CONGRESSMEN AND EXCLUSION LEAGUE

Promises of Support in Effort to Forbid Immigration of All Asiatic Labor

Sailors' Union of the Pacific Coast Gives Liberal Help to Great Lakes' Strikers

At the last meeting of the Asiatic exclusion league copies of bills that have been introduced in the house of representatives by Congressman Bennett of New York, Richardson of Alabama and Howland of Ohio were presented and passed to the secretary with instructions to report on them at the next meeting.

A letter received from Congressman Borland of Missouri was read. In this he pledges support for any legislation that will extend the Chinese exclusion law so that it will apply to Japanese, Koreans and all Asiatics.

During the week preceding the meeting 2,148 petitions were received requesting congress to enact an exclusion law that will effectively end the coming to this country of all Asiatics, particularly the Japanese.

The league will hold a meeting in the labor temple next Sunday afternoon when it will be addressed by A. E. Fowler of Washington on exclusion.

The Sailors' Union of the Pacific, which has already donated \$13,000 to the striking sailors of the great lakes, has voted to donate \$20,000, which may be the one sum or in such sums as the strike committee may desire.

The following named have been elected officers of the bakers' and confectioners' union for the ensuing term: Emil Schaefer, president; Andrew Saunders, vice president; William Wright, secretary-treasurer (re-elected); Emil Elsdold, business agent; T. F. Conway, sergeant at arms; Emil Kuhn, Frank Duffy, assistants; Henry Hanks, Andrew Saunders and Emil Elsdold, trustees; O. Ruefle, Paul Guederley, Otto Peterson, Anton Wahl, Richard Schwarting, John Woelfel, W. Wright, E. Elsdold and E. Weichert, executive board; C. Peterson, E. Elsdold, O. Ruefle, R. Hoffman, A. Wahl and A. Lethie, delegates to labor council.

The brotherhood of teamsters has elected the following officers: Michael Casey, president; David Noonan, vice president; C. J. Carroll, secretary-treasurer; John McLaughlin, secretary-business agent; John E. Stewart, trustee; J. McLaughlin, M. Casey and J. McNamara, delegates to city front federation; J. Keefe, J. O'Connell, J. Sessmith, M. Casey, J. McLaughlin, D. Noonan, J. Wilson, A. Brophy and J. Maher, delegates to labor council.

Machine hands' union No. 715, I. A. of M., had the following officers elected last Tuesday night for the ensuing term: Theodore Weske, president; Charles Roerden, vice president; Edward Corcoran, secretary; David McLennan, financial secretary-treasurer; William H. Finney, conductor; Joseph H. Byrne, sentinel; Samuel McCulloch, James Hickey and F. A. S. Roberts, trustees; Theodore Weske, Edward Corcoran and David McLennan, delegates to the labor council.

The auditing committee presented an encouraging report.

The lumber clerks' association, at its meeting Tuesday night, took up the matter of proposed amalgamation with the longshore lumbermen, as suggested by the building trades council. The general expression was opposed to such action.

The association adopted a resolution endorsing the Hetch Hetchy water project and declaring against Spring Valley.

The officers for the current term were installed by Past President A. Smith, three candidates were initiated and four applications received. The social committee reported that all arrangements were completed for the ball in the Auditorium Annex on January 22.

The granite cutters' union, by a unanimous vote, has declared in favor of the Hetch Hetchy water proposition and against Spring Valley.

Horse shoers' union No. 25 installed the following officers Tuesday night in the Building Trades temple:

William Preese, president; Ernest Katis, vice president; J. Jones, recording secretary; John Haik, financial secretary; Phillip Smith, treasurer; Thomas Dillon, sergeant at arms; Edward Mahoney, John Sungle and J. Scoulen, trustees; Ernest Kane and August Friedhofer, delegates to the labor council.

The union resolved to vote for Hetch Hetchy and against Spring Valley.

The molders' union was addressed Tuesday night by Mrs. de Lara in behalf of the Mexicans in prison in Arizona on a charge of violating the neutrality laws. The union endorsed the action of the San Francisco labor council.

Speeucvvel Automobile Catalogue Shows Many New Models of High Class Motors

The new Alco ambulance, built on a Vanderbilt cup winning chassis, for Richmond, Va.

