Frank Gilbert, who had charge of all the clam and mussel bakes, has gone to Carmel Bay with assistants to gather mussels. Thousands of luscious bivalves

MAYOR D. C. CLARK

GEORGE STAFFLER

MEMBERS OF SANTA CRUZ COMMITTEE PREPARING TO RECEIVE THE FORESTERS.

will be ready for the big mussel bake to be held on Tuesday at the beach. The grand banquet is to be held on Friday evening and on account of the large number who are to be present it will be held at the Armory.

SANTA CRUZ, May 2.—Great preparations have been made by the local court of Foresters for the entertainment of the Grand Court of the Foresters of America to be held next week. The arrangements for the entertainment of the guests is now complete and Santa Cruz hospitality will be dispensed as usual.

The parade on Tuesday promises to be a big affair, as 1200 Foresters are expected to participate. Excursions are to be run from Hollister, Gilroy, San Juan, Watsonville and Salinas, and Foresters' day, as Tuesday is called, is to be one of the most eventful in the history of California Forestry.

The decorations for the ball in this building are most elaborate. The entire ceiling has been covered with a net, filled in with thousands of small flags. The walls are completely hidden from view by red, white and blue bunting and redwood foliage.

At the hall W. S. Moore is to be floor manager and he will be assisted by George Staffler, C. J. Klein, Dr. W. R. Lincoln, J. B. Cook, J. C. Doyle, E. A. Ains, John Doman, Fletcher Scott, R. Williams, C. H. Stone, A. H. Hoff, Henry Hahn, George Dennett and C. D. Blain.

MINE WHISTLES STIR REJOICING

REDDING, May 2.—The welcome notes of the siren of the Delamar smelter at Bully Hill were heard this morning for the first time in six months and the noise it made was hailed with satisfaction and much delight by the people who heard it.

The big furnace in the Delamar was blown in this morning and throughout the day there was a scene of great activity in and about the plant and mine. About 250 men are now at work and the plant will be running full blast in a few days.

People in and about Delamar are feeling joyful and business is picking up rapidly. The stages are being put on again and things are rapidly assuming their old-time lively appearance.

Another furnace at the Keswick smelter is being fired, ready to be blown in today. The wages of smelter employees was raised for the summer months, and this, too, was hailed with satisfaction.

Within twenty years the South has increased its output of copper 152 per cent and its exports 56 per cent.

GRAPE-NUTS. PRETTY CHECKS. A Food That Makes Girls Sweet to Look Upon.

The right food for young ladies is of the greatest importance to their looks, to say nothing of the health. Thin, sallow girls don't get the right food, they may be absolutely certain. A Brooklyn girl says: "For a long time, in spite of all I could do, I was thin, skinny and nervous. My cheeks were so sunken my friends used to remark how bad I looked. I couldn't seem to get strength from my food—meat, potatoes, bread, etc. So I tried various medicines, without help."

"I often read about Grape-Nuts, but never tried the food until one day something impressed me that perhaps if I would eat Grape-Nuts for my nerves and brain I could digest and get the good of my food. So I started in. The food with cream was fascinating to my taste, and I went in for it regularly twice a day.

BURGLAR LOOTS JEWELRY STORE

The police are working to locate a daring burglar who, on Thursday night, entered E. Ance's jewelry store at 316 Grant avenue and made his escape with \$500 worth of valuables. Detectives placed in charge of the case by Captain of Detectives Martin believe they have a clue as to who the thief is and are said to have recovered some of the stolen property.

Ance has conducted the establishment on Grant avenue for nearly a year and is known to carry considerable stock, principally watches. When he came to open his place on Friday morning he discovered a widow in the rear open, and upon examination found that a tray of watches was missing.

The Asahi Shimbun, discussing the Manchurian question, suggests that Japan take advantage of the provision of her commercial treaty with China to open new ports in Manchuria. Hung Kiang, at the mouth of the Yalu, and a point higher up the Yalu, are the places suggested.

FRESNO WILL FAVOR VETERANS WITH FRUIT

Sixty Tons of Delectable Products to Be Distributed During the Convention. FRESNO, May 2.—A plan for advertising Fresno County at the National Encampment of the G. A. R. in San Francisco next August is being arranged by Atlanta Post of this city. It is proposed to ship a carload of fresh fruit to San Francisco every day while the encampment is in progress displaying it in a hall which has already been rented, and each night distributing it free among the visitors from the East.

The fruit has practically all been promised. There will be sixty tons of it. The Chamber of Commerce of this city is working in conjunction with the local veterans and will furnish descriptive reading matter, which will also be distributed during the encampment.

