

EVENTS IN THE COUNTIES BORDERING ON THE BAY OF SAN FRANCISCO

LECTURES ON BUGS AT SUMMER SCHOOL

Work on Parasitology Designed by Professor for Physicians and Veterinarians

BERKELEY, June 19.—What promises, from the applications already filed by prospective students, to be one of the largest summer sessions ever held at the University of California, will open tomorrow at that institution. This year's session is the eleventh held at the university and the faculty, besides regular university professors, will consist of several prominent visiting educators. The university library will be opened for the benefit of the summer students, and several new courses in instruction will be offered.

Prof. C. H. Reiber of the department of philosophy at the university will, as in the past few sessions, be the lecturer on the summer school, and besides the courses for regular university students who desire to make up work during the summer months, special courses in music, education and psychology will be given for school teachers, of whom a large number usually attend the session from all parts of the state.

ADDITIONS TO FACULTY

Among the visiting professors is Prof. Percy Bordwell of the law department of the University of Missouri, who will lecture on law; Dr. Everett Charles Beach of the physical culture department of the Los Angeles public schools, who will offer teachers' courses in the physical training of children; Prof. Frank B. Rowlett of the mathematics department of Ramona college, and Dr. Lucille Eames, professor of sociology at the University of Nebraska.

COURSE IN "PARASITOLOGY"

A course in "parasitology," designed by Prof. William H. Brackets of the University of California, will be one of the features of the session, according to notices sent to physicians and veterinarians throughout the state, for whom the course is specially designed. The course will be held by Prof. H. H. Hens, who is professor of medical entomology at the university and who inaugurated the recent fly killing campaign in this city, when the stables and restaurants were visited by officials from the board of health and protection against germ bearing flies arranged. The animal parasites of man and domesticated beasts will be dealt with in the course, and the means of the transmission of disease through these pests and measures for their extinction.

STUDY OF FLIES AND FLEAS

The fly, the flea and the insect commonly known as a "bedbug" will be fully discussed, with special emphasis on the plague carrying propensities of the flea, the discovery of which led to the recent rat killing campaign on the part of the federal authorities. The course will consist mainly of lectures and practical work in the study of the extensive insect collection in the possession of the university.

MUSICAL FOLK ARE GUESTS OF COMPOSER

Mrs. Alma Crowley Entertains For Sister
OAKLAND, June 19.—Musical folk in large numbers gathered last evening at the home of Mrs. Alma Crowley of 1164 Alice street, where the hostess gave a musical in honor of her sister, Miss Blanche Moore of Kentucky, well known as a musician in that state. Among the numbers given were two compositions by Mrs. Crowley. One was "Forever," sung by Rudolph Post, and the other was "Berceuse," by Miss Violet Ebersole.

INJURIES TO DRIVER RESULT IN HIS DEATH

C. Hansen, Thrown From Wagon, Dies at Infirmary
OAKLAND, June 19.—Chris Hansen, a liquor clerk, residing at 3235 Hansen street, who was thrown from a wagon which he was driving on the evening of June 14, died this morning at the county infirmary.

GRASS FIRE ENDANGERS BERKELEY DWELLINGS

Blaze Breaks Out in Vacant Lot Among Weeds
BERKELEY, June 19.—A grass fire threatened the fashionable East Berkeley residence district last night and was extinguished with difficulty by the Berkeley fire department. The fire first was noticed in a vacant lot overgrown with dry grass and weeds adjoining property at 1809 Ward street. Before the arrival of the fire department the blaze had spread, threatening several houses and long streets on the part of the fire fighters was required to save property in the vicinity. A cigarette or cigar stump thrown into the grass from the street is supposed to have caused the blaze.

