

THE MILAN EXCHANGE.

W. A. WADE, Publisher.

MILAN, TENNESSEE.

THE WAY OF THE WORLD.

If he wears a good coat, it fits him like a glove. Though he has a blue shirt, it does not show. If he has not combed his hair, it looks as if it were a nest. And he looks a few years older, than he is.

A THREE-POUND TROUT.

The pool was broad, and cool, and deep. And on its surface shined the sun. There were specks of foam, and ripples, and leaves. Around an eddy, in the center of the pool.

A DESOLATE CITY.

Observations of a Plucky Newspaper Correspondent in Yellow Fever Memphis.—The streets and squares and the corners and sidewalks.

THE WOMEN OF THE PLAGUE.

I have invaded the cottages of the poor and the palaces of the rich in equal proportion. The poor have not been called to bear the burden alone. Rich men escaped contact with the pestilence by flight, but they left behind them a family more to be dreaded than the narrow hole in the ground which contains all that was left of the victims of disease.

A MAN IN THE STREET.

I was passing down Main Street Friday morning, when I was accosted by a very honest-looking but very excited individual in the garb of an emigrant.

MANAGING A RESTIVE HORSE.

Thousands of valuable horses are annually made worthless by improper treatment. The breakers ruin numbers of horses by their stupid brutality.

THE COURSE OF ANNE COOKE.

An unfortunate woman, who turned her mansion on Gayoso Street into a hospital, and furnished protection for all who came (and all went) poor, until she herself sickened and lay down to die a sacrifice for the sick of others.

YELLOW FEVER NOTES.

—Will S. Brooks, of the Memphis Appeal, has lost wife, mother and son by the scourge.

—The fever is very bad at Hopefield, Ark., which explodes the idea that it would not go west of the Mississippi River.

—The New Orleans Picayune believes that doctors may differ as to the nature of a disease, and yet agree as to the price of a visit.

—Most of our richest men have not done their share before God; we trust they have done them before God.—Jackson (Tenn.) Sun.

—Nobility has had the yellow fever in Cairo except the attaches of the Bulletin of that city. It is suggested that the pestilence was probably brought to that place by the unimagined New Orleans, Memphis, and Vicksburg newspapers.

—The first copy of the Granada Sentinel issued since the appearance of the plague, is a mournful little death-sheet, with columns lists reversed, and containing the names of 240 citizens buried under the sod in that once happy and prosperous village.

—The record of Dr. Coleman (some days ago) is that 31 unacclimated physicians have arrived in Memphis since the plague began. Of these, 15 have died, 13 are now sick or convalescent, and only two out of the whole number have escaped thus far.

—A correspondent of the New Orleans Picayune says four of five negroes have died on the McCarthy plantation, near New Orleans, and that the bodies of the bodies the torch was applied to the cabins in which they died, and the bodies burned—the first instance of cremation in the State.

—The record of Dr. Coleman (some days ago) is that 31 unacclimated physicians have arrived in Memphis since the plague began. Of these, 15 have died, 13 are now sick or convalescent, and only two out of the whole number have escaped thus far.

HINTS FOR THE HOUSEHOLD.

Pickled Plums.—12 pounds of plums, 6 sugar, 1 quart of vinegar, 1 ounce of mace, 1 of allspice, 4 ounce of cloves (whole) 1/2 pint 15 minutes.

Cup Fudding for an Invalid.—A tablespoon of bread-crumbs, a teaspoonful of flour, 1 egg, a little nutmeg and salt, mixed together with 2 tablespoonfuls of milk. Boil in a cup, and serve with lemon sauce.

Delicious Graham Gems.—1 egg, 1 large spoon of sugar, and a little salt, beat all together; add a scant pint of milk and water; stir in 1/2 cup of bran; add a little lard; bake in gem pans in a hot oven 14 or 15 minutes.

Macaroni Soup.—Boil a couple of ounces of macaroni in salted water (a convenient piece) in a pint of stock free from grease, to which add a good pinch of salt. When cooked (10 or 15 minutes), drain them, and put them in a bowl.

Macaroni Soup.—Boil a couple of ounces of macaroni in salted water (a convenient piece) in a pint of stock free from grease, to which add a good pinch of salt. When cooked (10 or 15 minutes), drain them, and put them in a bowl.

THE MOST ECONOMICAL FOOD FOR MILK-COWS.

The most economical food for milk-cows is a mixture of hay, meal and bran. It is a combination of feeding these to cut the hay, moisten it, and sprinkle the meal and bran over it.
