

# REPEATED CAUSE OF BLOOD TO BE SHED

## Puglist Joe Goddard Among Men Shot at a Primary.

### Fierce Struggle for Supremacy in New Jersey Congressional District.

#### "Heelers" Are Imported From Philadelphia, and as a Result One Voter Is Killed and Several Fatally Wounded.

CAMDEN, N. J., July 28.—The primary election for delegates to the Republican convention of the First Congressional District of New Jersey was held to-day in Camden, Gloucester and Salem Counties, which comprise the district. The candidates for the nomination are Henry C. Loudenslager, the present Congressman, and J. Alpheus Van Zant. The contest has been one of the most bitter ever held in Southern New Jersey.

The polls were open from 5 p. m. to 8 p. m., and the three hours were marked with serious fighting. One man was killed in this city and Joe Goddard, the well-known heavy-weight puglist of Philadelphia, was probably fatally shot while endeavoring in Pensauken Township; another man was dangerously stabbed in this city and a fourth man received stab wounds at Dog Corner, near Merchantsville.

Goddard was at a voting place in Pensauken Township when he was shot. He was with a number of men who were traveling from one polling place to another. The puglist got into a quarrel with a colored constable named Robert Washington. It is alleged that Goddard assaulted the constable with a baseball bat, and that the constable in self-defense shot Goddard in the head. The constable surrendered himself to the police, and the injured puglist was brought to Cooper Hospital here, where the physicians say he may die.

Near a polling place Constable C. A. Fowler, while in a fight, was stabbed twice. His wounds, though painful, are not considered serious. There was much trouble in Pensauken Township and at Merchantsville, and a number of persons were badly beaten.

The most serious affray occurred at Third and Beckett streets, in this city. Each side had a crowd at the polling place at that point and a general riot was started. When it was over the rioters found that John Morrissey of Philadelphia, aged 25 years, had been shot through the heart by some unknown person, and that a policeman named Harry Miller, had received two cuts on the head and a probably fatal stab wound in the left lung. A number of other persons were hurt in the fight, but not seriously. Loudenslager won a majority of about twenty-five delegates.

The adherents of Loudenslager and Van Zant are charging each other with fraud and with bringing large numbers of repeaters from Philadelphia to the convention will be held at Woodbury on Wednesday.

Joe Goddard at one time was champion of Australia and considered one of the best heavy-weights in the world. He fought scores of battles and was repeatedly when in his prime he defeated Joe Choynski twice. The battles between the "barrier" champions, as they are called, are well known to ring goers. Both battles were furious. Choynski literally beat Goddard's face into shambles, but the Australian managed each time to come back and knock the Californian out. Goddard has a victory over big Joe McAluffe to his credit. Goddard fought in this city against Tom Sharkey, and the sailor knocked him out in four rounds. Goddard was not popular here. The night he met Sharkey he declined to enter the ring because the house was too small. The spectators called Goddard a quitter, and to save his reputation Joe went out and suffered defeat. He has not fought in five years. He has grown heavy, and lost all his cunning with his fists.

### MACEDONIAN COMMITTEE TO ELECT A PRESIDENT

#### Kidnaping of Miss Stone Will Play an Important Part in the Election.

SOPIA, Bulgaria, July 28.—The Macedonian Committee has convened a congress for August 2d to elect a new President.

The notorious ex-President of the committee, M. Saravoff, has returned here as a candidate for the presidency. If the Government permits the congress to meet the session promises to be an exciting one, as General Gotscheff, the actual leader of the committee, threatens to make revelations with regard to the alleged complicity of M. Saravoff in the kidnaping last year of Miss Ellen M. Stone and other compromising affairs.

It is reported that Turkey has demanded the arrest of M. Saravoff.

### Uneducated Officers in India Army.

LONDON, July 28.—The military authorities of India have discovered numerous officers who were recently commissioned in the India army to be so lacking in general education that it has been necessary to instruct and examine them in the elements of mathematics and English history before permitting them to attend the courses of garrison instruction.

### Commercial Treaty With Cuba.

MADRID, July 28.—At a council held to-day of the Cabinet negotiations for the conclusion of a treaty of commerce with Cuba were discussed.

### Excellent Wheat Harvest in France.

PARIS, July 28.—The Figaro this morning says that it has ascertained that the French wheat harvest will be excellent.