CHILDREN'S DAY HELD IN BERKELEY CHURCH

Youth of Methodist Chapel Contribute to Program
BERKELEY, June 19.—Children's day was celebrated this morning at the Wesley M. E. chapel of North Berkeley, a special sermon on "The Church and the Child" being preached by Rev. A. Y. Skee, who also delivered the evening address. A program of music, to which the children of the church contributed, was a feature of the occasion. At the Shattuck avenue M. E. church Rev. J. O. Duncan, a visiting clergyman, addressed the congregation in the morning, while in the evening Rev. S. D. Hutsinger, presiding elder of the San Francisco district and former pastor of Trinity M. E. church of this city, was the speaker.

SAME AS PERFECT

Wonderful Machine Makes Most Minute Divisions of Circle Known to Science

BERKELEY, June 19.—A machine for dividing a circle into small equal parts, such as degree divisions on a surveyor's transit or astronomer's measuring instrument, has been perfected by W. R. Stamer, a mechanic in the physics department of the University of California, and Prof. E. P. Hall, also of the university.

The machine, which is made to divide a six inch circle into smaller equal parts that have been reached by only calibrating instrument heretofore designed, is the result of years of labor on the part of the two inventors, and so fine are the divisions, and so accurate, that if a surveying transit arc, measuring six inches across, were divided into degrees and then magnified so that the circle measured four miles in diameter, the degree divisions would be 150 feet apart and would err only about two inches. This means that practically the divisions on the arc would be perfect.

The apparatus was designed and constructed by Stamer, while the calculations for error in the divisions made by the machine were worked out by Professor Hall, and have been published in a university bulletin. There are a few of the new machines in existence, and these differ radically, improvements having been made from time to time.

So delicate is the instrument that the heat from the body of a man standing in the same room will cause a material deviation of the needle which marks the almost microscopic hair lines that denote the divisions.

With the aid of a vernier attached to a circle marked out in division by the machine, angles of less than a second can be read off on a large circle, or the angles of the arcs and the radius of a circle can be divided into equal minute parts.

MEMBERS OF FRENCH SOCIETY HOLD PICNIC

Outing at Schuetzen Park Enjoyed by Many
[Special Dispatch to The Call]

SAN RAFAEL, June 19.—An enjoyable outing was held at Schuetzen park today by the members of the French Society, who were visited by officials from the board of health and protection against germ bearing flies arranged. The animal parasites of man and domesticated beasts will be dealt with in the course, and the means of the transmission of disease through these pests and measures for their extinction.

VOWS EXCHANGED AT PRETTY HOME WEDDING

Miss Florence Relfe Bride of Ray Leavitt
ALAMEDA, June 19.—Miss Florence Relfe became the bride of Ray Leavitt last evening at 9 o'clock at the home of the bride's parents, Mr. and Mrs. George Relfe, in Clara avenue.

MUSICAL FOLK ARE GUESTS OF COMPOSER

Mrs. Alma Crowley Entertains For Sister
OAKLAND, June 19.—Musical folk in large numbers gathered last evening at the home of Mrs. Alma Crowley of 1164 Alice street, where the hostess gave a musical in honor of her sister, Miss Blanche Moore of Kentucky, well known as a musician in that state. Among the numbers given were two compositions by Mrs. Crowley. One was "Forever," sung by Rudolph Post, and the other was "Berceuse," by Miss Violet Ebersole.

OFFICERS ARE ELECTED BY NEW CHAPTER OF ASSOCIATION

OAKLAND, June 19.—The Oakland chapter of the professional chauffeurs' association will give a theater party at Ye Liberty theater Thursday evening, June 30. The list of charter members of the new chapter contains 102 names, and organization has been completed.

MANY FEATURES FOR PICNIC ARE PLANNED

Native Sons and Daughter Arrange Indoor Festival
OAKLAND, June 19.—Final arrangements for the indoor picnic to be given at Piedmont pavilion August 19 are being made by Athens parlor No. 195, N. S. G. W., and Aloha field No. 106, N. D. G. W. Among the features will be a country village, a Marathon dance and a minstrel show. The funds raised will be used to entertain the guests of both parlors on Admission day. The committee in charge is composed of L. Flynn, E. Biven, G. F. Casert, Mrs. Fairchild, Mrs. Marten and Miss Wyckoff.

