PLAN WELCOME TO STATE BAPTISTS

Arrange for Annual Conference of California Churches to Be Held in Oakland

OAKLAND, Oct. 30.—Members of the First Baptist church are arranging to welcome delegates to the annual convention of the Baptist churches for northern and central California, which will be held here from November 9 to November 14.

The First Christian church, Rev. T. J. Boyer, pastor, has inaugurated a fall and winter campaign, which includes an increase in church membership, Christian Endeavor meetings, increase in attendance at church and Sunday school of respective members, doubling Sunday evening church congregations and increasing prayer meeting attendance.

The monthly musical service will be given tomorrow evening at St. Andrew's Episcopal church. Rev. Frank L. Goodspeed, pastor of the First Presbyterian church, will preach Sunday morning on "The Treatment of the Criminal."

At high mass Sunday morning at St. Mary's Roman Catholic church, Seventh and Jefferson streets, the following music will be given by the Oakland conservatory of music choir, under the direction of Prof. Adolf Gregory: "Kyrie" and "Gloria," from Gounod's "Messe Solennele"; "Credo," "Sanctus," "Benedictus" and "Agnus Dei" from Durand's mass in E flat; "Offertory Psalms Angelicus," by Gaid; organ prelude, interludes and postlude by Dubois. The soloists of the mass are Miss G. Wilkie, Miss Marie Spiller, L. J. Spahr, John P. Fieherling and Adolf Gregory.

In the evening at 7:45 o'clock rosary devotions and benediction of the blessed sacrament will be celebrated. "Praise His Awful Name" (Spahr), before the sermon; at the offertory, "Verum" (Elgar); "O Salutaris" (Gounod); "Tantum Ergo" (Spahr). Mrs. Adolf Gregory will preside at the organ.

The sermon at the 11 o'clock mass will be given by Rev. E. P. Dempsey, Rev. Thomas Kennedy will preach in the evening. Special music will be given Sunday morning at the First Unitarian church. Rev. W. D. Simonds will preach on a subject appropriate to "Prison Sunday."

Members of the Lutheran churches will give discourses tomorrow on subjects bearing upon the anniversary of the Reformation.

DEPUTY ASSESSOR DIES OF INJURIES

OAKLAND, Oct. 30.—William McDonald, a deputy county assessor, who fell 200 feet at the "Devil's Slide" near Cloverdale while on his vacation August 8, died this afternoon at his home, 547 Thirty-second street.

McDonald went over the cliff at the slide in a carriage drawn by two horses which had bolted. The vehicle was broken to bits, the two horses were killed and the driver was terribly mangled.

McDonald was born in Chicago, May 4, 1868. He leaves a father and mother; a brother, A. H. McDonald, and a sister, Mrs. Ayer of Elks, Mendocino county. He was a member of Sognola lodge of Masons and the funeral will be held by that lodge.

Mrs. William Bissell, who was formerly Miss Martha Snow, one of the charming girls of the younger set, is entertaining as her house guest Miss Mary Chappell of Alameda. Since their marriage Mr. and Mrs. Bissell have occupied a home in Livermore, sharing its hospitality with their bay cities friends.

Rubyn Thorpe, At Oakland Orpheum

BLOOMQUEST TOPS ORPHEUM PROGRAM

"Nerve," a Clever Sketch, is Among the Numbers for the New Bill

OAKLAND, Oct. 30.—George Bloomquest, who comes to the Oakland Orpheum Sunday afternoon, is a young man who has struck it rich in vaudeville. He is a "head liner," drawing a big salary. He is well known in Oakland. He has a play called "Nerve," which was written for him by Victor H. Smalley, a St. Paul newspaperman. In the company is Miss Rubyn Thorpe, a clever actress.

Howard and Howard in their successful "The Messenger Boy" and "The Pianist" will be among the newcomers. Martinetti and Sylvester will be seen in their latest acrobatic novelty. Bakerini's troupe of canine tumblers will be seen. Valerie Bergere will present an entirely new comedy this week.