CHICAGO, May 2.—A small riot occurred today as a result of the strike of the laundry workers and two hundred girls, employed in the Derby Hand Laundry, were thrown into a panic when a crowd of strikers attacked the building after having failed to persuade them to join the ranks of the strikers.

ACCEPTS RUSSIA'S ANSWER AS FINAL

WASHINGTON, May 2.—It is learned that Minister Conger's original statement of the Russian demands has very recently received further support in the shape of several reports from different sources—all official—but the State Department feels bound to accept without question the explanation of the Russian Government, as made through its Ambassador here, and through Count Lamdorff in St. Petersburg, and does not feel called upon to make any further representations at present upon this subject.

RUSSIA EXPECTS WAR.

VICTORIA, B. C., May 2.—Mail advices were received here that Newchwang is being strengthened by the Russians, who have expressed to the Chinese authorities that this course was made inevitable, as Russia may soon come into conflict with a certain power. It is also rumored that Russia has formed nine regiments of Chinese troops in Manchuria as an auxiliary to the regular garrison. The number, it is said, will be increased to 50,000 within three years.

The Yomiuri Shimbun of Tokio has an interview with Prince Takahashi, one of Japan's eminent statesmen, in which the Manchurian question is discussed. He suggests that if Russia refuses to withdraw her troops from Manchuria, Japan should also send an army to Moukden. Manchuria, he says, would thus be maintained as neutral territory.

Union and Non-Union Men Battle.

Union and non-union lumbermen had an exciting battle on Mission-street wharf yesterday. The non-union men were bound for a lumber camp in the north and were taken to the dock in an express wagon under guard. Upon their arrival at the wharf they were intercepted by "pickets" and a battle royal ensued. Both sides suffered bruises because the men could be hustled on board a boat. At this point the union sailors and longshoremen declined to work while the non-union men were aboard.

Yosemite Via Santa Fe.

The comfortable way to the Yosemite is via Santa Fe. The fare is \$28.50 for the round trip from San Francisco. You take California Limited to Merced, thence by stage. No sleeper required. No side trips to see Big Trees, Bower Cave, Cascade Falls or Merced Canyon. The roads are good and the hotels en route are excellent. The service is Santa Fe, therefore it's right. All about it at 60 Market street. Yosemite desk.

BREEZE CHOSEN BY OPPOSITION

The University Club is palpitating under a stress of excitement attending the approach of an annual election. On Tuesday next the members of the organization will be called upon to select a new directory and if present indications count for anything the event will be fraught with more political intriguing than has been known of in the history of the club.

For the first time in its career the club is divided on the question of a new president and for the first time it has an opposition ticket in the field. Anticipating the coming of the election, a nominating committee was chosen two weeks ago and immediately selected three candidates for expired terms on the board of directors.

It has been generally understood among the members of the club for months that William Bourn, the well-known mining man, would be named to succeed President Wheelan and not the slightest intimation was given that his candidacy would be opposed in any manner. Consequently when the nominating committee selected him for a director, together with Michael F. Michael, the attorney, and Seward McNear, it was foreseen that the plan was to insure Bourn a majority of votes in the board and pave the way for his elevation to the presidency.

OPPOSITION DEVELOPS.

Hardly had the ticket been posted in the club office, however, before the opposition began to develop and for ten days there have been rumors of a plan to defeat the purposes of the regular nominees. But it was not until late Friday night that an opposing candidate was brought to the surface. About 10 o'clock the members of the club who were looking forward to the usual peaceful election, notwithstanding the stories afloat, were surprised to discover posted on the club board the announcement that Thomas Breeze would be a candidate for a position on the new board.

A quiet investigation by the Bourn contingent revealed the fact that Breeze had the promised vote of about eighty members, which is quite a backing to start with, and that it was the intention of his friends to elect him instead of Michael F. Michael or Seward McNear and thereby, with the holdovers, Maddox and Lent, secure a majority in the new board and the right to name a president.

The opposition to the candidacy of Bourn, it seems, originates in a desire of the younger members of the club to keep the finances under restraint. The organization is not as healthy financially as several of its contemporaries, although under the administration of President Wheelan its former indebtedness has been reduced nearly \$15,000, leaving a legacy of only about \$200 to the next directory, which is considered a good record for the two years in which Wheelan has been president of the club.

FEAR ASSESSMENTS.

It is the fear of many members that Bourn will launch the club into another era of extravagance and eventually necessitate a resort to 10 assessments to meet the bills. He and his followers in the club are mostly members of the Pacific-Union Club and this fact is said to also have influence over the younger members of the University Club in their decision as to who should direct the affairs of the latter organization.

