

EXPECT TAFT TO SIGN NEW TARIFF BILL

Leaders Plan to Have Measure in President's Hands Early This Week

Deliberations of Republican Conference Committee Now Practically Completed

WASHINGTON, July 18.—The republican conference committee is near the end of its deliberations on the tariff bill and its report probably will be completed late this week.

Many expect that President Taft will sign the bill. He caused a flurry in congress Friday night by issuing what amounted to an informal message to congress reiterating his conviction that the people demanded a bona fide downward tariff revision.

Probably the five subjects which have received President Taft's personal attention—iron ore, coal, oil, hides and lumber—will be taken up by the conferees first. Proceeding upon the assumption that iron ore and oil will be placed upon the free list and that existing duties on coal, hides and lumber will be materially reduced, the conferees are preparing amendments on articles related to the foregoing materials.

WOOD PULP AND PRINT PAPER

Outside of the questions receiving the personal attention of Taft, the greatest difficulty anticipated relates to the wood pulp and print paper schedules. On account of the statement of Representative Mann, chairman of the special committee which investigated this whole subject, and reported reduced rates to the house, that he would vote against the conference report unless the views of his committee were recognized, the conferees have delayed disposition of this schedule.

SPLIT OVER GLOVE TARIFF

The paragraph affecting women's gloves, on which the house advanced the existing rate, is among those on which action has been deferred. The senate conferees are holding out for an amendment reducing Dingley rates. The senate conferees on print paper upon increases made in the duty on lemons. The existing rate is 1 cent a pound. The house increased this to 1 1/2 cents and the senate to 3/4 cent more, in the interest of the California growers. This is one of the questions to be taken up early this week.

THOUSANDS IN LINE FOR PUBLIC LANDS Spokane Thronged With Visitors Waiting to File

SPOKANE, July 18.—Five or six thousand visitors spent today in Spokane, waiting for the notaries to open their offices here for registration, or laying over to go to Coeur d'Alene, Kallispell or Missoula tomorrow. A large part of the influx came from the south and west, Seattle, Tacoma, Portland and the California cities furnishing many prospective applicants.

Every hotel in the downtown district turned away hundreds of persons. The land office was closed all day. Applications in Spokane tomorrow will probably number 6,000 on account of many waiting to register before leaving for the other application points.

Hundreds, perhaps thousands of persons who apply for registration on the three reservations will lose what chance they have for success in the drawing by mistakes in the process of application. One fruitful source of error is in mailing, without a stamp, the letter containing the application, as the applicants regard it as government business, which requires no postage. Many more are marked in some way which will render the envelope possible of identification, which will cause its rejection by the superintendent of the opening at Coeur d'Alene.

COEUR D'ALENE CITY, Idaho, also furnished an animated scene today with many visitors patronizing the lake tours and trolley rides.

DEAD BANDIT KILLED NEARLY HUNDRED MEN Lieutenant Joseph A. Baer the Hero of Battle

MANILA, July 18.—When Jikiri, the Moro bandit chief, who was killed with all his followers in a desperate battle with troops and constabulary near Patian, on Jolo island, July 5, began his career as an outlaw he swore that he would kill a hundred men before he died. A dispatch received today from Zamboanga says that the bandit nearly fulfilled his pledge. All but one of the many women in the cave where the outlaws made their last stand were wives of Jikiri. The woman who escaped was the wife of one of Jikiri's followers and accepted the safe conduct offered by the Americans before the assault on the cave began.

Lieutenant Joseph A. Baer of the Sixth cavalry is agreed by all who saw the fight to have been the hero of the battle. His timely rescue of Lieutenant Arthur H. Wilson, who was struggling with Jikiri and already desperately wounded when Baer shot and killed the bandit, is the talk of army circles. Baer killed four of the eight bandits slain.

PERU'S RAILWAY SYSTEM TIED UP BY A STRIKE All Engineers and Trainmen Leave Their Places

LIMA, Peru, July 18.—In consequence of a general strike of engineers, firemen and conductors traffic on the Central Railways has been completely suspended. A locomotive in inexperienced hands caught fire and the petroleum tank exploded, causing a loss of \$25,000.

Jealousy Rife When Mrs. Taft Smiles on Countess

German Ambassador's Wife Wins Favor and Society Folk Sadly Envious

[Special Dispatch to The Call]

BOSTON, July 18.—Jealousy is rife in the president's set at Beverly. The society folk who are clustered around the Taft cottage are bitterly, sadly envious over the successful bid for Mrs. Taft's favor which a charming woman has made.