# CRUTCH-BAND

The crutch is a poor substitute for legs, and affords a very inconvenient and tiresome mode of locomotion—there is no more pathetic sight than a person slowly and painfully moving along the street supported by these artificial limbs.

When Rheumatism settles in the bones and muscles of the legs, it is safe to predict that the victim will eventually become helpless and crutch-bound. The corrosive, irritating matter that is deposited in the joints and muscles causes the most intense pain, the knees and ankles swell, and when the natural oils and fluids that lubricate these parts are completely destroyed the joints become locked and the muscles drawn and stiff, and crutches a necessity.

The acid poisons that produce rheumatic pains form in the blood, and are distributed through the system, and lodged in the arms, shoulders, hands, back and feet, or other parts of the body—resulting often in total disability. A permanent cure of Rheumatism can be effected only by a complete cleansing of the blood, and no other remedy so safely accomplishes this as S. S. S. It neutralizes the acid effects, purifies and invigorates the stagnant blood, and the gritty particles are washed out or dislodged by the new rich blood, and relief comes to the pain-racked sufferer. S. S. S. leaves no morbid, irritating matter in the blood to reunite and produce another attack, but expels every atom of it from the system. S. S. S. is a purely vegetable remedy, and does not impair the digestion or general health like alkali or potash remedies.

Write for our special free book on Rheumatism, and if any medical advice or other information is wanted, our physicians will gladly furnish it without charge.

# FEAR OF DISASTER AT ST. VINCENT

## Severe Earthquake and a Tidal Wave Affect the Island.

### Soufriere Is Again in Eruption and Causes Great Alarm.

KINGSTOWN, St. Vincent, July 28.—The Soufriere volcano has been slightly in eruption twice since last Monday. A severe earthquake shock, accompanied by a tidal wave, affected the northeastern point of the island, washing a fire-swept estate. No further damage was done.

Many people, both of the wealthier classes and laborers, are leaving the city fearing disaster. The Government is still feeding 6000 persons. The settlement of refugees in huts on acquired lands in safe localities is progressing.

The Panama cable repair ship Nowington, which is engaged in work eighteen miles north of St. Vincent, reports that the depth of the sea there has increased to a mile and a quarter. Attempts to pick up the cable have been futile, owing to unfavorable weather.

FOR THE FRANCE, Martinique (Monday), July 7.—Dr. T. A. Jagguard of Harvard University, representing the United States Geological Survey in the West Indies, arrived for the second time at Port de France June 24 and has since visited Mont Pelee twice. He has also made excursions to the southern part of Martinique and to the Warm Springs of the interior of the island. Dr. Jagguard came directly from St. Vincent.

### MONT PELEE IS QUIET.

As a result of recent examinations of the crater of Mont Pelee and explorations of the track of the devastating blast which destroyed St. Vincent, it appears there is extraordinary similarity between the eruptions of the Soufriere volcano of St. Vincent and Mont Pelee. The products are the same, both are characterized by the absence of lava and the work of destruction, both to inanimate objects and to mankind, was accomplished in much the same way. The destructive effects of the eruption of St. Vincent covered a much more extensive area, but the loss of human life was much less.

There has been no active eruption of Mont Pelee of consequence since June 6. A great cone of volcanic and volcanic bombs, which appeared within the fissure from which the explosion came, has grown in size since the middle of May, when Dr. Jagguard first saw it. Occasionally there are sudden slides of debris down this cone in the deep gorge, and the Riviere Blanche. These slides produce great columns of brown dust, which resembles smoke, that rise in billows from the mountain's flank and give the impression of an eruption when viewed from the sea. At night these slides of red hot rocks make a glowing streak in the mountain slope. This accounts for the many reports by passing vessels of eruptions, hot lava and dust falls. The phenomenon is a mere superficial one. As at St. Vincent, the many mud spouts, steam jets and local craters that have been reported are all superficial, caused by rainwater trickling into the beds of hot, dry gravel.

### NEED OF SIGNAL STATIONS.

The two volcanoes of St. Vincent and Martinique were in eruption in sympathy in May. Both have gradually become less active since and it is probable they will continue to diminish in activity judging by the present signs.

In this opinion the French scientific commission, headed by Professor La Croix of Paris, concurs. Dr. Jagguard is strongly opposed, however, to any rehabilitation of the devastated slopes of the volcanoes until the respective Governments of the islands are willing to establish permanent experiment stations to protect and warn the inhabitants. In addition to his work on the island of St. Vincent, Dr. Jagguard has spent some time in Barbadoes collecting information and specimens relative to the spread of the dust fall, which appears to have been much greater from the Soufriere than from Mont Pelee.