Breeze is known as a Wheelan man and Maddox and Lent are said to be in the same category, so that if the first named is elected in place of either one of the

DR. CHAMLEY'S VICTORY!

Lately a charge was made against Dr. Chamley for incompetence and unprofessional conduct. These charges were the result of deep professional jealousy, largely aided and abetted by a discharged employe. At the hearing last Wednesday the action was dismissed. Dr. Chamley exonerated. The Judge saying there was NO EVIDENCE AT ALL in the case.

DR. S. R. CHAMLEY, THE FAMOUS CANCER SPECIALIST

S. R. CHAMLEY, M. D.

Dr. Chamley is a graduated physician of the College of Physicians and Surgeons of Keokuk, Ia., one of the oldest and best colleges in the United States, and licensed by the California State Medical Board. During the past thirty years he has cured more people afflicted with Cancer than any other living physician. Every case treated by Dr. Chamley is cured as if by magic. No knife is used. No pain is suffered, and, showing the Doctor's confidence in his wonderful treatment, no pay is asked for until cured. Thousands have been cured by Dr. Chamley, and references of the highest standing all over the United States, Canada and South America will be cheerfully furnished.

TO MY FRIENDS: During my many years on the Coast I have cured thousands of Cancers. Many grateful letters have been received from patients all over the United States, Canada and South America. In my practice I have made a special effort to be honest with the people, and I have refused thousands of dollars from those I knew could not be cured. For my friends' sake, as well as my own, I rejoice that the contemptible persecution ended in such a triumphant victory. I assure my friends that I cherish their friendship and good will, and sincerely hope that during the remaining days allotted to me I will continue to receive their assistance, so that I may be able to add to my list of thankful patients who are afflicted with cancer and who will only know of my wonderful treatment through those I have cured. With my sincere thanks for the kindly expressions of sympathy received from many of my friends, and thanking them for their past favors and regard, with deepest appreciation, hoping to merit a long continuance of the high feeling of gratitude, I am, sincerely, S. R. CHAMLEY, M. D.

READ WHAT "LUCKY BALDWIN" SAYS ABOUT DR. CHAMLEY:

For the benefit of those who may be suffering from the dreaded cancer, and to express somewhat my gratitude for the relief obtained personally, it gives me pleasure to say that Dr. S. R. Chamley can cure cancers. My experience proves that to be fact.

For many years a small sore in the center of my lower lip troubled me more or less, until, during the summer of 1902, treatment in the effort to heal seemed to have the contrary effect, and I was advised by prominent doctors to have it treated with the X-ray. This I did for some weeks, at the end of which time I realized, as I had not before, that it was beyond doubt a cancer, and daily becoming worse.

I consulted numerous authorities, and with all was at a loss what to do, until some time in December a friend informed me that he knew of several persons who had been cured by Dr. Chamley, and among those he named was a gentleman known to me. I investigated thoroughly and found the reports from patients who had been treated by him were uniformly that cures were certain, and in answer to inquiries made of medical men in high standing I found nothing to discourage me from submitting to his treatment. As a consequence I dropped everything. The immense business interests in which I was engaged were as nothing to the prospects before me. The indications of two more appeared under my chin, and in a short time would see them eating my life away and placed myself wholly under his care. He made no delay in applying remedies, and within a few days the cancers were out, foot and branch. In two weeks the healing was complete and I was out attending to business, and now, nearly four months after treatment, the scars are hardly noticeable. The lip has filled out wonderfully, and all the time my health has been on the improve, until now I am as well as at any time in years. Dr. Chamley's medicine, as well as local treatment, seems to go to the right spot.

Dr. Chamley has my permission to use this letter in placing the merit of his treatment before the public, and will gladly answer any personal inquiries. I would advise all suffering from cancer to apply to him without delay. They can't make a mistake in doing so. He will cure any case that he will consent to treat. Gratefully, (Signed) E. J. BALDWIN, Santa Anita, Cal.

E. J. BALDWIN

ANY LUMP IN A WOMAN'S BREAST IS CANCER

Any lump or sore on the lip, face or anywhere six months is nearly always Cancer.

Cancer never pains till almost past cure. If you have a small lump in the breast, you must not neglect it, as it is sure to poison the glands in the armpit, where cure is often impossible. Cancer never waits for you to experiment. One or two mistakes is sure death. Examinations free.

NO KNIFE OR PAIN! NO PAY UNTIL CURED!