NEW ROADSTER HAS GRACEFUL LINES

Artistic Book Issued by Speedwell Company, Illustrating 1910 Designs of Car

Richmond, Va., Purchases Fast Auto Ambulance From the Alco Company

By R. R. L'HOMMEDEU

The Speedwell motor car company of Dayton, Ohio, has just issued one of the most artistic catalogues that has appeared this season. The dark brown heavily embossed cover, which is neat and elegant in design, is but a preface to the contents of the book. The illustrations of the many models are strikingly clear and beautiful.

One of the most noticeable models of the Speedwells pictured is the 50 horsepower roadster, with semiracer body and seating capacity for two, three or four passengers. The front seat of the roadster is equipped with doors and the sides of the car slope to the dash in most graceful lines, resembling a yacht.

Another model worthy of mention is the "Speedwell special," a four passenger car, with a 121 inch wheel base.

A full description of these high class vehicles is given in a most interesting manner, from which may be obtained a splendid knowledge of the mechanism and work of the Speedwells cars.

The officials of Richmond, Va., decided recently to install a motor ambulance. The ambulance is mounted on a selection fell upon nothing smaller and cheaper than one of the Vanderbilt cup winning Alco cars. The ambulance is mounted on the regular Alco chassis of 40 horsepower and is capable of rushing a patient to a hospital at the rate of 35 miles an hour.

Ivan de Jongh, manager of the Standard motor car company, in speaking of building automobiles, said yesterday: "Few people have any conception of what it means to build 25,000 complete cars in 12 months. It means from the manufacturer's standpoint."

It means for the Ford motor company a going inventory of parts and materials for cars of more than \$5,000,000.

It means new materials coming in at the rate of a million dollars' worth a month.

It means working 2,000 men 60 hours a week through the long winter months when automobile sales are at the lowest point.

It means building more than 2,000 cars every month, whether sales drop off in the winter or not. If the cars are not sold, Ford calls for 200 cubic feet of space.

Following a custom established two years ago, the new Rambler is exclusively shown during the New York shows at the Rambler building, Broadway and Sixty-second street, New York City.

The Rambler automobile company of New York has arranged for the reception of Rambler dealers, Rambler owners and Rambler friends in a way which would be impossible at the Palace or Garden shows.

Calvin C. Eib, vice president of the Pioneer automobile company, has returned from Los Angeles, where he has been for seven years.

John A. Poole, who has been a gas-line car enthusiast, associated with the late Colonel Albert A. Pope, and European traveler for the American cycle company, and for the last six years foreign sales manager of the Olds motor works and the Buick motor works, has deserted his first love and will now espouse the cause of the electric car.

F. A. Babcock, president of the Babcock electric carriage company, and who on his extended trip abroad two years ago had occasion to note Poole's splendid work for the company whose European interests he then had in charge, has engaged him as general sales agent, and Poole will begin active work in his new capacity at the opening of the New York automobile shows.

Don C. McCord, coast representative of the Overland cars, returned yesterday from Los Angeles, where he has been for more than an hour on the aviation exhibition and in describing the flight said: "Above everything else is the great desire one has to manipulate one of these machines."

To Stop a Cough in a Hurry

With this recipe you can make a pint of cough remedy at home in five minutes. A few doses usually conquer the most obstinate cough. Simple as it is, no better remedy can be had at any price.

Put 2 1/2 ozs. of Pinex (fifty cents' worth) in a clean pint bottle, and fill up with Granulated Sugar Syrup, made as follows: Take a pint of Granulated Sugar, add 1/2 pint of warm water, stir for 2 minutes. Take a teaspoonful every one, two or three hours. The taste is very pleasant—children take it willingly. Splendid, too, for colds, chest pains, whooping cough, bronchitis, etc.

Granulated Sugar makes the best syrup. Pinex, as you probably know, is the most valuable concentrated compound of Norway White Pine Extract. None of the weaker pine preparations will take its place. It is the greatest and most imminent danger of a mortal disease, I applied to you, you cured me. My Chinese Herb Treatment saved my life, for which I tender you my most grateful thanks, and remain, most gratefully yours.

AN EXCELLENT REMEDY

Will Break Up a Cold in Twenty-four Hours and Cure Any Cold That is Curable.

The following mixture is often prescribed and is highly recommended for coughs, colds and other throat and bronchial trouble: Mix two ounces of Glycerine, a half ounce of Virgin Oil of Pine compound pure, and eight ounces of pure Whisky. These can be bought in any good drug store and easily mixed together in a large bottle. The genuine Virgin Oil of Pine compound pure is prepared only in the laboratories of the Leach Chemical Co., Cincinnati, and put up for dispensing in half-ounce vials.

