## NEW YORK NEARLY EXPERIENCED THE FRISCO CALAMITY

This Fact Realized When It Was Found a Hundred Thousand Lbs. Dynamite Had Not Exploded.

ENTIRE NUMBER OF VICTIMS NOT KNOWN

It Is Believed Between Thirty and Fifty Were Killed—Searching in the Ruins Is Dangerous.

(American News Service)

New York, Feb. 2.—The discovery made today that a hundred thousand pounds of unexploded dynamite is among the ruins made by the Jersey City explosion Wednesday in which from thirty to fifty persons perished and hundreds were injured, caused experts to declare that lower Manhattan had escaped the greatest calamity of modern times. Had this huge mass of dynamite been detonated by the force of other explosions skyscraper buildings in New York would have toppled over and a desolation like the San Francisco earthquake disaster would have resulted. The loss from yesterday's explosion is placed above a million dollars. Seven bodies have been recovered and more than thirty are known to be missing and are believed to have been blown to atoms.

Prosecutor Garven of Hudson county will go before the grand jury in Jersey City and ask for the indictment of the men responsible for the explosion of 35 tons of dynamite on pier 7 near the Communipaw station of the Jersey Central railroad yesterday which caused the death of between 30 and 50 persons and injuries to at least 300 others and a property loss conservatively estimated at \$1,500,000.

Was Violating Law.

Already it has been shown that the Catherine W., the steamer on which the dynamite was being loaded, was violating the law. She was not a licensed carrier of explosives and her owner, Captain James Healing will be asked to explain why his boat was allowed to carry dynamite.

Fear of another explosion caused officials of the company to take unusual precautions in searching for bodies today.

Samuel Schwartz, a searcher, was working on pier 7 with a crowbar and narrowly missed three sticks of dynamite. Other searchers had similar experiences and some of them quit their work.

Inspector Connelly expressed the belief today that the responsibility would be fixed on the Dupont Powder company and John Healing, owner of the tug, while certain Jersey Central officials will come in for blame.

A Tremendous Roar.

The stupendous force hurled itself upon the community yesterday while greater New York was teeming with noonday life. Eye witnesses say the prelude was a booming roar, the intensity of which was felt for miles.

In Communipaw it was a deafening reverberation which sounded like continuous thunder.

A blinding, semi-luminous glare spread over the land, fading into the darkness of smoke. The smoke spread immediately in billows over the sky.

Three ferriesboats in their slips were torn and splintered. Out in the Hudson river cries were heard from the ferryboat Somerville which had left her berth a few minutes before the explosion. Her windows were shattered and a score of her passengers were cut by fragments of flying glass.