BOYS' WAGON

Three Are Injured When Team Becomes Frightened and Leaves Road

BERKELEY, June 19.—As the result of their wagon falling over an embankment at the side of the Walnut creek road, near this city Claude Lane, Louis MacElroy and Joseph Flanagan, Berkeley boys, now lie at the Roosevelt hospital in this city, suffering injuries sustained.

The accident happened this morning at about daylight, when the boys were driving up Walnut creek for a Sunday's outing. The horses became frightened at some object on the road and, veering to one side, plunged down a steep incline. Lane suffered a broken leg as a result of the fall and the other boys were badly bruised.

TURN VEREIN TO LAY CORNERSTONE FOR HALL

Splendid Program of Speeches and Music to Be Given
For the third time in its history, the Mission turn verein on Sunday afternoon will lay a cornerstone for a new structure. This is the third home for the German society of turners, and the ceremonies will be marked with an extended program of addresses and music.

The structure, which will be located at Elwood and Lapidre streets, will cost \$45,000. The cornerstone for the building, which is to replace the one destroyed by the fire of 1906, will be laid under the auspices of the turner bezirk of the North American gymnastic union. The president of the bezirk, Albert Currlin, editor of the Oakland Journal, will officiate at the ceremonies. Among the speakers will be the recognized members of the board of supervisors and the board of public works, a committee from the Mission promotion association and the Mission merchants' association.

A monster chorus will be sung by the members of the various turn vereins of Oakland, Alameda and San Francisco and the Pacific saengerbund. Prof. L. N. Ritzau will lead a 20 piece orchestra in the musical numbers.

Addresses will be made in both English and German by President Currlin, Dr. Max Magnus and Fred Hauser, president of the Mission turn verein. The committee in charge of the celebration is composed of Prof. C. H. Hens, Prof. Louis N. Ritzau, Ulrich Remenberger, Charles Hahn, Paul Spelling, D. Brune, Ignatz Barke, August Hansen, Joseph Hille and A. H. Menne.

UNION PRINTERS HOLD BIG PICNIC AT FAIRFAX

Outing One of the Most Enjoyable of the Season
[Special Dispatch to The Call]

FAIRFAX, June 19.—With games, music, dancing, banqueting and a large variety of other entertaining features, the twenty-third annual excursion and picnic of the Union Printers mutual aid society was held at the park here today, proving one of the most enjoyable of the season.

ENGLISH COLONISTS FLOCKING TO CANADA

Indications That 50,000 Will Arrive There by End of Summer
Supplementing his recent report on the extensive English emigration from the Nottingham district, especially to Canada, Consul Frank W. Mahin now writes:

"Later information is to the effect that over 30,000 people will have left this country for Canada this spring, and that by the end of summer the number will be about 40,000. There is also a large emigration to Australia, smaller than to Canada, but increasing over that of preceding years. A special effort is made to induce domestic servants to go to Australia. Prospects of higher wages and of marriage being held out. In some cases it is stipulated that the women must be between 18 and 30 years of age, and of good character. Invitations to emigrate to Western Australia are coupled with the stipulation that married men shall have \$50 (\$243.33) and single men \$10 (\$48.57) capital. It is said that many of the emigrants to both Canada and Australia are well provided with capital.

TRANS-ANDEAN RAILWAY NEAR WORKING ORDER

Trip From Buenos Aires to Valparaiso Takes 35 Hours
From about July 1, when all will be in working order, the journey from Buenos Aires to Valparaiso can be made over the railway which runs through the trans-Andean tunnel in 35 hours. Passengers will have to change cars at Mendoza, Argentina, as the Great Western railway from Buenos Aires to that city is broad gauge, while the Trans-Andean railway is very narrow gauge. Another change must be made at Los Andes from the Trans-Andean to the Chilean state railway.

