

CALIFORNIA COMMISSIONERS ARE ON WAY TO ST. LOUIS

Plan to Fix Site for Reception Building and Prepare for Installation of Products Representing the Various Resources of the Golden State

CALIFORNIA'S OFFICIAL REPRESENTATIVES TO LOUISIANA PURCHASE EXPOSITION, WHO HAVE STARTED FOR ST. LOUIS, WHERE THEY WILL TRANSACT IMPORTANT BUSINESS.

COMMISSIONERS FILCHER and Wiggin, California's official representatives to the Louisiana Purchase Exposition to be held at St. Louis, started last night for St. Louis. This marks the first step of leading importance to be taken to provide for properly installing the exhibits illustrative of the products and resources of California at the great St. Louis show.

OLD POLICE OFFICERS ASK FOR RETIREMENT

Detective Dillon, Sergeant Griffiths and Officer Dearborn are on the list. Three old members of the Police Department, Detective Sergeant Thomas Dillon, Sergeant Griffith B. Griffiths and Policeman Hazen S. Dearborn, have sent applications to the Board of Pension Commissioners to be retired on the pension list at the next quarterly meeting of the board on the first Monday in July.

Thanks for Faithful Work.

United States Attorney General Knox has written a letter to United States Attorney Marshall B. Woodworth thanking him for the success of his efforts in breaking up the Federal salt trust.

THE EMPORIUM

Several New Instructors Are Engaged for the University.

Garret McEnerney Reluctantly Supports President Wheeler.

An important session of the University Regents was held at the Mark Hopkins Institute yesterday afternoon. Guy C. Earl presided. The roll call was responded to by Regents I. W. Hellman, Chester Rowell, A. W. Foster, John E. Budd, Garret McEnerney, John A. Britton, Peter C. Yorke, Charles W. Slack, Dr. Ellinwood, J. B. Reinstein, R. J. Taussig, C. S. Wheeler, Phoebe Hearst, Guy C. Earl, Thomas J. Kirk and President Benjamin Ide Wheeler.

Many appointments to fill vacancies were proposed and ratified. Projects for the disbursement of considerable sums of money without reference to the judgment of the finance committee called forth a protest from I. W. Hellman. Regent McEnerney reluctantly voted to sustain President Wheeler in the dismissal of three ladies who have been employed in cataloging the library of the university, but indicated that he would hereafter ask for investigation concerning changes of this character.

President Wheeler nominated for cataloguers Miss Jessie A. Carroll, B. A., Williamson College, Wilmington, Ohio, graduate of the Illinois University Library School and now cataloguer in the Van Worman Library of the University of Cincinnati; Miss Lillian Burt, graduate of Iowa College, Grinnell, Iowa, and Miss Louisa W. Katz, a graduate of Cornell University. The salary to be paid each is \$720 per annum. The nominations were confirmed by the board. Regent McEnerney, however, expressed his views in this manner:

"These library appointments are made to fill vacancies caused by the dismissal of old employees. The responsibility for such dismissal must rest on the conscience of each regent. To-day the president gave me a statement of facts which impels me to support him. In my opinion employees should be afforded opportunity to be heard in future reasons for removal should be assigned."

GREATEST OF CHEMISTS. President Wheeler reported that Dr. Wilhelm Ostwald, professor of chemistry in the University of Leipzig, Germany, and director of the Institute of Physical Chemistry of the University of Leipzig, perhaps the greatest living chemist, and the man who has done more than any other to develop the great modern field of physical chemistry, has accepted the invitation of the University of California to deliver the dedication address for the opening of the new physiological laboratory, on August 20.

The new building to house the needs of the department of physiology, to head which Professor Jacques Loeb was recently called to the university from the University of Chicago, was dedicated through the generosity of Rudolph Spreckels of San Francisco. The laboratories will be equipped by the generosity of Dr. M. Herzstein of San Francisco. Another friend of the university has provided the salary of the chair of physiology for three years. Professor Ostwald's visit to California will be an event of much interest to all the scientific world. He comes to America for the sole purpose of delivering the dedication address.

The president announced the following donations: Mrs. Hearst, \$1000 to Lick Observatory; Mrs. John J. Valentine, 500 volumes on money and medical economy; William Pierson, reflecting telescope valued at \$1500; Bishop, complete history of the birds of the United States; Mrs. A. S. Halliday, \$500 for the library; medicine cabinet, valued at \$200; original manuscript of Joseph Rodman Drake's "The Culprit Fisk," together with a number of early editions; Charles B. Temple Emanuel, \$750 for support of the Emanuel-El Fellowship in Semitic languages and the purchase of scientific apparatus.

The board gave the donors a vote of thanks. On motion of the president the board appointed Charles Derleth Jr. associate professor of structural engineering at \$2400 per annum; Professor Derleth graduated from the University of the City of New York in 1894 with the degree of B. S. He has had much experience in the design and construction of important structures, such as the foundations for large buildings, the steel and concrete structures, steel and stone bridges, etc. He has had also practical experience in railroad, water supply and sanitary engineering.

