## In Santa Claus' Realm

The immense Toy Department upstairs has been enlarged and extended until it covers almost half of the second floor. Every foot of this enormous space that is not required for aisles is covered with toys, games, sporting goods and toy books of every conceivable description. There are but two or three toy shops in all the world that are anywhere near as large as this one, and none other in this part of the world. The toys alone, in all their variety, are an interesting exhibit at which to spend some hours, but in addition to them we have prepared the unrivaled Mechanical Toy Show and Holiday Spectacle, The Swiss Alps, now open in Attraction Hall. Next week Santa Claus himself will arrive and take up his temporary abode in a gorgeous Ice Palace upon which the mechanics and electricians are now putting the finishing touches. Tomorrow there will be a special sale of Dolls and be sure and bring the children to see the beautiful Swiss Alps.