CHECK SWINDLERS WORK IN OAKLAND

OAKLAND, Oct. 30.—Worthless check operators passed four checks today, having come to Oakland from Stockton, where they swindled merchants by the same plan.

Tessler, a clothier at 823 Broadway, accepted a check for \$17.90 and gave back change on a small purchase. Joseph Herrier, 421 Tenth street, cashed one for \$11.90.

The paper was all of one kind, drawn on the Oakland Bank of Savings, in favor of Frank Graham and John Braden, of Elks and Healey. On the backs was stamped in red ink the "Fisher and Healy construction company," with the date October 29. They were made to resemble pay checks.

NEW NAME CHOSEN FOR OCEAN VIEW

Town Votes Change to Albany in Honor of the Mayor, Frank Roberts

BERKELEY, Oct. 30.—At a special election today the name of Ocean View, the incorporated town north of here, was changed to Albany. The vote was 35 in favor and six against the change. The new name is taken in honor of the birthplace in New York state of Ocean View's Mayor, Frank Roberts. Ocean View also considered that the original name was misleading.

News of Society Across the Bay

OAKLAND, Oct. 30.—The betrothal of George Wishart Drower and Miss Marion Newell Hovey was announced this afternoon by the young bride to be, who entertained two score friends at cards at the Hovey family home. Although the engagement has been suspected for some time, the announcement will bring to Miss Hovey the well wishes of a wide circle of friends. She is a pretty girl and gifted musically. As a member of the Frolic club she has contributed much to the musical interest of the bay cities. Miss Hovey is the daughter of Mr. and Mrs. C. E. Hovey of Alameda. Drower is a young San Jose man, who is at present in Bakersfield, where he has important holdings in the oil fields. He is the son of Mr. and Mrs. George Drower. No definite plans have been made for the marriage, although the wedding probably will be an event of the coming year.

Last evening Mrs. J. Walter Scott was hostess at a reception and dance in Ebenel club house, which she gave in honor of a dozen or more young Hawaiian visitors in Oakland. Two score guests accepted Mrs. Scott's hospitality. A delightful feature of the evening was the informal musicale to which the complimented guests contributed, playing their own compositions on their native instruments.

Mr. and Mrs. Raymond Snowden are in the southern part of the state where they are enjoying their honeymoon. The wedding of Miss Elsie Horton and the well liked Oakland man the last week will be remembered as one of the notable events of the early winter.

Mrs. Charles H. Smith entertained at luncheon this afternoon at her Piedmont home, a dozen friends enjoying the game of bridge, which followed. Miss Mary Van Orden will be the complimented guest at a gathering of friends Saturday afternoon of the coming week, when her sister, Miss Dorothy Van Orden, will entertain in her honor. Miss Van Orden will leave for Boston shortly to spend the winter on the Atlantic seaboard.

The wedding of Charles Davidson and Miss Mary Blossom will be one of the notable events which will interest society during the coming month. Miss Blossom is one of the best liked girls in the college town, where she has been prominent in university circles, as well as with the smart set. Davidson is the son of a well known Berkeley family and is engaged as consulting engineer for one of the large concerns of San Francisco.

Miss Claire Ferrin, the gifted Berkeley girl whose betrothal to Frank Thatcher came as one of the surprises of the early month, will be entertained at a reception Friday afternoon, November 12, at the residence of Mrs. William Wadsworth by the members of the Etude club. Miss Ferrin until the last year has been president of this coterie of musical women and her efforts in behalf of the club have given it an enviable place in the musical circles of the bay cities. Although no definite plans have been made for the marriage, the wedding of Miss Ferrin will be a notable event of the early winter. Thatcher comes from Washington, D. C., where he and his bride probably will establish their home.

