SENATOR IS COUNSEL FOR ALLEGED LYNCHER

Frees Man Accused of Having Participated in a Burning at the Stake.

INDIANOLA, Miss., Sept. 22.—The trial of C. C. Eastland for the murder of Luther Holbert and his wife by causing them to be burned at the stake has been suddenly ended. After the evidence was all in United States Senator McLaurin, returned for Eastland, moved for a preliminary injunction to the jury for the discharge of the prisoner on the ground that no evidence tending to prove that Eastland had been in any way a party to the lynchings had been introduced. District Attorney Neill asked the court to grant Senator McLaurin's motion. The judge thereupon discharged Eastland.

Eastland is a brother of the planter who was killed by Holbert and his companions last February. The tragedy was followed by a man hunt, which lasted more than a week and in which more than 500 persons participated. Holbert and his wife were captured and burned at the stake.

The Eastland killing resulted in the death of eight persons before the Holberts were taken. W. C. Eastland is charged with having applied the torch at the burning.

NEWPORT'S "150" HEAR SAD NEWS

Result of British Genealogical Inquiry.

Few American Families Are Declared Entitled to "Exalted Rank."

Secretary Carew-Pole's Proclamation Causes Consternation in the Smart Set.

NEW YORK, Sept. 22.—Let those who believe that they occupy an assured social position in this country now take heed lest they fall into oblivion. R. G. Pensonby Carew-Pole, issuing a proclamation under a red crown as secretary of the duly constituted committee of genealogical inquiry, announces from London to the social elite that there are only 177 American families who possess qualifications that entitle them to receive recognition of "exalted rank" in the British dominion.

Without the brand of R. G. P. C. P. it will avail nothing to claim membership in the late Ward McAllister's 400 or in the Newport 150. The mutterings of a storm are heard among the cottage owners of the Rhode Island summer resort, for Mr. Carew-Pole hardly gives enough American family names to supply one side of Bellevue avenue. A list of the "exalted," inscribed on parchment paper, has been received by the elect in America, and a document signed by Mr. Carew-Pole runs in the following fashion:

"The entire cordials between Great Britain and the United States of America being more pronounced at the present time than ever before in history, the committee appointed by the college of heralds to search the genealogical records of the United Kingdom and the continent of Europe has completed its arduous task, and in conjunction with various organizations throughout the United States has completed the list of names of families of historic and social eminence in that country, and in exercise of its prerogative doth present said list in its entirety to Cornelius Vanderbilt of the Vanderbilt family of New York, a family possessing qualifications that entitle its members to exalted rank at any and all social and semi-state functions within the confines of the crown. The list of families herewith submitted is absolute and subject to no revision whatever, viz.:

- "Abbott, Aldige, Adams, Amory, Appleton, Anderson, Aspinwall, Alexander, Astor.
- "Ballard, Byrd, Bonaparte, Bell, Bruce, Breckinridge, Blair, Beekman, Biddle, Bland, Bullt, Bienville, Biglow, Burden.

- "McCormick, McDowell, MacVeigh, McClure, Muir, Minor, Murray, Mills, Marshall, Minot, Mortimer, Motley, Meredith, Mott, McTavish.
- "Nelson.
- "Otis.
- "Page, Palmer, Folk, Preston, Peabody, Pendleton, Patterson, Pinckney, Pringle.

- "Rhinelander, Rumsey, Roosevelt, Revilo, Rutledge, Randolph, Ronalds, Remsen, Rogers.

The good work was begun by McKinley and carried out by Roosevelt. The prosperity we enjoy is due to the policies and principles of the Republican party. As to the future we shall lose our grasp on the trade of the Philippines or maintain it. What man today best understands the situation in the Philippines? Julius Kahn made a tour of the islands and studied the conditions there. No man in the country is better informed on this subject than Mr. Kahn, and I take great pleasure in endorsing his nomination for Congress."

KAHN IS CHEERED.

More cheering ensued as other speeches of indorsement were made. A. C. Taylor of the Forty-fourth moved that the ballot of the convention be cast for Julius Kahn. The motion prevailed and the secretary cast sixty-eight votes for Kahn.