Dr. Jagguard has been in communication with both the British and French scientific commissions now at work in the islands. Before returning to the United States he plans to visit the northern volcanoes of the Windward group with a view to studying the conditions of vegetation and drainage.

### BALFOUR DISAPPOINTS ENGLISH SHIPPING MEN

#### Says Government Is Not Ready to Formulate Statement Concerning the Atlantic Combine.

LONDON, July 28.—Premier Balfour in the House of Commons to-day, in reply to a question in reference to the Atlantic shipping trust, said it was improbable that the Government would be in a position to formulate a statement of its attitude toward the trust before the recess of Parliament on August 8th. If any agreement was to be made with the trust involving a financial arrangement such agreement necessarily would be subject to the approval of the House.

### New Educational Scheme.

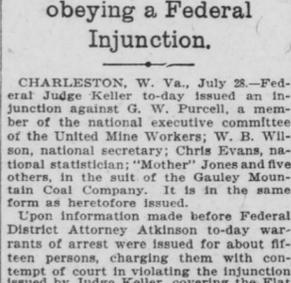

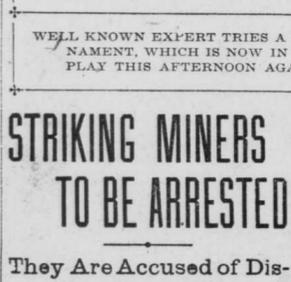

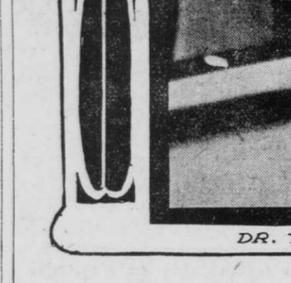

PARIS, July 28.—Adolph Cohn, professor of languages at Columbia University, had an audience to-day with M. Chaumie, the Minister of Public Instruction, in which he explained a scheme due to the initiative of Nicholas Murray Butler, president of Columbia University, providing for the creation of scholarships to enable French students to study in American universities, notably Columbia, and to give American students opportunity to study in French universities. M. Chaumie was much interested in the idea.

### Forbes Defeats Mike Mesick.

CHICAGO, July 28.—Harry Forbes, the bantamweight champion, defeated Mike Mesick in a six-round contest here to-night.

# BILLIARD EXPERTS CONTESTING FOR SUPREMACY IN TOURNAMENT

## Knights of the Cue Play Brilliantly—F. Whitney Beats Du Bois and Dr. Burns Out-plays J. J. Roggen and Makes Good Average

THE first game in the Class B billiard tournament now on at the Waldorf billiard parlors was played yesterday afternoon before a large gathering of devotees of the game. F. Whitney and F. Du Bois were the contestants and the first named won by the close score of 120 to 146. Whitney's average was 236.7. The game was played on a regulation table with a 14.2 ball-line.

Owing to the newness of the cloth the speed of the table was increased, which greatly affected the play of the contestants. Du Bois was especially bothered, as he usually plays a "nursing" game. Another thing that affected the speed of the play was the fact that both men have been practicing with large balls and the game yesterday was played with regulation balls. The contest, how-

ever, was very close, the score being tied not less than three times. Whitney finally winning with a well-earned run of 10. Both men were very nervous.

In the evening Dr. O. B. Burns defeated J. J. Roggen by a score of 150 to 152. Burns' average was 312.46. Burns played a very cool game and he left them up very hard. Roggen was nervous. He played brilliantly at times, however. Burns' high run was 14 and Roggen's 13. It was a hard fought game and was watched with keen interest by a large number of devotees of the game.

This afternoon Dr. Davis and Harry White will contest. In the evening F. Pechart and F. Du Bois will play.

The entries in the tournament are F. Whitney, F. Du Bois, H. W. White, Dr. W. E. Davis, Dr. O. B. Burns, J. J. Roggen and F. Pechart. Game will be played afternoon and evening until the tournament is ended.

DR. W. E. DAVIS

WELL KNOWN EXPERT TRIES A DIFFICULT MASSE SHOT WHILE PRACTICING FOR THE CLASS B TOURNAMENT, WHICH IS NOW IN PROGRESS AT THE WALDORF BILLIARD PARLORS. THE MEDICO WILL PLAY THIS AFTERNOON AGAINST HARRY WHITE.

