EASTERN MARKETS.

New York Stock Market. NEW YORK, July 11.—Opening prices this morning were at the highest level of the day. There were striking advances afterward, notably in Rock Island and Pacific, but they proved unavailing to sustain the general market, which sagged slowly but steadily throughout the rest of the session. The majority of stocks closed lower than last night. The decline in the cash market was especially noticeable in the case of stocks such as New York Central, Chesapeake and Ohio, Chicago and Northwestern and others which have recently been prominent in the rise. The report of the Interior has been especially the encouragement felt on account of the Government's monthly crop report, particularly in respect to corn, which had a stimulating effect on the demand for the grain-carrying roads, but it became plain at once that the buying was conspicuous only in Missouri Pacific and Rock Island, which stocks are peculiarly associated with the bull market in the cash market. The report of the Interior bank statement was not so encouraging as the report of the crop. The heavy movement of currency to the interior has been a subject of comment all week. The total preliminary estimate of the regular express movement of currency to the interior is a balance against New York of a little over a million dollars, but the Sub-Treasury operations provide to nearly \$5,000,000. The report of June exports of domestic products explains the continued decline in the cash market, and which, together with the continued selling here of stocks for London account, necessitate the

abroad. Variations from yesterday's prices were few and unimportant. The market was quiet. Standard spot to August, made a slight advance to \$1.12 1/2, while the market for the \$1.02 1/2 to \$1.05 1/2; electrolytic at \$1.05 1/2 to \$1.08, and casting at \$1.07 1/2 to \$1.10. The London market for the month of July is \$1.02 1/2 to \$1.05 1/2, and the market for the month of August is \$1.02 1/2 to \$1.05 1/2. Lead was quiet and steady here at 4 1/2.
