now sixty-five feet on the day and night shifts.

The Yreka Journal says: The Greenhorn Blue Gravel Company No. 2, working the Nebraska place, received their permit for pumping out the shaft. The company is now preparing for winter operations, so as to be ready when the water is furnished during the rain and snow storms. The company has a good hoist and a new Submarine pump that will handle forty inches of water. The shaft is now sixty-five feet on the day and night shifts.
