

YOUTHFUL AERO ENTHUSIASTS TO MEET MODEL AEROPLANES TO BE GIVEN TRIAL

CHILDREN TO CELEBRATE TOMORROW

Fruitvale Model Aviation Field Will Be Scene of Gathering May 18

The announcement of the model aeroplane meet to be held under the auspices of the Oakland Amateur Aeroplane club Saturday, May 18, has caused ripples of excitement in youthful circles of the bay cities. Interest is running high and the gathering together of boy aeroplanists promises to set a new pace. The meet will be held in the Fruitvale model aviation grounds, just opposite the Southern Pacific station at Fruitvale, and the first event will be called at 2 o'clock.

The main object of the meet is to stimulate interest in this particular branch of sport and to bring together those boys who are interested in model aeroplanes, and also to set and establish Pacific coast records for distance, duration and speed. It is the aim of each and every boy in the club to show the model aviation world that the boys of California are not asleep to this newest of pastimes.

The events will be as follows:

First. Distance—The entrant will fly his machine from starting line, the distance to be measured in a straight line to landing point.

Second. Duration—In this event the entrant is to launch his machine from starting line; the time in air to count being timed by standard stopwatches.

Third. Speed—In this event the entrant must fly his machine over a course of 150 feet, the time counting; fastest time made winning event.

Fourth. Accuracy—This event will try the skill of entrant in controlling his machine. He must start at line and land his machine within a circle 20 feet in diameter and 150 feet distant, the nearest to the center stake winning. Any machine landing outside the circle loses count and that turn of flight.

Fifth. Any entry failing to respond to his number and flying one minute after being notified of turn will lose that turn, unless the judges allow him the turn for unavoidable accident. Each entry is given three trials in each event, and is allowed to fly more than one machine; providing it is registered in proper time and according to rules.

The following prizes will be awarded the successful contestants:

Distance—First prize, trophy; second prize, medal.

Duration—First prize, medal; second prize, ribbon.

Speed—First prize, medal; second prize, ribbon.