ASSOCIATED CHAMBERS MAY DELAY MEETING

Coast Cities' Representatives to Assemble Next Month

Efforts are being made by the San Francisco chamber of commerce to postpone the first annual meeting of the Associated Chambers of Commerce of the Pacific Coast from February 27 to February 23.

According to present arrangements the meeting is to be held at Del Monte February 27, but owing to the fact that the excursion of Los Angeles businessmen to the number of 150 will be in San Francisco February 26, 27 and 28, it is probable that the other chambers will agree to the postponement.

The Los Angeles visitors will make their headquarters at the Palace hotel.

The different cities represented in the associated chambers are: San Francisco, Seattle, Tacoma, Spokane, Portland, Oakland, Los Angeles and San Diego.

McLeran Opposes Mayor's Hall Plan

Former Supervisor Says City Has Long Leases on Buildings Now Used

The mayor may go ahead with his scheme of putting up a temporary city hall, said former Supervisor Ralph McLeran yesterday, "but when he gets the building completed some months from now, what is he going to put in it? Four and five year leases are held by the city on fireproof buildings now sheltering some departments, and most of the other departments will be moved into the new hall of justice when it is ready, not more than 10 months from now."

"The hall will take in nearly everything now housed in the Eddy street quarters and the criminal branches of the superior court besides. The city attorney and the civil service commission are in the class A Grant building on leases to run several years. The board of works in all its main departments is well housed in the fireproof Hewes building, and the board of health has excellent headquarters in Mission street, near Seventh, all these under lease."

"McCarthy can't build a temporary hall with money voted at a bond election for a permanent school. Besides, after he got his hall built, what could he do with it?"

"As for the permanent city hall, the mayor, I believe, wants a \$7,000,000 bond issue for that. Our late city architect, Newton J. Tharp, Albert Pissis and a number of the city's best architects have given us detailed estimates, allowing sufficient space for all departments, and calling for only \$4,500,000. The people won't vote \$7,000,000. The plan suggested by the last building committee to build a five section city hall in five years by a special act of the legislature is the best plan."

ATTORNEY E. BURKE TRIED FOR FELONY

Said to Have Obtained Money Under False Pretenses

The trial of Edmund Burke on a charge of obtaining \$30 from Barclay McCowan under false pretenses was begun before a jury in Judge Cabanis' court yesterday. Burke was convicted in the police court of practicing law without a license, but won the case on appeal.

McCowan, the prosecuting witness, was Burke's partner in an oil deal in Fresno county.

James F. Brennan, assistant district attorney, who is conducting the prosecution, stated that Burke pretended to give a half share in the oil lands to McCowan and the same half share to A. L. Frick, collecting money from both of them. Robert Duke and Jacob Meyer are assisting in the prosecution. Carroll Cook is for the defense.

Domestic Dangers

"Only a cold," is the oft heard expression, popular but dangerous fallacy. A cold too often leads to grave results to be counted a small thing. The prevalent colds among those who ought to "know better" is due partly to ignorance of the causes of a cold and of preventive and curative measures, and partly to procrastination. Foresight and carefulness would in nearly all cases avert a cold. Many persons permit themselves to become so tender, says Life and Health, that when they are in the least exposed to a draft they "take cold." To overcome such a state of vulnerability the diet be correct, free from excessive fats and irritating spices and condiments, occupying not more than five minutes, is an excellent preventive of colds. But a bath should always be taken until reaction follows; and for the next bath a smaller portion of the body should be exposed at one time; the water should be applied by night, and the towel rubbing be more vigorous. It may also be well to have the room warmer. The "hardening" process must be conducted carefully, or harm will result.

Damp underhouse cellars and damp brick walls are prolific sources of colds. If the recently cleaned kitchen floor is slow to dry, it is better by opening doors and windows to let the air pass over it and not to use it for a while. A newly plastered house should be well ventilated, that the moisture may escape through the open windows.

Damp shoes and hose should be changed for dry ones as soon as vigorous exercise ceases. The feet of duty may be forestalled by having in possession at least one pair of rubbers, and these members of the family who work away from home would do well to keep a pair at each end of the line to be prepared for emergencies. If the rubbers become damp they should be dried before they are needed again. A wise man will seldom allow himself to be caught without an umbrella when it rains, and when he does he will take the first opportunity to change his wet clothing for dry.