Besides the expected increase of passenger traffic, which will undoubtedly be large, the cattle traffic will also be greatly augmented. Special trucks have been built to promote this growing trade. Light general merchandise will also be carried in ever growing quantities.

The prospective treaty of commerce between Argentina and Chile, which is expected will establish free trade between the two countries, except as regards Chilean ordinary wine and alcohol, will undoubtedly assist the passenger traffic. Special trucks have been built to promote this growing trade. Light general merchandise will also be carried in ever growing quantities.

WOMAN'S RETORT STOPS COMPLIMENTS OF JUDGE

Senator Theodore E. Burton of Ohio, who is a bachelor and has never been ensnared by the wiles of women, tells a story of a young woman and a prominent judge of his acquaintance. The former was a witness in the latter's court. The prosecuting attorney had repeatedly put to her questions which she persistently evaded under the plea that she did not comprehend his meaning. Whereupon his honor undertook to bring out the proper responses.

SINGAPORE PLANS FOR GREAT TRUNK RAILWAY

Population Within 2,000 Miles Numbers 700,000,000
The hope of Singapore is for a great trunk line railway, running from its southern point of the Malay peninsula northward through Siam to Burma and on to India, and a branch line through Cambodia into China. Some day that hope will be realized. Within a radius of 2,000 miles of the little island on which Singapore is built there is a population of 700,000,000.

Clifford Russell, One of St. Mary's College Debaters

STUDENTS CONTEST FOR COTTLE MEDAL

Sylvester Adriano, Junior at St. Mary's College, Wins Prize for Oration
OAKLAND, June 19.—In the annual oratorical contest for the Cottle medal Sylvester A. Adriano of the junior class captured the coveted trophy at St. Mary's college this afternoon. The alumni gymnasium, where the contest was held, was filled with the friends of the contestants. The winning oration was on the subject of "Religion and the College Graduate."

The judges in the contest were Judge Magee of San Rafael and two alumni of St. Mary's, Thomas E. Lennon and Rev. William M. Hughes. Second honors in the contest were accorded to William H. Lewis, '11, who delivered an impassioned address on "The Evils of Child Labor."

The other contestants spoke as follows: "A Censorship in Literature," Clifford A. Russell; "Socialism," Michael J. O'Connell; "The Collegian and the World," William B. Davis; and "The Influence of the American Newspaper," Thomas M. McCarthy.

Sylvester Adriano has been a student at St. Mary's for four years. He finished his studies in the school of commerce two years ago and then entered the freshman class. By dint of hard work and unusual ability he was able to cover the work of the freshman and sophomore years in two semesters. He is associate editor of The Collegian and has been identified with the senior dramatic club and other student activities.

The college orchestra furnished music during the afternoon and the following students contributed vocal and instrumental numbers: John P. O'Connell, Michael J. O'Connell, Michael J. O'Connell and Gerald J. Brusler.

The annual banquet of the athletic association of St. Mary's college will be held tomorrow evening. Tuesday will be devoted to the boys' St. Joseph's academy, the preparatory department of the college. Thomas Reilly is one of the youngsters from the academy who will take part in the entertainment to be given Tuesday evening.

The commencement exercises proper will be held Thursday evening. The students of the academic or high school department will give a dramatic entertainment Wednesday evening, when three original plays will be presented by undergraduates.

PAGAN DANCES SURVIVE IN ENGLISH VILLAGES

Curious Old World Ceremonial Performed in Cornwall
At Helston in Cornwall, May 8 each year, there is celebrated the Purry or Flora dance, a curious old world ceremonial, the origin of which is in dispute, says a London paper.

Some connect it with the worship of the goddess Flora, others derive the name from a Greek word, meaning to bear or carry flowers, as the dancers do on this occasion; while yet others associate it with the "furry" (foray), which is made in the country for bushes and garlands.

Probably it is merely a survival of the ancient British custom of welcoming the advent of summer with dance and song, as seen in the old English May day festivities, in all of which garlands and crowns of flowers, as well as music, play a prominent part.