## IS A MIGHTY GOOD PLACE TO RUSH CAN

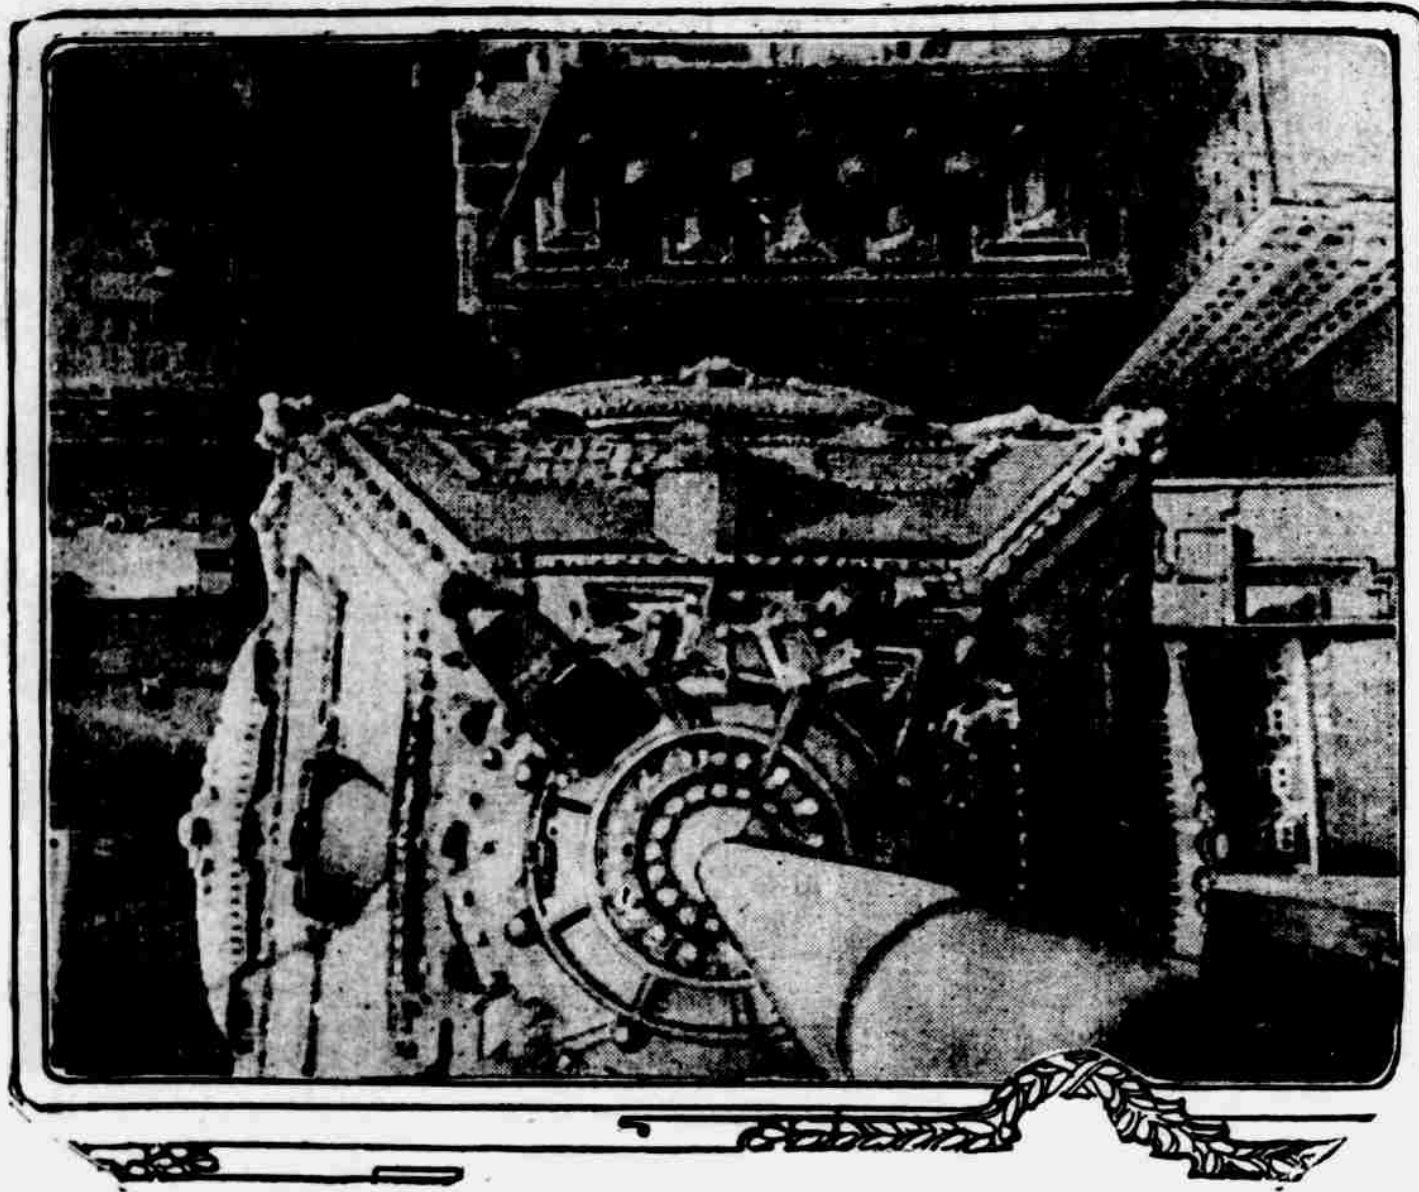

(American News Service)

Milwaukee, Wis., Feb. 2.—A record-breaking attendance is expected at the annual convention of the National Canners' Association to be held in this city next week. In connection with the convention the Machinery Supplies Association will join in the several sessions. The organization work of the canners and allied industries during the past year has made great progress and the approaching convention promises to be the most important as well as the largest in the history of the canning industry in America.

