

THE CALL OF CALIFORNIA MINING INDUSTRY

MOTHER LODE CLAIMS ATTENTION BY CLEANUPS

Rich Pockets Found in French Gulch Yield Golden Treasure; East Belt Discoveries Fabulous; Nigger Boy Changes Hands

CALIFORNIA

Tightner Enlarging Plant

William May of Grass Valley is at the Tightner mine at Alleghany installing a large new compressor. Lumber is also being hauled from the Cole sawmill, recently purchased by the Tightner company...

"Blue Lead" Revived

Drift gravel mining in the Forest City division of the Big Blue Lead has been languishing for more than a year, but has been given a new impetus as a result of a renewed search for the old mine...

Big Siskiyou Deal

Private advices lately received at Yreka say that the deal for the sale of the great Blue Ledge copper-gold mines, in the upper part of Siskiyou county, near the Oregon line, has been practically consummated...

The report that negotiations are pending for the sale of the Wildman Mahoney mines to an eastern syndicate by the Lincoln Consolidated company has aroused much interest among local miners...

Argonaut Rich at Depth

The famous Argonaut mine, one of the oldest properties in the Amador district, and the deepest incline mine on the Mother Lode, is claiming increased attention...

has been far from an accidental occurrence. The May cleanup of the Argonaut mill is reported to have exceeded \$50,000, an excellent figure when it is remembered that only 40 stamps were engaged...

Discovery of fabulously rich quartz in the Tanner mine has swerved attention of local mining experts to the long neglected East Side gold belt in the vicinity of Murphy's, Calaveras county...

The report that negotiations are pending for the sale of the Wildman Mahoney mines to an eastern syndicate by the Lincoln Consolidated company has aroused much interest among local miners...

The Trinity Consolidated Hydraulic Mining company is operating a large hydraulic mine at both the Union Hill and Hupp hydraulic mines in Trinity county. At the Union Hill the gravel channel has a width of 1,400 feet and ranges in depth from 50 to 100 feet...

The great banks are cut down by the hydraulic giants and the mass of gravel, earth and boulders sluiced through ditches varying in length from 200 to 1,500 feet. The ditches discharge the material into a shaft which connects with a tunnel about a quarter of a mile long...

The owners of the mine arrived in Downsville yesterday with \$20 worth of nuggets, one of which was worth \$150. During the last five weeks \$500 has been taken from the mine, and in the last three weeks there has been \$400 taken out.

One of the richest strikes reported in this district in a long time has just been made near Downsville, on the middle fork of the Yuba river, on the Dragon Slide gravel mine. It is located eight miles north of Downsville.

The French gulch mining district, just west of Murphy's, is again showing evidence of its great merit as a mining belt. S. O. Carley recently took out a pocket which this far has yielded him about \$1,000, while there is more in sight...

CORNER FOR POULTRYMEN MITEES Description, Habits and Successful Destruction

By ARTHUR R. SCHROEDER, San Gregorio, Cal. At this time of the season, when the weather is growing warmer and the extreme heat acts as a battery, so to speak, for the parasites, every poultryman should be on his guard...

It can be seen from the above that to get rid of the mites and to keep them away the following steps are necessary: Keep the poultry houses reasonably clean, a job with a brush and a dustpan. Get rid of the mites as easily as possible with the necessary care into the extremes, which is ridiculous and written by the dreamy writers for the benefit of the wealthy only.

Be on the constant alert and examine the premises quite often. You find any of the mite eggs, white specks, tickle the chicken house at once and do not wait another day, for then it will be more difficult to clean up thoroughly.

Believe in occasional spray. Paint the roosts and immediate vicinity every month, no matter what matter whether you have a reason to paint or not.

Be on the constant alert and examine the premises quite often. You find any of the mite eggs, white specks, tickle the chicken house at once and do not wait another day, for then it will be more difficult to clean up thoroughly.

Believe in occasional spray. Paint the roosts and immediate vicinity every month, no matter what matter whether you have a reason to paint or not.

Be on the constant alert and examine the premises quite often. You find any of the mite eggs, white specks, tickle the chicken house at once and do not wait another day, for then it will be more difficult to clean up thoroughly.

Believe in occasional spray. Paint the roosts and immediate vicinity every month, no matter what matter whether you have a reason to paint or not.