The chairman declared the result in accordance with a motion appointed Henry C. Dibble and J. Nathan a committee.

FAMED BOTANIST DISAGREES WITH DARWIN'S THEORY

New View as to the Origin of Species.

NOTED EDUCATORS WHO ATTENDED THE CONGRESS OF ARTS AND SCIENCE.

ST. LOUIS, Sept. 22.—Great interest has been aroused in the International Congress of Arts and Science by the theory advanced by Professor Hugo de Vries, professor of botany in the University of Amsterdam, who, combating in the open Darwin's theory of the origin of species, advanced a theory of his own in diametrical opposition to all ideas of former and present biologists and physiologists.

Professor de Vries asserts that no two of the same species of animal, from the lowest stages to man, are alike in any important particular. He claims that the distinguishing feature or element of an individual is not transmitted to the offspring of that individual. The theory of Darwin, on the other hand, is that heredity the peculiarities of the primogenitor finally result in a new species.

Professor de Vries offered proof before the scientists that an entirely new species may be developed within one or two generations.

Professor George H. Howard of Leland Stanford University spoke to-day on "Social Control and Function of the Home."

Professor Howard said that at the present time marriage depended more upon the family than the family depended upon marriage. The home was used merely as a place in which to eat and sleep, he said, while the members, through selfishness, were made wage-earners. Professor Howard asserted that the marriage ties are at present too lightly made and too easily broken, and that this was the reason for the club life of to-day, which was a menace to society.

Professor Howard brought out the fact that patriarchal control in the home, so prevalent in former years, was rapidly vanishing and that husband and wife were becoming more equal in power. Therefore, he said, harmony in the home was more important than ever before.

HEART DISEASE ENDS LIFE OF NOTED NEZ PERCE WARRIOR.

SPOKANE, Sept. 22.—Chief Joseph, the famous Nez Perce warrior, is dead. He had been in poor health for some time. He was sitting by his campfire on the Colville reservation Wednesday afternoon and was seen by Indians near by to fall from his seat to the ground. When they lifted him he was dead. He died from heart disease.

CHIEF JOSEPH DEAD.

Chief Joseph was considered by many army officers the greatest of Indian warriors. He made his home in the Wallowa country, in Eastern Oregon, and when in 1875 an attempt was made to confine his tribe on a reservation he took to the warpath. General Howard and a big force pursued Joseph for three months. He was finally headed off and captured by General Miles.

PRESIDENT IN TRAIN ACCIDENT

Wheel of Locomotive Sheds a Tire.

Metal Pierces the Boiler of Engine and Shuts Off Steam.

Slowness of Speed Prevents Serious Consequences and Roosevelt Escapes With Short Delay.

WASHINGTON, Sept. 22.—President Roosevelt and party arrived here over the Pennsylvania Railroad from Oyster Bay at 6:52 o'clock this afternoon.

The President's train was delayed about thirty-six minutes by an accident to the rear drive wheel of the locomotive as it entered the tunnel at Baltimore. The engine was immediately detached and another procured to pull the train to Washington.

Fortunately the train was not running at high speed when the accident occurred, or it might have been more serious. It was making not more than thirty-five miles an hour, when in some unaccountable manner the tire of the rear drive wheel on the left side of the engine broke and curled off. One end of it protruded upward and jammed through the boiler of the engine causing an almost immediate shutting off of the steam. Engineer Weatherly put on the airbrakes and the train came to a stop. A request was sent to the yard for another engine. After a half-hour's delay another engine was attached to the train and it proceeded to Washington.

The cause of the tire breaking, according to the railway officials, was inexplicable. The engine, just before leaving Philadelphia, had been thoroughly tested. The President and his party took the matter very coolly.

The accident is said to be the first which has happened to a train on which President Roosevelt has traveled during his administration.

The President was given a cordial welcome home by a large crowd of people as he came through the trainshed and walked out to the street where his carriage was waiting. The crowd lined both sides of the street for a long time before the train arrived, and when he made his appearance and stepped into his carriage he was enthusiastically cheered.