## A Birdseye View of Skyscrapers of Cotham

These immense structures of steel, concrete and brick trembled in the fury of the dynamite blast at Jersey City yesterday. Had all of the dynamite been exploded, it was discovered today, probably the greater part of the metropolis would have been demolished.

## NOT ENOUGH WATER USED BY DOCTORS

In Treatment of Various Cases an Expert Tells Local Physicians.

That a proper diet is a cure for many diseases and massaging equally beneficial in the treatment of several of the abdominal ailments, and that water is not used frequently enough by the general practitioner were points made by Dr. Otto Juettner of Cincinnati, in his lecture on the subject, "Physical Therapy in the Hands of the General Practitioner," at the Wayne county medical society meeting in the Commercial Club rooms on Wednesday afternoon.

Much discussion was created by the paper and many questions were put to Dr. Juettner by the forty-two physicians who attended the meeting, it being one of the largest attended in several months. Some agreed and some disagreed with what was stated, but generally the members of the society were in perfect sympathy with Dr. Juettner's treatment of the subject.

Diseases Needing Diet.

Such diseases as rheumatism, dyspepsia, gout, neurasthenia, diabetes and others are those in which recovery is more probable with a proper diet. Massaging he has found to be beneficial in the treatment of auto-intoxication, sciatic rheumatism and many others. He explained fully the manner of massaging and listed diets which might be used. In the treatment of many diseases water was declared to be essential and not one in physicians resorted to it frequently enough or in sufficient quantities. He also discussed the use of electricity and declared that the faradic current was more beneficial than the static current, in his judgment.

Dr. Charles S. Bond had an interesting paper on the recent discovery of an electrical instrument which is used in measuring the heart action and which has not only greatly increased the knowledge of the medical profession, but gives promise of even further discoveries. The machine is the invention of a French scientist and the one which was seen in action by Dr. Bond was brought to Johns Hopkins university, Baltimore, at the expense of several thousands of dollars. There are only a few in the United States.

## BARNARD FOR TAFT

He Will Support the Canadian Treaty.

(American News Service)

Washington, Feb. 2.—Indiana Democratic representatives caucused today and voted unanimously to support the president's Canadian reciprocity program. The two Indiana Republican congressmen will also support it. Crumpacker favored the Taft plan from the outset. Barnard was inclined to oppose it at first, but is reported today to have come out in support of the president's plan.

## MOTHERS MEET

(American News Service)

Atlanta, Ga., Feb. 2.—Mrs. Frederick Schoff of Philadelphia, president of the National Congress of Mothers, is in Atlanta the guest of honor at the third annual meeting of the Georgia Congress of Mothers, which assembled today for a three days' session.

## DIVORCED HUBBY MEETS HER FINE

After Disconsolate Woman Had Used Walls of Cell as Punching Bag.

After passionately beating the walls of a cell at the city jail with her fists during the entire morning, Marie Goodman, fined \$5 and costs in police court on an affidavit charging prostitution was released late this afternoon when Max Johnson, her divorced husband, paid the fine.

Upon being released the woman learned that her six year old girl had been taken to the home for the friendless, the police believing that she is not a fit person to care for the little girl.

She had been praying, cursing and calling on the spirit of her dead mother to release her from the cell, but when she heard that the child was to be taken from her she almost fought to get back in jail.

"I've lost all my friends and my children are to be torn from me," she wailed bitterly. "Let me die; there's nothing to live for."

The woman lives at 720 North D street, in a dingy flat, with Johnson, her divorced husband, and Ralph Goodwin, her present husband. She has been in police court before.

An attempt was made to prevent Patrolman Lawler from taking the child when he went to the house this morning, but after some argument and force he was able to carry it from the house. It is understood that other charges will be filed against the woman and her husband by Prosecutor Charles Ladd.