A book, a two volume edition de luxe, is the cause of all the heartache, and the countess von Bernsdorff, the wife of the German ambassador, is the much envied woman.

The close knit bonds of friendship between Germany and America have been strengthened through the graceful act of the countess in presenting Mrs. Taft with the memoirs of the late count von Bernsdorff, the present count's father, who was a great friend of Alonzo Taft, the president's father, when the latter was American minister to Germany.

As a result of the countess's gift the Tafts are more than merely friendly to the count and his charming wife. Indeed, the German diplomat's better half seems destined to outshine all the other women of the diplomatic set since the receipt of the gift by Mrs. Taft.

Mrs. Taft was immensely pleased with the token of esteem. As for the president himself he considers the book as one of the most precious in his library, containing, as it does, so much that concerns his father, whose memory he has always held in the most extravagant veneration.

The Japanese minister, though long a great friend, is almost forgotten in the presidential set at Beverly. The Chinese ambassador, who has been perhaps the greatest diplomatic social success in the history of the foreign portfolios in America, is now a back number.

Even Mrs. Bryce, a great favorite, is rather palling beside the sudden rise of the countess von Bernsdorff. This is all the more wonderful as the von Bernsdorffs have not up to now mixed in the social life at Washington any more than their position absolutely demanded.

There are heart burnings a-plenty among the diplomatic and social circles of the north shore over the sudden rise of the countess von Bernsdorff and future feuds are looked for.

As Charles VII died in 1861 without children his rights devolved upon his brother, Don Juan, who had married the archduchess Maria Teresa of Austria. Their son, Don Carlos, married Margaret de Bourbon. In October, 1868, Don Juan abdicated in favor of his son, whose standard was raised in the north of Spain in 1872 by some of his partisans.

Don Carlos himself, after addressing a proclamation to the inhabitants of Catalonia, Aragon and Valencia, calling upon them to take arms in his cause, entered Spain July 15, 1873, announcing that he came to save the country.

Then followed the "four years' war" which ended in January, 1876, when Tolosa, the last stronghold of the Carlists, fell, and its defenders sought refuge in French territory. Meanwhile the republic and the eldest son of former Queen Isabella took the Spanish throne as Alfonso XII.

Alfonso XII died in 1885 and the fight for the succession raged between Don Carlos and Marie Christina of Austria, widow of the late king. The posthumous birth of the present king in 1886, however, kindled a feeling of loyalty which has existed up to the present.

Within recent years there has been a recurrence of the Carlist agitation in Catalonia and other districts which was attributed to the influence of Don Jaime, the only son of Don Carlos, but these movements have proved of little importance.

THIRD AND LAST SON MEETS VIOLENT DEATH Robert R. Fulton, Electrician, Killed at Mariposa Mine

[Special Dispatch to The Call] BURLINGAME, July 18.—By the unexplained death of Robert R. Fulton at the mines of the Exchequer company in Mariposa county July 16, the last son of that family met with sudden and violent death.

Fulton, who married a niece of Captain John Martin a short time ago, was employed as an electrician by the company and had charge of its hoisting plant. Only meager details have been received as to the cause of his death by relatives in this city, but it is supposed that he was either whirled to death by belt shafting or electrocuted while at work.

Fulton was 31 years old and was survived by two small children. The funeral will be held Monday from the home of Mr. and Mrs. Chase P. Stanley.

FAIRFIELD'S BUSINESS CENTER TO BE REBUILT New Structures to Be Fireproof and of Reinforced Concrete

[Special Dispatch to The Call] VALLEJO, July 18.—The business section of Fairfield, the thriving little county seat town of Solano county, which was swept a few days ago by fire, is to be rebuilt with modern fireproof buildings.

D. T. Ambrose and D. Silverstone have let a contract to the Keystone cement company of this city to erect a 50x100 two story building of reinforced concrete building. Other landowners are also preparing to build.

These improvements, with a new Southern Pacific station at Fairfield and a \$250,000 courthouse, which the county is preparing to erect at Fairfield, will make a great improvement for the town.

BANK FAILURE RESULTS IN AGED MAN'S DEATH Father in Law of Banker Dies of Broken Heart

[Special Dispatch to The Call] VALLEJO, July 18.—George W. Cutler, formerly a millionaire resident of Monmouth, Ill., who came to Calistoga eight years ago with his son in law, Henry Brown, and purchased the Bank of Calistoga, is dead at his home in Los Angeles of a broken heart.

The old man was respected and prominent in the east and also in this section, but the attending disgraces on the closing of his son in law's bank and the ruining of many formerly prosperous neighbors was too great a burden for him to bear.

The remains will be shipped to Cutler's old home in Illinois.