RAILROAD ENGINEERING. The regents, on recommendation of the president, appointed Edward N. Prouty assistant professor of railroad engineering at \$1800 per annum. Mr. Prouty graduated from Taber College, Iowa, and subsequently he was engaged in railroad location and construction on a branch of the Chicago, Burlington and Quincy Railroad. He gained much experience also as a bridge engineer, and later he came to the University of California for graduate study. He filled here the position of assistant in engineering. He resigned to enter the services of the Southern Pacific Company. He is now in charge as a civil engineer of the division of the road between Sacramento and Red Bluff.

MECHANICAL ENGINEERING. Carl C. Thomas was appointed instructor in mechanical engineering at \$1200 per annum. Mr. Thomas graduated from the mechanical engineering department at Cornell University in 1885, having had three years of the course at Stanford under Professor Smith. Immediately after graduation he entered the employ of the Globe Iron Works Company at Cleveland, where he remained about four years, occupying positions as draftsman, assistant engineer and chief engineer, and having, during the last two years of his stay, had that company, entire charge of the design and construction of engines, boilers and other machinery for both stationary and marine service. In December, 1898, he resigned and entered the employ of the Maryland Steel Company at Sparrows Point, Md., as leading draftsman on marine engineering work. Six months later he was made chief draftsman. After remaining with this company two years he accepted an offer from New York University to take charge of the newly est-

THE EMPORIUM

Sale of Skins 38c. A hundred dozen large-sized colored Sheepskins for Pyrography burning and decorating in a fine assortment of colors; reds, green, gray, tan and brown; well worth 75c each on sale to-day, and Thursday also if quantities last 38c

established department of marine engineering and naval architecture. Besides the work in this department, he taught some mechanical engineering subjects, conducting laboratory and drawing-room work in addition to lecture courses. The summer of 1901 he spent in Europe, carrying on research work in Berlin, and visiting the more important engineering works of Germany, England and Scotland. The summer of 1902 he spent at the University of Cambridge, England, where he was engaged in research work on the battleship Nebraska. He resigned from New York University January 1 last, and is at present with the Rison Iron Works in this city.

WAGE QUESTION STILL PENDING. United Railroads Holding Out Against an Increase. There was an air of rest around the executive offices of the United Railroads all day yesterday and those selected to attend to adjust the differences between the members of the street carmen's union and the United Railroads were in close session until nearly 6 o'clock last night. Matters are far from adjusted and it is the earnest wish on both sides that some small technicality will not arise that may result in a serious breach.

WELL-KNOWN BANKING MAN DIES AT A GREAT AGE. Albert Montpeller, for twenty years Connected With the Grangers' Bank, Passes Away. Albert Montpeller, who for much more than a generation well known in this city, passed away at his late residence, 1425 Webster street, on Sunday after a few days' illness. Death was due to old age. Mr. Montpeller at the time of his demise being in his seventy-eighth year.

RAILROAD ENGINEERING. The regents, on recommendation of the president, appointed Edward N. Prouty assistant professor of railroad engineering at \$1800 per annum. Mr. Prouty graduated from Taber College, Iowa, and subsequently he was engaged in railroad location and construction on a branch of the Chicago, Burlington and Quincy Railroad. He gained much experience also as a bridge engineer, and later he came to the University of California for graduate study. He filled here the position of assistant in engineering. He resigned to enter the services of the Southern Pacific Company. He is now in charge as a civil engineer of the division of the road between Sacramento and Red Bluff.

DIFFERING OPINIONS. At the close of the conference yesterday afternoon, those who will compose the arbitration board, E. J. Livernash gave out the following statement on the behalf of the Street Carmen's Union: "We are now getting down to the main issues of the differences, namely, hours of labor and rates of wages. We will again take up the subject to-morrow morning. The subject is getting full of technicalities. I am satisfied with the results as far as they have gone, no reason why the whole matter should not be satisfactorily adjusted."

Are Arrested for Cruelty. Alfred Elysele, an employee of the City Street Improvement Company, and Frank Blundia, a peddler, were arrested by officers of the Society for the Prevention of Cruelty to Animals yesterday for driving horses physically unfit for use. Both men were released on bail.

CALIFORNIA HALL. The subject of spending the sum of \$250,000 allowed by the last Legislature for the construction of California Hall engaged the prolonged attention of the board. It was finally resolved to discuss the subject at the board Tuesday evening, June 23, to consider the subject. It was the sense of the regents that immediate construction was desirable. Regent Hellman and Foster advised the building around committee against acceptance of plans the execution of which would exceed the allowance of \$250,000.

MOON'S RESIGNATION. The resignation of Major J. B. Moon as counsel of the board was presented and a long discussion ensued as to the advisability of accepting it. In the letter of resignation Major Moon recommends that Osgood Putnam, who has been attending to the legal business of the board for the last two years, be appointed as his successor.

Back numbers of the Sunday Call containing art supplements will be forwarded from this office to any address in the United States, Canada, Mexico, Philippine Islands, Hawaiian Islands and Guam upon receipt of 5 cents.