## SPECIAL FINDINGS FOR JUDGE ENGLE

Attorneys on both sides of the case of Stella Oler of Dublin against the Pennsylvania railroad company to enjoin the latter from vacating streets in Dublin, will prepare special findings and conclusions. These will be submitted to special Judge James S. Engle, of Randolph county, who presides in the case. His decision probably will not be announced for some time. Oral arguments were made on Wednesday in the circuit court.

## IMMUNITY BATHS TO DANVILLE BRIBERS

(American News Service)

Danville, Ill., Feb. 2.—It was announced today that the grand jury was ready to vote approximately fifty indictments against vote sellers in Vermillion county as a result of the two weeks' investigation in progress here. With the immunity bath granted by Judge Kimbrough for the bribers, it is believed all the vote sellers will be named and indicted. City Attorney Jones was the first to take advantage of the immunity.

## WOMAN ANSWERED CALL AND WAS SHOT

(American News Service)

Flint, Mich., Feb. 2.—Mrs. Nellie Bane, boarding house keeper, was called to the door and shot dead and her sister Mrs. John Talbot, wounded in the arm this morning by a man whom Mrs. Talbot declared was Frank Fox, brother-in-law of Mrs. Bane. The motive is unknown. The assailant disappeared.

## CONTRACT AWARDS WERE MADE TODAY

They Call for Municipal Improvements that Will Cost \$15,500.

Contracts for public improvements amounting to nearly \$15,500 were awarded at the meeting of the board of works this morning. The board chamber was a busy place at ten o'clock when the bids were opened, as ten contractors from Indiana, Ohio and Kentucky towns, who had entered figures were present.

The plums given out were as follows: Improvement of South F street from Eleventh to Thirteenth streets, grading and graveling the roadway, construction of cement sidewalks, curb and gutter on both sides, awarded to A. F. Hooten & Co., of Greenville, \$2,981.12. North Seventh street from Main to Ft. Wayne avenue, cement sidewalks, awarded to Schneider Brothers of Richmond, approximate estimate, \$2,050. North Fifth street, Main to North D street, cement sidewalk, curb and gutter, awarded to Daniel Burkhardt, Richmond, approximate estimate, \$4,250. Construction of lateral sewer from Chestnut street, to the Indianapolis division of the Pennsylvania railroad, awarded to Philip Hipskind & Co., of Wabash, Ind., approximate estimate, \$4,250.

All Bids Were Close.

Hipskind bid \$2 below his nearest competitor. All the bidding in fact was close. A difference of only a few cents was shown in the Seventh and Fifth street improvements. The improvement of South Second street from Main to South A streets, with cement curb and gutter on both sides, and sidewalk on the west side, which was held over from Monday's meeting was awarded this morning to Daniel Burkhardt. Burkhardt was the second lowest bidder, but the estimate of Schneider Brothers, who had a low figure was provisional and therefore thrown out.

The large number of bidders came as a pleasant surprise to the board as on the last few improvements the bidding has been rather light. An interesting session is expected Monday morning, February 13, when the contract for the big addition to the north-west sewer system will be let at a probable cost of \$12,000. This sewer extends west of Ridge and north of Linden avenue, extending to School street. It is understood there will be a half dozen bidders.

A List of Bidders.

The following contractors bid on work this morning: L. W. Hancock Co., Louisville, Ky.; Goots and Gana, Greenfield, Ind.; Schneider Bros., Richmond; Daniel Burkhardt, Richmond; Coffey Construction company, Huntingburg, Ind.; Hooten & Company, Greenfield; Philip Hipskind & Company, Wabash; L. P. Meredith, Richmond; Hornung & Company, Indianapolis, and A. G. Pugh, Columbus, O.

A resolution to widen North D street at the Ft. Wayne avenue entrance, was approved by the board of works; the board also adopted a resolution for the construction of a cement alley in the first north of A street extending from Seventh to Eighth street. It is understood there will be a remonstrance against the improvement of South Fifteenth street, from Main to E street. The resolution calls for cement sidewalks on both sides of the street and curb and gutter on the west side, from Main to E, and the east side from A to E street.