At Helston the dance is performed to a sprightly tune, said to be used also in Wales and in Brittany; and on Flora day both doors of all houses are kept wide open in order that strings of dancers may pass through them at pleasure. For any one to refuse to obey this old custom would be tantamount to inviting misfortune and ill luck all through the ensuing year.

It is significant that during the sixteenth century the custom prevailed at Helston alone but all over England of celebrating a similar flower dance early in May. This was undoubtedly a relic of the Roman Floralia or floral games, which began April 28 and lasted for three to seven days.

CHICAGO WOMEN TELL HOW EXPENSES GROW

Prices Raise or Quantity Obtainable Cut Down
At the hearing on the demands for higher pay by the 2,500 striking switchmen in Chicago, the increase in cost of living was graphically described by the wives and mothers who were styled as witnesses. "Just seems that everything creeps up a little bit more each week," said one of them. "If I fed the children what they ought to have there wouldn't be enough to go around. We can afford meat only once a week, we use imitation butter and we do not eat any eggs."

Another said: "On everything you buy, if the price has not been raised the quantity has been cut down. The price is the same for soda biscuits, but there are two biscuits fewer in the package. I used to allow \$30 a month for the table for a family of three. It costs only \$25 a month now and we don't live so well."

"The quality of boys' clothing now is so poor that I can not hand down the suits from one boy to another, as I formerly did. The price of shoes has gone up and the quality gone down and I can not afford to wear rubbers any more."

These items from family budgets were supplemented by stories of home life which made a great impression. One mother swore that her children scarcely ever saw their father because he had to work from 12 to 16 hours a day. "A week ago Sunday he was home," she said, "and the little ones made such a fuss over him that he did not get outside the door all day long."

NATIVE BORN "COGN FEED"

Alameda, June 19.—The Native Sons of Golden West, will hold a "cogn feed" in Golden West hall tomorrow night. The members of the fraternal order of Native Sons, the baby organization of the big fraternity, will be the guests of Alameda park.

PICKPOCKETS WORK IN CROBDED STREET

Sneak Thieves and Burglars Enter Houses and Spring Wagon Is Stolen
OAKLAND, June 19.—Pickpockets operating in the Saturday night crowd in Broadway stole \$35 from the pocket of John Bauman of 1073 Fourteenth avenue as he was about to enter the Camera theater. Bauman reported his loss to the police, but the light fingered thieves made their escape.

W. G. Payne, a guest at the Hotel St. Mark, reported the loss of a suit case while crossing the bay from San Francisco to Oakland on the 740 Southern Pacific ferry steamer last night.

Sid Pollard, proprietor of the American hotel, at Second and Jackson streets, complained of the theft of a gold watch from his room in the hotel. A spring wagon belonging to B. McManus of the Clay street planing mill, at Fourth and Clay streets, valued at \$50, was stolen from a lot adjoining the mill last night.

V. M. Wiley, living at the southeast corner of Sixteenth and East Twelfth streets, reported that burglars gained an entrance to his paint shop by breaking a panel in the door, but took nothing.

MILE A MINUTE MADE BY MILL ENGINE FLY WHEELS

Operator's Carelessness May Cause Dangerous Explosion
The energy stored in a flywheel on the engines in a steel mill is about equivalent to an average sized passenger locomotive, running at the rate of 200 revolutions per minute. It is allowed to speed up, additional energy is imparted to the flywheel until it bursts from centrifugal force, unloosing a power which might be likened, roughly, to a locomotive engine, but several cars plowing their way through the mill at the rate of "a mile a minute."

This terrific force is controlled and held in check by the "governor," which is usually an arrangement of two flyballs, revolving on the engine shaft, and to that of the engine, and automatically reducing or increasing the steam supply. Certain parts of the governor may break and cause the engine to "race," and the engineer can not get a valve closed quickly enough to stop the flywheel from "exploding."

