The Rotation of the Earth. The New York Commercial Advertiser says :

"M. Boutigny has given an interesting explanation of his experiments on the rotation of a body in a spheroidal state. By means of a few drops of ether he attaches a small cone of gum guaiacum to a bighly-heated silver capsule. As soon as the tended to every citizen of Tennessee. cone reddeus on the summit one or two grammes of water are dropped into the capsule, and a remarkable effect takes place. The water becomes agitated from right to left, left to right, backward and forward, indeed in every direction, but presently, it assumes the spheroidal shape, it sets itself spor taneously in motion around the cone from left right, or from east to west. The motion at fir slow, goes on increasing, until its rapidity in suc as scarcely to be followed by the eye. Search the Scriptures. "Suum Cuique" sends us these relics:-One

of the Rev. Mr. Spurgeon's 'slamming sentences,' which you quoted in a recent number of the Home Journal, reminds me of a sermon preached in the 'old Bay State,' some forty or fifty years ago, by a famous minister, in which the same point was made, and, probably, to his audience, with quite as telling in effect. His text was 'Searcn the Scriptures,' and after enforcing it in variety of ways, he clinched his argument by the following narrative, of which | ry." Having used several b tiles in my family, with detoo homely for your columns: 'My dear breth- best and most pleasant medicine I have ever seen. ren, God works in a mysterious way, and ain't above using the humblest means to bring his critters to their senses, when he sees them slothful in business, and a going down to hell with their eyes shut; and here's a point, which | Josiah G Brown. affords a solemn warning to all who neglect this great duty. Some time ago, I knew a man down at Marblehead Point-s fisherman WHOLESALE HARDWARE STORE, a drunkard, who never darkened the doors of the meetin' house, or took delight in boly bings. He had a family-a wife, three sons and two daughters-all bad as himself; all a-goin' straight down to hell as fast as their of Edge Tools, Guns, Cutlery, and Fancy Hardware ever egs could carry them .- But at last they were brought to their senses in this wise, and from lmbs of Satan, transmogrified into children d light. Once upon a time there was great touble in the heads of this family. It was C. M. ELLISTON. long since they had been mowed or raked, and se to speak, there was varmin in the grass. Tiey all got desperate uneasy, and to come to the point at once, there was a lond cry for the fire-tooth comb. But, my friends, nobody knew where it was. It couldn't be found! It bargein. couldn't be found! And so it went on from bal to worse. Scratchin' was of no use - 'twas too bad for scratchin, Lookin' wouldn't do-Lwas too bad for lookin'. They hunted everyretto cellar, and from cellar to garret. They ranacked every closet and every drawer, batit couldn't be found. Here the preacher paned, and looked around; then went on in a low, solemn and earnest tone. 'At length it wasfound. Who found it I don't know; but it we found, to the great joy and everlasting salv tion of all that family. And, my friends, when do you think they found it? I say where do you think they found it? A long pause-The found it in the old family Bible, (sotto coce. They found it in the old family Bible, (cresendo.) They found it in the old family Bibh' (in a voice of thunder,) 'and the dust lay so thek on it that you might have written damnation on the kiver. Therefore," (in at tone deep emotion.) 'my beloved brethren, search the Scriptures."

Vey likely it is of the same preacher that the felowing anecdore is told in which, unluckit, he came off second best.

May years ago, when the new sects of New Englad began to break down the good old congruational barriers, and make incorsions revered divine, whom I well know-a man, at one, of infinite eccentricity, good sense and good hmor-encountered one of these irregufer pretitioners at the house of one of his flock. They had a pretty hot disensaion on their pint of difference, but, at length the interlope, finding more than his match at polemies, wond off by saying: - Well, doctor you'll at least-low that it was commanded to preach the gospl to every critter.' 'True,' rejoined the door-'true enough.' But then I never did hea that it was commanded to every "critter to preach the gospel."

There is probably no class of diseases which are so wide spread in their nature and so terrible in their results asthe diseases of the throat and lungs. It, therefore, becomes a matter of earnest solicitude to the profession to know if there be any means whereby those diseases can be controll-

THE REIGN OF ART .- In this wonderful age, Art lays her master touches on almost everything. The ceilings over us and the carpets we tread on, are hallowed by Art. Art winds the railway through the mountains and the mud; makes her machines of wood and iron, to act as if with knowledge and annihilates space with lightning tamed down to the tuteledge of a boy. Nothing is too lofty for her touch and nothing too humble. If we understand the subject, he has carried that article to the farthest perfection of which it is capable. Instead of employing Drugs in its composition, as we have always thought the necessary and only way, he has with consummate skill extracted the virtues of the medicine to be employed and combined them alone in their purity together. The composition is then mixed and rolled by machinery and steam power into a sperold pill which is wrapped in an envelope of gelatine, for protection from the effects of weather or time, and then thickly coated with sugar, to serve as its passport over the palate. Notwithstanding all the labored perfection they are offered to the Public at less than one centeach. However humble the department, we think this may be safely characterized as the consummation of Art in its lines-Morutha News, Balt.

up the disease, and recuperating its energies. See the cure of Mr. John Longdon, of Va., he had fixed and chronic Ague and Fever; chills twice a day for three years. Nothing permanently cured him until he tried Carter's Spanish Mixture 3 bottles of which perfectly restored him to health nor has he had a chill since. He is only one out of a thousand who has experienced the life renewing effects of this valuable purifier of the blood.

The Art of Dy ing Human Hair. It is but imperfectly understood even by those who make the greatest pretensions. The most of the popular Hair Dyes of the day may, for the time, color the hair, but soon to be succeeded by a tarnished green, or other unsightly appearance. Bogle's Electric Dye is vold of these noxious properties. It instantly dyes the hair a beautiful natural black or brown, which neither water nor sunshine can tarpish in the least; and "to make assurance doubly sure his agents are authorised to refund the money if the most perfect satisfaction is not given. Druggists everywhere. Pianos and Music. - We learn that Horace Waters, of 533 Broadway, N. Y., agent for the sale of many of the most celebrated makers of Pianos and Melodeous, is offering them at prices which we advise all who desire to purchase to avail themselves of. He is also selling his large and well-known Catalogue of Music at one-third off from the regular prices, and will forward the same free of postage. His offers to the trade, teachers, and schools, are of the most favorable character-all of which he will be able to fill to the letter, for having wisely adopted the cash system. The Horace Waters' Planos are known as among the very best. We are enabled to speak of those instruments with some degree of confidence, from personal knowledge of their excellent tone and durable quality .- N. Y. Econgelist.