## ANNUAL BANQUET OF THE Y. M. C. A. A GREAT SUCCESS

Over Two Hundred and Fifty Attended and Toasts of Speakers Followed with Keen Interest.

FUTURE PROSPECTS ARE QUITE BRIGHT

One of Most Interesting Addresses Was Given by Will Lockwood on Conditions in the Far East.

Toasts filled with optimism and joy over the outlook for the future in the Christian and philanthropic work both locally and elsewhere, resplendent with good stories and humor, and containing earnest pleas that the work undertaken in Richmond may be broadened and extended in all directions, captivated the large gathering of business, professional and laboring men who attended the annual banquet of the Y. M. C. A. in the gymnasium of the association building last evening.

And the banquet menu proved equally as captivating. It was served by the members of the Ladies Auxiliary and it "reached home." Speaker after speaker prefaced his remarks by referring to the excellence of the food and service.

A splendid diversified program had been arranged and was carried through without change. Much interest was manifested and the speakers were closely followed, especially when reference was made to the work in this city; suggestions were given for development in different lines, and plans for new features discussed. If the meeting, which was attended by about 250 men, can be taken as a criterion for the interest in the Y. M. C. A. work, it bids fair for that institution, and, as declared last evening, the prospects seem brighter than ever before.

Work Done in China.

Probably the most interesting toast was that on the subject "Changing China," which was responded to by Will W. Lockwood, general secretary of the Y. M. C. A. in Shanghai, China, who is in this country for a short time assisting in a canvass for funds for increasing the association work in the Celestial empire.

One of the greatest results in working out a difficult local situation, said Mr. Lockwood, is that the solution will serve in similar situations the world over. He said that in the development of the Y. M. C. A. work in Indiana to better state conditions, China had been benefited immeasurably by the men who had been educated in the work here and had then gone to that country for their field of labor. Among them were Clinton, who was among the first to establish a Y. M. C. A. in China; Vernon W. Helms, who followed the army of Japan across Manchuria working with the soldiers along association lines and who was afterward rewarded by the Emperor and Empress; Robertson, of Purdue university, who in his work as an engineer has found time to lecture extensively; and Elliott, of Earlham, who is now engaged in the Y. M. C. A. at Kan Tong.

Now Has a Future.

Mr. Lockwood said that in the seven years he had been in China, that country had undergone the most remarkable change; that where it used to be only a land with a past, it is now a country with a future, undergoing the most sweeping reforms and making lightning progress, industrial, socially, and morally. Mr. Lockwood called attention to the movement undertaken to wipe out every vestige of opium in 10 years, declaring that the country in general was behind the project and that the only party in existence was the one which calls for the absolute abolition of the opium business.

He said that by the end of this year it was hoped to have an entire parliamentary government fashioned after that of Great Britain in force. A senate and provincial assemblies are now in existence.

Mr. Lockwood said that the Y. M. C. A. was playing its part in the development of China, that it was one of the greatest agencies in helping the country to break away from its old forms, and urged that the movement be assisted by the people in this country.

Address by Foulke.

William Dudley Foulke, of this city, who was assigned the subject, "A Human Heart," by Toastmaster E. M. Haas, seemed to express the sentiment of the entire body of banqueters, when in referring to the financial report declared, "this organization must not fail."

Mr. Foulke was in a happy mood and for a while delighted his hearers with a few remarks about the feelings with which he had regarding several

## SHE IS THIRD WIFE OF LAWRENCE PHIPPS

Miss Margaret Rogers, daughter of former Mayor Platt Rogers of Denver who recently became the third wife of Lawrence C. Phipps, the millionaire steel manufacturer of Pittsburgh and Denver.

Mr. Phipps gained country wide notoriety in 1904 when he kidnapped his two little daughters, Dorothy and Helen from a New York hotel where they were staying with his divorced wife Genevieve Chandler and held them for weeks in defiance of the law. The matter was finally patched up and the children were returned to their mother with the understanding that he was to share in their custody.

The little girls, though residing with their mother, attended the wedding of their father and Miss Rogers. Mr. Phipps has two other children by his first wife who died some years ago. The Phipps are now in California on their honeymoon.