# STRIKING MINERS TO BE ARRESTED

## They Are Accused of Disobeying a Federal Injunction.

CHARLESTON, W. Va., July 28.—Federal Judge Keller to-day issued an injunction against G. W. Purcell, a member of the national executive committee of the United Mine Workers; W. B. Wilson, national secretary; Chris Evans, national statistician; "Mother" Jones and five others, in the suit of the Gauley Mountain Coal Company. It is in the common form as heretofore issued.

Upon information made before Federal District Attorney Atkinson to-day warrants of arrest were issued for about fifteen persons, charging them with contempt of court in violating the injunction issued by Judge Keller, covering the Flat Top coal field, along the Norfolk and Western Railroad. The clerk declined to give the names of the persons for whom warrants were issued.

Purcell, Evans and the others against whom the injunction was issued are not enjoined from furnishing supplies to the miners, but are enjoined from organizing camps close to the property of the complainants and were selected as defendants because they are non-residents. Numerous witnesses were provided supplies for the miners.

Little of interest developed in the trial of the defendants. The case was examined, but few of them could connect the defendants with the contempt.

Deputy United States Marshal Cunningham testified that in addition to acting as an official he had worked for the Collins Colliery Company as captain of the company's guards, drawing a salary therefor.

# JURY SUSTAINS SUICIDE THEORY

## Inquest Into Death of Anna Goepfert Ends.

### COLONIAL PREMIERS VOICE THEIR VIEWS

#### Believe That the British Empire Should Look to Consolidation Rather Than Acquisition.

GLASGOW, July 28.—Premier Seddon of New Zealand, in a speech here to-day, said the colonies had already proved that they love the motherland by sending their sons to fight in South Africa. They wished to go further and give the mother country trade preference over other nations, but too much attention was being paid to what continental nations might think. What the colonies and Great Britain should do was to join in common cause to meet American competition. Should this be done the result need not be feared by the colonies, because the British workmen and manufacturers were unequalled in the whole world.

All the colonial premiers with the exception of Sir Wilfrid Laurier, the Prime Minister of Canada, who is in London, were given great ovation here to-day. Prime Minister Barton of the commonwealth of Australia, in one of the many speeches he delivered in the course of the day, declared that the British Empire was large enough, and that no one now ought to look to consolidation rather than to acquisition.

George W. Rose, Premier of Ontario, declared in a speech that the war in South Africa was prolonged to the extent it had been because there had been so few colonial troops in the field.

### Miss Wackerman Is Severely Injured

BUFFALO, July 28.—Heien Vanderbilt Wackerman, the young American girl who recently had such an unpleasant experience in London that her mind was impaired, was severely cut to-night by the broken glass of a window she had smashed down while trying to escape from her room. Fire engines responding to a call for a fire opposite her home stopped at a hydrant directly under Miss Wackerman's window, and believing that the fire was in her house, the young woman became panic-stricken and began smashing the windows of her room with her bare hands. The windows were large and the heavy pieces of glass severely cut Miss Wackerman's arms and face. She was prevented from jumping by her mother.

# OCEAN SPECK IS THE PRIZE

## Rosehill Has Good Start in Race for Marcus Island.

### Japanese Warship Carries a Letter Telling Captain Not to Resist.

Special Dispatch to The Call.

CALL BUREAU, 1406 G STREET, N. W., WASHINGTON, July 28.—Captain A. A. Rosehill, who is ready to dispute with Japan the ownership of Marcus Island, with its rich guano beds, has more than two weeks' start of the Japanese warship which sailed on Saturday for the speck in the far-off Pacific. Until the State Department received to-day from Minister Buck at Tokio a cablegram, it was supposed the Japanese Government had already dispatched a warship to Marcus Island. The telegram stated that the Japanese warship would start the following day (Sunday) for Marcus Island to establish Japan's claim to the island. Minister Buck stated that officials of the State Department to Captain Rosehill advising him not to dispute with the Japanese warship the title to the island would be intrusted for delivery to these officials.