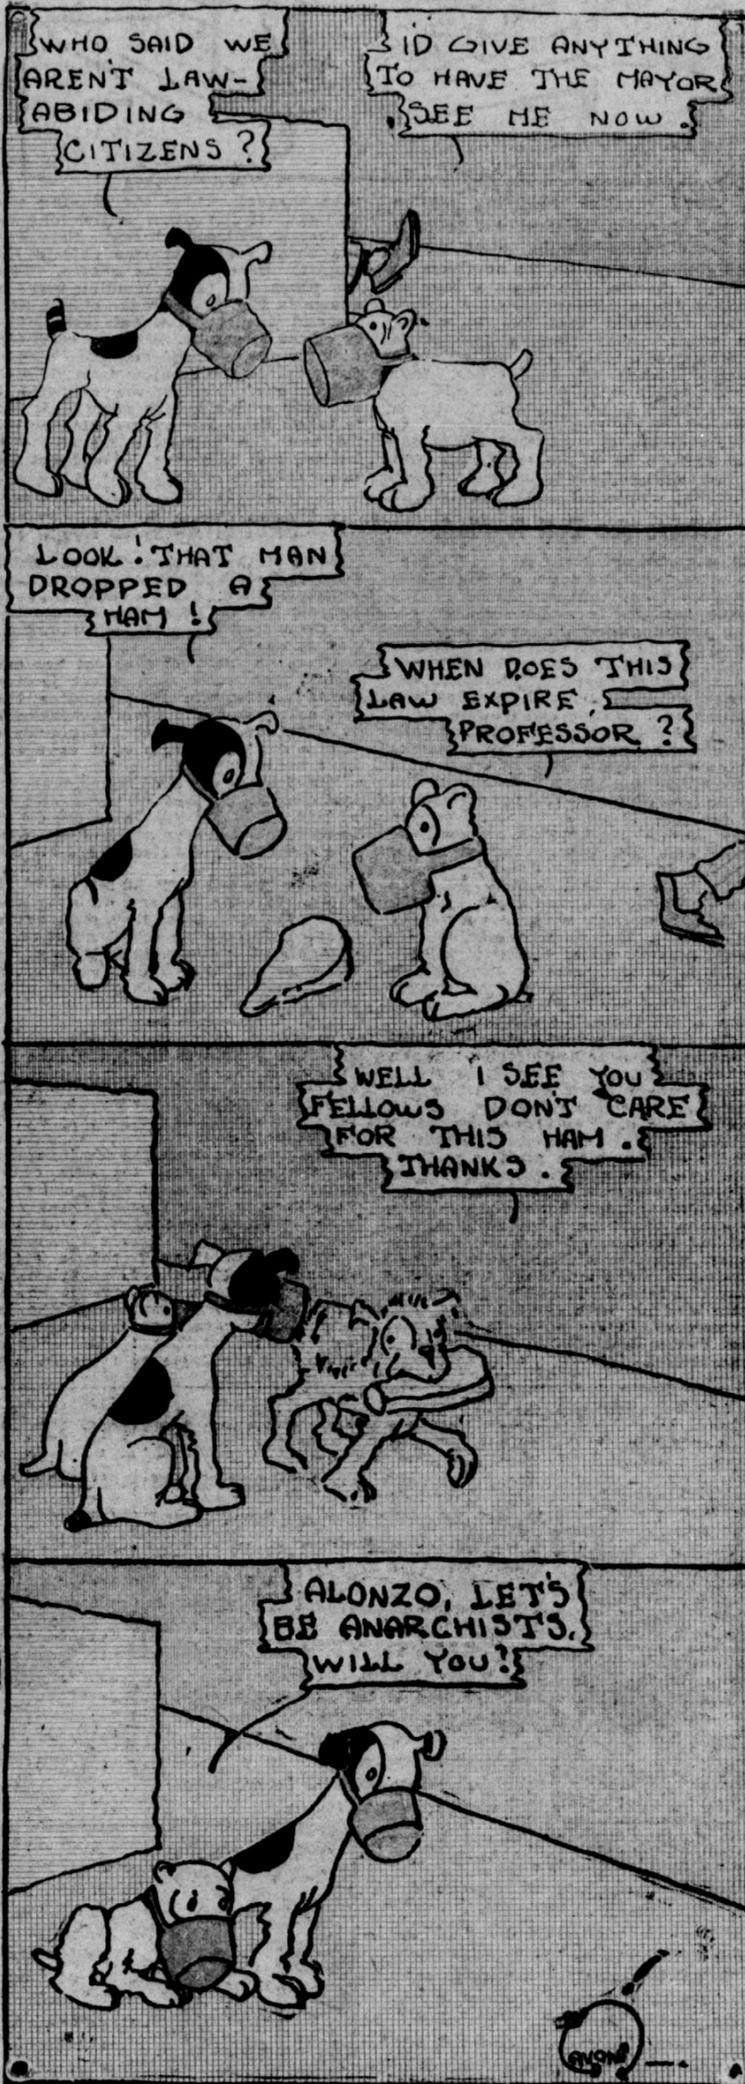

Accuracy—First prize, one set of propellers; second prize, ribbon.

All contestants are subject to the following restrictions:

All entries must be registered by May 15, 1912. Any entry mailed on this date will be accepted.

Each contestant must fly his machine under entry number given, and if machine is disabled on grounds, he will not be

BOYS AND GIRLS TO PAY TRIBUTE

Sons and Daughters Unite to Commemorate Mothers' Day in the City

How many of the Juniors have heard of Miss Annie Jarvis?

She is the woman who brought about the establishment of a "mothers' day" in almost every state in the union, not to mention the nations of the world and whose indefatigable efforts have served to arouse in every man, woman and child a sense of the beauty of motherhood and the duty we owe to our mothers.

Miss Jarvis is a Philadelphia woman. A few years ago, alone and unaided she started the "mothers' day" movement, and so eloquent was her plea that the idea found instant and hearty acceptance. Since then the plan has been gaining ground and within the last four years the setting aside of a mothers' day has been accepted and indorsed by nearly every governor in the union and many of the crowned heads of Europe.

"Mothers' day" falls on the second Sunday of May.

Tomorrow is the day when the Junior boys and girls pay special court to mother. On all the other holidays, remember, mother pays special attention to you, but on the second Sunday in May conditions are reversed a bit and mother comes in for the lion's share of pleasures.

See if you can't do something especially nice for her tomorrow. Show her how much you care for her and how very dear she is to you. Help her with the work around the house, wait on her for a change and give her the benefit of her holiday.

"Mothers' day" will be celebrated in many of the churches tomorrow, but that is not enough, boys and girls. It should be celebrated in your hearts as well. There is no one in all the world who will do as much for you as will your mother. When every one else has forsaken you and you haven't a friend on earth, your mother will stand by you with words of encouragement and love.

See if you can't make her tomorrow a very pleasant one indeed.

The white carnation has been chosen as the flower symbolical of filial devotion and the florists are crowding their windows with the beautiful emblems of purity and love, for everyone's going to make a big bow to mother tomorrow.

Don't forget to wear a white carnation and wish mother the happiest returns of the day.
