

FARMER IS SHOT BY HIS OWN SON

Parent Falls Pierced by Four Bullets From Revolver.

Would-Be Murderer Then Assists Wounded Victim Home.

Special Dispatch to The Call.

SOLEDA, Feb. 12.—Alex Tunzi, a wealthy farmer living fifteen miles west of Soloda, was shot and wounded this morning by his 17-year-old son, Frank Tunzi.

The boy dressed in his Sunday clothes this morning and the suspicion of his father was aroused. He suspected that Frank was going to run away from home and on entering the house discovered that a rifle was missing.

The shooting was done with a pistol the boy had concealed in his pocket. Five shots were fired and four took effect. Two of the bullets entered Tunzi's right breast, one passing through the groin and the fourth entered his hand.

The wounded man, after a long struggle, gained possession of the revolver and succeeded in coaxing his murderous son to help him home. On arriving at the house Tunzi with the boy's assistance managed to drag him to town, but before the doctor could be called the boy had fled.

Officers have left for the scene of the shooting. It is the general impression here that young Tunzi was demented when he shot his father.

MINE OWNER NARROWLY ESCAPES BEING KILLED

Falls a Distance of Sixty Feet and Only Sustained a Few Slight Injuries.

REDDING, Feb. 11.—W. G. Collins, a mine owner of Trinity county, fell a distance of sixty feet several days ago and escaped death. Collins is one of the owners of the Texas Jack mine on Indian Creek. The ore has been stoped out at one point in a raise of sixty feet and a piece of timber was laid across the stope for a foot log. Collins in trying to cross it slipped and fell sixty feet. The miners expected to find him dead, but, strange to say, he escaped with the loss of three teeth and a painful injury to the hip.

Miner Mysteriously Disappears.

REDDING, Feb. 11.—Charles Butler, a miner, is missing, and his hat and coat have been found on the bank of the Klamath River, near Fossil, Siskiyou county. Butler lived alone in a cabin with a dog for a companion. The dog was found dead near by. It had been shot. Butler either committed suicide by crossing the strychnine package, or the dog was poisoned by the strychnine. The body will probably be washed to sea by the storm-swollen waters of the river.

BULLETS DROPS NOTED BAD MAN

Lorenzo Bass Is Killed During Quarrel in a Saloon.

Tries to Draw Revolver, but Intended Victim Is Too Quick for Him.

Special Dispatch to The Call.

DOUGLAS, Ariz., Feb. 11.—Lorenzo Bass, a noted gangster of the border, was shot and instantly killed and Lon McDonald, a member of the Arizona Ranger Company, was fatally wounded last night in a shooting affray in the Cowboy saloon in this city. In the deadly gun play a bullet from Ranger W. W. Webb's six-shooter passed through the body of Bass and lodged in the stomach of Ranger McDonald. The latter was standing back of Bass and although a number of shots were fired during the night it is thought that the one bullet killed Bass and wounded McDonald.

Webb and McDonald met Bass and several of his friends in the Cowboy saloon. Bass was under the influence of liquor and had been boasting of his skill with a six-shooter when Webb and McDonald entered. Webb had warned the number of times to stop his lawlessness, so that the feeling between them was very bad. Without any other provocation than this Bass stepped up to Webb and struck him on the head with the butt-end of his revolver. A dozen six-shooters were whipped out in an instant, but Webb was the quickest and the ball from his revolver pierced Bass through the heart. Two constables who were on the outside rushed in and engaged the fight which followed. They placed Webb under arrest and picked up McDonald. The bar and windows were shattered by bullets.

The coroner's jury to-day held that the killing was justifiable and Webb was allowed to go. He has the sympathy of every man in Douglas, as Bass was a bad man, who had done nothing but create trouble since he came to this town from Texas. Captain Ryming of the Rangers was in Douglas at the time and at once investigated the affair. He has exonerated Webb of any blame, saying that Bass threatened the Ranger's life and that he was justified in killing him. Webb is one of the most popular rangers in the territory, being a Rough Rider and having served with distinction in the Philippine Islands. Bass would have certainly killed some one before the night was over and by shooting him in self-defense Webb undoubtedly saved his own or some other man's life.

The master of the stranded bark says the effort will surely prove successful.

TRAIN CATCHES MEN ON TRESTLE

One of Them Is Killed and Another Badly Injured.

Engineer Pays no Attention to Warning Flag Near the Track.

Special Dispatch to The Call.

SPOKANE, Wash., Feb. 11.—A light freight train, enroute north, caught a boarding gang yesterday afternoon on a high trestle on the Great Northern Railroad near Camden. One man is dead and another in the hospital. At last accounts the caboose of the freight train was in the Little Spokane River, upside down, forty feet below the track.

The workmen, it is claimed, had posted warning flags, to which the engineer paid no attention. At a high rate of speed the engine dashed around a curve and rushed down upon them. The boarding gang had removed ties from under the rails on the trestle for a distance of about sixteen feet. The rush of the engine carried it across this gap safely, but the caboose broke loose and plunged into the river below. Fortunately, the caboose was empty.

The foreman of the gang ran up the bank and escaped. Arthur Sewell was not so lucky. He was caught and crushed by the engine, his body being dragged a third of a mile. He died last night. John Walker was also badly injured, but may recover. Great Northern officials claim no others were injured.

It is charged that the train blew no warning whistle.

Hon. Philip B. Thompson Jr., Member of Congress from Kentucky, in a recent letter has the following to say of the national catarrh remedy, Peruna. The letter was written at Washington, D. I cannot express my thanks to you for the health I am now enjoying. My case of catarrh is one which had been in my system for years before I knew what was wrong. It was going from bad to worse, until tired of it, I went to an institute for treatment. The doctor in charge said my nose would have to be operated upon. Having no confidence in the operation he wanted to perform I at once began to take Peruna, which is our family remedy. Catarrh is a systemic disease, curable only by systemic treatment. A remedy that cures catarrh must aim directly at the mucous membranes. This is what Peruna does. Peruna immediately invigorates the nerve centers which give vitality to the mucous membranes. Then, catarrh disappears; then it is permanently cured. If you do not derive prompt and satisfactory results from the use of Peruna, write at once to Dr. Hartman, giving a full statement of your case, and he will be pleased to give you his valuable advice gratis.

FIRE DESTROYS OFFICE BUILDING

Atlas Block in Salt Lake Burns With Amazing Rapidity.

SALT LAKE, Feb. 11.—Fire that started in the Atlas block, a large five-story office building located on Second South street and in the heart of the business section, at 2:30 this morning completely gutted that building, spread to the Central block, leaving that structure a wreck, and did other damage that will bring the total loss close to \$25,000, with insurance of about half that amount. The fire was one of the fiercest in the history of the city and consumed the destroyed buildings with remarkable rapidity. Several ledgers on the top floor of the Atlas block had miraculously escaped from death.

The principal losers are: S. S. Walker estate, owners of Atlas building, \$100,000; Salt Lake Hardware Company, stock, \$75,000; tenants of Atlas block, \$75,000; Central block, \$25,000. The Bank of Commerce and the private bank of F. E. McGurrin & Co. occupied the ground floor of the destroyed Atlas block. Outside of office furnishings, however, their loss is believed to be small, although this cannot be determined until the ruins cool and the big vaults are opened.