FRACTURED SKULL RESULTS IN DEATH

OAKLAND, Oct. 30.—Two months after his skull had been fractured by the explosion of an automobile tire, over which he was working, W. A. Thompson, 23 years of age, died today from the injury, which was aggravated by a recently contracted cold. He was formerly a salesman for Goldberg, Bowen & Co., and his home was at 2853 West street.

Thompson was driving the automobile when it lost a tire. The machine was taken into a garage and a new tire was put on the rim. The salesman began pumping the tire, which suddenly burst. A piece of the heavy rubber struck him on the head, fracturing his skull.

Thompson leaves a widow and one child.

METHODISTS WILL DEDICATE CHURCH

ALAMEDA, Oct. 30.—The formal dedication of the new First Methodist Episcopal church, Central avenue and Oak Street, will take place tomorrow. Rev. S. D. Huttsnippler, district superintendent, assisted by former pastors, the present pastor and visiting ministers, will conduct the ceremonies. The special services of dedication will be held in the Sunday school auditorium of the church Sunday morning, November 7, at 9:45 o'clock.

The first religious services in the edifice will be held tomorrow morning at 11 o'clock. The sermon will be preached by Rev. E. R. Dille. In the evening the sermon will be delivered by Rev. S. D. Huttsnippler.

Consumption Cure Sent Free

Positive Remedy for Consumption, Bronchitis, Asthma And All Throat and Lung Troubles That Has Shown Quick Results In Every Case

Send Coupon Below for a Trial Package Today and Prove for Yourself That It Will Cure You

Dr. J. Lawrence Hill, Discoverer of This Great Remedy For Consumption, Bronchitis, Asthma, and All Throat and Lung Troubles.

A really wonderful remedy for Consumption, Bronchitis, Asthma, Chronic Coughs, and all Throat and Lung Troubles has been found by Dr. J. Lawrence Hill of Jackson, Mich., the well known Michigan scientist. He says: "It is true, I feel certain, I have found the remedy for these diseases. Every test covering a period of several years has proven it. It is not so much what I promise to do, but what I have already done, that makes my success all the more remarkable. Any one now may be cured in his own home at little expense and without having to change climate, or to diet, or to change his daily habits in any way. I want to say here that consumption, of course, has to start somewhere. It usually starts with a simple Cough, or with Asthma, Bronchitis, or mere spitting. The Consumption germ is obstinate and deadly. I have seen many terrible examples of its quick work, persons with a slight hacking cough, apparently in good health one month, die the next month. I want to make this discovery of mine as public as possible, because I want to send to every man or woman, who either has, or is threatened with Consumption, or who has weak Lungs, Catarrh of the Bronchial Tubes or Catarrh in any form, Chronic Bron-

Trial Treatment Package Coupon. Name, Address, Dr. J. Lawrence Hill, 1182 Hill Building, Jackson, Mich.

THE EMINENT CHINESE PHYSICIAN

Will publish from week to week the cause, effect and cure of different chronic diseases. The following—his first subject—will be on

The Microbe of Malaria Man's Deadliest Foe

Causes Nine-Tenths of Human Physical Misery—A Parasite That Lurks in the Most Delightful Countries—Most Destructive in the Tropics—No Race Immune from its Attack—The Object Lesson of Santiago—Narrow Escape of the American Army from Destruction—Utter Lack of Efficient Weapons Against This Unseen Enemy—A Sample of the Medical Requisitions—Only One Agent of Value on the List.

Suggestions of a Better Method of Treatment—Worth Considering by All Invalids

Scientific and Efficient Cure for Malaria and All Other Diseases

One of the loosely applied medical terms, which may mean a great deal or nothing at all, is the word "malaria." In practice, whenever a disease arises that the average physician can not diagnose, he calls it "malaria" and doses the patient with quinine. But when he is asked to tell exactly what malaria is he is unable to define it. He knows that it is something terrible which produces fever and breaks down the human body, ruining many splendid constitutions, but to describe the disease exactly, to state its origin and limitations, is beyond his power and information. Recently, however, Dr. Robert Koch of Berlin, who does the thinking for the world, at present, upon the microbe in all its multitudinous forms, has advanced some new and startling theories on the subject of malaria.