There is a safety attachment on the governor, which is intended to stop the engine in case of an emergency, but engineers frequently allow this attachment to become ineffective. On a single inspection trip this was the case with 10 out of 15 engines observed. In one instance a roll of waste was placed over the governor brackets—in another a wood block was used—in others the bolts were clamped so as to produce the same result, in two or three cases the man in charge simply said he had "forgot" to fix it up after a shutdown.

One gray haired engineer of perhaps 50 years to whom I spoke said: "I have been running this engine now for six years and have never had an accident." He further questioned me and admitted that such an accident might occur at any time, due to that insignificant handful of waste, and that probably he would be the first man in the mill to get the mill running these engines, realizing what might result from their interfering with the action of the governor, yet they all took the chance, because it never had happened in his experience.

To improve matters we are having counter weighted brackets placed under the engine governors, so that they will drop automatically when the engine is running, without any attention from the engineer, and a written report is made weekly which shows whether this safety feature is being used or not. As an additional safeguard, practically all the large engines in this company have been equipped with automatic stop valves having a speed limit attachment. These are intended to shut the engine down automatically when it exceeds a certain safe speed, and the valve may be closed also by pushing an electric button in various parts of the mill.—The Survey.

WOMAN'S RETORT STOPS COMPLIMENTS OF JUDGE

Senator Theodore E. Burton of Ohio, who is a bachelor and has never been ensnared by the wiles of women, tells a story of a young woman and a prominent judge of his acquaintance. The former was a witness in the latter's court. The prosecuting attorney had repeatedly put to her questions which she persistently evaded under the plea that she did not comprehend his meaning. Whereupon his honor undertook to bring out the proper responses.

Leaving over, he said in a kindly and fatherly manner, "Young woman, why is it that you insist in refusing to understand the questions of counsel? You are a person of charm, grace, beauty and more than average intelligence, and—"

"Thank you, your honor," interrupted the young woman. "If it were not for the fact, judge, that I am under oath I would return the compliment."

BLAST EXPLODES; WORKMEN MAIMED

Burning Gasoline Scattered Over Machinist's Legs and Arm and Condition Is Critical
RICHMOND, June 19.—William H. Larrabee, a machinist, was burned, perhaps fatally, at 9 o'clock this morning when a plumber's gasoline blast with which he was working on a leaking gas main exploded at the rate of his home. The burning fluid was scattered over his legs and one arm, and his clothes were ignited. Men ran to his aid and extinguished the flames before he had been burned to death, but Larrabee is in a precarious condition when taken to the Abbott sanatorium.

OFFICERS INSTALLED BY HAYWARD COUNCIL

Two Members Made U. P. E. C. Grand Lodge Delegates
HAYWARD, June 19.—Hayward council, No. 15, U. P. E. C. has installed the following officers for the ensuing year: Mrs. A. Baptista, president; Mrs. M. S. Bettencourt, vice president; Mrs. M. N. Simas, secretary; Mrs. A. A. Andrews, treasurer; Miss M. Bettencourt, chaplain; Miss M. Bettencourt, organist; Mrs. S. Soares, inside guard; Mrs. M. Enos Garcia, Mrs. L. R. Caldeira and Mrs. A. Monez, trustees, and Mrs. M. Bettencourt, and Mrs. Enos Garcia, delegates to grand lodge.

LOST AND FOUND

IF YOU LOSE ANYTHING—Advertise it here. It will be returned to you at once if a person finds it. Remarkable recoveries are brought about every day through this column.

MOTHER'S FRIEND A LINIMENT FOR EXTERNAL USE. One of the most valuable qualities of Mother's Friend is that it safe-guards the future health of the mother. It is a liniment to be applied externally to the body, the use of which lubricates the muscles and tendons, softens the glands and ducts, prevents lumps forming in the breasts, and relieves the pain, nervousness, nausea, and other troubles from which so many expectant mothers suffer.
