THE VICAR OF WAKEFIELD

BY DR. OLIVER GOLDSMITH.

I was ever of opinion that the hones man who married, and brought up a large family, did more service than he who continued single; and I had scarce taken orders a year before I chose my wife, a good natured, notable woman, who could read any English book without much spelling, while for pickling, preserving and cooking none could exce er. We loved each other tenderly, had an elegant house, a good neighborhood, and lived many years in a state of much

Our children were well formed an healthy, and though we had but six, I considered them a very valuable present made to my country. Our eldest son was named George; our second child, a girl, Olivia; another girl, Sophia; Moses was our next; and after twelve years, we and two sons more, Richard and William. Vhen our visitors would say:

Mrs. Primrose, you have the finest children in the whole country!"

found themselves humbled in the world, without an education to render them callous to its contempt. As we had only joyfully accepted a small cure of fitteen pounds a year, meaning to increase my salary by farming. est son George having started for London to seek his fortune, we set out soon after for our new home. Stopping the first night at an obscure inn, we found there a poor gentleman, named Burchell, who lacked money to pay his reckoning, having temporarily impoverished himself by his benevolence. I gladly lent him two pounds, and, during part of the next day, he traveled with us, giving me an entertaining account of Sir Wil liam Thornhill, the generous and eccentric uncle of our new landlord, and endearing himself to us all by plunging into a rapid stream and rescuing Sophia, who had been thrown from her horse by

the force of the current. Our retreat was in a little neighborhood of frugad fa mes. The house of one story, was snugly thatched, and nicely whitewashed inside, and, though the We had many simple pleasures to refresh against Mr. Thornhill, who us after our honest industry, and often sat together, when the weather was fine, hawthorn and honeysuckle.

One of the great evil of our merchants to the credit system. One of the great evil of our merchants to the credit system. One of the most singular in the loan transaction of the

proverb from the Indians:

WHY SUFFER from Cold in the Head?

The Telephone. The telephone itself is a simple affair and one which every person acquainted with the electric telegraph would understand at sight. The instrument consists of a powerful, compound, permanent magnet, to the poles of which are attached ordinary coils of insulated wire. In front of the poles, surrounded by these coils of wire, is placed a diaphragm of iron, while a mouth-piece to concentrate the sound upon this diaphragm substantially completes the arrangement. When the human voice causes the sensitive diaphragm to vibrate, electrical undulato create slack water navigation for a distions are induced in the coils surrounding the magnets precisely in the same manner as the undulations of the air are RELIGIOUS NEWS. produced by the voice. These undulations then travel through the wire, and passing through the coils of an instrument of similar construction at a longer or shorter distance, as the case may be, are again transformed into air undula-Sunday-school. As the result of the interest created in

tions by the diaphragm of the instrument. It will be borne in mind that the voltaic battery is dispensed with entirely, and all that is needed for transmitting the voice sounds are the instruments and the telegraph wire. In this connection a re- Chicago by Mr. Moody's preaching, the markable peculiarity of the telephone is churches of that city are receiving large sicians in curing obstinate cases of Catarri that a practiced ear is able to distinguish accessions to their members. On a rethe voices that speak through the in- cent Sunday the first Presbyterian, of we ought to build up an American breed strument. The inventor claims that which the Rev. A. E. Kittridge is pasto rise in that time. It is more or less of cattle in this way, by many intelligent as any affect produced by electricity tor, added to its roll of members one "Mr. Burchell," cried I, "as you have injurious, according to circumstances, to farmers, who supposed they knew what over a short wire, can with equal facility castle, and, when reproached, he showed delivered my girl, if you can stoop to an have the temperature of the room higher they were talking about. It ought albe produced over one of 100 or 1,000 miles but one instance. Churches of other ways to be kept in mind that races have in length, provided the insulation be denominations show like signs of prosperity. ing it at about sixty degrees, with a moephone be perfected to render free and voice to any length.