MAN'S WORST ENEMY According to this authority, the parasite of malaria, scores of which can live in a drop of blood, is man's deadliest foe. It appears in various degrees of malignancy, influence and is distributed all over the globe, but its worst forms are found in semitropical and tropical countries. It lurks in the low lands of Italy, producing deadly fevers. It causes the fever and ague of the Mississippi bottoms, and in worst form it produces the deadly black water fever, or vomito. It is the origin of the epidemics of cholera and yellow fever, which depopulate whole countries.

A LITTLE THING BUT TERRIBLE The parasite of malaria finds its way into the blood through the bites of mosquitoes or other blood sucking insects. It enters the system, and reproduces in the blood with incredible rapidity and soon poisons the whole system. The efforts of nature to get rid of the parasite produce a fever of greater or less intensity, according to the nature of the attack. The blood, upon the purity of which vitality depends, becomes a poisonous mass of corruption. The nerve centers are paralyzed for lack of sustenance, and the patient, unless a remedy is promptly applied, the patient inevitably dies.

NO SPECIFIC REMEDIES IN USE The worst of the situation is that our physicians have no remedies upon which they can depend with confidence. Quinine is the only remedy employed. In some parts of our own country people take quinine every day of their lives, as regularly as they take their morning coffee. The result of this constant course of medication is the lank and salubrious-looking soldiers of the United States army, which we are all familiar with. But quinine is not a cure. It may help prevent attacks of the disease, but it will not relieve the more severe forms. Only an iron constitution can carry anybody over these, and the best are frequently rendered physically wrecks for the remainder of their lives.

The reports made by Gen. Shafter from day to day show a terrible state of affairs in his army, and prove conclusively that nothing would have been left of it if the malarial stricken troops had been left to rot in the tropics for the still more deadly fever, yellow fever, to become epidemic. Here is Shafter's report of the condition of his soldiers under his command August 8:

Total number of sick, 3,818; total number of fever cases, 2,988; total number of new cases, 254; deaths, 12." The report also states that 350 fever cases were returned to duty on that day, showing that the fever was not of the most deadly kind. But, as a grim forerunner of yellow fever, it was deadly enough to strike terror to the hearts of our brave soldiers. And not many days would have been required, at twelve deaths a day, to roll up a mortality list far greater than that of the deadliest battle of the war.

THE REMEDIES PROPOSED While Shafter was sending daily bulletins to the above, certain officers in the medical department of the war office were discussing, through the newspapers, the responsibility for a failure to send sufficient medical supplies to Shafter's army. This discussion brought out the following as a sample of the requisitions made for medicines. The chief surgeon of the Fifth army corps sent the following requisition by cable July 23: "Want urgently quinine tablets, 1,000 bottles; strychnine tablets, 100 bottles; calomel and scabiosa, 100 bottles; calomel, 200 grammes; nitric acid in two ounce vials, 100; test tubes, 1,000; Fowler's solution, 1,000." As nearly as can be learned, these supplies never reached the Fifth army corps, which fact accounts for the recovery of a majority, and the prevalence of these remedies been administered there would have been a far greater mortality. With the exception of the quinine, every article asked for is a poison, and the sick would have had to fight against the combined effects of the poisons and the disease. They would have been administered with the laudable intention of fighting fire with fire. But these would have been simply that of adding fuel to flame. The fact that some who were dosed with these remedies recovered is a notable proof of the astounding vitality of the Anglo-Saxon race. It shows that the mysterious flame of life—with which each is endowed at birth, but the nature of which nobody understands—is a difficult thing to quench.