CHILD LIGHTS GASOLINE AND DIES IN HOSPITAL Stove Explodes, Clothes Burn Despite Father's Efforts

LOS ANGELES, July 18.—While his mother was attending the funeral of his grandmother today Alexander Spaulding, 3 years old, crept into the kitchen of his home at 1667 East Twelfth street, and turned on the fluid in the gasoline stove.

He applied a match to it, the stove exploded and the child was fatally burned. His father tried to save the boy, but could do nothing until every bit of his clothing had burned from the baby's body.

The mother came home just in time to rush to the hospital before her baby died.

SPANISH PRETENDER, DON CARLOS, DIES

Long Illness, Reported as Apoplexy, Ends Career of the Duke of Madrid

He Claimed and Fought for Throne Under Special Law of Succession

ROME, July 18.—Don Carlos of Bourbon, pretender to the Spanish throne, died today at Varese in Lombardy. He had been ill for a long time and the latest reports indicated that he was suffering from apoplexy.

Don Carlos, duke of Madrid, who claimed under the special law of succession established by Philip V to be the legitimate king of Spain by the title of Charles VII, was born at Laybach, Austria, March 30, 1848. His father, Don Juan, was the brother of Don Carlos Charles VII, known as the count de Montemolin, in support of whose claims the Carlist risings of 1848, 1855 and 1860 were organized.

As Charles VII died in 1861 without children his rights devolved upon his brother, Don Juan, who had married the archduchess Maria Teresa of Austria. Their son, Don Carlos, married Margaret de Bourbon. In October, 1868, Don Juan abdicated in favor of his son, whose standard was raised in the north of Spain in 1872 by some of his partisans.

Don Carlos himself, after addressing a proclamation to the inhabitants of Catalonia, Aragon and Valencia, calling upon them to take arms in his cause, entered Spain July 15, 1873, announcing that he came to save the country.

Then followed the "four years' war" which ended in January, 1876, when Tolosa, the last stronghold of the Carlists, fell, and its defenders sought refuge in French territory. Meanwhile the republic and the eldest son of former Queen Isabella took the Spanish throne as Alfonso XII.

Alfonso XII died in 1885 and the fight for the succession raged between Don Carlos and Marie Christina of Austria, widow of the late king. The posthumous birth of the present king in 1886, however, kindled a feeling of loyalty which has existed up to the present.

Within recent years there has been a recurrence of the Carlist agitation in Catalonia and other districts which was attributed to the influence of Don Jaime, the only son of Don Carlos, but these movements have proved of little importance.

OUTWARD FLOW OF GOLD STOPPED BY LOW RATES Big Engagements Being Made for Shipment to Argentina

NEW YORK, July 18.—The shifting price movement of stocks last week reflected a state of speculative uncertainty, and the aggressive upward turn in United States steel was the only decisive movement in the list.

The dull and uncertain movement in the stock market outside of United States steel is accepted as appropriate. Confidence in the healthy restoration of prosperity is undisturbed and the ultimate yield of profitable crops is counted on.

Last week's heavy requirements on the money market made an appreciable but slight effect on interest rates. National banks returned \$9,000,000 of government deposits and will be called upon to return \$6,000,000 more August 15. The renewal of plans for a Panama canal bond issue reported from Washington opens up a new factor in the influences between the government financial operations and the money market.

The rapid decline in foreign exchange rates stopped the outflow of gold to Europe. Large engagements are being made for shipment for Argentina.

The low stage of this country's merchandise exports and the heavy import movement are indicated by the \$7,000,000 excess of import values over exports for June, the first for any month since 1897. England and France are able, therefore, to draw on New York to make payments to Argentina.

SKIN OF BIG MOUNTAIN LION TO BE STUFFED Fine Specimen Killed in Blue Ridge to Be Mounted

[Special Dispatch to The Call] NAPA, July 18.—A party of hunters from Napa, C. Pierre, C. Carbone and A. Carbone, placed an order with a taxidermist here yesterday to have a handsome specimen of a California lion stuffed. The animal was killed in the Blue Ridge mountains in the northern part of this county and is the first one slain in the county for several years.

The lion measures six feet from the tip of his nose to the end of his tail and, though young, weighed more than 100 pounds. The lions' panthers are very destructive of sheep, though few remain now in this part of the state.

TRAIN JUMPS TRACK; TWO TRAINMEN KILLED Monon Passenger Derailed on Rounding a Curve

CHICAGO, July 18.—While rounding a curve south of Manchester, Ind., today a Monon passenger train jumped the track. Two trainmen were killed and six passengers were injured.