## BEVERIDGE IS AID

Taft Turns to Him to Carry Out Reciprocity Plan.

(American News Service)

Washington, Feb. 2.—Senator Beveridge had a conference with President Taft last night and again today senate with respect to the Canadian reciprocity and tariff board bills.

President Taft is much concerned over the obstructive tactics of the "standpatters." With only four weeks, practically of the session remaining President Taft realizes the power in the hands of the "standpatters" if they care to use it to obstruct and defeat his legislative policies and he has turned to Senator Beveridge and other progressives to help put through the progressive legislative program.

## LOVE SICK MAN SUICIDE VICTIM

(American News Service)

Toledo, Feb. 2.—With the picture of his sweetheart in one hand and a revolver in the other, Samuel J. Williams aged twenty-five of Columbus, was found dead in his bed at the Isenberg hotel this morning. Notes he left indicate that he had been disappointed in love.

## 2 KILLED AND 15 INJURED IN WRECK

(American News Service)

Memphis, Feb. 2.—Benj. Jenkins of Chattanooga and William Billings of New York were killed and fifteen others injured in a Southern Railway wreck at Lime Rock, Alabama, early yesterday morning. Train wreckers are suspected. The entire train except the engine, was turned over.

## LABOR PROTESTS

(American News Service)

Denver, Colo., Feb. 2.—Organized labor of Denver and vicinity joined today in a great parade and mass meeting as a mark of protest against the action of Judge Whitford in sending some of the striking coal miners at Lafayette to jail for violating an injunction issued by the court.

## THE WEATHER

STATE AND LOCAL—Fair tonight and Friday. Much colder tonight.

## PROCTOR LIQUOR REGULATION ACT NOW CONSIDERED

Senate Today Tacks on an Amendment Providing One Saloon to Each 500, and a Sliding Scale.

TWO VIOLATIONS OF LAW LOSE LICENSE

Amendment Also Passed that Saloonists Cannot Receive Any Assistance from the Breweries.

(Palladium Special)

Indianapolis, Feb. 2.—Facing the task of patching up the remaining five sixths of the thirty-sectioned Proctor liquor restrictive measure, and with one whole afternoon spent in whitening into shape the first five sections the senate began to realize the enormity of its undertaking when it resumed the special order of business Thursday morning.

Turning their backs upon four amendments tucked away, upon a victory for all present-licensed saloons which will permit them to continue in business even if their number exceeds the limitations of the act, and upon the defeat of an amendment to prevent breweries from owning property on which saloons are situated, the members of the senate Thursday jumped again into the puzzle of fixing the number of saloons per unit of population and the size of that unit.

A get-together proposal made informally at the close of the session Wednesday, for a limitation of one saloon to the first 500 people in a township, one for each succeeding thousand people was offered as an amendment Thursday and was adopted.

The Unit Butters. The two clean-cut amendments, one allowing one saloon for each 500 population from the beginning of the count upwards, and the other allowing one saloon to each 1,000 population, were considered. The former was presented Wednesday by Senator Higgins and the latter by Senator Kimmel. It was argued the 500 unit would not be restrictive, and the 1,000 unit would prevent communities less than that size from having a saloon when they desire it. Proctor, the author was the senator who moved to table both of these amendments, thereby setting himself awry with the two main plans which have been talked from the first. But he had a reason in the arguments stated.

The Higgins amendment was tabled Wednesday by a vote of 36 to 10. Proctor's motion to table the Kimmel amendment, however, was lost by 27 to 19, this being the first rebuff administered to the author of the bill. Proctor has held for the 1,000 unit all along and it was a surprise when he proposed to table it, but he explained he would not want to deprive townships of small population of their thirst parlor if they desired them.

In the session two years ago a bill in the session two years ago a bill in exact opposite of this stand. He then introduced a bill making it prohibitive to sell liquor anywhere outside cities and towns. It passed the house and was killed in the senate. Senator Proctor freely admitted fathering the bill which was the antithesis of his present attitude; but merely cited it as an example of the change of public sentiment and a change in the

(Continued on Page Eight)