But while the doughty Captain Rosehill has many days' start of the Japanese warship in the trans-Pacific race for the speck in the far-off Pacific, there is no certainty that he will first gain the goal. It is 2700 miles from Honolulu, from which port Captain Rosehill departed on July 27. From Yokohama to Marcus Island it is 800 miles. The warship is, of course, much faster than the schooner. Even if Captain Rosehill lands first he will probably not resist the Japanese warship's landing parties. He would, of course, be wanted in any case of strength. As the matter now stands, the State Department will take no action until an appeal is made by Captain Rosehill. The appeal will be made until after he has visited Marcus Island and definitely learned the attitude of the Japanese Government. At any rate there are a number of Japanese on the island at the present time who are not disposed to be friendly to any foreigner who attempts to land.

### Firemen Caught in a Blaze.

PITTSBURG, July 28.—Fire broke out about 12:30 o'clock this morning in the paint and glass house of Deacon Bros. at 917 Liberty street. By the time the firemen reached the scene the entire building was ablaze and an explosion outward to the fire escape, where the men were. All were taken to the hospital, but none is thought to be fatally hurt. If the loss shall be confined to the Deacon building it will not be heavy. At 2:30 o'clock the firemen appear to have control of the flames and think they can save the adjoining building.

### Deaths From the Cholera.

ST. PETERSBURG, July 28.—Deaths from cholera in Manchuria between June 25 and July 3 numbered 170 Russians and 23 Chinese.

### Fire in a Penitentiary.

LEAVENWORTH, Kans., July 28.—Fire to-night destroyed the shoe factory at the State penitentiary. The flames were discovered at 8 o'clock and after two hours' work were under control. Loss about \$20,000.

### Schwab Entirely Recovers.

ATLANTIC CITY, July 28.—Charles M. Schwab has entirely recovered from his recent indisposition. He took an automobile ride to-day and his wife left for New York.

# KING'S HEALTH THE CAUSE OF MUCH ANXIETY

## Rumors Keep the People of London in Feverish State.

### Credence Is Given to Report That a Second Operation Is Necessary.

#### Personal Affairs Fear That His Majesty Will Not Be Sufficiently Recovered to Be Crowned August 9.

Special Dispatch to The Call.

LONDON, July 28.—London was startled this afternoon by several rumors concerning the King's coronation. Where these reports originated cannot be ascertained, but they spread rapidly. The first was to the effect that the King was about to undergo a second operation; the second, that the coronation had been indefinitely postponed, and the third, which was current toward evening, but which received no credence whatever, was that the King had had a relapse from his convalescence. It is learned on excellent authority to-night that there was no truth in the second and third rumors. The call correspondent was told that instead of a relapse having occurred the King had passed a very encouraging day and that his convalescence was continuing without any interruption. It was also said that up to the present time there had been no thought of changing the date of the coronation, nor has there been any reason for any decision upon this point. King Edward's improvement has been a relief to the public, but it is not done at the initiative of the physicians, but rather against their will. The King displayed such great impatience and was so insistent that the date selected be as early as possible that the physicians yielded. They had been quietly working greater danger to their royal patient by reason of worryment if they persisted in advising his Majesty against an early day being set for the coronation, but the people are still asking: "Will the King be fit for the ceremony?" A great deal is heard that in a way goes toward settling the first rumor which was about to-day. It has been the subject of much comment that no police regulations or directions have yet been issued for August 3. This taken in connection with the rumors about the King's health, has kept the public from buying seats in any quantities along the route of the procession. There are to be rehearsals in Westminster Abbey on the Thursday and Friday preceding the day of the ceremony, but the putting off of this very important preliminary work until just before the day fixed has also helped to create the rumor that is existent in the public mind. Even the personal friends of the King say they do not see how his Majesty can be ready for the ordeal of the 9th, even though the ceremony be curtailed to an hour or an hour and a quarter.

Our \$10.00 made to order suits are better than you think

We sometimes feel when telling about the superior value of our \$10 made to order suits and insisting that you order one, that you may think us persistent, but we know that there are thousands of men right here in San Francisco who are wearing our \$10 suits and they thank us for our persistency.

These customers all thought that they could not get a good suit made to order for only \$10, but they found that they were greatly mistaken.

May we prove these facts to you? We will take all the risk. You can have your money back if you are not entirely pleased.

So suppose you get our samples sometime soon and pick out a neat pattern or a solid color if you choose. Let us take your measure and we will do the rest.

Visit our town or make-to-order clothing filled—satisfactory fit assured through our self-measuring system—write for samples.

S. N. WOOD & CO.  
718 Market Street and Cor. Powell and Eddy Streets.