The dead are: M. Byen, engineer, and L. Austin, fireman.

SAILORS ATTACK POLICEMAN—Vallejo, July 18.—John Leary, a member of the local police force, was attacked last night by three sailors and escaped with his life only after he had felled two of the three men. He received many serious scalp wounds. J. H. Betchell and J. Meylor, two of the sailors, were arrested.

Inquiry Fails to Prove Claim to 113 Years of Life

Plymouth Records Contain No Mention of Family of Capt. G.E.D. Diamond

[Special Dispatch to The Call] PLYMOUTH, Mass., July 18.—Inquiries have come from San Francisco seeking proof of the statements of Captain Godard Ezekiel Dodge Diamond, who has furnished the papers of California with matter to talk about in his claim to being 113 years old last spring.

He says he has lived under all the presidents of this country and has voted for them since 1817, when he cast his first ballot for James Monroe.

He says he was born here May 1, 1796, his father being Joseph Diamond, his mother's maiden name being Mahalia Allan. A number of efforts have been made, but no trace of such persons has yet been found. The records of the town clerk fail to show anything bearing on his claims.

"The History of Plymouth" and "Ancient Landmarks of Plymouth," both written by the late William T. Davis, who compiled genealogical matters in the latter from the town records, make no mention of the Diamonds or any one who could have been counted as Mahalia Allan. The first mentioned book refers to two men named Diman, and there is a record of Daniel Diman serving as a selectman in 1781-2-3.

In September, 1775, Elijah Morey is recorded as enlisting for 30 days in the army in Rhode Island for Daniel Diman. There was also Gamaliel Diman, who was one of the garrison in the fort on the Plymouth company, but Davis did not regard him as a Plymouth man.

STRONG STATEMENT BY LOCAL MATRON

"Stomach Man" Indorsed by Woman Who Says He Made Her Well

Indigestion Made Eating a Torture, Caused Faintness and Dizzy Spells

A strong statement in favor of the Cooper "stomach man" was made Saturday at the Owl drug store in the Phelan building by Mrs. Leontine Despin of 30 Scott place. She declared she had been entirely cured of stomach trouble of 20 months' standing by the treatment of the young easterner who has stirred so much comment in the bay cities since he has been meeting the people here. Cooper's most radical theory is that 95 per cent of all chronic illness is due to nothing but stomach trouble. Mrs. Despin's statement certainly tends to bear out his statements. She said:

"About 20 months ago I began to suffer severely from stomach trouble. I doctored for it but it seemed to me to steadily grow worse. I lost flesh, was tired and anemic all of the time and the pains I suffered after eating finally grew so bad that I thought I had cancer. Taking food into my stomach became torture. Gas would form. I would become nauseated and feel faint, with dizzy spells. Then palpitation of the heart, which followed, made me fear and almost wish I was going to die.

"I have lived in San Francisco long enough for my friends to know that I would not say this for anyone unless it were true, but this man Cooper's remedy has certainly cured me of stomach trouble, and when I came in today I was glad to be able to tell him so. Before I took his treatment I could not eat a particle of solid food and now I can eat anything. I lost 60 pounds through my illness, but now I am rapidly regaining my normal weight."

Cooper appeared to be one of the busiest men in San Francisco when interviewed, but, although he cut his statement short, what he said was characteristically novel. The "stomach man" said:

"Catarrh of the stomach and chronic constipation are at the root of all this sickness and habit sickness that you see in San Francisco. Thousands of people have come to see me here who have been suffering for years from what they thought was every imaginable kind of disease. In nine cases out of ten I found the fault was caused by stomach trouble. People eat what they want for a certain number of years and then when their digestive system gets out of order and disease overtakes them they wonder why. The stomach becomes coated with a catarrhal substance and food can not digest. Consequently it literally rots and forms gas. This pumps poison into the blood, upsets the liver and the kidneys and clogs the bowels so they can not work. Remove the cause—the stomach trouble and all the other diseases disappear with it. This is what my remedy does, and that is why Mrs. Despin has just told you what she has, and why thousands of others in San Francisco whose names I can give you, will tell you the same thing.

People eat what they want for a certain number of years and then when their digestive system gets out of order and disease overtakes them they wonder why. The stomach becomes coated with a catarrhal substance and food can not digest. Consequently it literally rots and forms gas. This pumps poison into the blood, upsets the liver and the kidneys and clogs the bowels so they can not work. Remove the cause—the stomach trouble and all the other diseases disappear with it. This is what my remedy does, and that is why Mrs. Despin has just told you what she has, and why thousands of others in San Francisco whose names I can give you, will tell you the same thing.
