If You Destroy Flies for Sanitary Reasons Why Not Do It in a Sanitary Way? POISONED Flies drop into the food, the baby's milk, everywhere, or are ground into the carpets, rugs and floors. A poisoned fly is more dangerous than a live one. The poison is an added danger and does not kill the germs on the body of the fly. Fly traps are offensive and unsanitary, the care of them disgusting. The fly destroyer that catches both the flies and the germs they carry and coats them over with a varnish from which they never escape, is Tanglefoot Fly Paper, Non-Poisonous, Sanitary. Sold by all first-class grocers and druggists.