THE ACTION OF QUININE Quinine is of some use in these cases. But it will not do the work alone, and it is really the only agent of any value that the American physicians possess. Dr. Koch says that quinine does not kill the microbe which is causing the trouble, but it definitely checks and limits its power of reproduction. In other words, less scientific, perhaps, but possibly just as clear, quinine has a tendency to dry the microbe up. This is its action in all cases where it is employed. It concentrates, and it may be that it puts the poisons of malaria into better shape for being thrown away by the system by the organs of excretion. Possibly, if followed up by other equally good remedies for this latter purpose, quinine would be effective. But the trouble is that the American physician has no such other remedies. He resorts to calomel, which is a mineral poison, and a deadly one, too. Quinine, the only agent of any therapeutic value commonly employed, is a vegetable remedy. This fact ought to point the way to complete success in dealing with these destructive epidemics. It would so solve the way if there were less prejudice and fiercer devotion to tradition in the minds of the medical profession.

WHAT THE HERBAL SYSTEM OF MEDICINE DOES The herbal system of medicine abandons the poisons entirely and relies wholly upon vegetable agencies, the action of which can be understood and the value of which is proven by experience. The best herbal system, the Oriental, has remedies that will cure malaria, quinine, and not only limit the reproduction of the malarial microbe, but they cast it and all its evil influence out of the blood and of the body. They nourish the blood and sustain the nerve force while nature makes a cure and the vitality of the patient, which has been depressed by the fever, is reasserting itself. They check the process of blood poisoning at once, and by so doing they save the body through the skin and the other organs of excretion. After this recovery is certain.

THE BEST HERBAL SYSTEM Herbal remedies are used among all nations to some extent. But the Chinese nation, which has the most advanced and its use into a science and an art. Centuries of patient investigation have taught us the proper use of the thousands of medicinal herbs which Nature has lavishly endowed upon the Flowering Kingdom. By the use of these herbs, which are called cures that seem wonderful to those who have not learned the fact that vegetable remedies which are readily assimilated are Nature's remedies, and that mineral poisons, which cannot be taken into the system, are a poor substitute, an honest effort, it may be a failure, nevertheless. The best Oriental system of herbal medicine, the Oriental system of herbs, was known and best tested exponents of the Oriental system of herbs, the members of DR. T. FOO YUEN'S STAFF, which has its headquarters at 1912 Broadway, Oakland. Hundreds of the best and most intelligent citizens of Oakland and other cities of California are using the herbal remedies sold by this firm, and with results which are constantly increasing their sale. Any one may verify these statements by calling at the offices of this company. These Oriental physicians are the most capable of any that have ever come to America, because they received the most thorough and careful training at the great Chinese Imperial Medical College at Peking, and later, in the practical school of experience, under the tuition of the celebrated Chinese physician, Dr. Li Po Tai, of San Francisco.

NO RACE OF MEN EXEMPT FROM MALARIA. Dr. Koch says that no race of men is immune from malarial disease, that it exists everywhere, in forms of greater or less virulence, and that it is responsible for nine-tenths of the diseases which afflict mankind. In all parts of the world, Malaria exists in California, and hundreds of people now living here have brought its germs with them, contracted in other localities. It causes many of the obscure and lingering diseases which the physicians can neither diagnose nor heal. There can be no cure until a proper diagnosis has been made, for, otherwise, medical treatment is the merest guesswork. Diagnosis by the intelligent and gentlemen who are deriving benefit from this system after vainly testing everything else, and secure a diagnosis by the pulse and an opinion from the physicians of this company. These give an absolutely free of charge, and no person is ever urged to become a patient against his own judgment. The doctor does not undertake to cure those who do not wish to be cured, but offers encouragement and relief in every form of disease amenable to the highest skill of the enlightener physician.

1912 Broadway, at 28th Street, Oakland, Cal.

H.C. Cahwell Co. THE LACE HOUSE 12th and Washington Sts. OAKLAND. Monday's Big Feature Special Values in Tailored Suits \$25. These suits only left New York last Monday.