To save the housekeeper the extra work of cleaning, all wet rubbers and wet shoes should be removed as near the entrance as is practicable.

The importance of thorough ventilation can not be overestimated. To teach a child to catch cold is spoiled by each breath, let him go out on a frosty morning and notice the space

To save the housekeeper the extra work of cleaning, all wet rubbers and wet shoes should be removed as near the entrance as is practicable.

The importance of thorough ventilation can not be overestimated. To teach a child to catch cold is spoiled by each breath, let him go out on a frosty morning and notice the space

McLeran Opposes Mayor's Hall Plan

Former Supervisor Says City Has Long Leases on Buildings Now Used

The mayor may go ahead with his scheme of putting up a temporary city hall, said former Supervisor Ralph McLeran yesterday, "but when he gets the building completed some months from now, what is he going to put in it? Four and five year leases are held by the city on fireproof buildings now sheltering some departments, and most of the other departments will be moved into the new hall of justice when it is ready, not more than 10 months from now."

"The hall will take in nearly everything now housed in the Eddy street quarters and the criminal branches of the superior court besides. The city attorney and the civil service commission are in the class A Grant building on leases to run several years. The board of works in all its main departments is well housed in the fireproof Hewes building, and the board of health has excellent headquarters in Mission street, near Seventh, all these under lease."

"McCarthy can't build a temporary hall with money voted at a bond election for a permanent school. Besides, after he got his hall built, what could he do with it?"

"As for the permanent city hall, the mayor, I believe, wants a \$7,000,000 bond issue for that. Our late city architect, Newton J. Tharp, Albert Pissis and a number of the city's best architects have given us detailed estimates, allowing sufficient space for all departments, and calling for only \$4,500,000. The people won't vote \$7,000,000. The plan suggested by the last building committee to build a five section city hall in five years by a special act of the legislature is the best plan."

ATTORNEY E. BURKE TRIED FOR FELONY

Said to Have Obtained Money Under False Pretenses

The trial of Edmund Burke on a charge of obtaining \$30 from Barclay McCowan under false pretenses was begun before a jury in Judge Cabanis' court yesterday. Burke was convicted in the police court of practicing law without a license, but won the case on appeal.

McCowan, the prosecuting witness, was Burke's partner in an oil deal in Fresno county.

James F. Brennan, assistant district attorney, who is conducting the prosecution, stated that Burke pretended to give a half share in the oil lands to McCowan and the same half share to A. L. Frick, collecting money from both of them. Robert Duke and Jacob Meyer are assisting in the prosecution. Carroll Cook is for the defense.

Domestic Dangers

"Only a cold," is the oft heard expression, popular but dangerous fallacy. A cold too often leads to grave results to be counted a small thing. The prevalent colds among those who ought to "know better" is due partly to ignorance of the causes of a cold and of preventive and curative measures, and partly to procrastination. Foresight and carefulness would in nearly all cases avert a cold. Many persons permit themselves to become so tender, says Life and Health, that when they are in the least exposed to a draft they "take cold." To overcome such a state of vulnerability the diet be correct, free from excessive fats and irritating spices and condiments, occupying not more than five minutes, is an excellent preventive of colds. But a bath should always be taken until reaction follows; and for the next bath a smaller portion of the body should be exposed at one time; the water should be applied by night, and the towel rubbing be more vigorous. It may also be well to have the room warmer. The "hardening" process must be conducted carefully, or harm will result.

Damp underhouse cellars and damp brick walls are prolific sources of colds. If the recently cleaned kitchen floor is slow to dry, it is better by opening doors and windows to let the air pass over it and not to use it for a while. A newly plastered house should be well ventilated, that the moisture may escape through the open windows.

Damp shoes and hose should be changed for dry ones as soon as vigorous exercise ceases. The feet of duty may be forestalled by having in possession at least one pair of rubbers, and these members of the family who work away from home would do well to keep a pair at each end of the line to be prepared for emergencies. If the rubbers become damp they should be dried before they are needed again. A wise man will seldom allow himself to be caught without an umbrella when it rains, and when he does he will take the first opportunity to change his wet clothing for dry.

To save the housekeeper the extra work of cleaning, all wet rubbers and wet shoes should be removed as near the entrance as is practicable.

The importance of thorough ventilation can not be overestimated. To teach a child to catch cold is spoiled by each breath, let him go out on a frosty morning and notice the space
